No. 4–13	Coastal ships only used for loading wire rod, angle bar, etc. and discharging materials.

CRANES: See "Berthing".

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO-HANDLING FACILITIES: See "Berthing".

BRIDGES: None.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

Average loading rates:	Coils 75 t.p.h.
	Plates 50–60 t.p.h.
	Pipes 40 t.p.h.
	Angle 40 t.p.h.
	Wire rods 15–25 t.p.h.
Average discharging rates:	Coal 700 t.p.h.
	Iron ore 750–800 t.p.h. 1,500–1,600 t.p.h. (2,500 ton unloader)
	Manganese ore 600 t.p.h.
	Iron sand 900 t.p.h.
	Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.

TANKERS: Only coastal tankers.

DENSITY: 1021-1025.

FRESH WATER: Available from shore line. Rate of delivery 40-50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay. Bunkers will be lightered from the nearest bunker stock ports at max. 7 days' prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches except steel hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CARGO GEAR: Usually load/unload by shore cranes.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRYDOCKS: 500,000 d.w.t. drydock at Chiba.

SURVEYORS: Nippon K.K.K., Kimitsu Branch.

REPATRIATION: Possible.

AIRPORT: Narita (Tokyo) International Airport is about 2 hours by car or railway.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: No cargo loaded on January 1st. Cargo discharged on all holidays.

POLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438-23-4011; Kisarazu Fire Brigade and Fire Station tel. 0438-23-7121.

TELEPHONES: No telephones installation direct to vessels alongside wharf.

SERVICES: Provisions, laundry, ship's stores, garbage, hold cleaning, navigation aids. Special service are called from Chiba, Yokohama and Tokyo.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

IDENTIFICATION CARDS: Shore Pass and Seaman's Book required.

REGULATIONS: See "General".

GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large vessel (over 200 m. in LOA and 10,000 g.w.t.) is required to give to Regional Maritime Safety Agency an advance report of estimated time passing the traffic route and other matters and also required to obey the instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the day prior to entering, directly from Master or through local Agent. Any change in reported matters, to be reported 3 hours before the time of entering by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.

2. Proceeding to the cultivation area is prohibited.

3. Numerous buoys each exhibiting flashing yellow lights have been established to mark the outer side-line of the seaweed cultivation area.

4. Bunkering possible daytime only (sunrise to 1 hour before sunset) in the port of Kimitsu.

AUTHORITY: Kisarazu Port Administration Office, 13-34, Kaifuchi 3-chome, Kisarazu City, Chiba Pref. *Tel:* (0438) 36-4455.

AGENT: Sub-agents of Dodwell & Co. Ltd. Toyko. Chiba Kaiun Sangyo Co. Ltd., Kimitsu Office, c/o Kaiun Centre Kimitsu Works of Nippon Steel Corporation, No. 1, Kimitsu, Kimitsu-shi, Chiba-ken. Tel: Kimitsu (04395) 2-0800. Cable Address: Chibamarine Kisarazu.

KOBE: 34.40 N. 135.12 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
1 Store List.
1 Declaration of Crew's Baggage.
4 Crew Lists.
4 Passenger Lists (if any).

Ship's Agents will prepare other documents such as Inward/Outward Declaration, Cargo Manifest, etc., using Japanese Custom's Forms.

PILOTAGE: *Tomogashima Channel Pilot (not compulsory but recommended):* Pilot boards 5–7 miles South of Tomogashima (approximately 34° 10′ N., 135° 00′ E.). Cable address: "Baypilot Kobe". If Bay Pilot is required, please inform them 24 hours prior to vessel's arrival at Tomogashima Pilot Station.

Harbour Pilot: Pilot boards at quarantine anchorage at Wada-Misaki Point. Cable address: "Pilot Kobe". 24 hours' prior notice is required. When vessel moors to buoy, chain cable should be prepared.

ANCHORAGES: Quarantine anchorage: Latitude 34° 38′ N; 34° 38.6′ N. Longitude 135° 10′ E; 135° 11′ E.

All vessels requiring anchorage for awaiting berth, repairs, bunkering, etc., must obtain anchoring position from Harbour Master.

RESTRICTIONS: Quarantine officials are available during daylight hours. Berthing is not permitted after 2130 hrs.

MAX. SIZE:

Name of Berth	*Max. LOA* (m.)	*Max. Safe Draft* (m.)	*Depth at Berth* (m.)
Showa Sangyo	213	10.35	12.60
Tomen Silo	223	10.35	12.40
Zenno Silo	223	10.35	12.20
Kohnan Silo	245	10.71	12.20
Hanshin Silo	210	10.26	11.60

Also see "Tankers".

HEALTH: Quarantine Officials board vessel from daylight to sunset at Quarantine Anchorage.

Radio Pratique is available. Vessels must be in possession of a valid Japanese Sanitary Inspection Certificate.

Documents Required: Derat Exemption Certificate, Crew List, Passenger List, Maritime Declaration of Health and Vaccination Cards.

RADIO: Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radios respectively.

Kobe-Radio details:

	Security and Port message	*Port message*	*Public message*
Call sign	JGD	Kobe Port Radio	JCK
Name of Station	Coast Station or Special Service Station	Kobe Port Radio	Kobe Radio
Station Owner	5th Regional Maritime Safety Headquarters	Kobe Municipality (its Port & Telegraph Harbour Bureau)	Kobe Central Office
Frequency	444 kHz. 500 kHz. 500 kHz. 512 kHz. International VHF Channels 12, 16	International VHF Channels 16, 12, 11, 18, 20. 24-hour service.	134.9 kHz. 143 kHz. 416.5 kHz. 487.5 kHz. 500 kHz. 512 kHz. 425 kHz.

TUGS: Join vessel at entrance of fairway. Tug's lines used without extra charge. 40 tugs available.

BERTHING: Chains must be used in mooring to a buoy. Ship must not drop anchor near a buoy when it is moored to one. Ship brought head in alongside pier except in special cases. Some berths impossible to reach after sunset. Example: dolphin berths. This is why ships need to arrive outside breakwater before sunset.

See tables on pages 776 and 777.

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 11.60 m. depth alongside available for vessels up to 50,000 tons d.w.t. Discharge effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kobe Silo Berth, length 752 ft., depth alongside 41 ft. 2 mobile discharging units each with capacity of 500 t.p.h.

Kohan Silo Berth, length 214 m., depth alongside 12.2 m. equipped with 2 discharging units which can be used for grain, sugar, or general cargo, also 1 pnuematic unloader, with capacity 1,500 t.p.h. per unit.

Kobe Steel, Berth No. 3: Length 334 m., depth 13.0 m., max. LOA 300 m., beam 40.0 m., draft 12.5 m. 2 cranes available for coal and ore. Discharge rate 1,400 tonnes/p.h.

In the current development programme a total of 7 container berths are to be provided at Kobe.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS:

The Port Island receives bunker oil from tankers into the terminal and delivers Intermediate 15 and MDO by pipe-line to vessels moored at Kobe Port Island. This berth is equipped with loading arms and utilises a boom completely surrounding the discharging tanker to prevent the spread of any oil spill.

Storage facilities consist of 3 tanks of 36,000 kl (226 mb) for Intermediate 15 and 2 tanks of 5,000 kl (31 mb) for MDO.

Pumping facilities consist of 3 pumps of 700 kl/hour (4,400 b.p.h.) capacity for Intermediate 15 and 2 pumps of 200 kl/hour (1,258 b.p.h.) capacity for MDO.

Special features include an automatic control system from a central control board, remote valve operation, remote tank gauges, communication equipment at each bunkering berth, flow meters for all deliveries, a chemical fire engine, a crane and a lorry for recovery of waste oil.

The terminal is open between 0900 and 1700 hrs. and availability at other times involves overtime.

Name of Berth	*Max. d.w.t. (approx.)*	*Max. LOA (m.)*	*Max. safe Draft (m.)*	*Mooring–Pipeline–discharging rate*
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250	12.6	To 4 buoys. 1×24″, 1×12″ for F.O., D.O. Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 (breadth 33)	11.20	To 3 buoys. 2×16″ for F.O. and D.O. Average discharge rate 1,000 t.p.h. Max. 1,300 t.p.h. mooring possible when tide runs towards West)
Mitsubishi Shoji (for L.P.G. tankers). Bunkers available ex-wharf; ex-barge at anchorage. No slop discharge facilities. Also see "Shipmasters Report".	45,000	240 m.	10.35 m.	Alongside Pier. 2×12″ for F.O. and 1×12″ for D.O. Average discharge 800 t.p.h. per pipe. Max. 2,000 t.p.h.
Port Island Oil Berth	70,000	240 m.	10.98 m.	2×16″ for Fuel oil. Average discharge rate 2,000 t.p.h. Max. 3,500 t.p.h.

TIDE: Mean height of tide 1.030 m. Some of tanker berths in West part of port affected by tide. Currents less than 1 knot inside harbour.

DENSITY: Winter: 1023 – 1026. Summer: 1018 – 1022.

FRESH WATER: Supplied from the quays at rates of 40 to 50 cu.m./hr. Three water barges available, largest with capacity 325 cu.m., can supply vessels at rates up to 300 cu.m./hr.

Possible to supply fresh water at anchorage weather permitting. 24 hours' prior notice is required.

FUEL: All grades are obtainable from major oil companies and supplied by barge.

FIRE PRECAUTIONS: LPG tankers instructed by Maritime Safety Headquarters to strictly observe safety rules. Example: checking on what is carried by those who go aboard; banning ship's stores to be loaded on to ship which is working.

WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By Stevedores or crew, ship's option.

CERTIFICATES: Ship's Register to show Customs Inspector for registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew member). Temporary shore-leave up to 50 cigarettes (duty free); Disembarkation up to 200 cigarettes (duty free). Maximum allowable (only in case of disembarkation) up to 800 cigarettes duty free (however, 600 cigarettes – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for more than 1 month, up to 6 bottles (1 bottle – duty free); less than 1 month up to 6 bottles (no duty free). Passengers: When a passenger travels for less than a fortnight up to 12 bottles (1 bottle – duty free); more than a fortnight up to 12 bottles (up to 3 bottles – duty free).

SURVEYORS: Lloyd's Register, Germanischer Lloyd, American Bureau of Shipping, Bureau Veritas, Norske Veritas, Nippon Kaiji Kyokai.
REPATRIATION: Possible.
AIRPORT: Osaka International Airport. Distance from Airport about 1 hour by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Air Lines, Nihon Kokunai Koku, Toa Koku.

International: For Far East: Japan Air Lines 31 flights per a week, Thai International Air Lines 10 flights per a week, Cathay Pacific Air Lines 8 flights per a week, China Air Lines 11 flights per a week, Korean Air Lines 12 flights per a week, North-West Air Lines 7 flights per a week.

For Europe: Lufthansa 1 flight per week, British Airways 3 flights per week, Air France 2 flights per week.

For United States: Japan Air Lines 12 flights per week, Pan American 3 flights per week.

TIME: GMT plus 9 hours. No alteration to clocks throughout year.
HOLIDAYS: 1st January (New Year's Day); 15th January (Coming-of-Age Day); 11th February (National Founding Day); 21st March (Spring Equinox Day); 29th April (The Emperor's Birthday); 3rd May (The Constitution Day); 5th May (Children's Day); 15th September (Respect for the Aged Day); 23rd September (Autumn Equinox Day); 10th October (Health Sports Day); 3rd November (Culture Day); 23rd November (Labour Thanksgiving Day).
POLICE/AMBULANCE/FIRE: *Police:* 110; Water Police Station tel. 331–2351, 331–2354, Ikuta Police Station 331–0044, Fukiai Police Station 231–4441, Hyogo Police Station 551–0051.

Ambulance: 119.

Fire: 119; Water Fire Department 331–9951, Fukiai Fire Department 291–0401.

TELEPHONES: Possible to place telephone on board.
SERVICES: Compass adjusting, radio/radar services, etc.
GENERAL: When typhoon approaching, Port Captain requires ships to proceed outside breakwater.
SHORE LEAVE: Crew members free to go ashore with landing passes issued by Immigration Authorities.
DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.
DEVELOPMENTS: Rokko Island is now under construction to the East of Port Island and expected to complete in 1985.

4×55 tonnes container cranes under construction for Sealand.

SHIPMASTER'S REPORT: February 1980.
Sakai to Kobe:
Transit: For LPG ships this can only be accomplished in daylight.
Pilots: In normal conditions Sakai Pilot will depart at about No.5 buoys Hamadera Passage and vessel proceed to Kobe No.6 breakwater embarking Pilot at No.3 buoy. In weather with poor visibility take 'Bay' Pilot, no movements with visibility less than 1 mile.
Kobe:
Pilot: For vessels proceeding to Mitsubishi Storage Terminal, Pilot is embarked at No.3 buoy and leaves at same.
VHF: Kobe Port Radio.
N.O.R.: 1st Line ashore.
Tugs: Two powerful tugs join vessel just inside No.7 breakwater. Cost of one tug Yen 48,000 per hour.
Surveyor: NKKK in attendance.
Microbus: We hire microbus for 20 persons on contract hire for 9 hours at Yen 70,000 – about £125. Easy to arrange through Agent.
Doctor: Obtainable, about £40 per visit.
Terminal:
Moorings: 3,2,2, each end, Line boat available.
Tanker type jetty with mooring dolphins each end connected by catwalks.
Berth situated West end of No.2 Industrial area.
Port side to.
Gangway can be difficult to land on narrow catwalk.
No transport near ship, about 5 minutes walk to gate.
Depth: 12.50 m.
Connections: Chicksans: 12 in. liquid, 8 in. vapour return. The forward vapour return line has a right angle elbow in it. Connection and disconnection by shore personnel, can take 1.5 to 2 hours.

Quite often a vapour mixture is returned to the vessel if discharging two grades, generally acceptable if propane and butane.
Max. Rate: About 700 tonnes/p.h. both grades.
Fresh Water: From the pier through Mitsubishi – will only give what Master has ordered. At 20 t.p.h. Difficult to connect American couplings. Yen 500 per tonne.
Stores: Nil on berth.
Facilities: All repairs off berth.

Walport Film and Video exchange through Agent.
Safety: Normal requirements plus fire axes each end at moorings.
Anchorage: Outside Kobe Breakwaters in areas marked on Japanese Chart. We anchored in Lima 3 area, very congested.

Best to obtain up to date Japanese Hydrographic Office Charts of Kobe and Osaka Bay as frequent changes, also BA. charts do not have incidentals like anchorage areas, Tomogashima traffic routes, lava beds, etc.
General: As usual the shore line is continually changing and care is required in taking positions.

BA. 2265: Kobe Ko. New breakwater marked by temporary light buoys from Breakwater No. 6 in position 34° 39.99′ N., 135° 14.86′ E. to 34° 39.63′ N., 135° 15.19′ E. in direction 324° – 144° for 830 m.

BA. 3614: Osaka Bay. New Osaka International Airport Buoy 34° 26.9′ N., 135° 16.15′ E. in a Southerly direction for 3.5 miles and Westerly direction for 2.5 miles with causeway to shore in approx. position 34° 24.5′ N., 135° 18.2′ E. Many barges crossing from Awaji Shima.

Also see "SAKAI" – "Shipmaster's Report" – Kobe was 2nd Port of Call.

AUTHORITY: Port and Harbour Bureau, Kobe City Government, 5-1 Kano-Cho, 6 Chome, Chuo-Ku, Kobe, 650 Japan. *Tel:* 078-331-8181. *Telex:* 78548 Kobeport. *Cables:* Japangate. *Contact:* Promotion Division.
AGENT: Dodwell Tramp Agencies, P.O.Box 557 Kobe Port, Kobe Meiji Seimei Building 3–7, Isogami-dori 8-chome Fukiai-ku, Kobe. Tel. (078) 251-0021. Cable Address: Dodtramp Kobe. International Telex J 78826.

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko")
(See Plan Book)

Kokura situated between Moji and Tobata. On the East is contiguous to Moji Port, on the West to Tobata Port and on the North it opens to the Kanmon Straits.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Anchorage not in use as the area is being dredged for the purpose of navigation fairway.
RESTRICTIONS: Vessel enters port only within 1 hour before and after slack tide in daytime. No night departure.

MAX. SIZE: See "Berthing".
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.
TUGS: See "Moji".

*2 cranes – capacity 1,000 t.p.h. each.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

(a) Max. 6 gangs are available.
Stevedores, regular employees 116, temporary labourers 109. Longshoremen 459.

(b) Lighters: Kokura Marine Transportation Co., lighters 25, tonnage 8,900 tons.

(c) Shore crane:

No.	*Capacity*		*Location*	*Owners*
2	10 tons		Sunatsu Wharf	Sumitomo Metal
1	6 tons		,,	Kokura Marine
3	12 tons	outreach 18 m.	Sumitomo Metal Wharf	Sumitomo Metal
3	35 tons		Hiagari Wharves Nos. 6 and 7	Shin Nihon Steel Corp.

(d) Floating crane: arrangeable from Moji.

(e) Average performance of loading/discharging:
Discharging: Iron ore 40/50 t.p.h./gang/hatch (by ship's gear). 200 t.p.h./gang/hatch (by shore crane). Coal 40/50 t.p.h./gang/hatch (by ship's gear). 100/150 t.p.h./gang/hatch (by shore cranes). Scrap steel, pressed 20 t.p.h./gang/hatch (by ship's gear). Ordinary 10 t.p.h./gang/hatch (by ship's gear). Bulky 5 t.p.h./gang/hatch (by ship's gear). Loading: Steel under 20 ft. long 25–30 t.p.h./gang/hatch, over 20 ft. long 15–20 t.p.h./gang/hatch.

(f) 2 shifts: 0800 to 1700 hrs. and 1700 to 0700 hrs. Normal working hours: 0800 to 1700 hrs. Refer to Moji for further information.
TANKERS: Also see "Berthing". At Kanematsu-Goshi Oil Refinery 1×6 in. line, rate 900 t.p.h. (Fuel/diesel oil). No slop facilities available.
DENSITY: 1025.
FRESH WATER: From hydrants at Sunatsu and Sumitomo Metal wharves, the rate of delivery per hour: 30 tons per hydrant. Also delivered by barge.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days' prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Moji".
REPAIRS: See "Moji".
AIRPORT: All Nippon Airways, Kitakyushu, about 30 minutes by taxi from Kokura Station to airport. Japan Air Lines, Fukuoka, and Cathay Pacific Air Lines, Fukuoka, about 1.5 hours by train and taxi from Kokura station to airport.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 56-7171; Ambulance 119; Fire 92-4831.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
SHIPMASTER'S REPORT: 1975, Vessel discharged iron ore at Sumitomo Metal Industries.
Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
Arriving from West. Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 53′ 00″ E.
Anchorage:
He Saki: Lat. 33° 56.2′ N., Long. 131° 02.9′ E. Depth 11.4 m.
Mutsure: Lat. 34° 00.0′ N., Long. 130° 52.5′ E. Depth 19.0 m.
Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.
Normally Pilot boarding 1 hour before tide change. Allowable drafts to transit Kanmon Straits max. 30 ft. anytime. Max. 32 ft. 10 in. at HW.
Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Smallpox Certificates valid. Send cable to Agent with prefix RPM following the standard text.
Docking: Always starboard side.
Anchor: Port anchor ready for emergency.
Fenders: Prismatic rubber.
Gangway: Ship's accomodation ladder.
Discharging Facilities: 3 cranes – capacity 180 t.p.h. each.
Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.
Under construction 2 unloaders, cantilever bridge type, with capacity of 1200 t.p.h. each.

AUTHORITY: Kita Kyushu Port Authority, 2-7, Nishi Kaigan 1-chome, Moji-ku, Kita-Kyushu City, Fukuoka Pref. *Tel:* (093) 331-1331.
AGENT: See "Moji".

KOMATSUSHIMA: 34.00 N. 134.36 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.
ANCHORAGES: Situated at Western corner of Komatsushima Bay and port protected by three breakwaters, North, East and South covering 396,700 sq. m. Depths of water at anchorages as follows:
(a) Inside Breakwater 8 m. – 10 m.
(b) Outside Breakwater 8 m. – 13 m.
(c) Wharf 8.50 m.
RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner Harbour: Entering and sailing usually only during day-time regardless tide and current. Outer Harbour: Entry and sailing anytime.
MAX. SIZE: Anchorage inside breakwater: length no limit, breadth no limit, draft 8.60 m.
Anchorage outside breakwater: length no limit, breadth no limit, draft 8.60 m.
Wharf. (Suitable 10,000 d.w.t.). length 175 m., breadth no limit, depth 9 m.
Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length no limit. Draft 10 m. after dredging.
HEALTH: Pratique to be obtained at Shimotsu prior arrival Komatsushima. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Wharf and Inner Harbour: Join vessel at Sea Anchorage, always using tug's line without charge. Outer Harbour: no tug required in normal conditions.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning special additional; Sundays/holidays 100% additional.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by telegram.

KUDAMATSU: 34.00 N. 131.52 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Kudamatsu loading anchorage Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E.

RESTRICTIONS: No restriction for entry into and/or departure from anchorage during night and daytime. But berthing/unberthing effected during daytime only.

MAX. SIZE: No restriction on length, breadth, and draft for any vessel entering port, but maximum safe draft for Nippon Oil Jetty 19 m., 178,000 d.w.t, Hitachi Seisakusho 9.5 m. and Toyo Kohan Wharf 11 m.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival at Quarantine Anchorage (Lat. 33° 56′ N., Long. 131° 51′ 30″ W.):

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel proceeding to Nippon Oil Refinery Wharf at Lat. 33° 58′ 20″ N., Long 131° 53′ 30″ E. and proceeding to Toyo Kohan Wharf at Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E. Tug's line used and charges for line's use is included in tug-boat operation charge. 8 tugs available, 2,000 h.p. – 4,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

	LOA (m.)	*Depth (m.)*	*Capacity (g.r.t.)*	*Cargo*
Hitachi Wharf	175	9.5	12,000	Plant/Carrier

1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki/Choshi Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits) Position 34° 34.09′ N., 135° 11′ E. Telegraphic Address: Anjin Kobe.

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transiting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Mutsure, at West Entrance of Kanmon (Shimonoseki) Strait, Position: 33° 59′ N., 130° 53′ E. Telegraphic address "Anjin Moji".

Note: VHF communication with pilot stations available as follows:

Name of Station	*Call/Answer Channel:*	*Communication Channel:*	*Working:*
KOBE Port Radio (For Wadamsaki)	Channel 16	Channel 12	24 hours
SHIMONOSEKI Port Radio (For Mutsure)	Channel 16	Channel 14	24 hours
OITA Port Radio (For Sekisaki)	Channel 16	Channel 14	24 hours

Also see "Shipmaster's Report" before first port.

ANCHORAGES:	*Minimum Depth*	*Minimum bottom width*	*Density of water*	*Nature of bottom*
Entrance Channel	20 m.	No limit	Summer Av. 1020	Sand, mud and rock
Harbour Channel(s)	20 m.	No limit	Winter Av. 1025	Mud and sand

Depths refer to M.W.L. Difference between datum quoted and chart datum: about 2 m. (to be added) Rise of tide: springs 3.4 m. neaps 2.6 m.
Also see "Berthing".
HEALTH: Radio Pratique available. Vessels usually anchor at the quarantine anchorage where the authorities board and grant Free Pratique. Quarantine anchorage (approx. 34° 13′ 45″ N., 132° 31′ 00″ E.)
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound/Eastbound to contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at quarantine anchorage. Tug's lines free of charge.
BERTHING: Harbour/Berthing Pilot available from Quarantine anchorage. Pilots do not agree to berth or unberth outside period from sunrise to sunset, according to their regulations. For berthing, at least 2 hours' advance arrival necessary to reach berth before sunset.

Harbour Anchorage: Following 2 anchorages with good ground (mud & sand) suitable vessels up to 80,000 d.w.t. LOA 300 m.

Name of Anchorage:	*Position:*	*Depth:*
Anchorage "C"	34° 13′ 51″ N., 132° 31′ 29″ E.	20 m.
Anchorage "D"	34° 13′ 29″ N., 132° 31′ 45″ E.	20 m.

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t.)
Showa Municipal Pier	170	9.0	7.0	10,000
Nisshin Steel Works Pier No. 3	270	18.0	18.0 (with Tide)	150,000
Kawaraishi Minami Municipal Pier	370	10.0	9.5	15,000

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. approx. 60% additional of basic stevedorage; 2130–0430 hrs. next morning 130% additional; Sundays/holidays approx. 100% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities.
FRESH WATER: Fresh water by barge:

(a) Hiro Kisen's water barge (on behalf of Kure City, 1 barge only, capacity 330 m/t).
  1. Basic volume of water, per ship per supply:
     50 cu.m. or less ¥35,000
  2. For more than basic volume:
     per 1 cu.m. or less ¥700
  3. No overtime additional required.

(b) Onomichi Water Supply Co's water barge (used in case above barge is unavailable), capacity 400 m.t.
  1. Basic volume of water, per ship per supply:
     200 cu.m or less ¥190,000
  2. For more than basic volume:
     per 1 cu.m or less ¥760
  3. Extra charge for overtime and holiday services:
     at ¥5,000 per hour for supply from 1600 to 0600 hrs.
  4. For Dec. 31 & Jan. 1,2,3,4 & 5: 50% additional.

FUEL: Most grades of domestic oil are available, bonded bunkers will be brought by barges from Iwakuni, Tokuyama, Moji or Kobe with 72 hours' advance notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Hatches usually opened by crew before berthing, however, hatches can be opened by stevedores if arrangements made.
CERTIFICATES: Ship's Register to show Customs Inspector for confirmation of ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS: No consul available at Kure, but marine note of protest can be attested by the local notary public.
REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: Following dry docks are available at I.H.I. Kure Shipyard

No.	*Length*	*Width*	*Depth*	*Capacity*
2	343 m.	65 m.	11.0 m.	up to 400,000 tons
3	510 m.	80 m.	13.5 m.	up to 800,000 tons
4	334 m.	47 m.	17.0 m.	up to 160,000 tons

AIRPORT: Hiroshima airport, distance from Kure approximately 35 km. – 40 km. and about 90 – 120 minutes by car. Only domestic regular airlines available. 6 flights to Tokyo and 2 flights to Kagoshima daily.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119.
TELEPHONES: No arrangements available for placing telephones aboard except special cases.
SERVICES: All navigational apparatus can be serviced as required with minimum 24 hours' advance notice. Cargo hold/Tank cleaning services can be arranged from Kobe area.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for 72 hours only, but 72 hours' extension possible if ship stays longer.
GENERAL: Kure is a local port which makes it difficult to arrange all requirements. At least 72 hours' notice helpful.
AUTHORITY: Port and Harbour Dept. – Kure City, 1-6 Chuo 4-chome, Kure City, Hiroshima Pref. *Tel:* (0823) 25-3336.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Naigai Unyu Co. Ltd., 1-7, 1-chome, Naka-dori, Kure-shi, Hiroshima-Pref. Tel. Kure (0823) 21-5181/7. Cable Address: Naigai Kure or Kurekanyu Naigaiunyu. Telex: 6623-40.

KUSHIRO: 42.58 N. 144.21 E.

DOCUMENTS: Ship's Register. Last Port Clearance. 4 Crew Lists including Passport Numbers. 4 Passenger Lists. 1 Store List. 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wristwatch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No telegraphic address. Previous advance notice, minimum 8 hours' advance notice ETA and any alterations. Contact pilot boat through Harbour Office/tug boats with wireless telephones. Pilot boat has no radio telephone. Pilot boat waits at Quarantine Anchorage (1,000 m. off and 280° from North Breakwater white light), and entrance of breakwater during winter period (December–March).

ANCHORAGE: Bottom sand and mud. Minimum depth 9 m. in passage and 7.5 m. in anchorage. Depth over 29.5 ft. 162,075 sq.m., Section 2; Depth over 24.5 ft. 690,000 sq.m., Section 2 and 3; Depth under 24.5 ft. 393,600 sq.m., Section 3. Tidal range, average high-tide plus 1.533 m., average low-tide plus 0.154 m., average tidal difference plus 0.953 m.

RESTRICTIONS: Vessel allowed to enter and sail day and night. Pilot assistance officially not compulsory but in practice necessary, and Pilot service available sunrise to sunset for entry and up to 2100 hrs. for sailing.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine Station 1,200 m. – 293° off Kushiro Breakwater Red Lighthouse.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Usually join vessel at entrance of breakwater and ship's lines to be used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. All berths limited by depth in entrance channel.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; Sundays/holidays 100% additional; Saturdays 10% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: West Dolphin: 4 berths for 6,000 d.w.t. Hose diameter 10 in., 12 in. and 6 in.

South New Pier – 1 berth for 6,000 d.w.t. Hose-diameter 10 in.×1.

DENSITY: Average 1025 inner breakwater high-tide, and average 1022 low-tide.

FRESH WATER: Direct supply from the wharves or by barge.

FUEL: Domestic oil is available; bonded oil will be brought from Hakodate or Muroran with sufficient advance notice.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None. U.S. Consul located in Sapporo city.

REPAIRS: Ordinary deck, engine and electrical repairs arrangable by the local factory.

DRY DOCKS: None; nearest located in Hakodate and Muroran ports.

REPATRIATION: Possible.

AIRPORT: Kushiro airport about 40 minutes taxi or direct connection bus from port area. Flight service daily, 6 flights for Tokyo and 4 flights for Sapporo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 1st May.

POLICE/AMBULANCE/FIRE: Police HQ 23–7111 or emergency 110; Hospitals Kushiro Grand Hospital 41–6121, Kushiro Red-Cross Hospital 22–7171; Fire HQ 22–2156 or emergency 119.

TELEPHONES: No systems for arranging on board.

SERVICES: Arrangable from Muroran.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 7 days or 15 days, but 5 days' extension possible if ship stays longer.

DEVELOPMENTS: Total of 9 berths including one for up to 40,000 d.w.t. Industrial raw materials carriers will be built and port breakwater will be lengthened by 3,940 m.

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Reports" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat: 33° 56′ 24′ N., Long: 131° 03′ 12″ E.
ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17 m. – 25 m.
RESTRICTIONS: *Oil tanker berth:* Vessel drawing less than 12 m. can moor and unmoor at half-flood during daytime but vessels drawing 12 m. or more advised to await high water.

Dry cargo is logs only and cargo working carried out at anchorage of Umaiso and Yura Bay.

Yura Bay: Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.
MAX. SIZE: *Maruzen Oil Co. Ltd., Matsuyama Refinery, Genyu Sambashi:* Max. 50,000 d.w.t. Max. LOA, 240 m. Max. safe draft 12.00 m.

Umaiso Bay: Length of vessel 160 m.; breadth no limit; draft 15 m.
Yura Bay: Length 110 m.; breadth no limit; draft 10 m.
Also see "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: For tankers: Join vessel at Quarantine anchorage, using tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

General cargo to be loaded/discharged at the following wharves in Matsuyama.

Berth section	*Length*	*Depth*	*Max. size d.w.t.*
Wharf No. 1			
Sect. 1	380 m.	9.5 m.	15,000
Sect. 2	230 m.	5.5 m.	5,000

Imazu Port Wharf: New Wharf for log discharging only in position Lat: 33° 48′ 46.79″ N., Long: 132° 41′ 49.06″ E. Length 320 m. Depth 9.5 m.

Restrictions: Due to tidal condition (strong current) Pilot requires 2 tugs for mooring and unmooring, even if vessel is less than 5,000 g.r.t.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: No advance notice of diameter of load/discharge lines required. See "Max. Size".

Manifold: 1×12 in. (Fuel Oil) 600 t.p.h.; 1×12 in. (Crude Oil); 2,000 t.p.h. 1×12 in. (Diesel Oil) 800 t.p.h.
DENSITY: Anchorage 1015. Berth 1015.
FRESH WATER: *Maruzen Oil Co. Ltd., Matsuyama Refinery, Genyu Sambashi:* Can be supplied by shore line with capacity 25 t.p.h.

Anchorage: Can be supplied by 60 ton barge with capacity 60 t.p.h. Strong winds prevail during Winter months, when no water can be supplied.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice. Also see "Moji, Fuel".
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless ship's crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: Consulates in Kobe.
REPAIRS: Only minor repairs.
DRY DOCKS: None. Nearest at Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima and Mukaishima, dimensions of those docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. Dock No. 1 for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard. Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel 175 m.×29 m.×9 m.
REPATRIATION: Possible.
AIRPORT: Domestic airport situated South of harbour. All Nippon Airways flights to Osaka and Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Only at Kobe.
SHORE LEAVE: Immigration issue shore passes valid for 7 days if vessel only calling at one port in Japan or 15 days if vessel calling at more than 2 ports in Japan, further extension possible.
AUTHORITY: Matsuyama Marine Safety Agency, Kaikan-Dori, Matsuyama, Japan. *Tel:* (0899) 51-1197. *Contact:* Port Captain.
AGENT: See "Niihama".

MIIKE: 33.00 N. 130.23 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 5 Crew Lists including Passport Numbers.
- 2 Passenger Lists.
- 3 Ports of Call Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory; Pilots board at the point Lat. 32° 59′ N., Long. 130° 23′ E.

Shimabara Bay Pilot (Kuchinotsu Pilot) not compulsory. Pilots board one mile South of Huchinotsu Lighthouse, Lat. 32° 35′ N., Long. 130° 12′ E. (Advise ETA Kuchinotsu 48 hrs. prior to arrival.)

Vessel should proceed to Miike anchorage by itself in case of Pilot not being arranged.

ANCHORAGES: Lat. 32° 59′ N., Long. 130° 23′ E. Harbour limit within circle of 2,700 m. radius centring on lighthouse at West end of Northern breakwater. Roadstead affords safe anchorage, mud and sand.

RESTRICTIONS: Vessel shall dock or depart on high water. Ebb stream begins about half an hour before high water and runs to South for 6 hours. Max. current 3 knots at entrance of channel. Flood stream begins at about lowwater time and runs to North for 6 hours max. 3 knots at lighthouse. Channel 1800 m. long, 137 m. broad from jetty to jetty, 45.7 m. width at bottom. 7.3 m. depth at LWOST.

MAX. SIZE: No limitation for breadth and length, but max. drafts are as follows: 29 ft. 6 in. up to 20,000 d.w.t.; 26 ft. 4 in. up to 25,000 d.w.t.; 24 ft. 6 in. up to 30,000 d.w.t.

HEALTH: Formalities will be carried out 2 miles off the lighthouse (Lat. 33° 0′ 8″ N., Long. 130° 23′ 50″ E.). Radio Pratique available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 3 tugs available. 2×1,100 h.p.; 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Draft* (m.)	*Capacity*	*Shore cranes & pipe-lines*
North Quay (No. 6, 7, 8)	520	10.7	8.5	30,000	2×6 tons, 1×10 tons
Dock Pier	114	8.5	8.2	1 × 8,000	
Dock Quay	421	8.5	8.2	2 × 8,000	2 coal loaders
Quay No. 5	91	10.7	10.0	1 × 8,000	1 coal loader
New Quay No. 5	68	10.7	10.0	1 × 6,000	1 coal loader

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: 1025.

FRESH WATER: Available at wharf only. Delivery 20 t.p.h. – 25 t.p.h.

FUEL: Domestic oil is available; Bonded oil will be brought from Moji or Tokuyama, when required.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches (according to charter party). Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears' maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Consuls at Osaka or Tokyo.

REPAIRS: Minor repairs only.

DRY DOCKS: See "Moji".

SURVEYORS: (1) No cargo inspectors available. (2) Lloyd's Register, American Bureau and Bureau Veritas in Miike.

REPATRIATION: Possible.

AIRPORT: See "Moji".

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 15th August, 1st January.

POLICE/AMBULANCE/FIRE: Tel. 110 and 119.

TELEPHONES: Available at agent's office.

STORING: See "Prelims", page viii.
1. By truck.
2. Barge storing only when loading steel products.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks available.
5. If any regulations in force agent will arrange documents.
6. Only a few riggers available. Additional riggers come from Moji or Kobe.

SHORE LEAVE: Local Immigration Offices issue crew permit valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Mitsui Mining Co., Ltd., Miike Port Office, Shinkomachi, Omuta, Fukuoka 836, Japan. *Tel:* (0944) 57-3131. *Contact:* General Manager.

Maritime Safety Agency, No.7 District Agency, Miike Office. *Contact:* Harbour Master or Captain of the Port.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Miike-ko Service Center K.K., 1, Shinko-cho, Omuta-shi, Fukuoka-ken. Cable Address: MSC Omuta; Domestic Telex: 7444-12; Tel: Omuta (0944) 53-3061.

MINAMATA: 32.11 N. 130.21 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the circular arc with a radius of 1,700 m. centred upon Myojin-zaki (Lat: 32° 11′ 59″ N., Long: 130° 22′ 30″ E.), and the line from the point of Myojin-zaki to Tsutsuwa-zaki (32° 10′ 50″ N., 130° 22′ 27″ E.) and the coast.

DOCUMENTS:
- 3 Crew Lists.
- 3 Passenger Lists.
- 1 Manifest.
- 1 Customs.
- 1 Stores List.
- 1 Health Document.
- 1 Bill of Lading.

PILOTAGE: Pilot station Lat: 32° 11′ N., Long: 130° 04′ E. (1 mile South of Toshima-Lighthouse of Ushibuka) (acting also as an Agent for foreign vessels). Senko Co. Ltd., Minamata Branch, located at 2-34 Umedo-Cho 1-chome, Minamata-shi, Kumamoto-ken. Tel: 09666-3-4117. Telex: 764941 Senko J.

ANCHORAGE: Within port limits.

RESTRICTIONS: A Pilot is not available after dark for an outgoing vessel but around-the-clock for incoming vessels. Availability of Pilot is dependent on the tidal conditions.

MAX. SIZE: Max. d.w.t. 40,000 tons at anchorage – Length 190 m., depth 10.5 m. Max. d.w.t.10,000 tons at Hyakken Wharf – Length 130 m., depth 6.5 m. The tidal difference between high and low water (spring tides) is 4.1 m.

HEALTH: All the necessary procedures must be undertaken at the Minamata-Yatsushiro Branch Office of the Nagasaki Quarantine Station.

Radio Pratique available. Quarantine inspection will be carried out in position Lat: 32° 12′ 30″ N., Long: 130° 20′ 40″ E. This position is about 20 minutes by boat from the port.

Quarantine Office Tel: 2-4016.

RADIO: Not available.

VHF: Not available.

TUGS: 3 tugs (200 h.p.) owned by Senko Co. Ltd, Minamata Branch.

BERTHING: Hyakken Wharf: length 210 m., depth 5.5 m. at low tide.

Hyakken New Wharf: length 210 m. depth 6.5 m. Completion March 1985.

CRANES: Not available. A vessel is required to use her own gear alongside the quay.

STEVEDORES: Senko Co. Ltd., Minamata Branch.

MEDICAL: Advise Agent.

FRESH WATER: Available from Hydrant of Hyakken Wharf, rate approx. 150 – 200 t.p.h.

CONSULS: None.

REPAIRS: Only minor repairs possible.

DRY DOCKS: Not available.

SURVEYORS: Will attend from Miike (N.K.K.K.).

GANGWAY/DECK WATCHMEN: Service of watchmen is not necessary.

HATCHES: Opening and closing is done by the stevedores if required.

CUSTOMS: Tel: 2-2347.

REPATRIATION: Minamata Branch Office of the Fukuoka Immigration Office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 100 km. distance), by car. Kagoshima Airport about 60 km. by car.

POLICE/AMBULANCE/FIRE: The Minamata Police Station located at 2-4 Tenjin, Minamata-shi, Kumamoto-ken. Tel: 09666-3-2171.

The Minamata Head Station of the Minamata Fire Department located at 523, Jinnai-Kitazono, Minamata-shi, Kumamoto-ken. Tel: 09666-3-1191.

TELEPHONES: There are no arrangements for placing telephones on board.

SHORE LEAVE: Shore passes are issued at the Minamata Branch Office of the Fukuoka Immigration Office.

DELAYS: An incoming foreign vessel is to be given priority, but delays will be expected when the quay is occupied by vessels.

DEVELOPMENTS: Hyakken New Wharf (6.5 m.) to be completed March 1985.

Hyakken New Wharves (7.5 m. and 10 m. depth) to be completed late 1989.

AUTHORITY: Minamata Port Office, 2–21 Minatomachi, 3–Chome, Minamata Shi, Kumamoto–Ken, Japan. *Tel:* 3-2449.

AGENT: Senko Co. Ltd., Minamata Branch, located at 2–34, Umedo-Cho 1-chome, Minamata-Shi, Kumamoto-Ken. Tel: 09666-3-4117. Telex: 7649-41 Senko J. Cable Address: "Senkomarine Minamata".

MISUMI: 32.38 N. 130.27 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the line from Seto-no-hana to the lighthouse on Oyano Island, the line from Togasaki on the same island to Daishiro-bana on Chizoku Iland, the line from Daishiro-bana to Usagi-bana on Tobase Island, the line West to Tobase Bridge, and the coast.
DOCUMENTS: 3 Crew Lists, 3 Passenger Lists, 1 Manifest, 1 Customs, 1 Store List, 1 Health Document, 1 Bill of Lading.
PILOTAGE: Pilot station (acting also as an Agent for foreign vessels).

Misumi Branch Office of the Nippon Tsuun K.K. located at Higashiko 1, Misumi-machi, Uto-gun, Kumamoto-ken. Tel: 09645-2-3121 or 2-3125.

Misumi Kaiun K.K. located at Higashiko 1, Misumi-machi, Uto-gun, Kumamoto-ken. Tel: 09645-2-3562 or 2-3278.
ANCHORAGES: Within port limits.
RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.
MAX. SIZE: Maximum d.w.t. 15,000 tons from North entrance (Lat. 32° 38′ N., Long. 130° 27′ E.). 27,000 tons from South entrance (Lat. 32° 33′ 18″ N., Long. 130° 29′ 39″ E.). The tidal difference between high and low water is great (4 m).
HEALTH: All the necessary procedures must be undertaken at the Misumi Branch Office of the Nagasaki Quarantine Station.
RADIO: Not available.
VHF: Not available.
TUGS: 3 tugs owned by the Misumi Kaiun K.K., 2 tugs owned by the Misumi Branch Office of the Nippon Tsuun K.K.
BERTHING:

MIYAKO: 39.39 N. 141.58 E. (See Plan Book)

DOCUMENTS:
For Quarantine
- 1 Statement by Ship's Master.
- 1 Crew List.
- 1 Passenger List (if any).
  Yellow cards for all.
- 1 Derat Certificate.

For Immigration
- 1 Declaration of Inward Vessel.
  Passport or Seamen's Book for all.
- 1 Crew List.
- 1 Application for shore pass.

For Customs
- 1 Last Port Clearance.
- 1 Declaration of Inward Vessel.
- 1 Crew List.
- 1 List of Crew's Baggage.
- 1 List of Ship's Store.
- 2 Cargo Manifest (Discharging).
- 1 Cargo Manifest (Through).
- 1 Certificate of Ship's Registry.

For Port Management Office
- 1 Declaration of Inward Vessel.

For Maritime Safety Base
- 1 Declaration of Inward Vessel.
- 1 Crew List.
- 1 Cargo Manifest (Discharging).
- 1 Cargo Manifest (Through).

Above documents to be prepared by Master before arrival.

Master to telegraph ETA and crew's health condition directly to Quarantine Miyako before arrival.
PILOTAGE: Not compulsory, but arrangeable at the Master's request. Pilot ordinarily boards at/around Quarantine anchorage, also available boarding at the Master's request at outer harbour which position is HeisaKi light Northward 1.5 miles (Lat. 39° 40.5′ N., Long. 142° 1.2′ E.).
ANCHORAGES: Quarantine anchorage located at Lat. 39° 37.82′ N., Long. 141° 59.3′ E. Depth 16 m. – 22 m. Bottom mud and sand. Outside breakwater, care should be taken not to foul fishing nets.

Depth in inner anchorage 12 m. – 15 m.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions.
MAX. SIZE: Draft 12 m. and LOA 240 m., breadth no restrictions.
HEALTH: Radio Pratique available. Formalities carried out at anchorage.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel, via Choshi Radio, and Northbound via Nagasaki Radio.
TUGS: Normally join vessel on passage from anchorage. Tug's line used. One tug available 2,400 h.p. Additional tugs available from Kamaishi.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities.
DENSITY: Average 1019.
FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangeable for this purpose.
FUEL: Domestic oil is available; Bonded oil will be brought from Tokyo or Sendai, when required.
GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depends on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: 60 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/ Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 2-5011 (Headquarters) and 2-6037 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.
SHORE LEAVE: Local Immigration Office issues shore pass valid for only 3 days; 3 days' extension possible if ship stays longer. If vessel advises longer stay in port on arrival, Immigration can issue shore pass for 9 days.
GENERAL: Discharging ex-gearless vessel at wharf unavailable, because no shore crane for discharge.
AUTHORITY: Miyako Port Administration Office, 114, Fujiwara 3-chome, Miyako City, Iwate Pref. *Tel:* (01936) 2-1471.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Miyako Kowan Unso Kaisha, Ltd. No. 1-12, Rinkodori Miyako-shi, Iwate-ken. Cable address: Koun Miyako. Domestic Telex: 8344-08. Tel: (01936) 2-3501/5. Postal No.: 027.

MIZUSHIMA: 34.31 N. 133.45 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *(a)* Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

(b) Vessels over 50,000 d.w.t. or of draft of more than 12.5 m. are unable to pass through Kurushima Strait and required to transit Wadamisaki.

There are very narrow and crooked channels, such as the Kurushima Strait, maximum tidal current amounting to 10 knots; the Bisan Strait maximum tidal current amounting to 4 knots, and the Akashi Strait, maximum tidal current amounting to 6 knots.

(c) Harbour Pilot: Pilots of the Inland Sea Pilots Association are also employed for this pilotage if required, and Pilot boards at Mizushima Quarantine Anchorage (Lat. 34° 26′ 30″ N., Long. 133° 34′ 30″ E. approximate centre position of quarantine area). However, if an Inland Sea Pilot is employed at the above-mentioned pilot stations, the same Pilot acts for harbour pilotage.

ANCHORAGES: Anchorages available for small size vessels only, and not for large vessels. In case of large vessels waiting for berthing, these vessels shall wait at Quarantine Anchorage, at around Nabeshima, at nearby Sakatewan or off Kobe.

Around "Q" Anchorage Depth	15 m. – 18 m.
Around Nabeshima Depth	32 m. – 40 m. (temporarily suspended)
Nearby Sakatewan Depth	32 m. – 41 m.
Off Kobe Depth	43 m. – 47 m.

RESTRICTIONS: *(a)* Entering and departing from port shall be in accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during night-time, nevertheless such movements are next to impossible in consideration of the nature of the structures of the port. In addition Pilots refuse to board during night-time.

(c) Super-sized vessels, unable to enter except at high tide.

Pilots should be consulted in advance for draft exceeding 14.80 m.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out at Quarantine Anchorage Lat. 34° 26′ N., Long. 133° 44′ E.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join the vessel at the Quarantine Anchorage area. Usually tug's lines used free of charge.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 2100 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: See "Berthing".

DENSITY: Entrance channel Summer average 1020, Winter average 1023. Harbour channel Summer average 1019, Winter average 1025.

FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate 20 k/t/hour. Water barges available, sent from Onomichi. Delivery rate approximately 50 k/tons per hour.

FUEL: Most grades available.

FIRE PRECAUTIONS: *(a)* Whenever necessary to repair vessel, the rule of "Strictly and Completely No Fire" is to be observed. *(b)* To keep sufficiently powered tugboat alongside vessel at all times when engine is under repair. *(c)* A written pledge to be submitted to Oil Company, promising to take full responsibility and to pay full indemnity by ship's Owners (in case of repairing vessel) if any accident has occurred by fault of the vessel.

*N.B.—Some allowance may be granted by Pilot depending on tidal condition. Depth of water (14.80 m.)+tide=ship's draft+keel allowance (ship's draft×0.1+0.5 m.).

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: No consul available, but marine note of protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs possible by Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Works. Minor repairs possible by Nojima Senpaku Co. Ltd., Mizushima Works, Sonkyo Nainenki Seisakusho Co.

DRY DOCKS: *Sanoyasu Dockyard Co. Ltd., Mizushima Shipyard:* Dimensions of longest drydock. Length 675 m., width 63 m., depth 13 m. *Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Dock:*

(a) Dimensions of largest dry dock No. 3 D. Dock (length 672 ft. × width 103 ft. 3 in. × depth 32 ft.). *(b)* Number of small docks: 2.

AIRPORT: Okayama Airport is the nearest from Mizushima, distance approximately 40 km. and takes about 40 minutes by car. Only domestic regular airlines available. 3 flights to Tokyo, daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No telephone installation service on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SERVICES: All navigational apparatus can be served, as requested, but technicians are to be sent from Kobe.

REGULATIONS: Quarantine Anchorage is outside harbour limits therefore (i) no persons allowed ashore from this anchorage, (ii) No supplies permitted to vessels and, (iii) No Agency services available.

REPORT: (Ship's Agent) 1984.

As you are aware, a vessel over 200 m. in length or 50,000 d.w.t. is not allowed to anchor off Mizushima whilst waiting for a berth or other purposes as the space in the Roads is narrow. Therefore, if a berth is not available at the expected time of ship's arrival, the ship has to anchor off Kobe, which is the nearest available place to wait for berthing turn. During vessel's stay in Kobe Roads, quarantine service from Kobe Quarantine Station is not available except in an emergency as this service is available at Mizushima. The Customs entry which requires payment of tonnage dues is not made at Kobe.

In the above circumstances, we, in order to protect the Owners interests, have been instructing the Masters of the vessels to tender Notice of Readiness when they arrived off Kobe for waiting berth although most Receivers or Charterers only accept the NOR when Free Pratique is granted at Mizushima if the vessel is not qualified to obtain Radio Pratique.

It is apparent that when calculation of laytime is made controversy arises between Shipowners and Charterers as to who is to bear the risk of waiting off Kobe for a discharging berth. The Charterers may contend that the Master is not allowed to tender NOR without Free Pratique and Customs clearance whilst the Owners rebut that the ship was lying at a place for waiting berth solely for Receivers/Charterers convenience, being her voyage ended.

In order to avoid a dispute of this kind, we would respectfully suggest modifying the charterparty clause for a vessel of the above category calling at Mizushima as follows:

Quote:

If berth is not available on arrival at discharging port, vessel shall be allowed to tender Notice of Readiness from place of anchorage ordered by Port Authorities whether in berth or not, whether in port or not, whether Customs cleared or not, whether in Free Pratique or not.

Laytime at second/third discharging port, if used, to commence on arrival, whether in berth or not, whether in port or not, whether Customs cleared or not. Time for shifting from a waiting anchorage to discharging berth not to count.

Unquote.

AUTHORITY: Mizushima Port & Urban Development Bureau, Okayama Pref. 1-12, Mizushima Fukuzaki-cho, Kurashiki City, Okayama Pref. *Tel:* (0864) 44-7141.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 1, 2 – chome, Kaigan-Dori Mizushima, Kurashiki-Shi Okayama-Ken. Cables: Naigai Kurashikimizushima. Tel: Kurashiki (0864) 44-5211.

MOJI (Kitakyushu): 33.54 N. 130.55 E. **(See Plan Book)** (See "Kanmon-Ko").

LOCATION: Moji port is located in the Kanmon Straits between Shimonoseki on Honshu Island and Moji at the Northeast tip of Kyushu and is well sheltered from the open sea by steep hills on all sides. According to the Harbour Regulations, the port is one of the sections in Kanmon Harbour which consists of Moji, Shimonoseki, Kokura and Dokai (Tobata, Wakamatsu and Yawata). In 1963, five cities, Moji, Kokura, Tobata, Wakamatsu and Yawata situated in North-Eastern part of Kyushu were combined in one city, as Kitakyushu.

Moji is now known as Moji-ku of Kitakyushu City.

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board to search vessel. Following documents to be submitted:

Crew List.
Passenger List.
Store List.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition list.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward (Form No. C2000).

The following will be checked on board:

Ship's Registry.
Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port. On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure and when vessel passing through Straits if g.r.t. exceeds 10,000 tons. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E. and Westbound vessels at Hesaki Quarantine Anchorage position 125°, 1,500 m. from Hesaki L.H. Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage.

(2) *Sea Pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. Lat. 33° 13′ 00″ N., Long. 131° 54′ 00″ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour Pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:

(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 – 2400 hrs.
(e) Communicating range: within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

Tanoura No. 1 anchorage (83° from Moji Saki Light Buoy, 1,340 m.). Draft 9.1 m.

Tanoura No. 2 anchorage (83° from Moji Saki Light Buoy, 1,770 m.). Draft 9.1 m.

Tanoura No. 3 anchorage (80° from Moji Saki Light Buoy, 2,300 m.). Draft 9.1 m.

WIND, TIDE: Easterly winds prevail in warm seasons. N.W. winds prevail in Winter season. Dense fog frequently prevails in Spring and Autumn.

Tidal range 3.07 m. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7-8 knots. In stream of port, it is about 3-5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Swift tidal current prevails at buoy berths necessitating strong moorings, and in accordance with harbour rules, ships moor with anchor chains to buoy. Requisite chain preparations should be completed before ship leaving pilot station. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.

(b) Departure: with adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except No. 7 wharf and Nos. 8, 9, 10 wharves, the latter 3 berths however only permitting vessel to sail against tide.

(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.

(d) Vessels with draft over 9.14 m. (30 ft.) but not exceeding 10 m. can pass through Kanmon Straits with favourable tide.

MAX. SIZE: *Tankers:* 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

Also see "Berthing" and "Tankers".

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

(a) Quarantine Station at Western entrance: half mile East from Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine Station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship is in Free Pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(f) Quarantine service is rendered from sunrise to 1 hour before sunset.

(g) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

(h) Radio Pratique is obtainable according to the Radio Pratique Regulations.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: See "Pilotage".

TUGS: Normally join vessel at suitable position for mooring in judgment of Pilot and tug. In operation, tug's line to be used for mooring and unmooring without any charge. 10 tugs, 1,500 h.p. – 3,520 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Name of berth	*Length* m.	*Depth* m.	*Permissible draft* m.	*Capacity* g.t.

CONTAINER HANDLING FACILITIES:

Tanoura Container Terminal

Total area:	63,100 sq.m.
Area per berth:	One berth only Sea depth: 10 m. under low water level (LWL) Length of wharf: 300 m. Marshalling yard: 44,856 sq.m. CFS: 2,400 sq.m. Office, control tower: 836 sq.m.
Gantry crane:	Single/twin: Single Height of span above quay: 9.2 m. Max. outreach: 36 m. Max. backreach: 7.5 m. Lifting capacity: 37.5 tons Spreader sizes: capable of handling containers of ISO-IS & IC also Matson type Width of rail: 30 m.
Reefer plug:	40 (440 V×20, 220 V×20)
Illumination:	3 (25 Lux) 1 kW×28
Track scale:	Scaling maximum 50 tons
Straddle carrier:	1

BRIDGE: Kanmon Bridge – Clearance 61 m.

TANKERS: No slop discharge facilities. Mobil Oil berth situated at Okubo, near Tanoura. In the vicinity of the berth, the current runs towards West nearly all the time. Maximum rate of current 3 knots. Vessels berthed during period that tide sets to West, in daytime only. Mooring berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolphins. Two 10 in. pipes connected to vessel; discharge rate 1,000 t.p.h. (Fuel and diesel oil).

Also see "Max. Size".

FRESH WATER: Good fresh water supplied from water barges to vessels lying at buoys and/or anchorage; from hydrants to those alongside wharves. The rate of delivery per hour is 20 – 40 tons from hydrant and 50 tons from barge.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Average loading/discharging:

Bulk cargo:	Coal	50	t.p.h./gang/hatch	(dis)
	Iron ore	45–50	t.p.h./gang/hatch	(dis)
	Grain	50	t.p.h./gang/hatch	(dis)
Baled cargo:	Cement	50	t.p.h./gang/hatch	(load)
	Fertilisers	40	t.p.h./gang/hatch	(load)
	Grain	30–50	t.p.h./gang/hatch	(dis)
	General	40	t.p.h./gang/hatch	(load)
Steel cargo:	Under 20 ft. long	25–30	t.p.h./gang/hatch	(load)
	Over 20 ft.	15–20	t.p.h./gang/hatch	(load)
Scrap steel:	Pressed	20	t.p.h./gang/hatch	(dis)
	Ordinary	10	t.p.h./gang/hatch	(dis)
	Bulky and awkward	5	t.p.h./gang/hatch	(dis)
Lumber/logs:	Lumber	15–20	t.p.h./gang/hatch	(dis)
	Logs	30	t.p.h. gang/hatch	(dis)

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal working hours 0800 to 1700 hrs. Overtime work is possible by applying to Customs. No work can be arranged on 31st December and during New Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of each month.

MEDICAL: No advance notice required unless urgent.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bonded bunker oil is supplied by oil barges. The rate of delivery: 80 t.p.h. – 100 t.p.h.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: Honorary British Consulate concurrent with Honorary Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Daiki Industries Co., Ltd. Moji; Kitakyushu Iron Works, Tobata.

DRY DOCKS: Refer "Shimonoseki".

REPATRIATION: Possible.

AIRPORT: Distance to Kitakyushu airport: 30 minutes by taxi and to Fukuoka airport; 2 hours by train and taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and Fire/Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and grain fitting.

SHORE LEAVE: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. One copy each of crew list and passenger list are required by them. Providing ship's Agent with a crew list beforehand will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred, arrive in Japan within 5 days.

DEVELOPMENTS: Dredging work is being carried out for deepening the draft to 13 m. and extending the Pier Aprons. This construction, dredging and reclaiming is expected to be completed by 1989.

AUTHORITY: Kita-Kyushu Port Authority, 2-7, Nishi Kaigan 1-chome, Moji-ku, Kita-Kyushu City, Fukuoka Pref. *Tel:* (093) 331-1331.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., PO Box 72, 9-9, Minato-machi, Moji-Ku, Kitakyushu-shi, Fukuoka-ken. Tel: Moji (093) 331-1311. Cable Address: Ringer Moji. Telex: 0713403 Ringer J.

MURORAN: 42.20 N. 140.58 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boards vessel about 1 mile outside breakwater. Not compulsory.

ANCHORAGES: Outside harbour limits: Subject to notice having been given to Authorities prior arrival.

Inside harbour limits: Permitted in any part.

MAX. SIZE: *Nissei Pier (Nippon Petroleum):*

Max. d.w.t.	*Max. LOA*	*Max. Safe Draft*
*50,000	230 m.	11.00 m.
*30,000 (g.t.)		
100,000 Sea Berth	250 m.	15.00 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA, 300 m., max. draft, 16.0 m.

HEALTH: Vessels usually anchor at the sea area within a circle of radius 1,000 m. – directed 290° 4,200 m. from Daikokujima Lighthouse, where the authorities board and grant Free Pratique. Radio Pratique also available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 10 tugs, up to 3,200 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS: See "Max. Size". N.P.R.C. Muroran Refinery. Discharge berth. About 25% of deadweight required in ballast.

Berth	*Product*	*Pipe-line*	*Discharge Rate*
50,000 d.w.t.	Crude Oil	2×12 in.	2,400 k/l
100,000 d.w.t.	Crude Oil	4×12 in.	8,000 k/l

DENSITY/TIDE: Density 1025. Rise and fall of tide about 4 ft.

FRESH WATER: Delivery at piers: Average rate about 40 t.p.h. Delivery by barge: Rate about 60 t.p.h.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Only minor repairs available, but Hakodate dockyard able undertake all grades repairs.

AIRPORT: Domestic flights only from Chitose Airport – 100 km. from Muroran.

TIME: GMT plus 9 hours. Permanent.

POLICE/FIRE: Police Muroran 2-5191; Fire Muroran 2-2111.

TELEPHONES: May only be connected on board at No. 2–2 West Pier.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Port & Harbour Bureau, Muroran City, Mubanchi, Kaigan-cho 1-chome, Muroran City, Hokkaido *Tel:* (0143) 22-3191.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd. 3–2, 3-chome, Kaigan-Dori, Muroran-shi, Hokkaido. Tel. Muroran (0143) 24-1314/6. Cable Address: Narasaki Muroran. Telex: 0987781/2 Nsmur J.

NAGASAKI: 32.45 N. 129.52 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport/Seaman's Book Numbers.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks in vicinity of Ioshima Lighthouse, Lat. 32° 43′ 20″ N., 129° 46′ 43″ E. Pilot available any time, subject to adequate notice (no VHF system). All communication with Pilot through Agent. Pilot boat carries International signals. "G" flag in daytime and "Morse" signals at night to call Pilot. In event bad weather Pilot boards at anchorage off Megami.

ANCHORAGES: Megami anchorage located in Harbour Division No. 3 (within line between Kagenoo Lighthouse and West end of Shirogashima) 60 ft. depth and capacity of 3 vessels of 20,000 d.w.t. Safe anchorage.

RESTRICTIONS: Berthing: During daytime only, except for emergency purposes. Entering into anchorage at Megami is generally permitted anytime with Harbour Master's permit. Departure: No restriction from buoy or wharf with adequate notice, but no night departure from Oil Terminals, except Hayashikane Oil Terminals of Dinokubi and Kozaki.

MAX. SIZE: Max. permissible length 1,200 ft., breadth 120 ft., draft 15.0 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Hayashikane Oil Co. (Kozaki Depot)	60,000	230 m.	13.00 m.
Hayashikane Oil Co. (Dinokubi Depot)	60,000	230 m.	13.00 m.
Mobil Oil Co. (Kibachi Depot)	22,000	200 m.	11.00 m.
Idemitsu Kosan (Kibachi Depot)	22,000	200 m.	11.00 m.
General Sekiyu (Otao Depot)	20,000	230 m.	15.00 m.

HEALTH:

(a) Quarantine Station: Sea area surrounded by the following lines:

1. From Senbonyama Beacon to Megami Beacon.
2. From Megami Beacon to Naginata Lighthouse.
3. From Senbonyama Beacon to Takaboko Island.

(b) Quarantine service is rendered from sunrise to one hour before sunset.

(c) Radio Pratique is effective.

RADIO: Recommended Master communicates with Agent through Chosi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at anchorage for swinging and/or at berth for assisting vessel. Tugs available: 3,200 h.p. owned by Dokai Tug Co.; 3,300 h.p., 2,880 h.p. and 2,400 h.p. (2) owned by Kowa Kogyo Co.; 2,200 h.p. owned by Nagasaki Port Tugboats Management Association.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length*	*Depth*	*Capacity*	*Crane*
Dejima	413 m.	9 m.	10,000 g.r.t. × 2 vessels	3 tons × 2 2 tons × 1
Yanagi	270 m.	12 m.	46,000 g.r.t. × 1 vessel

Nos. 4 – 5	175 m.	14 m.	6,000 × 1
Otao Nos. 1 – 2	347 m.	21 m.	150,000 × 1
MHI MC–MD	256 m.	10 m.	25,000 × 1

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0500 hrs. next morning 150% additional; Sundays/holidays 100% additional.

CRANES: *Floating Cranes:* 120 tons owned by Kowa Kogyo Co.; 330 ton floating crane available with adequate prior notice which originally located in Moji area.

MEDICAL: No advance notice required unless urgent.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Hayashikane Oil Co. (Kozaki Depot)	Diesel/ Gas Oil	8″×1	700
Hayashikane Oil (Dinokubi Depot)	Diesel/Gas/ Lub Oil	8″×1	700
Mobil Oil Co. (Kibachi Depot)	Fuel Oil	8″×1	400 (Berthed alongside)
Idemitsu Kosan (Kibachi Depot)	Fuel Oil	8″×1 6″×1	400 400
General Sekiyu (Otao Depot)	Fuel Oil	8″×1	700 (Sea Buoy)

A slop discharge station operated by Nishi Nippon Tanker Service located at Ioshima with facilities for tankers up to 500,000 d.w.t. mooring to three 20-ton bollards. Receiving capacity 1,500 cu.m. per hour. The tank cleaning facilities can accept 10 vessels of 200,000 d.w.t. per month.

DENSITY: 1025.

FRESH WATER: Capacity of water barges: 500 tons and 300 tons. 2 barges in total. Rate of delivery: 100 t.p.h. Wharf hydrants at Yanagi and Dejima.

FUEL: Available ex-barge only. 3–5 days' prior notice required by oil company.

FIRE PRECAUTIONS: No specific precautions.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CONSULS:

French Consul Agency, tel. 23-1221

Portuguese Honorary Consul Agency, tel. 26-2311

REPAIRS: All types of repair can be carried out.

DRY DOCKS:

	Length	*Width*	*Depth*	*Capacity (g.r.t.)*
Koyagi Dock (MHI)	400 m.	100.0 m.	14.5 m.	250,000
No. 2 Dock (MHI)	335 m.	54.0 m.	9.5 m.	165,000
No. 3 Dock (MHI)	268 m.	37.2 m.	8.8 m.	65,000

SURVEYORS: Cargo surveyors able to attend from Moji or other areas if prior notice given. LR, ABS & BV are available in Nagasaki. Salvage Association or U.S. Salvage are able to attend from Moji to Nagasaki.

REPATRIATION: Possible.

AIRPORT: Distance 54 km. (centre of town to air terminal). Time 1.5 hours by car. All Nippon Airway have regular daily service with 7 flights for Tokyo and Osaka, and Towa Domestic Airlines have regular daily service with 2 flights for Tokyo.

Overseas services: Japan Air Lines (JAL) and General Administration of Civil Aviation of China (CAAC) have regular service with 2 flights a week to Shanghai, China.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 22-2141; Ambulance/Fire 22-3211 (Fire station).

EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master.

TELEPHONE: Shore telephone can be installed on board vessel at both wharves of Yanagi and Dejima. Vessels at Mitsubishi Yards can communicate via shipyards' switchboard with town.

STORING: See "Prelims" page viii.

1. Yes.
2. No restrictions, vessel can store at anytime if adequate notice given.
3. Trucks can proceed alongside at the berth.
4. Yes.
5. No special regulations, but a simple style application must be made to Customs before storing.
6. Yes.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 15 days, but 15 days' extension possible if ship stays longer.

AUTHORITY: Nagasaki Port Authority, 2-11 Dejima, Nagasaki City. *Tel:* (0958) 22-1257.

Harbour Master (Maritime Safety Agency): 7-29 Matsugae, Nagasaki. *Tel:* (0958) 27-5133.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nagasaki Warehouse Co. Ltd., 2–13, Dejima-Machi, PO Box 6, Nagasaki. Tel. Nagasaki (0958) 24–1261. Cable Address: Ringer Nagasaki. Telex: 0752322 Nasoko J.

NAGOYA: 35.05 N. 136.53 E. (See Plan Book)

LOCATION: Situated at Northern head of Ise Bay. Harbour protected by breakwater 8,250 m. in length stretching from Chita Peninsula to bank of Kiso River at opposite side of harbour.

DOCUMENTS:

(a) Quarantine (only when arriving from a foreign port); 1 Maritime Declaration of Health, 1 Crew List, 1 Cargo Manifest, 1 List of Passengers (if any on board), Log Book and Registry should be readily available.

(b) Customs: 1 Declaration Inward/Outward with ports of Call, 1 Ship's Registry, 1 Last Port Clearance, 1 Store List including arms and narcotics, 2 Manifests of Cargo for Discharge (prepared by Agents), 1 Manifest of Through Cargo, 1 Crew List, 1 List of Passengers, 1 List of Crew's Baggage (only necessary if crew-members have to land personal effects ashore).

(c) Immigration: 1 Crew List, 1 Notification of Arrival, 1 Application for Shore-passes, 1 List of Passengers, 1 Notification of Departure (to be returned through Agents after sailing).

(d) Harbour Master: 1 Crew List, 1 Declaration Inward/Outward with ports of Call.

(e) Port Authority: 1 Declaration Inward/Outward with ports of Call.

PILOTAGE: Request Pilot and other services to JHY (Nagoya Port Radio Station) at least 5 or 6 hours prior arrival on frequency 500 kHz. JHY keeps watch also on 480 kHz. Pilot station near No. 1 and No. 2 channel buoys at entrance of harbour channel. When wind over 15 m./sec. Pilot boards inside High Tide Breakwater. When very rough, Pilot taken on board East side of Kinjo Signal Station. Pilot not compulsory but advisable. Pilot boat white painted with white and red funnel and letters "Pilot" on hull.

Pilotage is compulsory for all vessels in Irago Suido Traffic Route and for all vessels of 10,000 g.r.t. or over operating N.W. of a line bearing 050° from Hansu Hana Lighthouse (Lat. 34° 26.5′ N., Long. 136° 55.6′ E.) to the coast of Atsumi Hanto.

Shipmaster's Report: January 1985.

Pilotage for "Irago Suido", entrance for Yokkaichi-Nagoya Bay, has become compulsory since beginning of 1984.

Pilot to be arranged through the Agents and boards at Lat. 34° 31′ N., Long. 137° 04′ E.

ETA to be confirmed 3 hours before arrival at No. 1 Buoy by VHF, and also to Nagoyahoan, which is the controlling body for the traffic in the Irago Strait.

ANCHORAGES: The port boundary indicated by line connecting Oono Lighthouse (Lat: 34° 55′ 49″ N., Long: 136° 49′ 28″ E.), Ise Bay Light Buoy (Lat: 34° 56′ 05″ N., Long: 136° 47′ 44″ E.), S.W. corner of Nagoya High Tide Breakwater (Lat: 35° 1′ 54″ N., Long: 136° 47′ 04″ E.) and the base point at N.W. of the same Breakwater (Lat: 35° 00′ 54″ N., Long: 136° 46′ 09″ E.).

Quarantine Anchorage, located outside High Tide Breakwater offers safe anchorage for vessels awaiting Pilot or quarantine service. Depth of this anchorage area ranges from 10 m. to 20 m. Sea bed silty clay.

MAX. SIZE:

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Nisseki Terminal	34,000	195 m.	9.80 m.
Esso Standard	34,000	195 m.	8.80 m.
Maruzen Standard	20,000	80 m.	9.50 m.
Kanematsu-Gosho	34,000	200 m.*	9.50 m.
Mitsui	34,000	195 m.	9.50 m.
Mitsubishi Shoji	34,000	190 m.*	9.50 m.
Chita Futo	50,000	210 m.	11.70 m.
Idemitsu Chita Pier	100,000	—	14.00 m.
Nishi Nagoya Yusosho	30,000	200 m.	11.70 m.
Ise Bay Sea Berth	250,000	—	25.00 m. (Depth)
Toa Kyoseki	100,000	220 m.	14.00 m.

*Note: Limitation 30,000 d.w.t. These lengths available when no vessel secured to neighbouring (RYNORU) berth.

Other Vessels: 160,000 d.w.t., draft 14.0 m.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.

Crew List.

Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO:

JHY (Nagoya Port Radio Station). Service area: 100 miles. Frequency: 500 kHz (also 486 kHz). Working frequency: 486 kHz.

International VHF (Nagoya Port Radio). Service area: 40 miles. Frequency: Simplex working frequencies Channels 12 and 16. Duplex working frequencies Channels 18 and 20.

To be given prior arrival: Name; Capacity; Draft and length; Port of departure; Last port; Time arrival outer port; Time passing Kamishima Signal Station; Grade of cargo; Grade of dangerous cargo (if any); Health of crew.

TUGS: Usually join at point where vessel directs course toward allocated berth. Tug's lines normally used without charge.

Operator's Report: 1983.

Ise Bay Sea Berth (Discharging Terminal) is operated by Isewan Sea Berth Co., Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime, weather or other circumstances permitting. Terminal will not be closed due to any holidays.

Depth around the Sea Berth is 25.0 m. Berth direction alignment is North (360°) – South (180°).

Location: Lat. 33° 55′ 26″ N., Long. 136° 44′ 36″ E.

Pilotage: Sea Berth requires Pilot for berthing and unberthing.

Anchorage: South 1, 2, 3, miles off from South end of Ise Bay Sea Berth.

Berthing: East berth port side alongside. West berth starboard side alongside.

Cargo Handling: Maximum rate 18,000 Kl/hr. Minimum pressure 10.0 kg./sq.cm. at manifold.

DENSITY: 1020.

FRESH WATER: Water supplied direct from pier.

FUEL: All grades fuel available. Delivered by barge only.

CONSULS: The following countries are represented in Nagoya: Ecuador, France, Netherlands, Korea, Mexico, Portugal, Sweden, Thailand.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew. When stevedores do this work charges are made.

CUSTOMS ALLOWANCES: For crew (per landing): 60 cigarettes, 1 bottle of spirit when sailing period exceeds one month, 2 bottles over 3 months.

For passengers: 3 bottles of spirit; 200 cigarettes or 50 cigars; 2 ounces of perfume; 1 watch of which price is not over ¥30,000; other items of which total price is under ¥100,000.

CREW IDENTIFICATION CARDS: Required.

REPAIRS: All types of repairs possible. Repairs by Ishikawajima-Harima Heavy Industries Co. Ltd., Nagoya Shipyard.

DRYDOCKS: Ishikawajima-Harima Heavy Industries Co. Ltd., Nagoya Shipyard: Length 150 m., width 24.2 m., capacity 13,000 g.r.t.

Chita Shipyard of Ishikawajima-Harima Heavy Industries Co., Ltd. (IHI), length 810 m., width 92 m., capacity 250,000 g.r.t.

AIRPORT: Nagoya Airport, 20 km. from Port. 3 JAL (Japan Air Lines) flights for Hong Kong, 2 flights for Manila (weekly), 3 JAL flights to Seoul and 3 KAL flights to Seoul.
HOLIDAYS: National Holidays: New Year's Day (Jan. 1st), Adults Day (Jan. 15th), Foundation Day (Feb. 11th), Vernal Equinox Day (Mar. 21st), Emperor's Birthday (Apr. 29th), Constitution Day (May 3rd), Children's Day (May 5th), Respect for The Aged Day (Sept. 15th), Autumnal Equinox Day (Sept. 23rd), Health Promotion Day (Oct. 10th), Culture Day (Nov. 3rd), Labour Thanksgiving Day (Nov. 23rd). Cargo handling not arranged on December 31st, January 1st, 2nd and 3rd, and July 20th (Maritime Day).
TIME: JST (Japan Standard Time), 9 hours ahead of GMT.
POLICE/AMBULANCE/FIRE: Police 110, Ambulance 119, Fire 119.
TELEPHONES: Telephone can be arranged on board ships berthed at most wharves. For application call 652-7581. Telegram 971–4222, Time 117, Weather 177.
DEVELOPMENTS: Main Channel 14 m. deep and 350 m. wide will be enlarged to 17.5 m. deep. Secondary Channel 10 m. deep and 300 m. wide will be dredged to 12 m. deep and 400 m. wide.

Anchorage area 9 m. deep at present will be deepened to 10 m.

Kinjo Pier Development: 26 berths with 10 m. will be constructed.

AUTHORITY: Nagoya Port Authority, 8-21, 1-Chome, Irifune, Minato-Ku, Nagoya, 455 Japan. *Tel:* (052) 661-4111/4.

Port Status – Closed Port.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilot obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth.

1. Wadamisaki. (In this case Pilots compulsory if over 10,000 g.r.t.). Position: Lat 34° 38′ N., Long. 135° 11′ E. Cable Address: "Anjin Kobe".
2. Sekisaki. Position: Lat. 33° 13′ N., Long. 131° 54′ E. Cable Address: "Anjin Saganoseki".
3. Hesaki. Position: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Cable Address: "Anjin Moji".

ANCHORAGE: No anchorage at Namikata.
RESTRICTIONS: Mooring and unmooring daytime only.
MAX. SIZE: Oil tankers: 125,000 d.w.t. Gas tankers: 67,000 d.w.t.
HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio.
TUGS: Join vessel off Namikata, always using tug's line without charge. Two to four tugs are required for berthing, depending on size of vessel.
BERTHING: Berthing time will be notified by ship's Agent by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Namikata Terminal Co. Ltd.* only. Located approximate position Lat. 34° 07′ 07″ N., Long. 132° 54′ 32″ E. See "Max. Size".
FRESH WATER: Available by shore line. Rate of delivery: 20 t.p.h.
FUEL: Not available.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPAIRS: Not possible.
REPATRIATION: Possible. Nearest Immigration Office situated at Niihama.
AIRPORT: Nearest at Matsuyama and Takamatsu.
TIME: GMT plus 9 hours.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONE: No facilities for placing telephones on board.
GENERAL: As this port is a closed port, the undermentioned procedures required to obtain special permission to enter from Shikoku Maritime Bureau:

Usually vessels call at Matsuyama to obtain special permission for entering closed port at Namikata, by paying the charge at the same rate as tonnage dues; the above procedures will be undertaken by Agent. No quarantine available, the nearest Quarantine Station at Matsuyama. No Immigration Office at this port (Officials come from Niihama).

The above procedures of Quarantine/Customs will be undertaken by Namikata Agent.
SHORE LEAVE: Local Immigration Officer issues shore pass.
AGENT: Kaiko Tanker Co. Ltd., Namikata Office. Address: Miyazaki-600, Namikata-cho, Ochigun, Ehime, Japan. Tel: 0898-52-2009. Telex: 5845554. Fax 0898-52-2367. Cable Address: Kaiko Imabari.

Kaiko Tanker Co. Ltd., Matsuyama Office. Address: 6-12, 1-chome, Nakasuka, Matsuyama, Japan. Tel: 0899-51-0733. Telex: 5842011. Fax 0899-51-0359. Cable Address: Kaiko Matsuyama.

NAOETSU: 37.11 N. 138.14 E.

DOCUMENTS:

1 Inward Declaration of Vessel.
1 Cargo Manifest.
1 Through Cargo Manifest.
1 List of Provisions and Stores.
1 List of Tobacco and Personal Effects.
7 Crew Lists (preferably airmailed in advance).
2 Passenger Lists.

PILOTAGE: Pilot embarks at quarantine anchorage to take vessel directly to berth during daytime. All transmitting and receiving through Niigata Radio Station (call sign JCF, Type of Wave: 438454) or Choshi Radio Station and/or Nagasaki Radio Station. Cable Agent one week's notice of ETA and accurate ETA 24 hours before arrival, thereafter advising any change in arrival time. No Pilot boat. Pilot uses tug-boat.
ANCHORAGES: Half-circle drawn at a point of Lat. 37° 11′ 31″ N., Long. 138° 13′ 59″ E. (lighthouse) with radius 1,600 m.
RESTRICTIONS: Berthing and unberthing daytime only.
MAX. SIZE: LOA 160 m. draft 9.50 m. in Summer, and 9.00 m. in Winter.
HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine Station 321° – 2,200 m. (Lat. 37° 11′ 45″ N., Long. 130° 14′ E. 700 m. radius) from Naoetsu Lighthouse.
RADIO: Niigata Radio Station: JCF. Nagasaki Radio Station: JOS. Choshi Radio Station: JCS.
VHF: Channel 16.

TUG: Normally joins vessel at entrance of port. Ship's lines used. One tug 750 h.p. One tug 1,800 h.p. will be brought from Niigata when required.

BERTHING:

AGENT: See "Uno".

NIIGATA: 37.54 N. 139.04 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot embarks at Quarantine Anchorage (Lat. 37° 58′ N., Long. 139° 03′ E.) to take vessel directly to berth during daytime. All transmitting and receiving normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA one week's notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGES: Anchorage is a rectangle located N.W. of lighthouse at West breakwater at a distance of 1,600 m. covering an area of about 160,000 sq.m. Lat. 37° 57′ 37″ N., Long. 139° 04′ 00″ E. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in Winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position West side of N.W. line drawn from Niigata Lighthouse (Fl. R. sec. 13 m. 12 miles) and must avoid the vicinity of the mouth of the Shinano River or Showa Oil Co.'s Sea-berth (which is connected with shore facilities by submerged pipe-lines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigating vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weather forecast. In case bad weather is reported, the following necessary actions should be taken; namely, officers on duty, confirmation of ship's position, engines on standby, the use of extra anchors, sheltering, etc.

6. In case a vessel requires shelter from N.W. wind in Winter, it is suggested that such vessel proceed to Sado Island and anchor off Morotsu Port, Akadomari Port, Sado Island South Coast or Sado Channel.

7. When approaching the entrance of the port, a vessel can be drawn too close to the East Breakwater or the shallows existing East of the port entrance by force of N.W. gale, N.E. current and river flow. Therefore, vessel must enter from N.W. of Niigata Lighthouse, approaching from Quarantine Anchorage and alter course as West Breakwater Lighthouse and Niigata Port Light Beacon are seen in a line. It is dangerous for vessel to anchor at any areas East of Shinano River.

8. Prior to arrival, Japanese Charts No. 1155A, 122 and 1197 or substitutes should be provided on board. Charts 1181, 1198 may also be needed.

RESTRICTIONS: Berthing and unberthing daytime only. Entry and/or departure at time authorised by Port Authority. Shinano fairway from port entrance to Rinko wharves, depth 11 m. to 12 m.

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*

East 3 Jetty	Crude	1×28″	5,000
	Fuel	1×28″	2,000

DENSITY: Average in Rinko wharves (approx.) 1006. Average in Municipal wharves (approx.) 1005.
FRESH WATER: Available from all wharves. Cannot be supplied at anchorage during the Winter season.
FUEL: Domestic oil is available. Bonded oil will be brought from Hakodate or Moji with 7 days' advance notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
CONSULS: None.
DRY DOCKS: No facilities for ocean going vessel.
REPATRIATION: Possible.
AIRPORT: 5 km. Round service Japan Domestic Air Line.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAY: 22nd August.
POLICE/AMBULANCE/FIRE: Water Police 44–2269; Ambulance Station 119; Fire Station 119; Main Police Station 110.
TELEPHONES: No facilities for telephones on board available.
SERVICES: Hold cleaning by longshoremen available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
REGULATIONS: Oil carriers can receive bunker by oil barge and/or shoreline except when discharging cargo.
AUTHORITY: Niigata Port Administration Office, 6-3, Ryugashima 1-chome, Niigata City. *Tel:* (0252) 47-9131.
AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Niigata Rinko Kairiku Unso K.K., 2-Chome, Rinko-cho, Niigata-shi, Niigata-ken. Cable Address: Rinkokairiku Niigata. Telex: 03122501 Rinkon J., 03122502 Nrinko J. Tel.: (0252) 74-5181 & 8932, 73-2289.

For Harbour Office	
1. Declaration of Inward Vessel	1

1. Master to telegraph ETA and Crew's Health Condition directly to Quarantine Niihama before arrival.
2.*To be prepared by Master before arrival. Others to be made up by Agent with assistance of Master on arrival.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Inland Sea Pilotage: Pilotage at Kurushima Channel/Bisan-Seto/Akashi Channel is compulsory for ships over 10,000 g.r.t. Pilot boarding position unchanged, namely, Sekisaki/Hesaki/Wada, even if ship requires only foregoing area's service.
ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point Lat. 33° 59′ 18″ N., Long. 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12 m. – 15 m. No buoy moorings. Harbour protected by breakwater.
TIDE: (Springs) Max. 263 cm.; min. –9 cm. (Neaps) max. 182 cm.; min. 136 cm.
RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during LW 8.50 m. is insufficient to pass channel.
MAX. SIZE: See "Berthing".
HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.
RADIO: Choshi Radio, Nagasaki Radio.
TUG: Joins vessel at Quarantine Anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 700 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.
BERTHING: Harbour Pilot operates during day.

Berth	*Length*	*Depth*	*Berthing Restrictions*
"A"	Anchorage	8.0 m.	Draft 8.0 m. LOA 120 m.
"B"	Anchorage	9.3 m.	Draft 9.0 m. LOA 165 m.
"B-3" Wharf	103 m.	10.0 m.	Draft 9.5 m. LOA 170 m.
"K-4" Wharf	120 m.	9.1 m.	Draft 9.0 m. LOA 160 m.
"K-6" Wharf	200 m.	14.0 m.	Draft 13.0 m. LOA 250 m.
Kuroshima Buoy	Anchorage	11.0 m.	10,000 d.w.t. or less
"N-4" Wharf	80 m.	7.0 m.	Draft 7.5 m. LOA 110 m.
"N-8" Wharf	110 m.	9.3 m.	Draft 9.0 m. LOA 150 m.
Juki	85 m.	5.0 m.	Draft 5.0 m. LOA 100 m.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving berth No. 4 may pass.

Berth B: Vessel moors stern to wharf with 2 anchors about 4 shackles each.

CRANES:

Berth "B3"	2× 5 tons
Berth "K4"	3× 5 tons
Berth "K6"	2×25 tons

One 250-ton and one 50-ton floating crane.

LOADING/DISCHARGE RATES:
Average rate of Discharging Cargo:

Alumina	150 – 170 t.p.h. by pneumatic apparatus
Anthracite coal	50 – 70 t.p.h. by ship's gear
Bauxite	700 – 800 t.p.h. by 2 shore cranes
Chemical Oil	200 – 250 t.p.h. by ship's pump
Copper Concentrates	70 – 100 t.p.h. by ship's gear 130 – 150 t.p.h. by shore crane
Logs	600,000 – 800,000 BFM/day by ship's gear
Nickel Concentrates	70 – 90 t.p.h. by ship's gear 130 – 150 t.p.h. by shore crane
Phosphate	70 – 90 t.p.h. by ship's gear
Potash	40 – 60 t.p.h. by ship's gear
Salt in bulk	50 – 70 t.p.h. by ship's gear 80 – 100 t.p.h. by shore crane

Average Rate of Loading Cargo:

Alumina in bag	50 – 60 t.p.h.	by ship's gear
Alumina in bulk	170 – 180 t.p.h.	by pneumatic apparatus
Ammonium Nitrate	50 – 60 t.p.h.	by ship's gear
Anode Paste	100 – 120 t.p.h.	by shore crane
Fertiliser in bag	50 – 60 t.p.h.	by ship's gear
Fertiliser in bulk	80 – 100 t.p.h.	by ship's gear

MEDICAL: Hospitals and medical facilities available weekdays only.

TANKERS: No facilities for oil carriers.

DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FUEL: Bunkers in bond available from main ports or oil stations in tranship. 2 days' notice.

FRESH WATER: Water is available from the berths "K-4" and "K-6" only after normal working hours – 10 t.p.h. Water is not available from any other berths. A 70 ton barge is available, it can supply 300 tons per day.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.

CARGO GEAR: Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CONSULS: None. Nearest in Kobe.

REPAIRS: Minor repairs only. Main engine piston overhauling possible.

DRY DOCKS: None. For nearest see "Matsuyama".

REPATRIATION: Arranged by Agent.

AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 11th; Vernal Equinox Day, March 21st; Emperor's Birthday, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, September 15th; Autumnal Equinox Day, September 24th; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Lunar Calendar), August 8th; Autumnal Festival, October 16th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *except* for *Niihama* December 31, January 1, 2, 3, and October 17, 18.

Vessels may enter/leave port at overtime rates and cargo work will be done up to 1700 hrs. (daytime) against surcharges.

No cargo will be handled: *Niihama* December 31, January 1, 2, 3, and October 17, 18. No ship's movement (as well as cargo handling) can be done on January 1st.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niihama Detached Office, Nishibara-cho, Niihama, tel. Niihama 32-3966.

Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho, Niihama, tel. Niihama 32-3405.

Immigration: Niihama Port Station, Takamatsu Immigration Office, Nishibara-cho, Niihama, tel. Niihama 32-2672.

Maritime Bureau: Sanbashi-dori, Niihama, tel. Niihama 32-2855.

Maritime Safety Agency: Nishibara-cho, Niihama, tel. Niihama 33-0055.

Emergency Procedure: No Harbour Master radio available, therefore cable Agent. Telephone sub-agent since one person will be in attendance even during night, who in turn will contact person in charge.

Salvage: No salvage tug stationed, nearest from Kure.

SHORE LEAVE: Crew allowed ashore with pass.

DEVELOPMENTS: Sumitomo Chemical Co. Ltd., Kikumoto Works, intend to make another Bauxite berth available for large size vessel (suitable for vessels up to 50,000 d.w.t.).

Sumitomo Metal Mining Co. Ltd., Niihama reclaiming land adjacent to Western harbour limit of port of Niihama to construct additional refinery for producing copper with a berth for 25,000 ton vessel to discharge copper concentrate. Final date of completion unknown.

AUTHORITY: Niihama Marine Safety Agency, Nishibara-Cho, Niihama. *Tel:* (0897) 32-3405. *Contact:* Port Captain.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Sumitomo Warehouse Co. Ltd., 2-5, Sobiraki-cho, Niihama-shi, Ehime-ken. Cable Address: Sumitomosoko Niihama. Domestic Telex: 0584-4432. Tel: Niihama (0897) 37-1101.

NISHIHARA (Buckner Bay), Okinawa: 26.14 N. 127.50 E. (See Plan Book)

LOCATION: The Nansei Sekiyu Ltd. Refinery is located in Nishihara village on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay (Buckner Bay). Also see "Max. Size". There is also a Nihon Sekiyu Terminal SBM about 2 miles NNW of the NSS SALM. (Withdrawn 1980, area safe for navigation).

DOCUMENTS:

3 Manifests
6 Crew Lists
1 Passenger List
1 Store List
1 Personal Effects List
} For Customs, Quarantine and Agents' Use.
Ship's Register
International Loadline Certificate
Safety Equipment Certificate
Derat Examination Certificate
Last Port Clearance.

Each Crew member will be issued with an Official Pass, which must be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. Berthing shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge, except vessel berthed at the pier.

ANCHORAGES: Navigation and anchorage in the waters near the NSS product pier and crude berth will in so far as possible be restricted to those ships directed into these waters by Berthing Master. In the interests of safety, ships will not enter the restricted area unless so directed by Berthing Master. The restricted area is within the following boundaries:

Beginning at a point described as 26° 13′ 33.88″ N. 127° 47′ 30.24″ E.; thence running S. 60° 00′ 00″ E., a distance of 200 m. to an angle point described as 26° 13′ 30.62″ N., 127° 47′ 36.48″ E.; thence running S. 35° 40′ 45″ E., a distance of 1,170 m. to an angle point described as 26° 12′ 59.69″ N. 127° 48′ 00.98″ E.; thence running N. 45° E., a distance of 3,350 m. to a point on the circumference of a circle described as 26° 14′ 20″ N., 127° 49′ 30″ E.; thence running to the right a distance of 3,170 m. along said circumference, which is described by a radius of 1,060 m. with its centre located at 26° 13′ 56.18″ N., 127° 50′ 00.00″ E. to a point on the circumference described as 26° 13′ 30″ N., 127° 50′ 22″ E., thence running S. 48° W. a distance of 1,780 m. to the Nakasone buoy located at 26° 12′ 54.2″ N., 127° 49′ 37.5″ E., thence running S. 53° W. a distance of 1,940 m. to the Wara reef located at 26° 12′ 17.7″ N., 127° 48′ 45.0″ E., thence running W. 18° N. a distance of 2,810 m. to a buoy located at 26° 12′ 44″ N., 127° 47′ 07″ E., thence running N. 17° W. a distance of 710 m. to a point at 26° 12′ 46.42″ N., 127° 47′ 56.61″ E.

MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 270,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 50′ E., about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has 2 berths, one for vessels up to 65,000 d.w.t. and one for small vessels up to 4,000 d.w.t.

PRATIQUE: Port Officials will board the vessel after berthing.

TUGS: 2 tugs and a launch are available for assisting with mooring and unmooring. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.

CRUDE BERTH: Single buoy mooring with vessel secured by 2 heavy polypropylene lines from buoy. Lines connected to chains through bow mooring lead and secured inboard. Chains secured direct to Brega Pin or by double mooring wire or mooring rope (polypropylene 8 in. or over) to bollards, port and starboard side of forecastle head. There is 72 ft. of water at buoy position. Vessels may remain in berth in winds of up to 50 m.p.h.

Floating hoses: 2×24 in. into 2×20 in. connected to 2×16 in. are connected on vessel's port side. There is a 42 in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.

PRODUCT PIER: A 110° – 290° orientated pier allows tankers to approach the berth in a ballasted condition in either of 2 opposite directions. Vessels of 4,000 d.w.t. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean products and 2×16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clean products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Bunker fuel is available at both berths through meters and 4 in. hose connections. Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water-foam monitors and air-foam play-pipes.

RADIO: Crude vessels discharging at Nishihara should report ETA at pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.

OIL POLLUTION WARNING: We wish to alert all vessels entering this port of the extreme sensitivity on the part of the community and governmental authorities regarding any incident involving oil pollution of the seas. Any oil spill, regardless of size, is considered a criminal act, and offenders are dealt with accordingly. We urge all vessels to make complete pre-arrival checks for cargo and ballast system tightness, and to strictly adhere to all pollution prevention practices, procedures and policies while discharging or deballasting at this port. Officers and crews should be extremely alert during all phases of vessel operation for potential oil spill risks and seek assistance from shore representatives should any unusual risk arise.

TIME: GMT plus 9 hours. Summertime is not used. All ETAs and other messages should be made in local time.

SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless they are in the microbus which will be provided by ship's Agent.

AUTHORITY: Nansei Sekiyu K.K., 858 Aza Onaha, Nishihara-Cho, Okinawa, 903-01 Japan. Postal Address: P.O.Box 525, Naha, Okinawa, 900-91 Japan. *Tel:* 098995 – 2831 – 8.

Captain of the Port: Kin-Nakagusuku, 46 Soeishi, Nakagusuku-Son, Okinawa, Japan. *Tel:* 098895 – 4874.

OFUNATO: 39.03 N. 141.44 E. (See Plan Book)

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended as many fishing obstructions in the harbour. Pilot boards about two miles from entrance of Ofunato Bay, Lat. 39° 00.2′ N., Long. 141° 45.5′ E. but for vessels less than 10,000 g.r.t. Pilot boards in Quarantine Anchorage where depth 35 m. (but not after dark). Master must radio vessel's Agent of ETA 24 hours in advance, because neither telegraphic address of pilot station nor VHF available.

ANCHORAGES: Not suitable in stormy weather. Depth of water at anchorage 30 m. to 40 m. Quarantine Anchorage located between radius 500 m. of Lat. 38° 59′ N., Long. 141° 48′ E.

RESTRICTIONS: Depth of water at entrance of passage 14 m., oil tanker's draft restricted to 9.0 m. and draft of log and coke carriers restricted to 8 m. Depth of water alongside wharf 9 m. at mean level.

MAX. SIZE: *Tankers:* Kamei Oil Piers Max. d.w.t. 35,000. Max. LOA, 210 m. Max. Safe draft 9.0 m.

Log and Coke Carriers: Max. LOA 180 m., max. draft 8.0 m. Tidal range 1 m. – 1.4 m.

HEALTH: Radio Pratique available. Formalities carried out at the anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.

TUGS: Small tugs 800 h.p. and 600 h.p. available. Large tugs (2,400 h.p.) can be arranged from Kamaishi with advance notice, they usually join vessel about 400 m. in front of jetty and discharging wharf. Ship's lines used if necessary.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 –0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: One tanker berth. Product handled, Diesel Oil. Shoreline, 8″×2. Discharge rate, 800 t.p.h.

DENSITY: Average density 1020.

FRESH WATER: Available from shore. Supply 10 t.p.h. – 15 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Yokohama or Hakodate, with sufficient advance notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: Hanamaki Airport about 97 km. from Ofunato. TOA Domestic Air Lines (TDA); 2 flights between Hanamaki/Tokyo every day, 2 flights between Hanamaki/Osaka every day and 1 flight between Hanamaki/Sapparo every day.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Discharging ex-gearless vessel at wharf not available, because no shore crane for discharge.

SERVICES: Surveyor: NKKK and Kentei Shin Nihonsha. Hold and tank cleaning. Provisions/laundry/water. Bunker: Domestic diesel available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; 3 days' extension possible if ship stays longer.

AUTHORITY: Port & Harbour Department, Iwate Prefecture Government, 10-1, Uchimari, Morioka City, Iwate Pref., 020 Japan. *Tel:* 0196-51-3111. *Contact:* Masanao Takeda, Director, Port & Harbour Department.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Morita & Co. Ltd., No. 108 Chayamae, Ofunato-cho, Ofunato-shi, Iwate-ken. Cable Address: Morita Ofunato. Domestic Telex: 8382-32. Tel.: (01922) 6-5131. Postal No. 022.

OITA: 33.17 N. 131.40 E. (See Plan Book)

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board the vessel to search. The following documents are to be submitted:–

- Crew List.
- Passenger List.
- Store List
- Declaration of Crew's baggage. (Must be signed by individual Crew member).
- Arms and Ammunition List.
- Narcotics List.
- List of Ports of Call on Current Voyage.
- Discharging Cargo Manifest.
- Through Cargo Manifest.
- Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:–

- Ship's Registry.
- Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. The Master or Agents are to attend at Customs House for entry formalities with the following documents:–

- Discharging cargo Manifest.
- Through cargo manifest.
- Declaration Inward/Outward.
- Ship's Registry.
- Last Port Clearance.
- Documents entrusted with the Master by Customs at previous Port.
- Store List.

On ship's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

No Customs house open outside office hours except when advance notice given.

Immigration: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and or other equivalent travel documents and provide 72-hour landing passes for Crew members and passengers. 2 copies each of crew list and passenger list are required by them. Providing ship's Agents with a crew list beforehand will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application.

In the event that Crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the ships to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Harbour pilotage not compulsory. It is compulsory for vessels over 10,000 g.r.t. to take a Pilot in the Inland Sea.

Request must be made at least 24 hours in advance and Pilot should be kept closely advised of vessel's accurate ETA at pilot station. If there is any change in vessel's movements, the Master is requested to immediately radio to the pilot office directly or through Agents reporting the revised ETA. The cable address of the pilot office is "Anjin Moji".

ANCHORAGES:

No.	Depth (m.)	Capacity (g.r.t.)	Position	Remarks
No. 1	37–38	Under 20,000	33° 16′ 26″ N. 131° 38′ 44″ E.	Within radius of 100 m.
(265°, 3,400 m. from Tsurusaki Hakuchi Breakwater East Lighthouse "A" point).

(93°, 3,800 m. from "A" point).				
Shin Nittetsu Anchorage		5,000×3 3,000×3	The sea area circumscribed by the lines connecting the following points end to end: 1. The point "A", 278°, 1,310 m. from the Otozu Breakwater West lighthouse in Oita Harbour. 2. The point, 249°, 1,200 m. from "A". 3. The point, 219°, 170 m. from "A". 4. The point, 330°, 550 m. from "A".	Draft 6 m. – 40 m.
Quarantine Anchorage	25–43 m.		The sea area circumscribed by the following lines: The line that connects the point "A", 227°, 11,550 m. from the Sekisaki lighthouse with the point, 180°, 1,500 m. from "A"; a second line that connects the same with the point 260° 2,100 m. from it; a third that connects the same with the point, 0°, 1,300 m. from it and a fourth that connects the same with "A".	

*It is necessary to obtain permission from Harbour before vessel's arrival.

RESTRICTIONS:

Berthing: During daytime only.

Departure: Night departure from wharves in generally impracticable, except vessels at Sea-berth and Seihin berth can depart up to 2000 hrs. However, this will depend upon condition of weather, etc.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH:

(a) Quarantine Station: Lat: 33° 16′ 00″ N., Long: 131° 46′ 00″ E.

(b) Quarantine inspection is not allowed inside port except when weather or other special reasons prevent the quarantine boat from approaching ship at anchorage.

Quarantine is effected in berth for a vessel more than 3,000 g.r.t., provided the vessel possesses valid (i) derat exemption/fumigation certificate. (ii) all crew/passengers are healthy. (Radio message from ship's Master for these items are required 2 days in advance).

(c) Quarantine service is rendered from sunrise to 1 hour before sunset.

(d) "Q" flag should be hoisted until ship has free pratique.

(e) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required.

All sanitary outlets must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese Coast.

(f) Radio Free Pratique possible.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to their arrival, berthing instructions also Pilot's requirements, etc., through VHF, the details of which are as follows:–

(a) Call sign: Oita Port Radio.

(b) Location of radio facilities: The transmitting and receiving station is located at the top of Mount Tohmiyama, Saganoseki (Sekisaki)

(c) Channel: Simplex 16 (Calling)
12 (Communicating)
14 (Communicating)
Antenna power: 50 W.

(d) Operating Hours: 0000–2400 hrs.

(e) Communicating range: Within a radius of 100 km. from the station at sea.

MEDICAL: Hospitals available. No advance notice required unless urgent.

TUGS: Operator: Oita Rinkai Kogyo.

Tug	g.r.t.	H.P.
*Yuhi Maru	276	3,200 Schneider
*Kakuho Maru	199	3,500 C.P.P. Kort Nozzle
*Ryusei Maru	199	2,400 Z-Peller.
Udo Maru	141	2,000
Morita Maru	177	2,000
*Hikita Maru	274	3,200 Z-Peller
*Daiho Maru	293	3,200 Z-Peller
Nagata Maru		3,000

It is a practice to use tug's line for berthing/unberthing.

*Fire extinguishing apparatus equipped.

Kyushu Oil Co. own a special boat equipped with an extinguisher system and station same when a tanker berthing/unberthing at their expense.

BERTHING:

Wharf	*Length berth (m.)*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Capacity (d.w.t.)*	*Public or Private*
Sumiyoshi					
No. 1	185	160	9.10	15,000×1	Public
No. 2	185	160	9.20	15,000×1	Public
(Larger size vessels can be accommodated at Nos. 1–2 wharves, using 2 berths)					
Otozu:					
E–3	240	200	11	Under 30,000	Private (Nippon Steel Corp.)
E–4	200	170	11	Under 30,000

E–6	200	170	12	Under 35,000	,, ,,
E–7	200	170	12	Under 35,000	,, ,,

(Larger size vessels (max. 50,000 d.w.t. and 250 m. LOA) can be accommodated at the wharves, using 2 berths).

Control tower for vessel's entry/departure to and from Otozu Hakuchi is located at the end of Otozu Hakuchi, close by lighthouse.

Sea Berths:

Wharf	*Length berth (m.)*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Capacity (d.w.t.)*	*Public or Private*
N–1	310 (plus 125 m. dolphin)	350	22	50,000/200,000	Private (N.S.C.)
N–2	310 (plus 140 m. dolphin)	350	25	5,000/300,000	Private (N.S.C.)
N–3	350 (plus 140 m. dolphin)	350	22	50,000/100,000	Private (N.S.C.)
N–4	210	180	20	5,000/30,000	Private (N.S.C.)

STEVEDORES: *Stevedoring Companies:*

Nippon Express Co. – maximum 4 gangs are available.
(at Sumiyoshi public wharves – Tsurusaki Kairiku Unyu – maximum 4 gangs are available)

Hirohata Kaiun Kaisha – maximum 2 gangs are available for loading steel products (for export) at Nippon Steel Corp.

Tsurusaki Kairiku Unyu – maximum 2 gangs are available for loading steel products (for export).

Nippon Express Co. – maximum 2 gangs are available for discharge steel scrap and pig iron.

Kamigumi Co. – 3 gangs are available for discharging iron ore/coal.

Working Hours:

(a) At Sumiyoshi public wharves: 0800 to 1700 hrs. (No work on Sundays and holidays. No work can be arranged New Year's holidays).

(b) At Nippon Steel Works (coal/iron ore) 3 shifts, 0600 – 1400, 1400 – 2200, 2200 – 0600 hrs.

At Nippon Steel Works (loading steel products) 3 shifts/actual nett working:

1. 0700 – 1100 hrs. meal 1100 – 1145 hrs.
   1145 – 1500 hrs. oiling crane: 0700 – 0715 hrs. 7.00 hrs.
2. 1500 – 1800 hrs. meal 1800 – 1845 hrs.
   1845 – 2215 hrs. oiling crane: 1500 – 1515 hrs. 6.15 hrs.
   2215 – 0200 hrs. meal 0200 – 0245 hrs
3. 0245 – 0700 hrs. oiling crane: 2215 – 2230 hrs. 7.45 hrs.

21.00 hrs.

Average loading/discharging rates:

Bulk cargo:

Iron Ore (sinter)	1600 t.p.h./crane/hatch (dis.)
Coal	1300 t.p.h./crane/hatch (dis.)
Steel Scrap:	1000 tons per day per crane (dis.)
Pig Iron:	2700 tons per day per crane (dis.)
Logs:	30 t.p.h./gang/hatch (dis.)
Steel Cargo: HR. Coil	200 t.p.h./gang/hatch (load)

CRANES:

Shore cranes:

1. Sumiyoshi public wharves — no crane available.
2. N.S.C. loading wharves — 50 t×1, 30 t×3, 20 t×3: (for HR. Coil)
   — 50 t×1, 35 t×1: (for M.S. Plate)
3. N.S.C. Sea-Berth — 81 t×3

Floating Crane: 40 tons capacity available.

FRESH WATER: Good fresh water is supplied from hydrants to vessel alongside wharves. The rate of delivery:

At Sea-Berth 30/50 t.p.h. hydrants every 103 m. (12 hydrants).

At Otozu Wharf: 35/45 t.p.h. hydrants are every 50 m. (21 hydrants).

At Sumiyoshi Public Wharf: 25/30 t.p.h. hydrants every 100 m. (3 hydrants).

At Kyushu Oil Jetty: 25/30 t.p.h. only 1 hydrant is available. 1 day's advance notice required.

At Showa Yuka 70,000 d.w.t. Naphtha Berth: 25/30 t.p.h. 1 hydrant available. 1 day's advance notice required.

Oil barge (tank separated for fresh water) of 40 tons capacity available for emergency case.

TANKERS: Private berths: 24 hours operations.

Kyushu Oil Jetty (Dolphin Style):
Length of berth 480 m, max. LOA 350 m., Max. draft 19.50 m. Capacity 60,000/270,000 d.w.t.

A submarine type rubber oil fence is stretched around the berth.

5 unloading arms are installed on the unloading platform and can be connected directly to ship's manifold. 4 of these unloading arms are 12 in. diameter and used for discharging crude oil.

The other arm is 12 in. in diameter and used for fuel/diesel oil. Nominal capacity for discharging crude oil is 10,000 Kl/hr. and for fuel/diesel oil, 1,000 Kl/hr.

Following information required 3 days before arrival: Manifolds, type, size, number and distance between, also pump capacity.

Showa Denko Naphtha Berth: (Dolphin) Length of berth 400 m. max. LOA 300 m. Max. draft 15 m. Capacity 5,000/70,000 d.w.t.. Product handled – Naphtha. Rubber oil fence provided at berth. 2×12 in. lines, rate 3,000 Kl/hr. LPG also handled.

DENSITY: (Average):
1023 in Summer season at Sumiyoshi.
1023 in Summer season at Sea-Berth.
1021/1023 in Summer season at Otozu Hakuchi.
1024 in Winter season at Sumiyoshi.
1025 in Winter season at Sea-Berth.
1021/1025 in Winter season at Otozu.

FUEL: Bonded bunkers supplied by oil barges (except vessel at Kyushu Oil Jetty where rate of delivery is 450 Kl/hr).

The rate of delivery: 200/500 t.p.h.

Japan Inspection Co.	58–7020

REPATRIATION: See "Documents – Immigration".

TIME: GMT plus 9 hours. No alteration made to clocks during year.

POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance and Fire 119.

TELEPHONES: No telephones can be placed on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

According to new Customs regulation, ship's crew members are requested to land ashore by designated Micro bus or launch from ship at Sea-berth and by launch from ship at Seihin wharves via Customs house.

AIRPORT: Oita Airport: approx. 56 km. to the airport via land. Approx. 16 miles to the airport via sea (hovercraft). Hovercrafts run between Oita City and the New Oita airport. Domestic line only, Toa Domestic Airlines and All Nippon Airways.

GENERAL: *Japan Maritime Disaster Prevention Centre:*
Tsurusaki Kairiku Unyiu K.K. are appointed by the Japan Maritime Disaster Prevention Centre as base for stock piling and use of the materials for removal of discharged oil.

Restrictions: It is prohibited to pump out bilges, to throw overboard sweepings, waste or garbage of any kind and cleaning dust out of holds, whilst the vessel is in port or in pilotage waters according to regulations. Also, not permitted to wash ship's deck and painting ship's outside shell platings.

Services: The following are available: Laundry, hold cleaning, fumigation, deck and engine stores, provisions, dunnage, Japanese charts (HO and BA charts available from Yokohama and Kobe respectively with adequate notice.).

DEVELOPMENTS: Land reclamation continues in 3 areas. Public wharves as well as private wharves will be constructed.

AUTHORITY: Shin Sangyotoshi Kaihatsu-Kyoku, Ohita Pref., 3-33, Mukaibaru Nishi 1-chome, Ohita City *Tel:* (0975) 58-5111.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Tsurusaki Kairiku Unyu K.K., 1000, Oaza Misa, Oita City, Japan. Postal Code 870-01. Tel. 0975–21–6111/9. Cables: Tsurukai Oita. Telex: 07723-89.

OMISHIMA (Ohmishima), Inokuchi Port:

34.16 N. 133.00 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24′ N. Long. 131° 03′ 12″ E.

ANCHORAGES: Omishima Island located at centre of the Inland Sea and lies between Ehime and Hiroshima prefectures. Eastern part of island, Inokuchi surrounded by deep water where holding ground good. Oil company located at Inokuchi. No strong winds.

RESTRICTIONS: No restriction on entry; however mooring and unmooring to be carried out during daytime, regardless of tide and current.

MAX. SIZE: *Tankers:* Maruzen Ohmishima Oil Jetty: Length 140 m. Depth 9.0 m. Coastal tankers of 3,000 g.r.t. allowed to berth. Berth designed to accept max. 7,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from day-light to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tug's line without charge.

TANKERS: No advance information of loading/discharge lines required. No loading facility. Only one berth available for discharge. Product handled, fuel oil. Shoreline, 1×10 in. Discharge rate, 400 t.p.h.

DENSITY: Anchorage 1025. Berth 1025.

FRESH WATER: Not available but usually brought by barge from Onomichi (about 3 hours run to Omishima). Rate of delivery 80 tons to 200 tons per hour which depends on barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: No consuls. Nearest Consulates are in Kobe.

REPAIRS: Minor repairs only.

REPATRIATION: Possible.

AIRPORT: Nearest at Matsuyama and Takamatsu.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: Not available.
GENERAL: Closed port. To conform with regulations vessel obtains special permission from Maritime Bureau and Customs at Takamatsu to enter.

Customs request vessels calling Omishima to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival. This procedure undertaken by Agent. No Quarantine Station, nearest at Matsuyama. Immigration Officer comes from Niihama.
SHORE LEAVE: Immigration issue shore passes valid for 7 days if vessel only calling at one port in Japan or 15 days if vessel calling at more than 2 ports in Japan, further extension possible.
AUTHORITY: Imabari Marine Safety Agency. *Tel:* (0898) 32-0708.

AGENT: See "Niihama".

ONAHAMA (Iwaki City): 36.56 N. 140.55 E.

The port is protected by breakwater, 7,910 m. long and is open to the South.
DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 4 Crew Lists including Passport Numbers.
- 4 Passenger Lists including Passport Numbers.
- 1 Stores List.
- 1 Declaration of Crew's baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: No means of communication with Pilots and vessels should arrange pilotage by advising Agent of ETA. Not compulsory; Pilots are available at the anchorage (Lat. 36° 53′ 05″ N., Long. 140° 54′ E.) for vessels requiring Pilot services.

For Tankers at Lat. 36° 52′ 05″ N., Long. 140° 54′ 00″ E.
ANCHORAGES: Just outside No. 1 West Breakwater. Depth of water 14 m. – 22 m.
RESTRICTIONS: Restriction only by ship's draft. Depths of water alongside wharves 9 m. and 10 m. at low tide, and rise of tide is about 1.40 m. highest. Berthing daylight only. Unberthing at Pilot's option.
MAX. SIZE: *Tankers:* Sea Berth: Max. 80,000 d.w.t. Depth 15.0 m. Max. safe draft, 13.50 m. (Also see "Berthing").
HEALTH: Radio Pratique available. Formalities will be carried out at anchorage.
RADIO: Recommended Master communicates with Agent through Chosi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Chosi and Northbound to contact Nagasaki Radio respectively.
MEDICAL: No advance notice required unless urgent.
TUGS: Normally join vessel on passage from anchorage. Vessel's lines used. 4 tugs available, 1×2,400 h.p., 1×2,100 h.p, 1×1,800 h.p. and 1×800 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TANKERS: Sea Berth: Product handled, Naphtha and Crude Oil. Shoreline 16 in.×2. Discharge rate 9,000 k/l per hour. Bunkers not available ex-pipe-line.
STEVEDORES: At least 24 hours prior notice excluding 2nd and 5th Sundays and holidays required in order for Agent to arrange stevedores. 1st, 3rd and 4th Sundays shall be non-working days. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0800 hrs. next morning 120% additional; Sundays/holidays 100% additional.
DENSITY: 1025.
FRESH WATER: Available from shore lines, at about 30 t.p.h.
FUEL: Domestic oil is available. Bonded oil will be brought from Yokohama with sufficent advance notice, when required.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: None.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Iwaki (0246); Police 54-1111; Ambulance and Fire, 119.
TELEPHONES: No facilities for connecting on board.

SHIPMASTER'S REPORT: 1975.
The port is protected by breakwaters, 1 running North and N.E. 11,170 ft. long and 1 running Westerly and W.S.W'ly 5,520 ft. long, the latter which affords some protection from Southerly swell.
Pilotage: The Pilot boards at the main breakwater entrance. If possible, obtain Japanese Port Chart No. 63 and approach Chart No. 68.
Anchorage: If awaiting Pilot anchor approximately 1 mile E.S.E. of the Southern extremity of the East breakwater.
Max. Size: Several new berths have recently opened, including No. 5 and No. 6.
Health: The centre of the Quarantine Anchorage is located 6 cables S.E. from the Southern extremity of the East breakwater. Radio pratique is accepted if a Japanese Sanitary Inspection Certificate is held.

AUTHORITY: Onahama Port Construction Office, 38-1, Onahama Tatsumi-cho, Iwaki City, Fukushima Pref. *Tel:* (0246) 54-2411.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Onahama Kairiku Unso Kaisha, Ltd., 36 Tatsumi-cho, Onahama, Iwaki-shi, Fukushima-ken. Cable Address: Kaiun Iwaki. Domestic Telex: 08922-80 Onakai J. Tel: (0246) 53-3221/6. Postal No.: 971.

ONOMICHI-ITOZAKI (incl. Mihara, Matsunaga): 34.20 N. 133.16 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declarations, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transiting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat: 33° 56′ 24″ N., Long: 131° 03′ 12″ E.

Inland Sea Pilot also berths vessels at anchorage berth (if Matsunaga Bay – logs), or pier in Itozaki district (Mihara section).

ANCHORAGES: Draft limitations: Itozaki-Mihara 7.5 m. Matsunaga Bay 8.5 m. Tidal range: Maximum (+) 3.91 m. Minimum (−) 0.09 m. Capacity for 3×20,000 ton vessels.

RESTRICTIONS: Entry 24 hours, sailing possible up to 2000 hrs.

HEALTH: Radio Pratique not available. Vessels usually anchor at Wada-Misaki (off Kobe), or Hesaki (off Moji), where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Brought from Fukuyama, Mizushima or Kure, when required.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft and Length overall (m.)*	*Capacity (G/T)*
Municipal Nishigosho Pier	404	6.5	5.0×130	2,000
Municipal Shinhama Pier	250	5.5	4.5×100	2,000
Matsunaga Bay (Anchorage)		5.0–10.0		1×10,000 1× 6,000 1× 3,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available. Method of delivery (1) Barge. (2) Pier. Additional charge for overtime work and in event of bad weather.

FUEL: Domestic oil is available, Bonded oil will be brought from Kobe, Kanokawa, Hirohata or Moji.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 40 cigarettes to take ashore but no spirits.

REPAIRS: Minor repairs possible.

CONSULS: None.

REPATRIATION: Possible.

AIRPORT: Nearest, Tokyo International Airport.

TIME: GMT plus nine hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Port and Harbour Dept., Onomichi City, 8-1, Higashi Gosho-cho, Onomichi City, Hiroshima Pref. *Tel:* (0848) 22-8158.

AGENT: Sub-agent of Dodwell and Co. Chugoku Kaiun Kaisha Ltd., Onomichi Chuo-Sanbashi Bldg., No. 10–3, Tsuchido 2-chome, Onomichi-shi, Hiroshima-ken. Cable Address: Chugokukaiun Onomichi. Domestic Telex: 06422–15. Tel.: Onomichi (0848) 22–3141/4.

OSAKA: 34.39 N. 135.26 E. (See Plan Book)

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: 24 hours' notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15 ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.

Pilotage not compulsory. Pilotage available to container vessels 24 hours a day.

ANCHORAGES: Section Nos. 7 and 8. Section 7 is Quarantine Anchorage. Section 8 for other vessels. Harbour Master allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 42 ft.

RESTRICTIONS: Vessels only permitted to enter from sunrise to 2000 hrs. However, in order to avoid danger, some wharves (oil wharf, Nakayama wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset. Max. depth 39 ft. 4 in., Wharf No. 49.

Depth restrictions at other berths depend upon berth allocated.

MAX. SIZE: Max. permissible length, 750 ft., draft 34 ft. 6 in. Also see "Tankers".

HEALTH: Vessel requiring Free Pratique requested cable directly to "Quarantine Station", Osaka informing ETA, date of departure from last port, name of last port, number of crew and health condition. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

Radio Pratique is available only for a vessel which possesses Valid Sanitary Inspection Certificate issued by the Japanese Government.

RADIO: Osaka Port Radio, 24-hour VHF service on Channels 16, 12, 19 and 20. Osaka Harbour Radar has 24-hour navigation aid and weather information service. Contact by VHF Channels 16, 14 and 22.

RADAR: Harbour radar station supplies information on ship movements, etc.

TUGS: 10 Port Authority tugs. Tugs join vessel just before harbour entrance. Tug's lines used, no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by VHF or radio.

CONTAINER FACILITIES: Berths C1, C2, C3, C4, C5, R2 and R3 each equipped with container handling gantry cranes. Berth C1 equipped to handle Roll-on/Roll-off.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent. General and Seaman's hospitals available.

TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima Oil Wharf, max. LOA 210 m., max. safe draft 11.60 m. Product handled, fuel oil, diesel oil. Minas Waxy. Shoreline 1×12 in. Discharge rate 1,000 t.p.h.

Wharf No. 25. Max. LOA 210 m. Max. safe draft 10.30 m. Product handled, fuel oil. Shoreline 1×14 in. Discharge rate, 850 t.p.h.

DENSITY: Outside anchorage: 1023 – 1025. Near breakwater: 1020 – 1022. Average density inside breakwater 1020. Wharves near estuaries (Aji River, Shirinashi River, Kizu River and etc.): 1016 – 1020.

FRESH WATER: Methods of delivery: by barges or pipe-line. Rate of delivery: 200 ton barges – 4; 160 ton barges – 1; 60 ton barges – 1; Total – 6.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: The following consulates available in Osaka:

Denmark	Korea	Spain
Great Britain	Mexico	

REPAIRS: All grades repairs possible.

DRY DOCKS: Mitsui Shipbuilding & Engineering Co. Ltd., Fujinagata Works, No. 1 dock size 446 ft. 2 in.×55 ft. 2 in., depth 17 ft. No. 2 dock size 541 ft. 2 in.×66 ft. 2 in., depth 23 ft. 5 in.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan). Each person's signature is necessary in it.

Ship's Agent will prepare 2 Inward/Outward Declarations. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot station is 2 miles East from Togashira Island. Pilotage is not compulsory at this port but recommended to take pilotage by Toho Oil Co. Ltd.
ANCHORAGES: Quarantine Anchorage position is Lat. 34° 03′ 55″ N., Long. 136° 13′ 20″ E. Depth of water 60 m. – 80 m. Radius 500 m. However, it is not advisable for vessels to stay there for a long time as there are many fishing boats nearby.
RESTRICTIONS: According to Agreement between Fishery Association and Oil Refinery, ship's movement is prohibited at night. See "Berthing".
MAX. SIZE: See "Tankers".
HEALTH: Radio Pratique available. Formalities carried out after entering the port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs usually join vessel at Outer Harbour (near Quarantine Anchorage) and tug's line is used. Tugs come from Nagoya. VHF Channel 16, 6, and 12.
BERTHING: Time limit of Pilot boarding for berthing to Toho Oil Terminal is 3 hours before sunset due to the agreement between Fisheries and Toho Oil Co. Ltd.
MEDICAL: No advance notice required unless urgent. Hospital facilities available.
TANKERS: Toho Oil Owase Pier: Depth of water, 17.3 m., Max. d.w.t. 150,000, Max. LOA, 275 m. Max. safe draft 16.00 m. Product handled crude oil. Shoreline 2×12″. Discharge rate, 4,500 k/l.p.h.

Toho Oil Sea Berth: Depth of water, 21.0 m. Max. d.w.t. 250,000. Max. LOA 350 m. Max. safe draft 19.00 m. Product handled, crude oil. Shoreline 2×20″. Discharge rate 7,000 k/l.p.h.
FRESH WATER: Fresh water can be supplied to the vessel from pipe at quay. Supply capacity 30 t.p.h.
FUEL: Domestic oils available. Bonded oil will be brought from Nagoya, Yokohama, Chiba or Kobe.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and net tonnages.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS/REPAIRS/AIRPORT: None.
TIME: GMT plus 9 hours. Permanent.
TELEPHONES: Emergency numbers, Owase Police Office (05972) 2-0004; Owase Fire Station (05972) 2-2020; Owase Hospital (05972) 2-2118. No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but extension possible if ship stays longer.
AUTHORITY: Owase Doboku (Public Works) Office, 2-11, Hayashi-machi, Owase City, Mie Pref. *Tel:* (05972) 2-2017.
AGENT: Nippon Express Co., Ltd., Owase Branch. Tel: (05972) 2-2217. Cable: "Nexco Owase". Uyeno Unyu Shokai, Yokkaich Branch.Tel: (0593) 45-2271. Cable: "Uyeno Shell Yokkaichi".

SAKAI (Including Senboku and Hannan Port): 34.34 N. 135.27 E. **(See Plan Book)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
7 Crew Lists including Passport Numbers.
2 Passenger Lists.
1 Store List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (if first port of call in Japan).

Ship's Agent will prepare inwards/outward Declaration, 1 Cargo Manifest in transit using specific form. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Cable address "Hanshinpilot Osaka". 24 hours' notice required. VHF (Osaka Port Radio), Channel 16, JBD Osaka Radio, Channels 25, 26 and 27. Three boats capacity 15 tons, 147 h.p. Pilot boards anywhere within harbour area, but preferably at quarantine anchorage – sector No. 7. Bad weather: unable to take Pilot. Boarding measures: Safe Pilot ladder. Anchorage for vessel waiting Pilot: as Pilot boarding area.

Inland sea Pilot cable address: "Anjin Kobe" can also be used for following wharves: Kansai Oil Co. Ltd., Sakai Wharf; Koa Oil Co. Ltd., Sakai Wharf.
ANCHORAGES: Quarantine inspection carried out at quarantine anchorage Sect. No. 7 where max. draft 12.5 m. Vessels with draft over 12.5 m. have to obtain free pratique at other ports.
RESTRICTIONS: Entry not possible after sunset. Sailing possible anytime but Pilots not available after sunset.

(a) Arrival notice for ships over 500 tons gross must be given to Harbour Master 48 hours prior to arrival.

(b) Entrance passage draft limitation: 11.20 m.
MAX. SIZE:

Name of Wharf (Jetty)	*Max. draft* (m.)	*Max. LOA* (m.)
Nippon Steel Wharf 3-A/3-B	14.0	255
,, ,, ,, 2-H	10.2	181

,, ,,	2	6.5	400	3	3,000

There are many additional berths with depth of 2m. – 4m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
General Wharf	Fuel Oil	12 in.×3	7/8,000
	Crude Oil	12 in.×3	9,000

Mitsui Toatsu	Propane	12 in.×1	1,000
(LPG)	Butane	12 in.×1	1,000
Osaka Gas			
Senboku Jetty (LNG)	LNG	8 in.×5	2,000

DENSITY: Osaka Gas Wharf and Nippon Steel Corporation Wharves 1020 to 1025.

All other wharves, 1010 to 1025.

FRESH WATER: Minami Hakuchi anchorage by barges. All other wharves by shore line.

FUEL: Most domestic and bonded fuels available.

GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.

OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Each man allowed 200 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: None.

REPAIRS: See "Osaka".

DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.

REPATRIATION: Possible.

AIRPORT: International Airport Osaka, 45 km. distant.

TIME: GMT plus 9 hours No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: See "Osaka".

TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.

SHORE LEAVE: Local Immigration Officers issue shore leave pass valid for 3 days, but a 9 day pass is obtainable in case where a vessel stays in port for longer period.

DEVELOPMENTS: 29 berths under construction at Sakai-Senboku. Max. depth 12 m. 53 berths under construction at Hannan, depths from 4 m. – 12 m.

SHIPMASTER'S REPORT: February 1980. (L.P.G. Carrier).

Osaka Bay: Also see "Kobe" – "Shipmaster's Report".

Entry: No transit of Tomogashima Strait at night from Sunset to Sunrise. This is not a regulation but a Japanese Government request which for all intents and purposes is a requirement.

Pilotage: Bay Pilot is a recommendation for LPG carriers which again means a requirement. About 97% of overseas shipping and 60% of Japanese foreign going shipping use this service.

Lights: Flashing red over Green to be permanently on day and night in Japanese waters if vessel over 200 m. length. Red is for dangerous cargo and flashes at 120 to 140 flashes per minute and green for vessels over 200 m. flashes at 180 to 200 flashes per minute.

Two black cylinders by day for over 200 m. length plus 1st substitute over 'B' for dangerous cargo.

Fire Wires/Mooring Line: To be rigged starboard side fore and aft, plus 1 mooring line at each end. In actual fact we kept the fire wires in during transit of Osaka Bay in case of slippage and getting caught in propellor. The Pilot approved.

Navigation: Sumoto – Oki Light Buoy Lat: 34° 21.1′ N., Long: 135° 00′ E. must be left to port (North or South bound). This is not indicated on BA.3614 as a traffic separation buoy. The Pilot advised me that some foreign ships without Pilot leave this buoy on the wrong side, if JMSA catch any vessel doing this they are liable to prosecution. No navigation in visibility less than 1 mile and no berthing when wind speed exceeds 12 m./sec.

Pilot: Boards about 7 miles South of Tomogashima. Cable: 'Bay Pilot Kobe' 12 hours ETA, if any alteration cable 'Urgent Bay Pilot Kobe'.

Then by VHF through Kobe Port Radio – range 80 miles. Pilot nearly always starboard side. Boards from 3 fairly fast purpose built red hulled cutters based at Sumoto on Awaji Shima Island.

Pilot disembarks about 1 mile South of Tomogashima Strait.

Entry: For LPG carriers and certain other dangerous classification ships there is no night passage of Tomogashima Straits or Osaka Bay which means from about 1600 hrs. to 0600 hrs. there is no transit. Further complications are:

(1) At the berths themselves at Sakai and Kobe, LPG movements and berthing during darkness prohibited.

(2) If vessel has no Sanitary Certificate Free Pratique cannot be given which means anchoring at Osaka Quarantine anchorage for Pratique.

(3) The cost of an escort tug whilst vessel is at anchor is fairly costly about £100 per hour.

Therefore if Pratique is required (No Sanitary Certificate) and berthing that day is undertaken, arrival at Tomogashima pilot station can only be between 0600 to 0930 hrs. as the Quarantine service finishes for lunch time and if pratique is not granted before lunch, entry is unlikely to take place that day.

If Sanitary Certificate is held, Pilot boarding at Tomogashima can be between 0600 to 1200 hrs.

Pratique: Free Pratique can only be given on proper notification by Radio 24 hours before arrival to Quarantine Service, prefixed by RPM through Agent. Current Sanitary Certificate must be held.

Pratique is granted whether or not Sanitary Certificate held but as above delay will be entailed. Granted at Osaka Anchorage between 0830 to 1200 hrs. and 1300 to 1700 hrs. Sanitary Certificate costs about £100 and is valid for 1 year. Application is made through Agent who arranges prior inspection by 'Rentokil' agency (£100) for any debugging and water testing and then followed by Government inspection which takes about 1.5 hours. Storerooms, fridges, galley, toilets, garbage bins, drinking water, etc., etc., all checked. This certificate entitles vessel to Free Pratique.

If the ship is not calling at Japan again within the 12 month period it is of little value, otherwise if likely to call, for an LPG ship with restricted entry the £200 could be well spent.

For pratique, vessel anchors in Osaka Quarantine anchorage position Lat: 34° 37′ N., Long: 135° 21.5′ E. (approx.).

Escort Boat: A fire-fighting escort tug is required for Loaded LPG ships in port limits. An escort boat of smaller capabilities is required for LPG ships in Vapour taking on bunkers or Lub oil in port limits.

Approximate cost of firefighting tug is £100 per hour.

Therefore to anchor overnight to await berthing in loaded condition will require escort tug costing in region of £1,500. During cargo operations instant communication must be maintained with escort tug by VHF or Walkie Talkie.

Sakai:

Notice of Readiness: On anchoring at Quarantine anchorage or when Harbour Pilot boarding, whichever first.

Agent suggests tendering Tomogashima Pilot and seeing if receiver accepts.

Pilot: Harbour Pilot boards at Quarantine anchorage or at No. 1 and 2 buoys Hamadera Passage channel as indicated on BA.3614.

Depth: Minimum depth in channel found to be 18 m.

V.H.F.: Kobe Port Radio, very powerful station – 80 miles range. Osaka Radio used for public correspondence.

Tugs: Two tugs join about half way down buoyed channel. Usual powerful Japanese type, tug's lines.

Berth: Mitsui Toatsu – Fertiliser berth: Position Lat: 34° 32.45′ N., Long: 135° 25.6′ E.

Port Side to.

Depth: 14.5 m.

Stern overhangs end of quay.

Gangway can be easily landed.

No stores on quay.

If wind speed exceeds 15 m./sec. no berthing and instant disconnection.

Vessel must be connected and have commenced pumping by sunset.

Solid concrete pile quay wall with ample fenders.

Lines: 3, 2, 2, each end. Line boat available, about 1.5 hours to tie up.

Connections: Rubber hoses for liquid and Vapour Return.

Propane line 12 in., Butane line 12 in. connection ASA 150.

Vapour 8 in. for both.

Shore labour with shore reducers.

Takes about 1.5 hours to connect.

Rate: Maximum able to accept: Propane: 800 m.t.p.h.
Butane: 1,300 m.t.p.h.

We were pumping at very close to this figure all the time with 3 pumps on each grade – shore restriction.

Cargo General: Little back pressure.

We had no surveyor, all tonnages on shore figures.

Plant capacity: Propane: 1 tank of 20,000 metric tons.
Butane: 3 tanks 12,000 metric tons.
1 tank 24,000 metric tons.

Approximately 15 m. of hose is used from shore manifold.

Fire axe required for moorings each end.

Watchman: English speaking watchman with telephone on board throughout 24 hours.

Departure/Arrival: Latest 1700 hrs.

Arrival: Hoses must be connected and discharge commenced before sunset.

Facilities: No stores alongside.

Water available, about Yen 700 per tonne.

Doctor will board vessel at minimum charge of Yen 20,000.

STD telephone to U.K. very expensive.

Crew changes: Via Osaka International Airport – no difficulties.

Repairs – Diawa (Company accredited Japan repair company).

Kobe H. Kajita (Konishi now in general office). 078–681–6001 Telex 5622–849 Daiwindus.

Documents: 1st Port:

1 Health Declaration
1 Vaccination List.
1 Application for Shore Pass.
3 Crew Manifests (Crew Declaration) – Japanese Form.
7 Crew List – Ship.
1 Declaration (Ship Information) Japanese Form.
3 Ship Stores.

If any crew changes new personnel must be added onto original crew list (Manifest).

Seal Bond only, leave Beer Room open.

Usual procedure with shore passes – all handed in on departure, bottom torn off if calling at 2nd port and re-application made.

For 2nd Port:
7 Crew Lists.
1 List Ship's Stores.
1 Application Shore Passes.

AUTHORITY: Sakai Port Administration Office, 1, Shiohama-cho, Sakai City, Osaka. *Tel:* (0722) 38-5241.

AGENT: See "Osaka".

SAKAIDE: 34.19 N. 133.51 E. (See Plan Book)

DOCUMENTS:

1 Voyage Memorandum (List of Ports of Call).
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio or Choshi Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: Port located on North coast at East part of Shikoku Island in Inland Sea.

Boundaries and Areas. Area bounded by line joined with three points, East corner of Sosha river mouth, Mamako-Hana of Semi Jima and Tako-Saki of Shotsuji-Yama.

Depth of water inside harbour limit: 9 m. Outside harbour limit: 13 m.

RESTRICTIONS: Vessels entering and/or leaving during daytime only at wharves; but no restrictions day and night at sea anchorage provided favourable weather conditions prevail.

MAX. SIZE: East section of Centre pier, length 160 m., breadth no limit, depth 9 m.

West section of Centre pier, length 110 m., breadth no limit, depth 7.50 m.

Anchorage inner harbour, length no limit, breadth no limit, depth 7 m. – 9 m.

Anchorage inner harbour, length no limit, breadth no limit, depth 13 m.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from Cholera infected area within 10 days, Master must advise crew and passengers health condition prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Sakaide Port Radio is located on top of Seijima (Lat. 34° 21′ N., Long. 133° 51′ E.). Watch is kept from 0600 to 2000 hrs. each day on Channel 16.

TUGS: Wharves: Join vessel at Sea Anchorage, using tug's line without charge. Sea Anchorage: No tug required in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Max. Size* (d.w.t.)	*Max. LOA* (m.)	*Max. draft* (m.)	*Remarks*
Mitsubishi "A"	70,000	275	13.00	Coal
Mitsubishi "B"	20,000	200	13.00	Coal
Mitsubishi "C"	55,000	220	11.50	Coke loading
Centre Pier	20,000	175	9.00	Fertiliser, grain

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Asia Kyoseki Refinery No. 2 Pier. Max. size 50,000 d.w.t. Max. LOA 230 m. Max. draft 12.40 m. 2×24 in. for crude (4,000 k/l.p.h.); 1×16 in. for fuel (1,000 k/l.p.h.); 2×14 in. for chemical products (10,000 k/l.p.h.).

Asia Kyoseki Pier No. 1 (Sea Berth) max. size 100,000 d.w.t., depth alongside 19.6 m.; 2×16 in. connections for crude. Max. unloading rate 10,000 k/l.p.h.

DENSITY: Inside harbour limit 1025. Outside harbour limit 1025.

FRESH WATER: Sea anchorage. No water barge available but usually brought from Onomichi (about 4 hours run to Sakaide). Rate of delivery 80 to 200 t.p.h. dependent on barge.

Centre Pier: Can be supplied by shore line with capacity 25 t.p.h.

Mitsubishi Chemical Industries Wharf: Can be supplied by shore line with capacity 60 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, Osaka and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: No specific precaution.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per gang per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: None. See "Kobe".

REPAIRS: Only minor repairs.

SURVEYORS:

1. Nippon Kaiji Kentei Kyokai is stationed at Sakaide.

2. Nippon Kaiji Kyokai (NK Class) and Lloyd's Register are stationed at Sakaide.

DRY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is suitable to dry dock. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at present for ship building and after services.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest Takamatsu, All Nippon Airways 11 flights to Osaka and one to Tokyo and TOA domestic airlines to Tokyo/Fukuoka.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: National Holidays – see "Niihama". Local Holidays: New Year's Day (Lunar Calendar) January 30th; May Day May 1st; Memorial Day of the Sea July 20th; Bon Festival August 8th.

No ship's movement can be effected on January 1st, 2nd and 3rd, August 8th and October 15th.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Sakaide Maritime Safety Base, 6-2858.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. As wharf of above works located outer harbour limit of Sakaide port, the undermentioned procedures required: In conformity with regulations, vessel required to get special permission for entering into closed port, which will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals Wharf to obtain special permission for entering. If tonnage dues paid prior arrival, this procedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to special water zone navigation order. Imperative to exclude water surfaces with established Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.

STORING: See "Prelims", page viii.

1. Available by both, however, for Asia Kyoseki by barge.
2. Available during cargo operations.
3. Available, however at Mitsubishi "A" or "B" berth – by barge for heavyweight goods.
4. No, however, at Centre Pier East/West they are available.
5. No special regulations.
6. Yes.

BANKS: No American/European banks. But it is possible to collect foreign currency, especially U.S. Dollars, at The 114th Bank, Ltd., Takamatsu.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but extension for next 7 days possible if ship stays longer.

AUTHORITY: Sakaide Port Administration Office, 5-32 Irifune-cho, Sakaide, Pref. of Kagawa, Japan. *Tel:* 08774-6-2858. *Contact:* Port Captain.

AGENT: Asia Marine Agency Ltd., 1-3-2, Irifune-cho, Sakaide-shi, Kagawa-ken. Cable Address: Asiamarine Sakaide. Telex: 05825689 Asimar J. Tel.: (08774) 6-6209/6215.

SAKATA: 38.55 N. 139.48 E. (See Plan Book)

Located at mouth of Mogami River. Strong wind blows from Japan Sea November to March.

In Winter season, wave height between 3 m. to 5 m., length 70 m. to 80 m. and period 7 to 10 seconds. Current South to North along coastline.

TIDAL RANGE:

Higher high water	+61 cm.
Spring tide high water	+45 cm.
Neap tide high water	+41 cm.
Mean sea level	+39 cm.
Neap tide low water	+35 cm.
Spring tide low water	+31 cm.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Order Pilot through Agent. In bad weather, wait instructions from Agent.

ANCHORAGES: All sea areas (except waterway) available for anchorage. No prohibited anchorage areas. Pilot station and quarantine anchorage position is the area in the 500 m. radius circle centre of which is 260° – 3,100 m. from Sakata Light Station.

RESTRICTIONS: Ship movements in daytime only.

MAX. SIZE:

Name	*No. of Berths*	*Length (m.)*	*Depth (m.)*
Kominato Wharf	1	270	−13.0
Sumikei Wharf (Private)	1	270	−13.0

HEALTH: At first port of call Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Niigata. Call sign JCF. Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan.

If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: One of 800 h.p. and one 2,000 h.p.

BERTHING: No particular requirements.

Agent communicates by means of ship's radio with respect to the exact time when the Pilot has to be taken on board.

STEVEDORES: In order to arrange stevedores, advance notice required by Agent at least 24 hours before, except Sundays and National Holidays,

When berthing at Ohama Pier (No.1), industrial salt and any ore in bulk handled at a rate of 150 t.p.h by bridge transporter.

Logs, 1,400 cu.m. per day are handled by ship's winches.

MEDICAL: No advance notice required unless urgent. Medical facilities available at Sakata City Hospital.

TANKERS: Berthing facilities are available. Draft not to exceed 8.5 m.

FRESH WATER: Wharf feedwater only. No water boat.

FUEL: All kinds of bonded oil available at Bay of Tokyo, Bay of Ise and port of Kanmon. Bunkers lightered from Hakodate provided at least 7 days' notice given.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages.

Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: If voyage over 30 days – 200 cigarettes and one bottle of spirits per man.

CONSULS: Korean Consulate Tel: 0222-21-2751. Consul: Mr. Cho Kian.

REPAIRS: Minor repairs only.

REPATRIATION: Crew replacement conducted basis "landing for transfer to another vessel".

AIRPORT: Yamagata Airport, situated 105 km. from Sakata. Two flights per day.

TIME: GMT plus 9 hours. No alterations.

HOLIDAYS: Public offices closed on Sundays and National holidays. Cargo work every day except 1st and 3rd Sunday of each month and 1st, 2nd and 3rd January.

POLICE/AMBULANCE/FIRE: Police (urgent) Tel: 110; (usual) Tel: 22-6611. Ambulance (urgent) Tel: 119; (usual) Tel: 22-3214. Fire (urgent) Tel: 119; (usual) Tel: 22-3214.

TELEPHONES: No facilities for placing on board.

SERVICES: Compass adjustment.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extensions possible if ship stays longer.

AUTHORITY: Sakata Port Office, 5-15 Funaba-Cho, 2-Chome, Sakata-Shi, Yamagata Pref. *Tel:* 0234-23-5444.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Sakata Kairiku Unso Co., Ltd., 6-19, 2-chome, Funaba-cho, Sakata-shi, Yamagata-ken. Cable Address: Kairikusakata Sakata. Domestic Telex: 08733-08, Tel: Sakata (0234) 22-1801.

SASEBO: 33.10 N. 129.43 E. (See Plan Book)

DOCUMENTS: See "General – Customs and Immigration".

PILOTAGE: Compulsory. Vessel should keep Pilot closely advised through Agent, of ETA pilot station at least 24 hours prior arrival and any subsequent change. Pilot boards vessel 1 mile N.W. Kogosaki lighthouse. (Lat: 33° 06′ N., Long: 129° 38′ E.). In bad weather, Pilot will board at Lat: 33° 05′ 48″ N., Long: 129° 40′ 24″ E.

Telegraphic address of Port Captain "JNK" 500 kHz (Sasebo Maritime Safety Office).

ANCHORAGE: Ample good holding ground in inner harbour, but is controlled by U.S. Navy and only following anchorage available for commercial vessels: No. 3 Section, Depth 10 m. – 37 m. Capacity 20,000 g.r.t. and over × 10.

RESTRICTIONS: Entry and departure from sunset to sunrise only allowed under extenuating circumstances subject to Port Captain's special permission (U.S. Naval vessels excepted). No particular restrictions upon draft or tide conditions. Berthing during day only. Controlling depth of water – in the passage 23 m. – 54 m., at anchorage 10 m. – 37 m.

WEATHER: South-westerly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 26.1 m./sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.

MAX. SIZE: See "Berthing". No particular limitation for entering port. For berthing however, acceptable length, draft and breadth will be decided case by case in accordance with conditions of each berth consulting with Pilots, U.S. Navy and Port Captain. No tanker installations outside port.

HEALTH: See "Moji". Quarantine station: Lat: 33° 05′ 30″ N., Long: 129° 42′ 00″ E. 1.5 miles East of Kogosaki Lighthouse. Vessels chartered by USN (GAA, T/C, CVC, V/C) shall be cleared by U.S. Navy Quarantine and service available after sunset also.

RADIO: See "Yokohama".

TUGS: Normally join vessel about 0.5 – 1 hour prior berthing and tug's lines used. Charge for use of lines included in tug hire.

IDENTIFICATION CARDS: See "General – Immigration".

CONSULS: None.

REPAIRS: All deck and engine repairs possible.

DRY DOCKS: Sasebo Heavy Industries Co. Ltd. No. 3, dry dock: Length 370 m. Width 70 m. Depth 15 m. Max. ship (d.w.t.) 300,000. Another 5 dry docks available.

AIRPORT: Itazuke Airport, Fukuoka, about 120 km. (about 180 minutes by taxi). Served by regular airlines. Nagasaki Airport, Nagasaki, about 50 km. (about 70 minutes by taxi). 10 flights daily (All Nippon Airways).

TIME: GMT plus 9 hours. No alterations to clocks throughout year.

POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).

TELEPHONES: No facilities exist for placing telephones on board.

GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member). Arms and Ammunition List, Narcotics List, List of Port of Call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration Officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 72 hour landing pass for crew members and passengers. Two copies each of Crew List and Passenger List are required by them. Providing vessel's Agent with these documents beforehand will help in expediting Immigration business on arrival. When vessel in port more than 72 hours, landing passes will be extended every 72 hours on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Services are rendered from 0900 hrs. to 1700 hrs.

SERVICES: Hold cleaning. Compass adjusting. Fumigation.

AUTHORITY: Port & Harbour Bureau, Sasebo City, 3-5, Yorozu-cho, Sasebo City, Nagasaki Pref. *Tel:* (0956) 22-6128.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Nishikyushu Warehouse Co. Ltd., Tategami-cho, Sasebo-shi, Nagasaki-ken. Tel: Sasebo (0956) 24-6161. Cable Address: Soko Sasebo. Telex: 748227 Soko J.

SHIMIZU: 35.01 N. 138.31 E. (See Plan Book)

DOCUMENTS: *Quarantine* (only when arriving from a foreign port):
1 Maritime Declaration of Health.
1 Crew List.
1 List of Passengers (if any on board).
Log Book and Registry, Certificate of Vaccination and Derat Certificate (or Derat Exemption Certificate) should be readily available.

Customs:
1 Declaration Inward/Outward of vessel.
1 Ship's Registry.
1 Last Port Clearance.
1 Store List including arms and narcotics.
2 Manifests of Cargo for discharge (prepared by Agents).
1 Manifest of Through Cargo.
1 Crew List.
1 List of Passengers.
1 Declaration of Crew's Baggage (only necessary if crew members have to land personal effects ashore).
1 Parcel List.

Immigration:
2 Crew Lists.
1 Application for Shore-passes.
2 Lists of Passengers.
1 Declaration Inward/Outward of vessel.

Harbour Master:
1 Declaration Inward/Outward of vessel.

Port Authority:
1 Declaration Inward/Outward of vessel.

PILOTAGE: Pilotage should be arranged through Agent by VHF (Shimizu Port Radio, Channel 16, 12, 14, 20), or vessels requiring Pilot should hoist signal flag "G". Pilot Station: on the point 043° – 1500 m. from Shimizu Lighthouse (the lighthouse: Lat. 35° 00′ 24″ N., Long. 138° 32′ 00″ E.)

ANCHORAGES: See Section 3 on Chart of Shimizu.

MAX. SIZE: Dry-cargo max. draft 12 m. Length and breadth no restriction.

HEALTH: Free Pratique automatic calling at another Japanese port. Radio Pratique available.

TUGS: Normally join in-coming vessels near Pilot station. Tug's lines usually used no extra charge.

	20		Duplex	Communication

CERTIFICATES: Ship Register, Radio and Safety Equipment Certificate, Derat Exemption Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco: 60 cigarettes permitted. Wine or spirits, according to the length of voyage: none within 1 month voyage, 1 bottle over 1 month, 2 bottles over 3 months.

IDENTIFICATION CARDS: Passport or Seaman's Book.

CONSULS: None.

REPAIRS: Most repairs and overhauls possible.

DRY DOCKS: Kanazashi Shipyard (largest dry dock 120 m. × 18.6 m., 5,000 tons).
Miho Shipyard (90.5 m. × 16 m. × 7.5 m.).
Floating Dock: 125 m. × 22 m. 9.5 m. (internal dimensions).

SURVEYORS: Japan Marine Surveyors & Sworn Measurers' Association, Shimizu Branch, 7-5, Irifune-cho, Shimizu, Japan. Tel: 52-0177.

Japan Oil Stuff Inspectors Corporation, Shimizu Branch, 1-28, Irifune-cho, Shimizu, Japan. Tel: 52-8549.

New Japan Surveyors & Sworn Measurers' Association, Shimizu Branch, 7-17, 1-chome, Minato-cho, Shimizu, Japan. Tel: 53-1290.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: No work from December 31st to January 3rd and Shimizu Port Festival Day (First Sunday in August). Also the 1st and 3rd Sunday of every month, except containers.

AIRPORT: 263 km. from Narita International Airport, 180 km. from Haneda.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119; Water Police 52-0200.
TELEPHONE: Telephones can be arranged onboard at most berths by calling 64-2002.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days but 7 days' extension possible if ship stays longer.
SHIP SUPPLY SERVICE: Operated by Shimizu Port Service Ltd., 10-78 Hinode-Cho, Shimizu City, Shizuoka Pref., Japan.
AUTHORITY: Shimizu Port Administration Bureau, 5-19 Hinode-Cho, Shimizu City, Shizuoka Pref., Japan. *Tel:* Shimizu (0543) 53-2201. *Contact:* Katsumi Saito, Chief of Planning and Development Division.

AGENT: Sub-Agent of Dodwell & Co. Ltd. Suzuyo & Co., Ltd. 11 – 1 Irifune-cho, Shimizu-shi, Shizuoka-ken. Cable Address: Suzuyo Shimizu. Domestic Telex: 3965-671, 672, 677 Suzuyo Smz. Tel: Shimizu (0543) 53-3111/3914 and 52-1398.

SHIMONOSEKI (including Mutsure): (See Plan Book)
33.57 N. 130.58 E.
(See "Kanmon-Ko")

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: See "Moji".
ANCHORAGES: Mutsure anchorage: Undermentioned area is open port. The sea area surrounded by:
- *(a)* Line connecting Daibahana on Takenoko Island and top of Wagora Island.
- *(b)* Line connecting top of Wagora Island and Udonohama on Mutsure Island.
- *(c)* Coastline between Udonohama and Unoishibana on Mutsure Island.
- *(d)* Line connecting Unoishibana and Anse-no-Shiri in Shimonoseki.
- *(e)* Line connecting Anse-no-Shiri and point at 370 m. from Daibahana on the line connecting Daibahana and top of Wagora Island.
- *(f)* Line Long. 130° 54′ E.

Anchorage includes a part of quarantine anchorage and Mutsure oil berth; depth 10 m. – 25 m.
RESTRICTIONS: See "Moji".
MAX. SIZE:

Wharf	*Numbers*	*Length (m.)*	*Depth (m.)*	*Capacity (g/t)*
Daiichi Pier	9–10	330 m.	8.5	10,000×2
	12	165	8.0	10,000×1
	13	165	8.5	10,000×1
Daini Pier	15	150	8.5	10,000×1
	16	165	8.5	15,000×1
	17	210	9.1	15,000×1
Hosoe Wharf	18	130	7.2	(Exclusively used by Kampu-Ferry)
	19	130	7.0	5,000×1
	20	185	9.0	15,000×1
	21	185	9.4	15,000×1
Hananocho Pier	24	185	9.5	15,000×1
	25	185	10.0	15,000×1

Note: If both Nos. 12 and 13 piers are used, LOA up to 160 m.
If both Nos. 15 and 16 piers are used, LOA up to 160 m.
If both Nos. 20 and 21 wharves are used, LOA up to 230 m.
If both Nos. 24 and 25 piers are used, LOA up to 230 m.

Fukuura Berth (for lumber discharge only)		120	7.2	5,500 d.w.t

Also see "Tankers".
HEALTH: See "Moji".
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
VHF: See "Yawata".
TUGS: See "Moji".
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
Mitsui Kinzoku Dolphin Pier: Max. d.w.t. 60,000. Max. LOA 230 m. Max. draft 11.90 m. 1 shore crane. Bauxite and phosphate handled.
BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: It is recommended that advance notice be given if treatment required.
TANKERS: Shell Oil berth situated at Hikoshima, on Southwestern end of Honshu, facing Moji across Kanmon Strait. In vicinity of berth, flood tide sets to East, ebb tide to West, current about 5-6 knots. Mooring berth consists of 4 buoys, approximately 140 m. offshore, space between buoys being approximately 270 m.

Max. dimensions of vessel which can be safely accommodated are 18,000 d.w.t., LOA 170 m., breadth unlimited, draft 9 m. Product handled, fuel oil. Shoreline 1×8 in. Discharge rate 500 t.p.h.

Vessels only berthed or unberthed when tide sets to West during daytime only. In approaching berth, as vessel comes against tide, full engine power and tug assistance required. One 10 in. pipe connected to vessel; discharge efficiency per hour 500-600 kl.

Nissin Tanker Pier located about 610 m. South of Mutsure lighthouse. At this berth, West-going current stronger than East-going and ship taken to berth only on Westerly current, with stern towards South. Most suitable berthing time is 2-3 hours after commencement of West-going current. Max. dimension of vessel which can be accommodated at this berth is 95,000 d.w.t., LOA 246 m., draft 15 m. Product handled, fuel oil. Shoreline 3×12 in. Discharge rate 2,000 t.p.h.
DENSITY: 1025.
FRESH WATER: Good fresh water supplied either from water barge or from hydrants alongside wharves. Rate of delivery from water barge 50 t.p.h. and from hydrants 40-50 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Also see "Moji, Fuel".
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
CONSULS: Korean Consul, Tel. (66) 5341.
REPAIRS: All types of repairs possible.
DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 & 4 for smaller vessels).
Hayashikane Shipbuilding K.K. 3 dockyards (Max. 1,100 g.t.).
Towa Shipbuilding K.K. 1 dockyard (Max. 1,000 g.t.).
Mitsubishi Heavy Industries Ltd.
Dimensions of docks:

	Length (m.)	*Breadth (m.)*	*Draft (m.)*
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Max. size of vessel for docking:

	Length (m.)	*Breadth (m.)*	*Draft (m.)*
No. 1 Dock	160.00	22.50	5.50
No. 2 Dock	143.00	19.30	5.00

REPATRIATION: Possible.
AIRPORT: Approx. 80 km. to Fukuoka airport; about 1.5 hours by train. Approx. 18 km. to Kitakyushu airport; 40 minutes by taxi.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police station 110; Ambulance/Fire Station 119.
TELEPHONE: Possible to place telephone on board.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
DEVELOPMENTS: Nishiyama lumber discharge wharves (depth of water 12 m.) and a lumber pool for larger vessels are under construction at Western centre of Hikoshima Island, facing Kanmon Straits, for completion in 1985.
AUTHORITY: Shimonoseki Port Authority, (750) 1–1 Nabecho, Shimonoseki City, Japan. *Tel:* (0832) 31-1111. *Contact:* S. Takaoka, General Manager.
AGENT: See "Moji".

SHIMOTSU (including Kainan): 34.06 N. 135.08 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot request to be given to pilot station through Agent. Advance notice of ETA: 72 hours and 24 hours before arrival. No VHF available. Pilot usually attends by tug boat. No special pilot boat. Pilot boards Lat: 34° 07′ 25″ N., Long: 135° 06′ 45″ E. No alternative area in event of bad weather. Location of anchorage for awaiting pilot – Lat: 34° 07′ 25″ N., Long: 135° 06′ 45″ E., as pilot station.

ANCHORAGES: Quarantine anchorage, 20 m. depth.

RESTRICTIONS: Entry daytime only.

Yura Bay: Vessels no longer than 110 m. berth. Daytime entrance only regardless of tide and current.

MAX. SIZE:

	Max. d.w.t.	*Length*	*Draft*
Tonen O-1	236,000	480 m.	18.50 m.
Tonen E-1	70,000	400 m.	12.50 m.

TAGONOURA: 35.06 N. 138.42 E. (See Plan Book)

PORT LIMITS: Commences 5 cables from the harbour entrance. A vessel is considered an "arrived ship" at this point.
DOCUMENTS: Same as "Shimizu".
PILOTAGE: Ordered 24 hours in advance through Agents. If possible vessels should obtain Japanese Chart 1075 for the approaches and Japanese Harbour Plan No. (P) 98. Two fixed green leading lights visible 13 miles lead the ship through the entrance on a bearing of 323.5° True. Vessels should approach on this transit until 1 mile off the breakwater entrance which is marked by an occ. G. 6 second 14.4 mile light on the West breakwater and a occ. R. 6 second 15 mile light on the East breakwater. The Pilot will board from a tug 1.25 miles from the entrance. 2 tugs will attend for the entrance transit.
ANCHORAGES: Due to the steep nature of the coast no roadstead anchorages are available. In the event of having to wait for Pilot or weather to moderate it is necessary to steam outside the entrance or anchor and wait near Shimizu Quarantine Station.
RESTRICTIONS: The allowable draft should be verified with the Agents before arrival as this does vary, the average being 6.5 m. alongside the berth. The entrance channel has a minimum depth of 9 m. at all times.
MAX. SIZE: LOA 600 ft., beam 100 ft. These extremes are likely to be increased as the port develops.
HEALTH: Radio Pratique is unavailable even if vessel holds a valid Japanese Sanitary Inspection Certificate; if not, then quarantine will be cleared at Shimizu.
RADIO: Chosi Radio. When nearing Shimizu a call can be made via Shimizu Radio VHF requesting them to telephone ETA to Tagonoura Pilot.
TUGS: 2 tugs normally required. These are ordered from Shimizu in advance by Tagonoura Agents. The same applies on departure.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t)

Parcel List.

Osaka Immigration Office (Shimotsu Branch):
1. Before ship's arrival: "Notice of Ship's arrival" is to be submitted 24 hours before ship's arrival with Crew List (Name, Nationality, Date of Birth, Number of Passport or Seaman's Book, Rank).
2. On ship's arrival: "Report of Ship's Arrival" is to be submitted with Crew and Passenger Lists (if already submitted before ship's arrival, not required).
3. On Ship's Departure: "Report of Ship's Departure" to be submitted with Crew List if any changes.

Note: It is required that ship's Agent is able to guarantee the identification of crew.
PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot Lat: 33° 42′ N., Long: 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana lighthouse. Depth 38 m.
ANCHORAGES: Waiting anchorage, 1,900 m. 40° from Banshono-hana lighthouse. Depth 19 m. Bottom, sand and mud.
In Tanabe port, there are many rocks, and therefore it is required to investigate the port passage sufficiently, according to the Chart of Tanabe port which is issued by Maritime Agencies (Chart No. 74).
RESTRICTIONS: Max. draft 9.5 m. (31ft.), high tide. Usual draft, under 8.5 m. (28 ft.).
When a vessel loaded with explosives or dangerous cargo is entering the port, she must obey the instructions issued by Port Master when outside the port.
There is no restriction for night arrival.
HEALTH: Vessels usually anchor in the port of Owase or Shimotsu, where the authorities board and grant Free Pratique.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
Tanabe Maritime Safety Office, call sign: JNH.
The contents of communications must be concerned with ship's arrival and departure, and maritime safety.
VHF: Call: "Tanabe Hoan".
Communication to be concerned with ship's arrival and departure arrangements and port safety affairs.
Telephone number of Maritime Agencies: 0739-22-2000.
TUGS: None available.
BERTHING: 2 buoy berths, depth 10 m. and 7.5 m.
STEVEDORES: Available through Kinan Port Transport Union.
MEDICAL: No advance notice required unless urgent. In an emergency contact Maritime Agencies.
TANKERS: Proceed to Shimotsu.
DENSITY: About 1030.
TIDE: Tidal range: Maximum plus 2.13 m. Minimum minus 0.21 m.
FRESH WATER: Available by water barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours' notice required.
FUEL: Bonded oil will be brought from Shimotsu or Kobe, when required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: No facilities available.
AIRPORT: Nanki Shirahama Airport about 25 km. distant. 2 Domestic flights daily to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tanabe police office, tel. 0739-22-1226; Ambulance, tel. 0739-22-0931; Fire department, tel. 0739-22-0931.
SERVICES: None available locally but obtainable from Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
AUTHORITY: Tanabe Doboku (Public Works) Office, 23-1, Asahigaoka, Tanabe City, Wakayama Pref. *Tel:* (0739) 22-1200.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Shimamoto Kaiun K.K., 193 Kamiyashiki, Tanabe-shi, Wakayama-ken. Tel: Tanabe (0739) 24-2424. Cable Address, Shimamoto Tanabe. Telex: 05562-103.

TOBATA: 33.55 N. 130.51 E. (See "Kanmon-Ko")

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure pilot station. Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9 m.– 11 m. Capacity (g/t) 15,000×2. Quarantine Anchorages also used when necessary.

WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.

RESTRICTIONS:

(a) Vessels exceeding 20,000 tons gross may berth only within 1 hour before and/or after slack tide. Vessels under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.

(b) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.

(c) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves and Nos. "A", "B", "C" buoys until 2200 hrs., regardless of current, provided they are moored with bow outward.

(d) Least depth in channel, 17.0 m.

MAX. SIZE: No. 4 Ore Pier: 160,000 d.w.t. or 250,000 d.w.t. with part load.

HEALTH: Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m., (800 m. square) from Mutsure Lighthouse.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: Kinjyo Hospital, Yawata; Shimada Surgical Hospital, Yawata. No advance notice required unless urgent.

TANKERS: *Kitakyushu LNG. Co.:* Max. size 125,000 d.w.t. Max. LOA 286 m. Max. draft 12.0 m. 3×16 in. (LNG) discharge rate 12,000 k/l.; 1×16 in. (boil off oil) discharge rate 12,000 k/l.

FRESH WATER: Available in connecting lines from shore side at Wharf Nos. 1, 2, 3, 8 and 9. No. of hydrants 5, 4, 5, 5, 5. At buoys: from barges, arranged from Wakamatsu. Rate of delivery: 55 – 70 t.p.h., ex-hydrant, 60 t.p.h., barge. Overtime (0500 – 0800 hrs.) (1700 – 2200 hrs.), 50% add.; (2200 – 0500 hrs.), 100% add.; bad weather, 50% add.; Sundays and holidays, 50% add.; minimum quantity at Tobata, 30 tons; minimum quantity at Mutsure, 50 tons.

DENSITY: Average density in the port is about 1019 – 1021 in Summer season, 1025 – 1026 in Winter season.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with fire extinguishing system for attending emergencies on request.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: See "Yawata".

REPAIRS: All types of deck and engine repairs possible afloat.

DRY DOCK: No dry dock.

REPATRIATION: Possible.

AIRPORT: See "Yawata".

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Tobata Police Office, Tel: 093-871-4321; Wakamatsu Water Police, Tobata Branch, Tel: 093-861-0284; Ambulance/Fire: Tobata Fire Department, Tel: 093-871-2621.

TELEPHONES: See "Yawata".

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

AUTHORITY: Kitakyushu Port and Harbor Bureau, Nishi-Kaigan 1-Chome, Moji-Ku, Kitakyushu-City, 801 Japan. *Tel:* (093) 331-1331.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Holme Ringer & Co. Ltd., 2nd Floor, Service Center Bldg., Outside West Gate, Tobata Works, Nippon Steel Corp., Kawashiro-cho, Tobata-ku, Kitakyushu-shi, Fukuoka-Ken. Cable Address: Ringer Tobata. Domestic Telex: 7145-75. Tel: (093) 861-0221, 871-1561 (Ext. 5678).

TOKUYAMA (including Tonda): 34.02 N. 131.48 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.

DOCUMENTS:

(a) Customs. When vessel arrives direct from foreign port, Customs officials will board to search. The following documents are to be submitted:

Crew List.
Passenger List.
Store List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).

The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with Master by Customs at previous port.

On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

(b) Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents, and provide 72 hour landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".

PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 33° 13′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.

Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., depth water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. of Quarantine Anchorage where Quarantine board supertankers. If harbour congested, vessels, especially supertankers, anchor Outer Harbour. In this case Quarantine go to Outer Harbour if advised by Master or Agent. In emergency or unable contact Agent, vessel can talk with Harbour Master by VHF, Channel 16, calling "Tokuyama Hoan". No restriction for entry into and/or departure from the anchorages after nightfall.

MAX. SIZE: Largest recorded vessel to enter 275,000 d.w.t., 19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA (m.)*	*Max.* *Safe Draft (m.)*
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	70,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	50,000	250	12.00
Idemitsu Center	35,000	220	11.00
Nippon Seiro Jetty	30,000	200	11.00

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requested. Tugs' lines used. 8 tugs available, up to 4000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

(a) Wharf	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630–2130 hrs. (60% additional on basic stevedorage), 2130–0830 hrs. next morning (120% additional on basic stevedorage), Sundays/holidays (100% additional on basic stevedorage).

Loading/Unloading facilities

(a) Gangs: Maximum 40 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	200	230
Longshoremen	110	80

Stevedoring Companies: Tokuyama Kairiku Unso Kabushiki Kaisha; Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Unyo Kiko Co. and Nippon Express Co. Ltd.

(b) Lighters: No lighter is available, but coastal boat available for use as substitute for lighters. 8,000 d.w.t. arrangeable with notice of 2 weeks in advance.

(c) Shore Crane:

Wharf	*Capacity grab (tons)*	*Max. discharge rate (t.p.h.)*
Tokuyama Soda Salt Pier	10	500
Toyo Soda Salt Pier	12	550

(d) Floating crane: Capacity, 100 tons available from Kudamatsu.

(e) Average performance of loading/unloading: Loading: Cement in bags, 55–65 t.p.h./gang; Soda ash in bags, 40–50 t.p.h./gang; Fertiliser in bags, 55–65 t.p.h./gang. Salt in bulk, 500/550 t.p.h./ship. Clinker in bulk, 180/200 t.p.h./ship. Chrome Ore in bulk, 65/75 t.p.h./gang.

Working Hours: 1 labour shift. Normal working hours: 0800–1700 hrs. Overtime is possible by applying to Customs. No work can be arranged for during New Year Holiday (1st to 3rd January) and Bon Holiday (14th to 16th August).

MEDICAL: No advance notice required unless urgent.

Hospitals: Asanoumi Hospital, Asami Hospital, Ishikai Hospital, Chuo Hospital, Ono Dental, Ishida Dental.

TANKERS: No slop facilities.

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*	*Hoses*

Nippon Seiro Jetty	Raw Oil	12″×1	700	8″×1 Flexible
	Fuel Oil	10″×1	500	8″×1 Flexible

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of Iwa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier, Idemitsu Central pier, Toyo Soda wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered usually by barge.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SHIPMASTER'S REPORT: June, 1983.

Toya Soda Salt Pier at Tonda.

Documents/Immigration: Landing Passes are now valid for 1 week but restricted to the immediate Port Area (Tokuyama) only. This restriction is enforced and the Agent must make written, individual application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Y100,000) for being found ashore by the Authorities without a Landing Pass.

Pilotage: The Inland Sea Pilot who boarded at Seki Saki also acted as Harbour Pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the Inland Sea after passing through the Hayasui Seto entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight High Water only, using 3 tugs and the Eastern dredged channel into Tonda Port. Departure is during daylight hours only (pilot available apparently 0630 – 1830 hrs. during June, although ours wasn't ordered by the Charterers' Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama section of the port.

Health: Valid Smallpox Vaccination Certificates were *not* required but we could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this Certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons. With large, engines-aft, bulk carriers there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the Portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew and a Launch Service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at the Customs Pier.

This launch is also used for the Agent, watchmen, etc. and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access to and from the launch via the vessel's gangway onto the wharf is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier, delivery can only be made by lighter, June 1983 price Y770 per ton.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores, E/R spares, etc. and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12-7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable address: Ringer Tokuyama. Domestic Telex: 6765-93 Sankyu J. Tel.: Tokuyama (0834) 22-0039.

TOKYO: 35.43 N. 139.46 E. (See Plan Book)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).

1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Ayase. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel: 453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel light buoy. Uraga Channel Pilot embarks three/five miles S.S.E. of Kannonsaki lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel light buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

RESTRICTIONS: No. 1 fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted to use fairway when vessel over 5,000 tons is in transit. Depth 12 m.

Container Vessels: May enter from sunrise till 2400 hrs. and may leave at any time.

ANCHORAGES: See "Advance Applications".

Quarantine anchorage on starboard hand of No. 1 fairway.

Sector A triangular sea area formed by line passing through point 180° and 400 m. from light buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector C (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector D (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 mooring buoy. No. 15 buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

MAX. SIZE: (Draft) General/Bulk: 7.0 m. for Toyosu; 10.0 m. for Shinagawa, Harumi and buoys; 10.0 m. for Land-lot No. 13 and 15; 12.0 m. for Oi.

(Tide). These drafts are at low water. The difference between high and low water level is about 2 m.

Tankers: Tokyo Gas Wharf (Toyosu) Max. d.w.t. 23,000. Max. draft 11.0 m.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – corner reflector type.
C. Direction:	Southern part of entrance to Tokyo Bay and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Single communication – 156.6 MHz, CH 12 156.7 MHz, CH 14 156.8 MHz, CH 16 (for calling, answering and safety) Plural communications – 161.6 MHz, CH 20 161.7 MHz, CH 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range) S.E. side – About 20 nautical miles South of Nojimazaki. S.W. side – About 5 nautical miles North of Oshima Island. North side – Tokyo Port and Chiba port.
I. Operating time:	All times.

Ship telephone: Uses VHF and is a service between navigating or anchored ships and subscriber telephones on land, and between ships connected via base station on land. Communicating sphere approximately 50 km. to 100 km. from base station. Base stations located so as to allow communication with any ship sailing along Japanese coasts.

Charges for device: Y1,000 for 1 telephone set and actual cost for use by ship.

Service charges: (in case Japan Telegraph and Telephone Public Corporation installed the unit) Y40,000 a month for long term, Y4,000 a day for short term.

Call charges: Within specified call area for ship telephone in general – Y180 up to 3 minutes and additional Y60 per minute after the 3 minutes.

TUGS: The port has 2 tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel. (452) 4781. (ii) Shibaura Tsusen Kaisha Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel. (455) 1461. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" to TMG and TMSA. See "Documents". (2) Submit "Application for Berth" to TMG. See "Documents". (3) Submit "Application for Designation of Anchoring Site" to TMSA (Form No. 13) regarding anchoring area. Berthing will be in order of arrival, passenger and special cargo vessels excepted.

Name of Wharf	*Length (m.)*	*Depth (m.)*	*No. of Berths*
Shinagawa (Foreign Trade)	585	10.0	3
Shinagawa (Domestic Trade)	476	8.0	3
Shinagawa Container Terminal	558	10.0	3
Shibaura	910	7.8	7
Hinode	564	6.7	6
Takeshiba	309	6.7	3
Tsukishima	260	7.5	2
Harumi	1,444	9 – 10.0	8
Toyosu	800	7 – 10.0	8
Ariake Terminal	750	5.0	10
Oh-i Marine Products Wharf	450	12.0	2
No. 15 Lumber Wharf	720	10.0–12.0	3
Oh-i Container Terminal	2,300	12.0	8
Odaiba Terminal	1,800	10.0	9

There are many private wharves and other smaller public wharves in use and under construction.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and Crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.

(b) Coal, crane and bucket, 1,500/2,000 tons/day.

(c) Ores, grabs and bulldozers, 1,000 tons/day.

(d) Timber, 1,000 tons/day.

(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves	
Application	Bureau of Port and Harbour Offices in charge of each wharf.
Work of water supply	Tokyo Port Service Association.
(b) Water supply by water boat	
Extra charge	Overtime from 0600 to 0800 50% from 1700 to 2200 50% from 2200 to 0600 100% Special district 50% Festival day 50%

In the case of less than 20 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hours' notice required.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make two prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (Operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

IDENTIFICATION CARDS: Not required.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Shiprepairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03(244) 5670, Telex: J22232 (Ichico), has two dry docks for vessels of 11,000 and 23,000 d.w.t. and slipways from 8,000 to 60,000 d.w.t. capacity.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels.

SURVEYORS:

American Bureau of Shipping, Nihon Bldg., 6-2 Ootemachi 2, Chiyoda-ku, Tokyo 100. Tel: 279-7992/6.

Lloyd's Register of Shipping, No. 32 Mori Bldg., 4-30 Shibakoen 3, Minato-ku, Tokyo 105. Tel: 438-0481.

Nippon Kaiji Kyokai, 28-2, Hamamatsu-cho, Minato-ku, Tokyo 108. Tel: 434-2341.

AIRPORT: Distance to new Tokyo International Airport (Narita Airport), approx. 60 km.

TIME: GMT plus 9 hours. Permanent.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity*	*Cargo Handled*	*Remarks*
Oh-i Terminal	16 container gantries	30.5 tons	Containers	Straddle carriers and transtainers available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	24.5 tons 30.5 tons	Containers	Ro-ro facilities, Straddle carriers available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	6.4 tons 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5 tons	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth "AB"	10 tons	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons. Open storage yard 254,246 sq.m.

HOLIDAYS: National Holidays: New Year's Day (Jan. 1st); Adult Day (Jan. 15th); Foundation Day (Feb. 11th); Vernal Equinox Day (around March 21st); Emperor's Birthday (April 29th); Constitution Commemoration Day (May 3rd); Children's Day (May 5th); Respect-for-Age Day (Sept. 15th); Autumnal Equinox Day (around Sept. 23rd); Physical Education Day (Oct. 10th); Culture Day (Nov. 3rd); Labour Thanksgiving Day (Nov. 23rd).

No cargo work on 1st or 3rd Sundays of each month, and no work from 31st December to 3rd January inclusive. Cargo work can be arranged on all other days including National Holidays.

POLICE/AMBULANCE/FIRE: Tokyo Water Police, 5-8-36, Konan, Minato-ku, Tokyo. Tel. (433) 2411. Call Fire Stations for ambulances. Tokyo Water Fire Station, 5-1-23, Kachidoki, Chuo-ku, Tokyo. Tel. (534) 0119.

TELEPHONES: (also see "VHF").

Installed on ships moored at piers or jetties to allow telephone communications between ships and subscriber telephones on land and between ships.

*See "Report" on page 816.

Report: 1983.
Idemitsu Hokkaido Sea Berth (Discharging Terminal):
Location: Lat. 42° 36′ 10″ N., Long. 141° 38′ 50″ E.
Operator: Idemitsu Kosan Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime weather or other circumstances permitting. Terminal will not be closed on any holidays.

Approaches: Clear and unimpeded from South. White and red striped high chimney (approx. position: Lat. 42° 38.1′ N., Long. 141° 35.6′ E.) makes a most conspicuous landfall. In poor visibility, in heavy fog or rain, radar reflector fitted at centre of Sea Berth can be located first by ship's radar and after that Sea Berth will be seen in direction from N.W. to S.E.

Westward of Sea Berth, there are many cargo vessels anchored.

Ships berthing starboard side alongside at the Sea Berth, proceed on course 314° observing transit of chimney and East Breakwater Lighthouse.

Anchorage: No strict boundary areas for anchorage but Master recommended to anchor 1 mile to 2 miles S.E. from Sea Berth.

Holding ground is good and depth about 27 m. – 30 m.

Pilotage: Sea Berth requires Pilot for berthing, no strict location of anchorage for ships awaiting Pilot in Tomakomai area, but should be as close as possible to port in accordance with harbour draft and communications.

2 Pilots will board ships over 30,000 g.r.t. Pilot uses tug boat for boarding.

Important Features: Ships arriving in Winter season (November-March) should pay special attention to the cold, as average temperature in that season ranges from −3°C to 5°C.

FUEL: Domestic oil is available. Bonded oil will be brought from Hakodate with sufficient advance notice, when required.

FRESH WATER:

Wharf	*Owner*	*No. of water Hydrants*	*Max. capacity t.p.h.*
Coal Wharf	Tomakomai Port Authority (Tomako Services Co., Ltd.)	16	60

		−7.5	5,000	6	780
Central Waterway	Central Wharf	−7.5 ~ −10	5,000~15,000		1,130

(b) (Exclusive):

District	*Name of facilities*	*Depth (m.)*	*Max. Vessels (d.w.t.)*	*No.*	*Extension (m.)*	Remarks
Outer Harbour	250,000 D/W Class Dolphin	−22	250,000	1	—	Comp'd June '82 (10,000 D/W Class)
	150,000 D/W Class Dolphin	−10	150,000		—	
East Waterway	Terminal facilities for bulk cargoes	− 14	60,000	1	280	Under construction
	Berthing facilities for dangerous cargoes	−7.5	5,000	15	1,300	
	Hokuden Pier	−7.5	5,000	1	143	Comp'd Oct. '80 (2,000 D/W Class)

Tomako Coal Centre: Terminal under construction, completion late 1984. Berth length 280 m., depth 14 m.

REPAIRS: Minor repairs possible.

SHIP SUPPLY SERVICE:

Tomako Service Co., Ltd., 9 Shiomi-cho, Tomakomai, Hokkaido, 053 Japan. 5 service boats.

Tomakomai Kaiun Co., Ltd., 7-1 Motonakano-cho 4-chome, Tomakomai, Hokkaido, 053 Japan. 1 service boat.

Also see "Tugs".

AUTHORITY: Tomakomai Port Authority, 6-38, Minato-machi 1-chome, Tomakomai City, Hokkaido 053 – Japan. *Tel:* (0144) 34-5551.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co., Ltd. Tomakomai Marine Branch, 13-24, 2-chome Motonakano-machi, Tomakomai-shi, Hokkaido. Cable Address: Narasaki Tomakomai. Domestic Telex: 09842-10 Nstoma J. Tel: (0144) 36-3636.

TOYAMA: 36.46 N. 137.13 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. No telegraphic address for pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Niigata Radio. Pilot boards 1 mile off East breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only.

ANCHORAGES: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least 4 vessels over 5,000 gross tons. Anchoring position for ocean tankers is 36° 48′ N.; 137° 14′ E.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Radio Pratique available. Formalities carried out at Quarantine anchorage.

RADIO: (Also see "Pilotage"): Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.

"Narita Maru" – 2,060 h.p. uses own lines free of charge.
"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.
"Raicho Maru" – uses ship's lines.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: Max. size: 200,000 d.w.t., max. LOA, no limit, and max. safe draft 19 m. for Sea Berth of Nihonkai Sekiyu K.K., Toyama. Two lines, diameter 16 in. Reducing pieces supplied as necessary. Discharge rate 7,500 t.p.h.

DENSITY: 1015–1019 min./max.

FRESH WATER: Available ex-wharf at Nos. 1, 2, 3, 4 and 5 wharves; average 40 t.p.h. Other berthing positions supplied by barge which ordered from Fushiki and is filled up at Toyama.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji with sufficient advance notice when required.

FIRE PRECAUTIONS: Nihonkai Oil Co., Toyama, issue Safety Regulations to Master on arrival tanker sea berth.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: Nihonkai Juko Co. Ltd., Toyama. No. 1 dock, used for construction. No. 2 dock, ship-building capacity: length, 104 m.; width 15 m.; depth, 1.8 m. Size of dock: length, 112 m.; width, 14.6 m.; depth, 4 m. Maximum building capacity, 4,000 g.r.t. No. 3 dock, ship-building capacity: length, 150 m.; width, 20.8 m.; depth, 5 m. Size of dock: length 168.2 m.; width, 21.88 m.; depth, 9.2 m. Maximum building capacity, 10,750 g.r.t.
AIRPORT: Toyama airport, distance about 10 km. Two daily flights.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police, Toyama North Police Station, Toyama (0764) 37–7171; Ambulance, Toyama Iwase Fire Station, Toyama (0764) 37–7141 or 119; Fire, Toyama Fire Station, Toyama (0764) 37–7141.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
AUTHORITY: Toyama Port Administration Office, 5, Kaigan-dori, Higashi Iwase, Toyama City. *Tel:* (0764) 37-7131.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Fushiki Kairiku Unso Co., Ltd., Toyama Port Office, 82, Higashiiwase-Irifune-cho, Toyama-shi, Toyama-ken. Cable Address: Fushikikairiku Fushiki. Tel.: (0764) 38–1100.

TOYAMA SHINKO: 36.47 N. 137.10 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 6 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained Free Pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.
ANCHORAGES: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.
MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.
HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.
RADIO: (also see "Pilotage"). Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from wharves No. 1, 2, 3, 4, 5 and 6 average 10 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.
FUEL: Domestic oil is available. Bonded oil will be brought from Kanmon area, with 1 week advance notice, when required.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks. Nearest available in Toyama.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 25 km. distance. Two regular services a day. ANA only.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day, most probably from 31st December to 3rd January.
POLICE/AMBULANCE/FIRE: Police, Shinminato Police Station, Shinminato (07668) 2-3141; Ambulance, Shinminato Fire Station, Shinminato (07668) 2-3175; Fire, Shinminato Fire Station, Shinminato (07668) 2-3175.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer. Attending from Fushiki Immigration Office, Fushiki, due to no office in Toyama-Shinko.
AUTHORITY: Toyama Prefecture, 1-7 Shinsogawa, Toyama City, Toyama Pref., Japan. *Tel:* (0764) 31-4111.

AGENT: Sub-agents of Dodwell & Co. Ltd. Tokyo, Fushiki Kairiku Unso Co. Ltd., 6-6 Fushiki-Minato-machi, Takaoka-Shi, Toyama-ken. Head Office in Fushiki; Takaoka (0766) 44-1300/9 and Toyama-Shinko Branch; Shinminato (07668) 4-3330. Cable address: Fushikikairiku Fushiki, only to Fushiki Head Office.Telex: 05155571/2 Kairik J.

TSUKUMI: 33.05 N. 131.52 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists, including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position Lat. 33° 05′ 30″ N., Long. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.
ANCHORAGES: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.

RESTRICTIONS:

(a) Berthing: Night entry or berthing after nightfall, though not impractical (depending on weather) is not recommended unless special arrangements (stevedores, etc.) necessitate vessel's immediate berthing.

(b) Departure: Night departure allowed, weather permitting, and subject Pilot's agreement.

MAX. SIZE: See "Berthing".

HEALTH: Vessels usually anchor in the bay of Saganoseki or Saiki, where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 2 tugs, each 1,800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

TANKERS: No facilities for large tankers.

DENSITY: Average density through year 1023.

FRESH WATER: Available from wharf, and by barge.

FUEL: Bonded oil will be brought from Moji with sufficient advance notice, when required.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspectors ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: Distance 1 hour by train. 2 flights daily to Tokyo.

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police, 2–4000; Ambulance and Fire, 119.

TELEPHONES: Not available for placing on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SERVICES: Hold cleaning.

AUTHORITY: Tsuruga Port Administration Office, 2-1, Sakura-Machi, Tsuruga City, Fukui Pref. *Tel:* (07702) 2-0369.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Tsuruga Kairiku Unyo Kaisha Ltd., P.O. Box 11, 10-2, Sakura-machi, Tsuruga-shi, Fukui-ken; Cable Address: Kairiku Tsuruga, Domestic Telex: 05176-693, Tel.: Tsuruga (07702) 2-3111.

UBE: 33.56 N. 131.15 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, fiarms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Sea bottom is mud.

Depth	4 m. – 7.5 m.	7.5 m. – 10 m.
Sheltered	73,000 sq.m.	233,100 sq.m.
Unsheltered	12,175,500 sq.m.	680,000 sq.m.

RESTRICTIONS:

(a) Outer harbour: No restriction.

(b) Inner harbour: Berthing/unberthing is practicable only during daytime.

(c) Deep draft vessels may berth at high water only.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: "Naruto Maru" 2,800 h.p., "Nachi Maru" 2,800 h.p. and "Iris" 2,400 h.p. stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Wharf	*Length*	*Depth*
Public Okinoyama Wharf	370 m.	10 m.
Public Shibanaka Wharf	185 m.	10 m.
Public Shibanaka East Wharf	152 m.	9 m.
Public Shibanaka New Wharf	260 m.	7.5 m.
Ube Cement Wharf	247 m.	9 m.
Ube Kosan Chisso Wharf	188 m.	9 m.
Ube Kosan Urea Wharf	223 m.	9 m.
Ube Kosan No. 2 Pier	131 m.	9 m.
Central Glass Wharf	162 m.	9 m.
Public Shinmachi Wharf	260 m.	7.5 m.

Wharf for Limestone:

Name of wharf: Okinoyama Limestone Wharf (Ube Kosan No. 5 Wharf). Length of wharf 165 m. Maximum safe draft 11.00 m. Maximum 30,000 d.w.t. Fairway 300 m. wide, 2.25 miles long, 8.80 m. deep, with shallow spot 8.40 m. at low water. Accessible max. draft 10.50 m. Facilities: Loaders × 2; 1,500 tons per unit/hour. Entry and Departure: Berthing/unberthing is practicable only during daytime. Deep draft vessel may unberth at high tide only.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: Seibu Sekiyu Co. Refinery.

(a) Geographical Location: Lat. 33° 49′ 48″ N., Long. 131° 13′ E. 163°, 11,400 m. from Motoyama Misaki.

(b) Entry Permission: Sea berth located outside harbour limit of Ube port and treated as a closed port. Vessels therefore required to obtain special permission for entry from Customs at any open port prior to arrival.

(c) Restrictions: Max. 230,000 d.w.t. Max. LOA, 325 m. Max. safe draft 19.5 m.

(d) Diameter/No. of shore pipes: Float-sink hose: 16 in.×2 lines connecting to manifold; sub-marine hose: 20 in.×2 lines; submarine pipe-line: 48 in.×1 line.

(e) Discharging Rate: 7,800 t.p.h. (Crude oil).

DENSITY: 1025.

FRESH WATER: *(a)* Water barges available from Moji and supply about 50 t.p.h. *(b)* Water from wharf supply at Central Glass Ube Cement and Ube Chisso wharves.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Sasebo Heavy Industries Co., Ltd., Moji; Kitakyushu Iron Works, Tobata; Ube Dockyard Co., Ltd.

DRY DOCKS: None.

AIRPORT: 30 minutes by road.

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if ship stays longer.

SERVICES: All services available.

DEVELOPMENTS: 1×2,000 t.p.h. coal unloader under construction for Ube Industries, delivery expected late 1985.

AUTHORITY: Ube Port Administration Office, 5-7, Minato-machi 1-chome, Ube City, Yamaguchi Pref. *Tel:* (0836) 31-3311.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo.

Dry Cargo: See "Moji".

Tankers: Uyeno Unyu Shokai, Yamaguchi Branch Office, Oaza Nishioki, Onoda-shi, Yamaguchi-ken; Cable address: Uyenoshell Ube, Domestic Telex: 6845-42, Tel. Ube (0836) 88-1171.

UNO: 34.29 N. 133.57 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Choshi (Nagasaki) Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. Harbour pilots available sunrise to sunset.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34′ N., Long. 135° 08′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel.) Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 57′ N., Long. 131° 03′ E.

ANCHORAGE:

Harbour anchorage	*Bottom*	*Depth*	*Position from Tobisu Beacon*
No. 1 Anchorage (off shipyard)	Sand and/ or Sand/Shell	13.0 m.	323°–700 m.
No. 3 Anchorage (Max. LOA 180.0 m.)		23.0 m.	043°–1,300 m.
No. 4 (closed port)		21.0 m.	150°–500 m. (May-Sept.)
No. 4 (closed port)		21.0 m.	162°–820 m. (Oct.-April)
No. 5 Anchorage (Max. LOA 180.0 m.)		29.0 m.	023°–850 m.
No. 6 Anchorage (Max d.w.t. 6,000)		21.0 m.	025°–1,300 m.

RESTRICTIONS: Vessel is only able to berth at time of slack water in Bisan Central Passage from daybreak to before sunset. Vessel's bottom clearance must be 10% of depth in passing through the passage and whilst in berth.

Mitsui Hibi Wharf and Hibi Public Wharf are closed-ports. Ship's crew members (including Master) must get hired launch (ferryboat) for going ashore, this being a Japanese Customs Law.

MAX. SIZE: See "Berthing".

HEALTH: Vessels usually anchor at Wada-Misaki (off Kobe), where the Authorities board and grant Free Pratique.

Quarantine Officials not stationed in the port, therefore, vessel has to pass a quarantine inspection at Kobe (Quarantine) Anchorage (Lat. 34° 38′ N., Long. 135° 11′ E.) when vessel coming through the Kii Channel, Matsuyama, Mizushima, Sakaide or any other "Q" port when coming through the Bungo Channel, or Mutsure "Q" Anchorage (Lat. 33° 58′ N., Long. 130° 52′ E.) when vessel coming through the Japan Sea.

Vaccination is available at local hospital. If vessel requires sanitary inspection, Officials come from Mizushima.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs join vessel at Outer Harbour area. Tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Length Overall* (m.)	*Capacity* (g./t.)

WAKAMATSU: 33.54 N. 130.48 E. (See "Kanmon-Ko").

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure Pilots Station: Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E. Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: No. 5 section, Wakamatsu. Depth 9 m. – 11 m. Capacity (g/t), 15,000×2. Also quarantine anchorage.

RESTRICTIONS: Pilots not available after sunset. Entry and Sailing are controlled by the one-way signals as follows: *Entry:* 0800 to 1100 hrs.; 1300 to 1500 hrs. 1 hour before sunset to sunset. *Sailing:* 1100 to 1300 hrs.; 1500 hrs. to 1 hour before sunset. Sunset to 0800 hrs. Easterly winds prevail in warm season, dense fog prevails sometimes in Spring and Winter, but generally clears in a few hours in the morning. Tidal range about 1.5 m. and current in leading channel about 1.5 – 2.5 knots, but no current in port. Due to narrow channel leading to main harbour and shallow water at entrance of channel, length and draft of vessels are generally limited as follows:

Buoy: Ship's length overall, 165 m.; draft, 8.5 m.; 11,000 g.r.t

Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to a breakwater and reclaimed land. In this channel, as in main harbour and fairway, vessels observe only one-way traffic and on an outgoing signal from the shore, wait outside for outgoing vessel until channel is cleared. Vessels with draft of more than 7 m. can enter/depart only at high tide. Entry permitted only from sunrise and vessel to be berthed before sunset. Night departure prohibited.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m. (800 m. square) from Mutsure Lighthouse.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specially Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 2 tugs join vessel under Wakato Bridge at corner of fairway leading to main harbour.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGES: Wakato Bridge. Height of mast limited to 38 m. for passing under bridge.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No tanker berths.

DENSITY: Average density in port about 1019 – 1021 in Summer season; 1025/1026 in Winter season.

FRESH WATER: Available. Rate of delivery: 50 t.p.h. – 60 t.p.h. ex-barge. Minimum quantity at buoy, 10 tons; minimum quantity at No. 5 section, 30 tons.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency case at request.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Yawata".
REPAIRS: All grades deck and engine repairs afloat.
DRY DOCKS: None.
AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. Permanent.

AGENT: See "Tobata".

WAKAYAMA: 34.13 N. 135.08 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advices to Agent. Pilot boards 1,500 m. – 2,500 m. off Wakayama Breakwater. Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No pilot boat. Pilot boards from tug.
ANCHORAGES: For waiting Pilot and/or berth (nature of bottom, sand mixed with mud.) Four anchorage points for large vessels (ore carriers for Sumitomo Metal) over 30,000 tons gross are provided by the Port Authority. Agents must apply for one when required. The position of each from the lighthouse (flashing white) in the Southern sector of the port is as follows:

"A" – 3,000 m. – 255°
"B" – 3,500 m. – 272°
"C" – 4,100 m. – 283°
"D" – 4,800 m. – 292°

Other vessels are required to anchor in position (approx.) Lat. 34° 13′ 30″ N., Long. 135° 06′ 30″ E. or nearer the shore if possible. (Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse; depth about 22 m.
RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.
MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m., 20,000 d.w.t. draft 9.0 m.; LOA 200 m., 35,000 d.w.t., draft 10 m. (Sumitomo Metal Pier, South Section): LOA 300 m., 100,000 d.w.t. or 150,000 d.w.t. with part load, draft 14.0 m.
HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
Vaccination List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio or Kobe Radio respectively.
TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 3,000 h.p.
BULK HANDLING FACILITIES:

Berth	*Max.* *d.w.t.*	*Length* *(m.)*	*Depth* *(m.)*	*Cranes*
Sumitomo Metal A	18,000	172	9.5	7×700 t.p.h. 1×1,000 t.p.h.
Sumitomo Metal B	160,000	365	14.0	
Sumitomo Metal C	160,000	274	14.0	
Sumitomo Metal D	40,000	215	12.0	
Sumitomo Metal E	26,000	218 (LOA)	11.00 (Max. draft)	2×20 tons
Sumitomo Metal F	18,000	180 (LOA)	9.30 (Max. draft)	

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. (60% additional of basic stevedorage), 2130 – 0400 hrs. next morning (130% additional), 0400 – 0830 hrs. (60% additional), Sundays/holidays (100% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: *Wakayama Northport (LPG Dolphin):* Sumitomo Metal: Max. 48,000 d.w.t., Max. LOA 230 m., Max. draft 12.0 m., 1×12 in. (butane), rate 2,700 k/l.
DENSITY: 1025 – 1030.
FRESH WATER: Available alongside and Water boat, capacity 90 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 200 cigarettes to take ashore for one week but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only. Suwa Shipyard Co., Ltd. Tel. 0734-31-1694.
DRY DOCK: None.
REPATRIATION: Possible.
AIRPORT: Itami, Osaka, about 3 hours by car.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 9 days, but 9 days' extension possible if ship stays longer.
DEVELOPMENTS: Breakwater under construction in the vicinity of the entrance to Wakayama No. 1 Area.
AUTHORITY: Wakayama Shimotsu Port Administration Office, 22, Chikko 6-chome, Wakayama City. *Tel:* (0734) 31-7266.

AGENT: *Wakayama North Port* (Sumitomo Steel Mills), Sumikin Kaiun Co. Ltd., c/o Sumitomo Kinzoku K.K., 1850, Minato, Wakayama City. Tel. Wakayama (0734) 55-5151. Cable Address: Shipsumikin Wakayama. Telex: 05542161 Smikai J, 05542162, 05542193.

Wakayama South Port (Lumber/log discharge), Shimamato Kaiun Co., Ltd., 7, 5-Chome, Chikko, Wakayama City. Tel: Wakayama (0734) 22-5111. Cable Address: Shimamoto Wakayama. Telex: 05542151 Simawk J.

YATSUSHIRO: 32.30 N. 130.05 E. (See Plan Book)

PORT LIMITS: The sea surrounded by the circle with a radius of 5,000 m. centred upon the triangulation point on Kagashima Island (28.7 m. high), the lines West to the respective bridges on the lowest Mae-kawa and Kuma-gawa, and the coast.
DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Manifest.
1 Customs.
1 Store List.
1 Health Document.
1 Bill of Lading.

PILOTAGE: Pilot station (acting also as an Agent for foreign vessels):

Yatsushiro Branch Office of the Nippon Tsuun K.K. located at 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-7-0011 or 7-0012.

Kokoku Unyu K.K. located at 262 Minato-machi, Yatsushiro-shi, Kumamoto-Ken. Tel: 09653-7-1101. Telex: 767503 Kounkij.

Yatsushiro Branch office of Kitakyushu Unyu K.K. located at 3-2 Tatema, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-7136. Telex: 767592 Yatsushiro Kitakyuunma.

Yatsushiro Koun K.K. located at 9-4 Asahichuodori, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2233. Telex: 767506.
ANCHORAGES: Within port limits.
RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.
MAX. SIZE: Max. d.w.t. 35,000 tons. The tidal difference between high and low water is 4.3 m.
HEALTH: All the necessary procedures must be undertaken at the Yatsushiro-Minamata Branch Office of the Nagasaki Quarantine Station.
RADIO: Not available.
VHF: Not available.
TUGS: 1 tug owned by the Jonan Unyu K.K., tugs also available from Miike Port in Fukuoka Prefecture.

BERTHING:

Quay	A	Length	130 m.	Depth	7.5 m.
„	B	„	130 m.	„	7.5 m.
„	C	„	165 m.	„	9.0 m.
„	D	„	185 m.	„	10.0 m.
„	E	„	185 m.	„	10.0 m.

CRANES: 7 mobile cranes and 20 shovel loaders.

As a rule, when a vessel is secured alongside quays A, B, C, D and E there is no need to use the ship's own gear. However, it may sometimes be necessary to use the ship's gear during loading and unloading.

STEVEDORES: Arranged by ship's Agent.

MEDICAL: Arranged by ship's Agent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: Not available.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Watchman is not necessary.

HATCHES: Opening and closing is done by the stevedores.

REPATRIATION: Yatsushiro Branch Office of the Fukuoka Immigration office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 70 km. distance).

POLICE/AMBULANCE/FIRE: The Yatsushiro Police station located at Nishimatsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-5-2110.

The Yatsushiro Head Station of the Yatsushiro Fire Department located at 1-10 Matsuejo-machi, Yatsushiro-shi, Kumamoto-ken. Tel: 09653-2-6181.

EMERGENCY CO-ORDINATION CENTRE: Yatsushiro Branch Office of the Misumi Maritime Safety Department. Tel: 09653-7-1477.

TELEPHONES: There is no arrangements for placing telephone on board.

STORING: See "Prelims" page viii.

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Yes.
6. Yes.

SHORE LEAVE: Shore passes are to be issued at the Yatsushiro Branch Office of the Fukuoka Immigration Office.

DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.

AUTHORITY: Yatsushiro Port Office of the Kumamoto Prefecture, 249 Minato-Machi, Yatsushiro City, Japan. *Tel:* 09653-7-0632. *Contact:* Port Office Superintendent.

AGENT: Yatsushiro Branch Office of the Nippon Tsuun K.K., 262-15 Minato-machi, Yatsushiro-shi, Kumamoto-ken. Cable Address: Nexco Yatsushiro. Tel: 09653-7-0011.

YAWATA: 33.52 N. 130.49 E. (See "Kanmon-Ko")

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Harbour Pilotage:* Compulsory for entry, departure and when passing through Straits if vessel exceeds 10,000 g.r.t. departure. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage (see "Moji"), Westbound vessels at Hesaki Quarantine Anchorage (see "Moji"). Two Pilots embark vessels exceeding 20,000 gross tons, charging 180% pilotage.

Sea Pilotage: Vessel approaching from East obtain Pilot by radio request made at least 24 hours in advance. Pilot embarks 3 miles South from Sekisaki Lighthouse; Lat. 33° 13′ N. Long. 131° 54′ E.

Pilots should be kept closely advised of accurate ETA pilot station. If any changes, Masters requested radio immediately to pilot offices direct or through Agent reporting revised ETA. Cable addresses of pilot offices: Harbour Pilot, "Kanmonpilot Moji". Inland Sea Pilot, "Anjin Moji". Require 24 hours' notice of ETA, but can attend with 2 – 3 hours' notice in emergency cases.

ANCHORAGES: No anchorage at Yawata, but quarantine anchorage used in essential cases. See "Health".

RESTRICTIONS:

(a) Because of narrow channel leading to Yawata and shallow water at entrance of channel, length and draft of vessel limited, except for berthing at Nishi-Yawata Wharf, where 20,000 gross tonnage with 200 m. length overall and 8.3 m. draft may be accommodated. Limits:

	Wharf	*Buoy*
Length (overall)	166 m.	155 m.
Draft	8.5 m.	8.5 m.
Gross tonnage	10,000 tons	10,000 tons

Vessel slightly exceeding above may be berthed at the Pilot's discretion, subject weather conditions and efficiency of engine, steering, etc.

(b) Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to breakwater and reclaimed land. In this channel, as in main harbour and fairway to Yawata, vessels observe one-way traffic and, on a "not-clear" signal from shore, wait outside for outgoing vessels to clear channel. Vessels with draft of more than 7 m. can enter/depart only at high tide.

(c) Entry permitted only from sunrise and vessels to be berthed before sunset. Night departure prohibited.

(d) Wakato suspension bridge crosses channel between Tobata and Wakamatsu. Height of bridge from water line at fairway 42.675 m. at spring high tide; height of mast of vessels passing under bridge limited to 38 m.

(e) Easterly winds prevail in warm season. N.W. winds in Winter. Dense fog sometimes in Spring and Winter, but generally clear in morning. Tidal range about 1.2 m. Tidal current in channel about 1.5 to 2.5 knots, but no current in port.

(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE: See "Berthing".

HEALTH: See "Moji".

(a) Quarantine station at Western entrance: 0.5 mile East of Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) Quarantine service is rendered from sunrise to 1 hour before sunset.

(e) "Q" flag should be hoisted until ship in Free Pratique.

(f) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(g) When ship arrives from plague-infected or suspected area within 10 days after she left such place, 24 hours special quarantine required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to arrival, berthing instruction, etc, through VHF, details as follows:

	Kitakyushu (Moji)	*Shimonoseki*
(a) Call sign:	"Kitakyushu Port Radio"	"Shimonoseki Port Radio"

(b) Location of radio facilities: The transmitting and receiving station located at top of Mt. Hinoyama, Shimonoseki, for both the above radio stations.

(c) Type of wave:

		Kitakyushu (Moji)	*Shimonoseki*
Channel:	Simplex 16	(Calling, responding)	16 (Calling, responding)
	Simplex 12	(Communication)	12 (Communication)
	Simplex 14	(Communication)	14 (Communication)
	Duplex 20	(Communication)	20 (Communication)
	Duplex 22	(Communication)	22 (Communication)
Outport:		50 W.	50 W.

(d) Operating hours: 0000 – 2400.

(e) Communicating range: Within a radius of 50 miles from the station.

(f) Communicating language: English and Japanese.

TUGS: 2 tugs join vessel at corner of fairway leading into main harbour. Ship's lines used when vessel berths.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Note: Capacity for the above, no limit subject to draft and length.

BRIDGE: See "Restrictions".

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No tanker berth.

DENSITY: Average density in port about 1020 – 1022 in Summer season, 1024 – 1025 in Winter season.

FRESH WATER: At buoys: Water barges available from Wakamatsu, rate of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and Nishi-Yawata Wharf.) From hydrants: 25 t.p.h. – 40 t.p.h. For supply at Nishi-Yawata Wharf, 1 day prior notice required. Overtime charge: (0500 – 0800 hrs.) (1700 – 2200 hrs.), 50% add.; (2200 – 0500 hrs.), 100% add.; bad weather 50% add.; Sundays and holidays, 50% add. Minimum quantity at Yawata, 10 tons. Minimum quantity at Mutsure Anchorage, 50 tons.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency cases.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: British Consul, who is also acting Swedish Consul, is stationed with Holme Ringer, Moji (tel. 093-331-1311). American Consul stationed at Fukuoka (tel. 092-751-9331). Korean Consul stationed at Fukuoka (tel. 092-771-0461).

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: No dry dock available.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport; approx. 70 km.

(a) International line:
JAL, for Pusan (Tuesday and Thursday);
for Taipei-Hongkong (Monday and Thursday);
CPA, for Taipei-Hongkong (Wednesday and Saturday);
KAL, for Pusan-Seoul (Mon., Tues., Wed., Fri., and Sat.).
(b) Domestic line:
JAL and ANA, regular service.

Kitakyushu airport; approx. 20 km. Flights often suspended by heavy rain and fog. Domestic line: ANA, regular service.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Yawata Police Station, tel. 093-671-6631; Wakamatsu Water Police, Yawata Port branch, tel. 093-681-3475; Ambulance/Fire, Yawata Fire Department, tel. 093-671-4831.

TELEPHONES: Nippon Senpaku Tsushin K.K. available at Moji (tel. 093-331-1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC – 22/28 v. AC – 100 v. 110 v. 120 v. (to keep at least within 10 v.).

GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.

SERVICES: Tank cleaning, sand blasting (Fuji Co., Tobata), chemical cleaning (Fuji Co., Tobata). Hold cleaning (Tsuyama Kosan K.K., Yawata; Fuji Co., Tobata). Compass adjusting (Kajiwara Koki, Shimonoseki). DF calibration (Nippon Radio Co., Tobata). Life-raft servicing and inspection (Kikutani Sengu, Shimonoseki; Marinair International, Kobe; International Marine, Kobe; Marine International; Yokohama and Tokyo); this service requires name of maker in advance. Radio and radar repairs available, but requires name of makers/type of the machine in advance. Laundry (Sunrise Cleaning, Tobata; Moji Dry Cleaning, Moji). Watchmen service available. Charts: only Japanese charts available locally; BA and HO charts can be obtained from Kobe and Yokohama respectively, with adequate notice. Grain fitting (Ushio Co., Moji; Fuji Sobi, Moji); this work is usually carried out at Moji (public port). Fumigation (Toyo Fumigation Co., Moji), this work is not permitted at Yawata but at Moji. Floating crane, capacity 200 tons (Kondo Kaiji, Wakamatsu; Nichibei Kosan). Diver (Nippon Salvage Co., Moji; Tsuyama Kosan, Wakamatsu). Salvage service (Nippon Salvage, Moji) Painting service (Fuji Co.).

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

DEVELOPMENTS: All the present discharging berths (wharves) for coal, ore (including Nishi-Yawata Scrap Wharf) converted to loading berths.

AUTHORITY: Kitakyushu Port and Harbor Bureau, Nishi-Kaigan 1-Chome, Moji-Ku, Kitakyushu City, 801 Japan. *Tel:* (093) 331-1331.

AGENT: See "Tobata".

YOKKAICHI: 34.57 N. 136.38 E. (See Plan Book)

DOCUMENTS: See "Yokohama".

PILOTAGE: Not compulsory; Pilot available at Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. Vessels requiring Pilot cable Agent at least a day ahead advising exact ETA pilot station.

Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kHz and A1.A2 486 kHz, output A1 50 W. and A2 110 W. Zone of communication about 100 km.

Yokkaichi Signal Station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 to 2000 hrs. any day.

Also see "Nagoya" – "Pilotage: Shipmaster's Report".

ANCHORAGES: Vessels anchor in position Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. where Authorities board and grant Free Pratique; max. depth 13 m.

RESTRICTIONS: Entry restricted by vessel's draft and Pratique. Max. draft inside port 12 m. Quarantine Authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.

MAX. SIZE: Max. permissible draft inside port 12 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe Draft* (m.)
Showa Outer SBM	275,000	335	19.30
Showa Inner SBM	170,000	300	15.80
Showa Wharf "E"	32,000	232	10.50
Daikyo SBM	230,000	330	19.50
Daiyo Umaokoshi Pier	60,000	240	9.80

HEALTH: Request for Radio Pratique to be addressed to Agents not less than 12 hours before arrival.

TIDE: Tidal current of Ese Bay runs Northward along East side of Mie Prefecture and turns round at mouth of Kiso River and runs Southward for Chita Peninsula.

Tidal level:	High tide	Tidal level (average)	+7.74 ft.
	Mean tide		+4.30 ft.
	Low tide		+0.00 ft.

TUGS: Normally stand-by to assist vessel inside breakwater of entrance to fairway; tug's lines used.

BERTHING:

Berth No.	*Depth (m.)*	*Length (m.)*

15	10.0	220.0
16	7.5	114.0
17–18	5.5	163.0
19–21	5.0	210.0

SPECIALISED CARGO HANDLING FACILITIES:

Bulk Cargoes: No. 2 Wharf has a cereal silo which can store 56,840 tons of imported grain. 2 pneumatic unloaders with unloading capacity of 300 t.p.h. per machine at the Northern berth of the pier to connect the silo with conveyors.

Containers: One deep-sea container berth of 280 m., quay length and minimum water depth of 12 m., incorporating a Ro-Ro ramp. Two 37.5 ton and 44.5 ton Hitachi container cranes. Container yard and marshalling yard area of 58,750 sq.m. Three TCM straddle carriers, 3 forklift trucks (10 tons – 25 tons), 15 tractors, 35 trailers. Container freight stations at Asake 5,940 sq.m. Wool centre 46,768 sq.m.

Facilities of Container Terminal:

1. Total area 58,750 m.
2. Container berth: Length 280 m., depth 12 m., mooring capacity 25,000 d.w.t.×1 berth.
3. Cargo handling equipment: Ramp-way 1 unit, container cranes 2 sets, one 44.5 tons, one 37.5 tons.
4. Transport machine: Straddle carrier, 3 units, one 40 ft., two 20 ft.; fork lift 3, one 25 tons, one 20 tons, one 10 tons.
5. Container yard: Container yard 6 yards, 29,730 m. refrigerated container yard, one yard 1,275 m.
6. Other relevant facilities: Chassis yard 5,740 m.; wool centre 46,768 m.; cold store 4,664 m.; meat centre 3,335 m.

Liquid Chemicals/LPG Carriers:

Operator: Yokkaichi LPG Terminal Co. Ltd.
Location: Lat. 34° 50′ 05″ N., Long. 136° 40′ 00″ E.
Max. Mooring Capacity: 67,000 d.w.t.
Depth of Water: Passage: 12 m.
Berth: 12 m.
Max. Acceptable Length: 255.46 m.
Max. Acceptable Draft: 10.50 m.
Tidal Range: Zero to plus 2.36 m.
Side Berthing: Starboard
Type of Unloader: Chiksan Arms.
No. of Receiving Lines: 2 liquid and 2 vapour.
Size of Manifold Flange: Liquid 12 in., vapour 8 in. ASA-150.
Manifold Configuration: From fwd to aft – bv-bl-pl-pv.
Max. Airdraft Manifold: 19.00 m.
Remarks: Safety Pledge letter has to be filed with Port Authority.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Showa Outer SBM	Crude Oil	16 in.×2	8,350
Showa Inner SBM	Crude Oil	12 in.×2	5,000
Showa Wharf "E"	Naphtha	12 in.×1	1,000
	Fuel Oil	12 in.×1	1,000
	Kerosene (Load)	10 in.×1	300/500
	Lub Oil (Load)	3 in.×1	200/300
Daikyo SBM	Crude Oil	16 in.×2	5,000
Daikyo Umaokoshi Pier 1	Crude Oil	12 in.×2 (Chiksan)	3,000
	Fuel Oil	12 in.×1	3,000
	Naphtha	6 in.×2	350/400
	Kerosene (Load)	6 in.×2	380/400
Daikyo Umaokoshi Pier 9	Crude Oil	12 in.×1 (Chiksan arms)	3,000
	Fuel Oil	12 in.×1 (Chiksan arms)	3,000
	Naphtha	6 in.×2	350/450

Attention is drawn to the manual "Safety Standards on Discharge Operations for Crude Oil Tankers", which will be handed to the Master on arrival by the Berthing Master and which are to be strictly adhered to. Apart from request for the normal international safety precautions for tankers, it contains several regulations which could cause considerable delays to vessels if not taken into account when planning discharge/ballasting operations.

Such regulations are:

1. Ballasting operations shall commence between sunrise and 90 minutes before sunset.

2. Berthing operations shall be performed so that discharge operations can be commenced between sunrise and 90 minutes before sunset.

3. Unberthing shall be conducted only between sunrise and sunset.

4. Discharge operations shall be suspended when malfunctions occur to the vessel or discharge facilities or at other times when in the judgement of the Master and the Berthing Master, it is necessary to suspend operations.

It is therefore of utmost importance that the planning/timing of port operations are carefully drawn up and fully discussed with the Berthing Master prior to commencement in order to reduce delays to a minimum. The good operational conditions of ship's equipment (pumps, etc.) and awareness of personnel are of equal importance.

DENSITY: Average 1025.

FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.

FUEL: Most domestic and bonded oil available, ex-barge. Minimum 5 days' notice required.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: No airport.

POLICE/AMBULANCE/FIRE: Police, Tel: 110; Ambulance/Fire, Tel: 119.

TELEPHONES: Telephone can be arranged from shore connection at Government wharves. No connections at tanker berths.

GENERAL: Lightening: Not allowed, except a cargo of oil or chemicals.

SERVICES: Technicians for vessel's instruments can be arranged from other ports.

REGULATIONS: Under adverse weather conditions:

1. If a typhoon is reported approaching, and upon advice from refinery representative, loading or unloading operation will be suspended and vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped upon receiving order from refinery, and vent-line valves securely closed.
3. During stormy weather, with gusty winds condition, Master shall follow weather reports closely and shall endeavour to prevent any accidents by taking all possible precautions, such as reinforcing mooring ropes and arranging adequate emergency personnel to stand-by for any emergency.

Liability for Accidents: If accident is judged by Maritime Safety Office and Port Captain to be ship's fault, either through negligence of these Safety Regulations or otherwise, Master shall immediately cease operations, if necessary, and simultaneously follow in good faith the instructions of refinery and Port Captain, and take all necessary actions. Master shall inspect and verify cause of accident in the presence of refinery representative and ship's Agent, and shall be held responsible for reporting the accident, in writing, to the parties concerned. Until this is completed and full agreement reached with refinery representatives, the vessel shall not leave the jetty, unless otherwise requested. For actual confirmation of the accident, and damage liability, Public Surveyor (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to inspect the accident.

AUTHORITY: Yokkaichi Port Authority, 9-1, Chitose-cho, Yokkaichi City, Mie Pref. *Tel:* (0593) 53-5541/6.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo.

Dry Cargo Vessels: Yokkaichi Warehouse Co. Ltd., 6, Chitose-cho, Yokkaichi Mie-ken. Cable address: Soko Yokkaichi. Domestic Telex: 04948-179 Yonso J. Tel. Yokkaichi (0593) 53-5211.

Tankers: Uyeno Unyu Shokai Yokkaichi Office c/o Showa Yokkaichi Sekiyu K.K. 1, Shiohama-cho, Yokkaichi-shi Mie-ken. Cable address: Uyenoshell Yokkaichi. Domestic Telex 0494-8276. Tel: Yokkaichi (0593) 45-2271/8.

YOKOHAMA (incl. Negishi and Tsurumi): 35.27 N. 139.38 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: As Yokohama/Kawasaki is a busy port, all movements – entering, leaving port and shifting within port – are regulated by Harbour Authorities, and Agent has to make application for movement one day before, also tugboat(s) arranged through Agent. If any change necessary to arrangement already made, 2 hours' notice sufficient to make rearrangement with Pilot. No station pilot boat; Pilots use small launches and often make use of tugboat when it is employed at same time, for embarking and disembarking especially when sea rough. In either case, launch or tugboat with Pilot on board displays "H" flag or lights prescribed in International Regulations. Pilot for Yokohama/Kawasaki port picked-up off Yokohama Fairway Entrance Buoys No. 1 and No. 2, but in case ship has to wait for berth, usually does not take Pilot and proceeds to anchorage shown on chart as "Quarantine Anchorage" or as near as safety permits, and anchors. In this case Pilot boards at anchorage. If anchor or picks-up Pilot inside harbour limit, pilotage cheaper because assessed on two stages; "From Bay to Sea" and "From Sea to Berth", but Master requested to anchor outside fairway. Vessel to provide properly approved pilot ladder.

Uraga Channel:

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka, advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. Uraga Channel Pilot embarks 3 to 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Recommendations: To be followed by tankers of 100,000 d.w.t. or more when they navigate through the Uraga Channel with cargo loaded:

1. 12 hours and 3 hours, respectively, before such a vessel expects to pass the Uraga Channel No. 1 Light Buoy, it should report the following items to the Yokohama Maritime Safety Division. Also, after the three-hours-in-advance report, it should keep its radio station open. This, however, is not required if the vessel is Southbound:

(*a*) Name of vessel.
(*b*) Signal letters, d.w.t. tonnage, type and quantity of cargo, name of port intended to enter (not required in a three-hours-in-advance report).
(*c*) Availability of international VHF transmitter-receiver equipment aboard.
(*d*) Time at which the vessel expects to pass the Uraga Channel No. 1 Light Buoy.

2. Refrain from sailing through the Channel when visibility is poor (less than about 1 nautical mile).

3. Avoid sailing through the Channel at night unless it is essential to do so. Follow any instruction that may be issued from the Director of the Yokohama Maritime Safety Division as to the time for sailing through the Channel.

4. Maintain look-out at stem.

5. Between the neighbourhood of the Uraga Channel No. 2 Light Buoy and that of the Uraga Channel No. 5 Light Buoy, avoid overtaking other vessels (weighing about 500 g.r.t. or more) unless it is essential to do so.

ANCHORAGES: 12 m. – 26 m. in Quarantine Anchorage, and 26 m. – 34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.

RESTRICTIONS: Entry or departure or movement inside port not allowed from sunset to sunrise, but ships without dangerous cargo can be given special permission to enter, leave port and move inside the port (only in Yokohama). In Kawasaki, which is very narrow and long, no special permission given. Depths of shallows in Yokohama, Tsurumi and Kawasaki Fairways 11.6 m., 11.2 m. and 12.0 m., and Pilot Association make these the maximum drafts accessible to the berths inside the respective fairways. Ship with max. draft of 11.6 m., when entering Yokohama through Yokohama Fairway, has to wait for tide.

MAX. SIZE: *Tankers:*

Name of Berth	*Max. d.w.t.*	*Max. LOA*	*Max. safe draft*
Keihin Yokohama (Sea berth)	No limit	No limit	19.50 m.
Shell Oil (Main Jetty)	No limit	180 m.	10.00 m.
General Sekiyu	No limit	182 m.	9.30 m.
Mobil Oil	No limit	176 m.	9.20 m.
Asia Oil No. 5	No limit	No limit	12.00 m.
Nisseki Koyasu	No limit	250 m.	12.00 m.
Nisseki Negishi A (E.)	No limit	310 m.	16.70 m.
Nisseki Negishi B	No limit	250 m.	13.60 m.
Shell Sekiyu Super Berth	No limit	260 m.	11.70 m.
Tokyo Gas	50,000	300 m.	12.00 m.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

TUGS: Under control of Yokohama Kawasaki Tug Company in Yokohama/Kawasaki for foreign ships, and normally join ships in fairway between outer breakwater and Lt. Hos. and Entrance Lt. Buoys. If ship is at anchor in quarantine area or near to it, tug(s) joins ship at anchor. Usually two tugs used for mooring and/or unmooring, but depends largely upon special conditions of berth and weather conditions. Tug's lines used and charge included in towage. 35 tugs available.

VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/VHF").

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630–2130 hrs. (60% additional of basic stevedorage), 2130–0400 hrs. next morning (130% additional). Sundays/holidays (100% additional).

Transtainers	10	333 t.p.h.
Straddle Carriers	46	1,322 t.p.h.

Cranes of Port and Harbour Bureau: 1 Hammer Head crane, 4 Gantry cranes, 1 Level Luffing crane.

Future Plans: Two Gantry cranes in 1984, one Gantry crane in 1985, and three Gantry cranes will be completed in 1986.

MEDICAL: No advance notice required unless urgent.

TANKERS: Masters of tankers seldom requested to fit reducing pieces before arrival for connection of shore lines since oil installation have own appliances. Two slop disposal facilities, one in district No. 5 in Yokohama which is private enterprise and can dispose of dense residues, and one in District No. 1 in Kawasaki which is run by Kawasaki city and can dispose of diluted slop or oily ballast. (Also see "Max. Size").

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Keihin Yokohama Sea Berth	Crude	20 in.×2	8,000
Shell Oil Main Jetty	Lub. Oil	8 in.×2	1,200 (Kl.p.h.)
		6 in.×2	1,200 (Kl.p.h.)
		4 in.×2	1,200 (Kl.p.h.)

	LPG (Gas)	12 in.×1	3,000 (cu.m.p.h.)
	Naphtha	10 in.×1	2,000 (Kl.p.h.)
	Naphtha	6 in.×1	700 (Kl.p.h.)

DENSITY: Average approx. 1023.

FRESH WATER: Available (rate 50 t.p.h.) at Honmoku Pier, Yamashita Pier, Osambashi Pier, Shinko Pier, Takashima Pier, Yamanouchi Pier, Mizuho Pier, Detamachi Pier, Daikoku Pier and 4 Automatic Vending Machines. 3 Water barges with 280 tons capacity also available.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: Oil installations in Yokohama/Kawasaki generally do not allow bunker barge to come alongside ships moored to their berths.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPAIRS: Any kind of repairs can be effected at this port.

DRY DOCKS: The largest dry dock, owned by Ishikawajima-Harima Heavy Industries Ltd. (and another six smaller dry docks owned by Mitsubishi Heavy Industries Ltd., Nippon Kokan K.K.). Max. length, 1,161 ft. 5 in.; breadth at entrance, 183 ft. 8 in.; height of sill above bottom dock,, 5 ft. 3 in.; depth on sill at high water, ordinary spring tides, 20 ft. 3 in.

REPATRIATION: Possible.

AIRPORT: Haneda International Airport 25 km., Narita International Airport 100 km. and served by many regular airlines.

CONSULS:

Consulate-General of Argentine Republic	,,	641–4194
Consulate-General of the Republic of Korea	,,	621–4531/2
Honorary Consulate of Paraguay	,,	401–3431
Honorary Consulate of the Netherlands	,,	651–1661/9
Honorary-Consulate-General of El Salvador	,,	211–1371
Royal Swedish Honorary Consulate	,,	201–4171
Royal Thai Honorary Consulate	,,	651–1361
Royal Norwegian Honorary Consulate	,,	641–0141/7
Royal Danish Honorary Consulate	,,	651–1381
Consular Agency of Mexico	,,	671–7277
Honorary Consulate of Colombia	,,	312–8461
Vice-Consulate of Brazil	..	641–0097

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Only observed at Public terminals.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance, 119; Fire, 119.

TELEPHONES: Telephones can be placed on board.

SERVICES: Almost all requirements by ships could be met, if time permits.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days' extension possible if ship stays longer.

DEVELOPMENTS:

Daikoku Pier Construction Project:

The following construction works are now under way just off Daikoku-cho of Tsurumi Ward:

1. 2-berth pier of 600 m. long, with the depth of water of 12 m., to accommodate container vessels of 35,000 ton class.
2. 8-berth pier of 1,600 m. long, with the depth of water of 10 m., for liners of 15,000 ton class.
3. 8-berth pier of 1,590 m. long with the depth of water of 10–12 m. for tramps of 15–30,000 ton class.
4. 4-berth pier of 520 m. long with the depth of water of 7.5 m. for coastwise vessels of 5,000 ton class.
5. An island-like pier with loading and unloading places.

As for the 25-berth pier as mentioned above, 15 berths (7 berths for tramp vessels) are already in use.

It may be noted that a project to make on this pier a green zone that will provide a recreation place and an athletic field for the benefit of port workers and citizens is now being undertaken. The athletic field is already open for public use.

Land Reclamation Project (near the Honmoku Pier):

For the purpose of expansion of container terminal and creating a green zone and, at the same time, acquiring the ground where to dispose of the city refuse, this project aims at reclaiming land in front of D jetty of the Honmoku Pier by burying dredged soil and sand, unwanted mud and soil and general wastes that do not pollute the environment. It will reclaim land for further expansion of container terminal and make a park and a green zone for the benefit of citizens. Two container berths with depths of 13 m., will be completed in 1984 and 1986.

Kanazawa Reclamation Project:

Reclamation work will be carried out in the sea in front of Kanazawa Ward, in accordance with the city redevelopment plans. A modern industrial zone will be formed on this reclaimed land and many factories that are now scattered in the city, whose locations are undesirable from an environmental view point, will be urged to be relocated to this zone. Thus, while improving the conditions in the city area and various city facilities, the project aims at realising an ideal industrial complex where new and relocated factories will be given sufficient guidance and assistance to have highly modernised facilities that will be free from any pollution problem.

In addition, a marine park will be made, where the people can enjoy the beauty of nature and take quiet repose.

Minato Mirai 21 New Port City Plan for 21st Century: A plan for constructing a new city is underway in an area of 110 ha. extending from the East entrance of Yokohama Station to New Port Pier via Takashima Pier by reclaiming 76 ha. of land in addition, for the functions of this area as a harbour are poor as its facilities have been overworked.

This area has good conditions of location. Therefore, by integrating here the city functions such as business, culture, commerce and recreation, etc., with international features as its axis and by improving the harbour according to the liking of citizens, it is planned to form a new and attractive city by uniting the entire city that has been split up into two parts. At the same time, it is planned to strengthen the harbour functions by way of integrating the control functions of Harbour Centre.

Its construction work started in November 1983 with the year 2,000 as the target for its completion.

AUTHORITY: Port and Harbour Bureau, City of Yokohama, 2 Yamashita-cho, Naka-ku, Yokohama, 231 Japan. *Tel:* 045-671-2874/2888. *Contact:* H. Shimizu, Chief of Port Promotion Division.

AGENTS: Dodwell Tramp Agencies, P.O.Box 271, Yokohama Port, 5th Floor, Minato Building, 33, 3-chome, Hon-ho, Naka-ku, Yokohama. Tel: (045) 201-6991. Cable Address: Dodtramp Yokohama. International Telex: J47721.

YOKOSUKA: 35.17 N. 139.40 E. (See Plan Book)

DOCUMENTS:

Customs:
- Port Call Notification.
- Cargo List.
- List of Crew's dutiable possessions.
- Passenger List.
- Crew List.
- Ship's Nationality Certificate.
- Port Departure permission paper.

Immigration:
- Crew List.
- Port Call Notification.
- Passport or Crew Pocket Book.

Quarantine:
- Declaration of Health.
- Crew List.
- Passenger List.

Plant Protection Station:
- Plant Importation Inspection Application.

Maritime Safety Agency:
- Port Call Notification.
- Application for Loading, Transfer and Unloading of Explosives and Combustibles.
- Application for Transport of Explosives and Combustibles.

Port Authority:
- Port Call Notification.
- Application for use of Facility.

PILOTAGE: In applying for Pilot at time of entry and departure, pilot station should be contacted 24 hours in advance of beginning of Pilotage through Agent. 44 Pilots available.
Uraga Channel Pilots: Tel: 0468-35-6211. Telex: 3852-451.
VHF Call sign: "Uraga Channel Pilot", on Channel 16.

ANCHORAGES: At 4th District of Yokosuka Port. Depths 10 m. – 30 m.

RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port under compulsory pilotage districts.
Possibilities of Entry or Sailing after Sunset:
Nagaura Pier:
Entry – 0600 to 1800 hrs.; Sailing – 0600 to 2200 hrs.
Yokosuka Shin-ko:
Entry – 0600 to 1700 hrs.; Sailing – 0600 to 1700 hrs.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Authorities board at anchorage. Quarantine Station to be informed in advance name of last port, ship's name, tonnage, number of crew, number of passengers, ship's nationality, etc. In event any suspected disease, Agent should be advised. When isolation of ship needed, it will be transferred to Nagahama Quarantine Station in Yokohama.

RADIO: Local radio station.

BERTHING: Agent submits application for berth to Port Authority (Nagaura and Kurihama Port Offices and Yokosuka New Port Wharf Company).

TUGS: Can be arranged through Agent. Tugs normally join vessel in 3rd District when vessel enters Nagaura and New Port, and in 7th District when it enters Kurihama. Tug's lines to be used. Charge for tug's lines included in charge for tug.

STEVEDORES: Agent will arrange stevedores.

MEDICAL: Agent can arrange doctor who understands foreign languages.

TANKERS: No berthing facility for commercial tankers. Only U.S. Naval Base, Yokosuka, has berthing facilities.

FRESH WATER: Available by barge or ex-wharf. 50% additional charge in case of bad weather or out of office hours.

FUEL: Most grades of domestic and bonded oil are available from Yokohama or Kawasaki.

GANGWAY/DECK WATCHMEN: Agent arranges watchmen.

OPENING/CLOSING HATCHES: Stevedores or crew.

CUSTOMS ALLOWANCES: Tobacco: 2 packets per day. Spirits: 1 bottle when more than 1 month voyage; 2 bottles when more than 6 months voyage.

CONSULS: None.

REPAIRS: Dockyards available for all repairs.

DRY DOCKS: 1 – 475×19.5 ft.; 1 – 352×15.75 ft. 5 large-size slips; 1 rigging wharf.

REPATRIATION: No facilities exist. If necessity occurs, Yokohama Immigration Office will attend.

AIRPORT: 40 km. to Tokyo International Airport.

TIME: GMT plus 9 hours. No alterations during year.

HOLIDAYS: Cargo work usually daytime. On Saturday afternoon and Sunday, National holidays, Municipal Inauguration Anniversary, and December 31, January 1, 2 and 3 no cargo work.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

TELEPHONES: Facilities now underway.

GENERAL: Port situated in city confines, a portion of port is used by JMSDF and also by the U.S. Navy according to Japan-U.S. Security Treaty.

AUTHORITY: Nagaura Port Office, Mubanchi, Minato-machi, Taura, Yokosuka City. *Tel:* (0468) 61-3419.

Port & Harbour Dept., Yokosuka City, 11, Ogawa-cho, Yokosuka City. *Tel:* (0468) 22-4000.

AGENT: Sub-Agent of Dodwell & Co., Tokyo. Sagami Unyu Kabushiki Kaisha, Taura Minato-Machi, Yokosuka-shi, Kanagawa-ken.
Cables: Sagami Yokosuka Taura. Tel. Yokosuka (0468) 61-5361.
Telex 03852-528.

NOTES

Please also advise Shipping Guides Ltd.

Jordan

AQABA: 29.31 N. 35.01 E. (See Plan Book)

LOCATION: The commercial sea port of Aqaba is the only outlet to the Hashemite Kingdom of Jordan, and is situated at the top of the Gulf of Aqaba at Lat. 29° 31′ N., Long. 35° 01′ E.

The Container and Cement Terminals lie approximately 3 miles to the South of the main port.

The Fertiliser Industry Terminal lies approximately 12 miles to the South of the main port.

PORT LIMITS: The Southern limit of the port is an imaginary line 270° from Al Derrah Point (Saudi Border).

DOCUMENTS: *Documents required by the authorities for cargoes:*

1 Copy of all dangerous goods on board showing IMO & UN numbers.

6 copies unfreighted Manifest, showing IMO & UN numbers for dangerous goods.

2 copies of unfreighted Manifest for Free Zone if vessel has Free Zone cargo.

1 set of non-negotiable Bills of Lading.

All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included in the Black List".

All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents Required by the Authorities for Free Pratique:

7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The Following Forms to be Filled:

2 copies of Maritime Declaration of Health.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The Following Documents to be Produced for Checking:

(*a*) Log Book.
(*b*) Ship's Registry Certificate. (Kept by the Port Authorities until departure).
(*c*) Derat Certificate.

PILOTAGE: Pilotage is compulsory in that area of Aqaba Bay North of an imaginary line 270° from Al Derrah Point. Notice of ETA must be made to the Harbour Master not less than 24 hours before arrival through the ship's Agent. ETA is confirmed by radio before entering Tieran Straits. ETA confirmation by VHF is required not less than 2 hours before arrival. Ships in harbour requiring a Pilot should call the Pilot through Aqaba Port Control Radio (VHF Channel 16, working Channel 12) 1 hour before ship is ready to move. Advance notice of the ship's requirement of pilot service should be given to the Agent who should advise the Harbour Master or his representative.

It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory. Sound signals are prohibited.

Ships intending to go to anchorage, cargo berths or bulk export berths should wait for Pilot in a position 1 mile to the West of Al Derrah Point.

Ships intending to berth alongside the Yarmouk Floating Berth should wait for Pilot 1 mile to the S.W. of the berth.

Ships intending to berth alongside the fertiliser berth should wait for Pilot 1 mile to the S.W. of this berth.

The vessel has to supply the following information to the pilot station when requesting a Pilot:

(a) Name of vessel;
(b) Nationality;
(c) Agent's name;
(d) Overall length;
(e) Maximum draft;
(f) Gross and net tonnages;
(g) Cargo for Aqaba;
(h) Any special characteristics of the vessel.

ANCHORAGES: About 0.5 miles from shore in depths of 15 to 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 11 large vessels.

Anchorages 1-5 are called inner anchorage and are used for ships discharging cargo into barges. The remainder (6-11) are used for ships waiting. The anchorage may take a larger number of ships during congestion periods. All anchorages lie in the compulsory pilotage areas.

When anchored all ships must keep 6 cables distance from the Royal Jetty.

RESTRICTIONS: Recent regulations prohibit the entry of ships to anchorage after 2000 hrs. until daybreak.

Berthing on phosphate berths and floating berth is prohibited during the hours of darkness.

It is prohibited to throw overboard or pump into waters any refuse, spills, ballast waters or oil of any kind. Failure to abide will make ship liable to pay a fine up to 10,000 J.D.

MAX. SIZE: Up to 20,000 d.w.t. max. draft 32 ft. for the cargo berths and 100,000 d.w.t. and 50 ft. draft for the phosphate loading berth. Also see "Berthing".

TUGS: Compulsory. One 1,300 h.p. and two 1,500 h.p. tugs – twin screw with schuttle drive, and several small tugs of 250 h.p. for towing barges, handling ships' lines etc.

HEALTH: Pratique Officials board after vessel drops anchor or after vessel is secure alongside.

The Port Medical Officer is in charge of granting Free Pratique to all vessels on arrival.

The Port Medical Officer is also in charge of all medical matters concerning ships and seamen.

RADIO: Aqaba Radio Station call sign JYO. Watchkeeping hours GMT 0500 to 1700. Station has transmitting frequencies presently on 500 and 477, however 2182, 2612.5, 6390 and 4326.5 are reserved for future use.

The station can receive on all M/F and H/F frequencies and listens continuously on 500 kHz at present.

Weather Forecast: During watchkeeping hours the weather forecast is broadcast for the Aqaba Gulf area twice daily – at 0730 and 1530 GMT.

Traffic List: The traffic list is broadcast every 2 *odd* hours on the half hour.

Station maintains watch during schedule hours on VHF Channel 16, working Channel 12 for service messages.

Radio Free Pratique may also be granted to vessels prior to their arrival, by radio.

Station Telex No. 62 235 Aq Radio Jo. Station Tel. No. 5544.

RADAR: There is no Port Control Radar, but tug boat "Ramm" is equipped with radar and sounding apparatus.

VHF: Aqaba Port Control at Harbour Master's Office listen from 0700 to 2400 hrs. local time on VHF Channel 16, working Channels 10 and 12 for service messages. Pilots listen VHF Channel 16.

BERTHING:

General Cargo Berths: The port has 6 deep water berths 1,060 m. long which can receive ships of up to 20,000 d.w.t., and with a draft of 32 ft. at LW. The height of these berths is 6 ft. to 10 ft. (2 m. to 3 m.) above sea level. Each berth has an apron 35 m. wide and also a transit shed, a semi-covered shed and open storage areas of about 20,000 sq.ft.

The port also has 3 berths 450 m. long for shallow drafted and coastal vessels.

Further the port has a lighter quay 280 m. long for lighters carrying cargoes discharged in the Roads.

The total storage areas in the Main Port are as follows:

Transit Sheds	45,200 sq.m.
Semi-covered Sheds	25,000 sq.m.
Open Storage Areas	436,000 sq.m.

Cargo Berth No. 1 is equipped with 2 grain elevators capable of discharging 400 t.p.h. each into grain silos of capacity 150,000 tons.

The main cargo port also has cold storage facilities for 500 tons.

New container stacking area of 140,000 sq.m. at main port area fully equipped with 2 straddle carriers and fork lift trucks of various capacities ranging from 2 tons to 10 tons.

Bulk Export Berth A: The berth is 210 m. long and the draft alongside is 33 ft. It is situated South of the general cargo berth and is specially built to load phosphate rock in bulk via a loader which can handle 500 t.p.h., (this loader has been damaged since June 1979). The berth is designed to accommodate ships of up to 20,000 d.w.t.

Pipes have been laid to supply petroleum to a nearby tank farm for the occasional import of some petrol products, other pipes for use in importing edible oil in bulk and for supplying bunkers to vessels have also been laid.

There are 2 main berthing dolphins with a loading tower in between and mooring dolphins at each end. The loading tower is connected with a conveyor belt feeding the tower from 2 silos with a 20,000 ton capacity each.

Bulk Export Berth B: This berth is 180 m. long with 15 m. depth of water at LWS tides and is designed for berthing and loading 100,000 d.w.t. bulk carriers.

The berth has 2 mooring dolphins 45 m. North and 45 m. South of the berth ends and is connected to the shore by 2 causeways about 4 m. wide which are able to take large trucks.

The berth is equipped with 2 travelling shiploaders with a loading capacity of 2,200 tons of rock phosphate per hour each, and the phosphate is loaded through a telescopic pivoting feed chute which is fed from 4 phosphate silos with a capacity of 370,000 tons. Rock phosphate being loaded into ships is weighed on a continuous recording belt weigher. The accuracy is 100% between 40% and 115% of rated capacity. The clearance of the chute above high water level is 18 m. Loading may be carried out 24 hours per day.

Yarmouk Floating Berth: Depth alongside is only 33 ft. The berth is presently used for handling cement in bulk.

Container Terminal: Mota Floating Berth has been removed and replaced by a permanent container berth, stage II now under construction.

The Container Terminal has a container freight service. Container Freight Station (CFS) and a container and Ro/Ro storage area of 180,000 sq.m.

The capacity of the container storage area is 2,560 full containers and 960 empty containers (in TEUs).

The Terminal also has 24 power points for the supply of power to refrigerated containers.

Jordan Fertiliser Berth (JFI): The Jordan Fertiliser Industry Co., Ltd., has recently completed their berth, commonly known as JFI Berth. Close to the Saudi Arabian border about 20 km. South of the general cargo berths, the berth was built specifically to enable them to discharge their equipment. It is 80 m. long by 24 m. wide, has a depth of 8.25 m. at the West side and 3 m. above Admiralty chart datum. Vessels of 5,000 d.w.t. and between 100 m. and 120 m. in length can berth alongside. The rise and fall of the tide is about 1 m.

Mooring buoys are installed to enable Ro/Ro ships to use the berth. These vessels berth from the South side by placing their ramp on a 24 m. wide by 21 m. long section consisting of a concrete slab supported by bearing piles. The depth here is 7.5 m. and the slab can support a single piece of equipment of 180 tons.

A larger fertiliser berth is being constructed close to the temporary berth. This will be exclusively used by the owner, JFI, for the import of their bulk raw materials and export of their bulk and bagged finished products.

The Industrial Port consists of 1 jetty with 2 berths.

	Sea Side	*Shore Side*
Max. draft permissible	16 m.	11.4 m.
Length	219 m.	190 m.
Max. vessel width	27 m.	
Max. vessel d.w.t.	50,000 tonnes	30,000 tonnes

Cargoes handled: Anhydrous Ammonia, Sulphur, Phosphoric Acid, Diammonium Phosphate Fertiliser and MOP.

Potash Berth: Another berth of identical specification to JFI Berths will soon be constructed about 15 km. South of the general cargo berth and about 5 km. to the North of JFI.

This is to serve a project being developed to extract potash brine from the Dead Sea 180 km. North of Aqaba. An excellent highway connects the berth with the Dead Sea which is expected to provide potash and other chemical exports.

Also see "Developments".

CARGO EQUIPMENT: *Forklifts:* 54×2 tons; 24×3 tons; 7×3.5 tons; 6×5 tons; 21×7 tons; 1×15 tons; 1×22 tons and 1×30 tons.

Mobile Cranes: 26×3 tons; 2×5 tons; 31×10 tons; 9×15 tons; 1×17 tons; 3×20 tons; 3×45 tons; 1×70 tons and 1×120 tons.

Tug Masters: 14.

Shore Cranes: 2×5 tons on floating berth. 2×40 ton gantry cranes.

Tractors (towing): 43.

Head Trucks: 6.

Chassis of 40 ft.: 19.

Straddle Carriers: 6.

Trailers: 120.

Barges: 7 Flat Top Barges of 250 tons, 14 Flat Top Barges of 300 tons, 6 Flat Top Barges of 500 tons, 4 Barges of 250 tons, 1 Water Barge of 300 tons, 1 Waste Collection Barge of 100 tons, 1 Oil Pollution Combatting Barge of 200 tons.

STEVEDORES: Stevedoring is carried out by The Ports Corporation and their working hours are from 0800 – 1400, work must start at 0700 and end at 1400, therefore there is 1 hour overtime in the morning from 0700 – 0800. The second shift's working hours are 1700 – 0100 next morning and are counted as overtime hours.

Ships with homogenous cargoes of bags or steel may work four shifts per day – first shift 0700 to 1200, second 1200 to 1700, third 1700 to 2300 and fourth 2300 to 0500 next morning.

During the month of Ramadan the timing is 0730 – 1400 for the first shift and 2000 – 0300 next morning for the second shift, the four shift system is suspended during this month.

Cargo work is continuous throughout the year with the exception of 1 day at Eid-El-Fitr (the first day of the holiday) and 1 day at Eid-El-Adha (the first day of the holiday).

Friday is the official weekly holiday therefore the working hours during this day are treated as overtime hours at an extra cost of JD 37.5 per gang per day.

Ships' Working Hours: Ships can work around the clock depending on the Master's option and the number of ships in port. Opening of ships' hatches is allowed up to 2100 hrs. if Agent arranges for gangs beforehand.

The port meeting is held daily at 1000 hrs.

TANKERS: Tankers may berth alongside the phosphate loading berth "A" during daylight hours only.

A new jetty was originally built to handle bulk cement in 1983 and is now used by tankers for oil loading from land transport. A new project to erect an oil export jetty to receive oil from pipes is now under consideration.

DENSITY: Average density in the port is 1031.

MEDICAL: A modern, well equipped and well staffed hospital has recently been commissioned. Also see "Health".

FRESH WATER: A quantity of 50 tons of fresh water may be supplied to ships as a maximum due to water shortage and water may be supplied alongside any of the berths with the exception of the floating berth which has no water available.

FUEL: Fuel oil of 1297 – 1433 sec. and diesel oil are available provided ample notice is given to Agent. Bunkering is carried out on Bulk Export Berth "A" by lines from a tank farm 0.5 km. away from the berth.

REPAIRS: Only minor repairs may be carried out above the waterline, (see "Developments"). Divers may be obtained and a private firm carries out repairs to Navigational Aids including radar, gyro compass, echo sounder, wireless equipment, etc.

DRY DOCKS: No dry dock is available in Aqaba.

SURVEYORS: Germanischer Lloyd, NKK, Bureau Veritas and Lloyd's Register are available.

OPENING/CLOSING HATCHES: Normally handled by stevedores, while alongside or by ships' crew before arrival.

CUSTOMS ALLOWANCES: 20 packets of cigarettes and 1 bottle of liquor for each crew member. Ship's store is locked and sealed by Customs while in port.

GANGWAY/DECK WATCHMEN: Customs provide a guard who has to be given full board and lodging. Ships are also supplied by local watchmen through Agents.

HOLIDAYS: King Faisal's Crowning (March 8th); May Day (May 1st); Independence and Army Day (May 25th); Arab Reconaissance Day (July 4th); Crowning of King Hussein (August 11th); King Hussein's Birthday (November 14th).

The following dates change from year to year as they are reckoned in accordance with the lunar calendar consisting of 354 days.

1985: Eid El Maraj (April 17th); Eid El Fitr (June 18th); Eid El Adha (August 26th); New Year Hijriya (September 15th); Prophet's Birthday (November 25th).

1986: Eid El Maraj (April 7th); Eid El Fitr (June 8th); Eid El Adha (August 16th); New Year Hijriya (September 5th); Prophet's Birthday (November 15th).

CONSULS: All Consulates are in Amman, the capital, except for Hon. Danish Consulate, (Vice-Consul), at Kawar Building.

TIME: GMT plus 2 hours.

AIRPORT: Aqaba Airport links Aqaba with Amman International Airport 355 km. away. One flight daily except for Thursday and Saturday when 2 flights are scheduled for each.

GENERAL: *Weather:* Masters are warned that during the Winter months strong Southerly gales can develop within 2 hours followed by swell. In such a case it may be necessary for small vessels to unberth and proceed to sea, and also for vessels in the anchorage to weigh anchor and proceed to sea and remain at sea until the weather moderates.

Range of Tide: The range of tide is 4 ft. at Spring tides.

Firefighting: The port has its own fire brigade, which includes 3 water and foam engines; 1 dry powder engine; 1 ladder engine; 1 water and rescue engine and 2 manual high capacity pumps, plus a variety of equipment such as breathing apparatus etc.

The town of Aqaba has a highly efficient and well equipped fire brigade and it is 1 km. away from the port.

Aqaba Airport 11 km. away also has a fire brigade and assistance may be called for from any of these whenever needed.

Waste Matter and Pollution: No rubbish may be thrown overboard either at the anchorage or alongside the quays. A barge calls regularly at all anchorages to collect garbage. No vessel which has carried livestock may clean its holds while in port. No vessel may pump overboard any silage or water ballast liable to contaminate the port. This regulation refers particularly to substances mixed with oil. Any discharge of oil or oily ballast into the water is strictly prohibited. Ships' Masters are warned that contravention of this rule renders them liable to penalties of up to JD. 10,000 per ship.

DEVELOPMENTS: The 5 year development plan is now almost completed:

1. Two tug boats were purchased.
2. One pilot boat was purchased.
3. Computerisation: Still under consideration.
4. Two straddle carriers were purchased.
5. Slipway was completed in April 1983.
6. Stage I of the permanent container terminal was completed where a berth of 280 m. was erected and equipped with 2 gantry cranes for 40 ton containers.

Stage II is now under construction replacing Mota Floating Berth, which was removed, this stage consists of 1 berth of 260 m. A Ro/Ro berth was erected in the same area with a length of 40 m. and can take a ship of 220 m. long with 12 m. draft.

7. General cargo berths still under consideration.
8. Grain Silos: Capacity of which was increased to 150,000 tons.

AUTHORITY: The Ports Corporation – Aqaba, P.O.Box 115, Aqaba, Jordan. *Tel:* 2471/2, 4031/8. *Telex:* 262 Port Jo, 235 Radio Jo. *Cables:* Port, Aqaba. *Contact:* M. Katamin, Director General.

NOTES

Kampuchea

KOMPONGSOM: 10.38 N. 103.29 E.

PORT LIMITS: The seaward boundaries are fixed by the buoys "KS" to the South and "A" to the East (for cargo ships) and 2 miles N.W. of Rocher Carre (for tankers).

DOCUMENTS:
Entry form to be completed on arrival.
23 Manifests of Cargo for Discharge.
2 Manifests of Cargo in Transit.
10 Crew Lists.
7 Passenger Lists.
7 Lists of Provisions.
7 Lists of Crew Personal Effects.
7 Lists of Arms and Ammunition.
7 Lists of Drugs and Narcotics.
Ship's Register.
Passenger Safety Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Contact "Pilot Kompongsom" giving ETA 24 hours before arrival. Pilotage is compulsory for all vessels of more than 150 nrt. Pilot launch is a white motor boat carrying international pilot signals. Cargo Vessels: Pilot boards at buoy KS. Tankers: Pilot boards 2 miles N.W. of Rocher Carre. Pilot station equipped with VHF simplex channel only, Channel 16.

ANCHORAGES: Southern Anchorage: Centred on buoy KS at the entrance of the deep-water channel in depths of 10 m. to 12 m.

Northern Anchorage: to the West of buoy A, in depths of 10 m. to 11 m.

Tanker Anchorage: 2 miles N.W. of Rocher Carre in depths of 15 m. to 18 m.

RESTRICTIONS: Entrance prohibited to Portuguese and South African vessels. Berthing daylight only, and unberthing day and night but delays may occur in bad weather during S.W. monsoon.

MAX. SIZE: Cargo vessels: draft 7.60 m. plus height of tide. Limited by entrance channel. Tankers: length 220 m., and draft 11.50 m.

HEALTH: Authorities board all vessels on arrival at the quay or in the outer harbour. Quarantine flag to be flown by all vessels even if coming from a Kampuchean port. In case of suspected disease on board, contact "Sante Kompongsom" by radio before arrival.

RADIO: Kompongsom Radio; call sign XUK, operating 24 hours daily. Medium wave: receiving on 500 kHz, transmitting on 500 and 458 kHz. Short wave: receiving on 8364 and 4185 kHz. Transmitting on 8480, 8680, and 4342 kHz.

TUGS: Available to assist berthing and unberthing. Join vessel in immediate vicinity of the berth. Vessel's lines used. Three tugs available, largest 1,500 h.p.

BERTHING: Commercial Dock: West side, 2 berths for vessels up to 9.50 m. draft. East side, 2 berths for vessels up to 7.50 m. draft.

New basin, for vessels up to 6.50 m. draft.

Tankers: Oil Refinery Terminal situated at Pointe du Depart. Two sea-line buoy berths in depths of 13 m. No slop disposal facilities. Hoses are lifted and connected by ship's crew.

STEVEDORES: Working times from 0700–1130 hrs., from 1400–1700 hrs., from 1900–2200 hrs. according to authorisation of Military.

MEDICAL: Advance notice required of serious cases to arrange transportation to Phnom Penh. Local doctors and hospital available for non-surgical cases. Crew require cholera and yellow fever certificates.

DENSITY: 1022 in February; 1012 in July.

FRESH WATER: Available at Commercial Dock at rate of 10 cu.m. per hour. Very small quantities may be supplied by tug.

FUEL: Only available supply by tanker-lorries in case of emergency.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Each crew member allowed one carton cigarettes and one bottle alcohol for five days. Master not included in this restriction.

IDENTIFICATION CARDS: Seamen's passports or seamen's books are taken by Immigration in exchange for a shore pass to be surrendered when vessel departs.

CONSULS: France, tel. 2742. All other consuls at Phnom Penh.

REPAIRS: Small repairs can be undertaken on board.

REPATRIATION: Can be arranged.

AIRPORT: Ream Airport, 18 km. from Kompongsom, domestic flights only. Pochentong Airport at Phnom Penh 226 km. from Kompongsom, with full international services.

TIME: GMT plus 7 hours all the year round.

HOLIDAYS: Work can usually be arranged on all days except at Kampuchean New Year, 13th, 14th and 15th April, and for two days near the end of September which is the Buddhist Festival of the Dead.

POLICE/AMBULANCE/FIRE: National Police tel. 2630; Police Aid 17; Fire 18; Ambulance 19.

SHORE LEAVE: Allowed. Permission of Immigration Dept. is required to travel outside Kompongsom port area.

Curfew: In force from 2200–0600 hrs.

DEVELOPMENTS: New wharves being built and access channels deepened.

AUTHORITY: Direction du Port Autonome de Kompongsom.

NOTES

Please also advise Shipping Guides Ltd.

Kenya

MOMBASA: 04.04 S. 39.40 E. (See Plan Book)

DOCUMENTS:
Health Certificates: Forms obtainable from Pilot.
6 Crew Lists.
10 Passenger Lists.
Dangerous Cargo Lists.
Ship's Register.

Shipmaster's Report: 1981.
Declaration of Health (Form Med-284).
Port Health Clearance of Ships (Form GPK-160).
Set Vaccination Lists.
4 Crew Lists.
4 Intransit Passenger Lists.
4 Landing Passenger Lists.
Arrival Declaration for Passengers (Landing Only) (Form F1).
Store List (Form C7).
Crew Declarations (Form C8).
Parcel Lists (Form C3).
Ship's Register (Copy).
Ship's Record & Master's Report (Form EAH-6007) (to Pilot).
Shore Passes (Company Forms).
Arrival & Sailing Reports (Agency Forms).

Shipmaster's Report: April 1984.

Please note that the "East African Countries" (Kenya, Tanzania, etc.) Customs Union does not exist any more and separate Customs Declarations are needed for each country. Consequently Bonded Stores seal can be broken after Mombasa or Dar Es Salaam.

PILOTAGE: ETA through ships' Agents, 48 hours' notice. VHF Channel 12 (Mombasa Radio VHF Channel 16). Pilot boat 72 ft. launch, blue hull, white superstructure. No signals for Pilot – call on VHF Channel 12 (Mombasa Pilots) or by signal lamp to lighthouse. Pilot boat position 1 mile outside "Turning Buoy" on Ras Serani leads (301°) except for deep-load tankers (over 35 ft.) when pilot boat position 1 mile from "Turning Buoy" on Mackenzie leads (327°). No special bad weather regulations. Pilot ladder 6 ft. from water – must have manropes – lit at night.

Tankers: For deep laden tankers Pilot boards 1 hour before HW. Because of strong currents, deeply laden tankers must not attempt to "close" in before sighting pilot launch. Good lee and some headway recommended.

Special attention is drawn to the fact that ships bound for Kipevu must be in the agreed pilot embarkation position at the agreed time. The time agreed is chosen, such that, ships may transit the dredged channel with maximum advantage of the rising tide and arrive off the berth just before the ebb sets in. At that moment only little time is left to position the vessel and tie up sufficient moorings to hold vessel on to the jetty face, before the force of the ebb, diverted to an abeam direction by the jetty causeway, comes to bear on the ship's side.

Distance to Shimanzi Jetty, about 6 miles.
Distance to Kipevu Jetty, about 7 miles.

ANCHORAGES: No safe outer anchorage.

RESTRICTIONS:
Tankers:
1. By day: Max. length 820 ft.
By night: Max. length 680 ft.
Trim to be between 4 ft. to 6 ft.

2. No restrictions for night movements for Crude Oil or Black Oil ballasted vessels up to 820 ft. LOA provided: (Rigid requirements.)
(a) movement takes place on last 3 hours of flood tide;
(b) all anchorages between berth and sea are vacant;
(c) the Duty Pilot holds a Master's Certificate;
(d) ballast draft to be 18 ft. forward, 22 ft. aft.

No night movements are permitted for Low Flash White Oil product vessels. Masters of vessels ready to sail at night are strongly advised to notify the Authorities of the time of sailing; the vessel is to be ready to sail before 1600 hrs. and preferably before 1500 hrs. of the day in question.

This should be done by Radio direct to the Assistant Harbour Master and through Agent. The Agent must also make the request in writing to the Harbour Authorities so that proof of requirements exists.

This is a standing regulation.

MAX. SIZE: Length 820 ft. Draft 44 ft. Also see "Restrictions", "Berthing" and "Tankers".

RADIO/VHF: Mombasa Radio Coast Station M/F, H/F, W/T & R/T and VHF R/T Services:

Station 5ZF (W/T) 500 – 524 kHz; traffic list 0100, 0500, 0900, 1300, 1700, 2100; Continuous watch; listening freq. 500 kHz.

Station 5ZF2 (W/T) 8710.4 kHz; traffic list 2018; schedules 2018 – 2030, OBS only 0080 – 0030, 0600 – 0630, 1200 – 1230, 1800 – 1830; listening freq. 8354 – 8374 kHz.

Station 5ZF3 (W/T) 13065 kHz; traffic list 0448, 0830, 1518; schedules 0448 – 0530, 0830 – 0900, 1518 – 1545; listening freq. 12531 – 12561 kHz.

Station 5ZF4 (W/T) 17175.2 kHz; traffic list 1248; 1248 – 1315; listening freq. 16708 – 16748 kHz.

Station (R/T) 2595, 2181 kHz; traffic list 0603, 1203; schedules 0600 – 0630, 1200 – 1230; continuous listening watch outside schedules 2182 kHz; listening freq. 2182 kHz.

Station (R/T) 4409.4 kHz; traffic list 0533, 1303; schedules 0530 – 0600, 1300 – 1330; listening freq. 4104.4 kHz.

Station (R/T) 8805.6 kHz; traffic list 0633, 1233; schedules 0630 – 0700, 1230 – 1300; listening watch on 8255.6 kHz; 0330 – 1530 listening freq. 8255.6 kHz.

Mombasa Radio also provides continuous R/T service on VHF for the benefit of ships in and around Mombasa within radius of 30 miles. Channel 16 for calling and Channels 26 and 27 for working. All times in GMT.

HEALTH: Radio Port Health Officer, Mombasa, giving last port of departure, ETA Mombasa, condition of crew, any sickness on board, passengers. Must have "Q" Flag until doctor visits vessel.

TUGS: Tugs join vessel inside harbour between Ferry and Kilindini Reef. Tug lines no additional charge.

BERTHING: All berths fendered. Nos. 8, 9 and 10 and Shimanzi Oil Terminal berths, no berthing on ebb tide, with range of 6 ft. or more. Kipevu Oil Terminal berthing on first of ebb with tankers over 650 ft.

Draft alongside Nos.	1 to 5	32 ft. at datum
„ „	7 to 10	31 „ „ „
„ „	SOT	32 „ „ „
„ „	11 to 14	33 „ „ „
„ „	16 to 18	36 „ „ „
„ „	Mbaraki	36 „ „ „
„ „	KOT	44 „ „ „

Draft in Buoys varies from 24 ft. to over 60 ft. at datum

Channel depth 40 ft. at datum, plus tide, minus 6 ft. N.E. or 8 ft. S.E. Monsoon gives max. draft for entry. Therefore, max. draft given as 44 ft. as this is the controlling factor for KOT.

CARGO HANDLING: No. 9 berth has been arranged for bulk export of soda ash. Berth for Roll-on/Roll-off traffic has been operated on experimental basis since March 1980. Container berths at No. 16, 17 and 18. One 40 tonne container crane at No. 18. 3 ship-to-shore gantry cranes, 4 rubber mounted yard gantry cranes and 2 rail mounted gantry cranes available. Also see "Developments".

Mbaraki cement berth for bulk export of cement clinker and automated loading of cement in bags, also used for bulk import of coal.

Shimanzi oil terminal now handles all imports of bulk vegetable oil as well as all other oil products except crude oil.

Bulk Molasses exports handled at berth No. 9 and Mbaraki.

Bulk cargoes are at present handled by grabs, railway wagons and lorries.

STEVEDORES: ETA preferably 48 hours in advance in order to arrange gangs. Advisable notify Harbour Master ETA and also give quantity of cargo to be loaded and/or discharged and other matters of importance.

Working Hours: Weekdays: 3 shifts, 0700 – 1500, 1500 – 2300 and 2300 – 0600. Saturday and Sundays: One shift, 0700 – 1500.

Stevedoring Company: Kenya Cargo Handling Services Ltd., P.O.Box 95187, Mombasa.

MEDICAL: In emergencies necessary to receive advance notice. Hospital facilities available. Inoculations required – yellow fever (endemic zones in Africa and South America), cholera (all ships from Asia).

TANKERS: Discharge and load white oils at Shimanzi. Discharge and load Heavy oils at Kipevu.

Shimanzi Oil Terminal: T-head jetty with 200 ft. long berthing head. Depth alongside 32 ft. LWOST. Bunkers and fresh water available.

Kipevu Oil Terminal: T-head jetty with 225 ft. long berthing head. Tankers up to 65,000 d.w.t. berth at dolphins alongside jetty head; depth alongside 44 ft. LWOST. Max. length 820 ft. Max. draft 44 ft. (over 42 ft. by arrangement). Slop reception facilities for 3,000 tons.

At Kipevu, tankers normally berth starboard side to at slack tide, on the beginning of the ebb. Masters should assist Pilots to moor as quickly as possible, in view of the abeam current in a direction off the jetty, which is created by the jetty causeway configuration. This current will increase with the ebb tide and ships with all wire moorings are advised to use their first-ropes-ashore with priority. Mooring launches are low powered and can only handle 1 wire at a time, and mooring dolphins are not fitted with winches and require manual handling of wires. In view of the above, and in view of the accurate positioning required to connect to chiksan arms, it is vital that the ship be brought against the breasting dolphins as soon as possible.

In cases where vessel's mooring is delayed by whatever reasons, Pilots may require extra tugs to assist in keeping the ship alongside.

DENSITY: 1025.

FRESH WATER: Available at all berths; in stream ex-tug at Harbour Master's discretion or barge of 300 tons capacity. 30 t.p.h. on quay.

FUEL: *Main Quay Berths:* Marine fuel oil, viscosity 1500 secs. Marine diesel fuel. Gas oil cannot be delivered by pipe-line at these berths but delivery can be made by bulk lorries up to only 10 tons at extra delivery cost. Minimum 48 hours' notice required. Quantities of 10 to 30 tons can be made by rail tank wagon if 48 hours' advance notice given. Thin fuel oil viscosity below 1500 secs. can be delivered at all berths through Fisher blender. Only 1 Fisher blender available and can deliver fuel to only 1 vessel at a time.

Shimanzi Oil Terminal: All grades, i.e. fuel oil, marine diesel, gas oil and thin fuel oil (through Fisher blender).

Cased Oil Jetty: Only marine diesel and gas oil can be delivered at this jetty.

Kipevu Oil Terminal: Only fuel oil of viscosity between 1500 secs. and 3500 secs. available. Fuel oil viscosity below 1500 secs. not available. At least three days' clear notice required by EA Oil Refineries for arranging bunker delivery. Not possible to deliver any marine diesel or gas oil either ex pipe-line or rail tank-wagons/bulk lorries at this berth.

GANGWAY/DECK WATCHMEN: Watchmen available for gangway and deck and recommended.

OPENING/CLOSING HATCHES: Normally done by stevedores except MacGregor type hatches.

CERTIFICATES: Normal port requirements for safety cargo equipment.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes for each crew member for 8 days. Wine and/or Spirit, 8 small bottles of beer for each crew member for 4 days.

CARGO GEAR: All cargo gear supplied by stevedores.

IDENTIFICATION CARDS: Port passes issued by the Port Authority.

CONSULS: The following countries are represented in Mombasa: Germany, India, Belgium, Denmark, France, Italy, Norway, Sweden, Netherlands, Greece, USA.

REPAIRS: Normal running repairs.

DRY DOCKS:
African Marine Drydock:
Principal Dimensions:

Length	590 ft. 00 in.	180.00 m.
Entrance width	80 ft. 10 in.	24.75 m.
Dock width	86 ft. 00 in.	26.40 m.
Minimum water depth LWS	13 ft. 00 in.	4.00 m.
Maximum water depth HWS	26 ft. 00 in.	7.90 m.

Cranage: 1×30 ton fixed, adjacent to the dock gate.

1×7 ton mobile on rails which can traverse the full length of the West side of the dock.

1×5 ton mobile on rails which can traverse the full length of the East side of the dock.

1×5 ton fixed at the jetty.
1×7 ton mobile.
1×12 ton mobile.

Berths: One piled jetty capable of mooring ships of up to 280 ft. length overall, with certain draft restrictions. A second berth capable of taking ships of up to 300 ft. length overall situated at the dock gate entrance for all but very deep drafted vessels.

Slipways: Two slipways capable of slipping barges, lighters and other small craft.

Tugs and Harbour Craft: For towing and transport. Paint pontoons, barges and catamarans, welding generators and air compressors (either self-propelled or 'dumb') which can be berthed alongside a 'gash' barge and a barge containing workshop facilities.

Electrical Shop: A fully equipped workshop (A/C and D/C).

Carpenter's Shop: Fully equipped to carry out all types of work.

Foundry: All types of castings in cast iron and non-ferrous metal. Maximum single pour in cast iron normally 15 c.w.t. with larger pours by special arrangement.

Paint Shop: All types of ship's paintwork.

Design Office: Chief Draftsman and Design Draftsmen undertake all types of work.

Air Conditioning and Refrigeration Workshop: Specialises in the installation, repair and servicing of General Electric air conditioning units and ship's refrigeration equipment.

General Labour: Gangs of men for cleaning, storing ship available at short notice.

Power Supplies: A/C and D/C power supplies are available at the alongside berths. Two power barges are available which contain: 1×400 KVA, 440 volt, 600/S 3-phase diesel generator; 1×210 KVA, 440 volt, 60 C/S 3-phase diesel generator; 3×60 kW, 220 amp 220 volt D/C diesel generators.

Machine Shops: Comprehensively equipped to handle all types of engineering work.

Plate Yard: For all types of ship repairs, ship construction and steel prefabrication work. A blacksmith's shop for forging and smithying work and a shop for sheet metal work.

Welding Shop: Electric arc welding, both in shop and in the port area. Approved to Lloyd's Register of Shipping standards.

REPATRIATION: Possible. Facilities available.

AIRPORT: About 7 miles from port. Served by regular airlines.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1st May); Madaraka Day (1st June); First Monday in August; Kenyatta Day (20th October); Independence Day (12th December); Christmas Day; Boxing Day (26th December).

Also for persons belonging to Islamic Faith: Idd ul Azha and Idd ul Fitr. Christmas Day is normally only holiday on which port closed except for necessary pilotage of ships in and out and for dealing with mails, passengers and their baggage, livestock and perishables. On other public holidays restricted working at Mombasa may be carried out at overtime rates. Overtime rates also apply on Saturdays after 1500 hrs. and on Sundays, and to third shift between 2300–0600 hrs.

POLICE/AMBULANCE/FIRE: In Port Area – Police 567 444 and 374; Ambulance 33; Fire 333.

TELEPHONES: Telephones supplied on board. Charges include cost of local calls. Telephone essential per port regulations.

SERVICES: All solvents for tank cleaning available. Repairs to Gyro compass, radar and most other electronic aids to navigation. Compass adjusting by arrangement with port.

SHORE LEAVE: All crew members allowed ashore and to travel except those from Socialist countries who must stay on Mombasa Island.

PORT REGULATIONS: White tankers and vessels carrying explosives enter port daylight only. No vessels carrying explosives or dangerous cargo allowed to berth at Main Quay.

DELAYS: Usually no waiting days.

SHIP SUPPLY SERVICE: Kenya Ports Authority, P.O.Box 95009, Mombasa – Kenya. Tel: 312211. Telex: 21243 Bandari. Cables: Kenports.

Private Organisations:

Comarco Ltd., P.O.Box 99111, Mombasa – Kenya. Tel: 316776/7, 315319. Telex: 21245 Comarco.

Murri International Salvage Company, P.O.Box 82345, Mombasa – Kenya. Tel: 20822/3 – 24 hours. Tel: 24912 – Office hours. Telex: 21215 Kboat.

Southern Oil Supply Co. Ltd., P.O.Box 84145, Mombasa – Kenya. Tel: 315738, 23889, 313204. Res: 471737. Telex: 20049, 21223, Sosco. Cables: Sosco.

NOTICE: *From the General Manager, East African Oil Refineries Ltd. To Ships' Masters.*

Spillage of Oil and Air Pollution:

I would like to draw your attention to the serious consequences which will arise from any spillage or discharge of oil into the waters of Kilindini Harbour. This part of the Kenya shoreline, with its famous coral reef, is an extremely beautiful and popular tourist attraction as well as providing a means of livelihood for many local people.

Any spillage of oil can harm the environment and raises a great deal of criticisms from the residents of the area. The same applies to excessive funnel smoke.

In the event of any spillage or leak from ship or jetty facilities, ship's officers should immediately warn refinery personnel, who will instigate emergency measures. If there is any delay in notifying the refinery, then any oil spillage or pollution into the sea must be reported to:

(1) Ras Sarani Lighthouse (Mombasa Port Control) manned 24 hours. Telephone Mombasa 312895 (21211 ext. 357 office hours only). VHF Radio Channel 12.

(2) Senior Harbour Master Kipevu, Office hours telephone Mombasa 24864 or 312211 ext. 259. Other times telephone Mombasa 471550 or through signal station in (1).

I am sure you will agree that both you and your staff as well as ourselves should do all that we can to protect this part of the environment against pollution. Moreover, it is a firm belief that we should try our utmost to avoid adverse publicity for the oil industry of which we are both part.

NOTICE: *Notice from ship's Agent to Masters:*

Stowaways from Mombasa:

We wish to inform you that stowaways from the Port of Mombasa are a serious problem and we have had a number of vessels leaving Mombasa with half a dozen stowaways on board causing the Owners considerable expense and inconvenience.

Please, therefore, take every precaution to ensure your vessel is not boarded by stowaways whilst in Mombasa. We would suggest you employ shore watchmen to guard the vessel and also perhaps to have members of your crew on duty at all times to protect the ship. Please, just before sailing, carry out a thorough search of the whole ship with your crew and the watchmen. We also suggest that once you have sailed and you are outside the port limits, you steam around the area for a few hours to give any stowaways the impression that the vessel is fully underway, and again during this period have your crew thoroughly search the ship.

If stowaways are found on board of non-Kenyan nationality then the authorities do not permit them to be landed in Mombasa. Most of the stowaways from Mombasa tend to be Tanzanians.

We would stress again that stowaways are a serious problem in Mombasa and it is up to you to ensure your vessel does not sail with stowaways on board. Please inform your crew about stowaways and that they should be on the look out at all times for any suspicious persons on board.

DEVELOPMENTS: New equipment installed includes additional gantry cranes (5×15 tons capacity) for container handling at Mombasa and inland container depot, now open at Embakasi, Nairobi.

Four tugs to be delivered in 1984. 3 tugs are 4,000 h.p. (bollard pull 40 tonnes) and the salvage tug is 6,000 h.p. (60 tonnes bollard pull).

Berth Nos. 16, 17 and 18 (total length 600 m.) have been modified to take the above mentioned cranes.

AUTHORITY: Kenya Ports Authority, P.O.Box 95009, Mombasa, Kenya. *Tel:* 312211. *Telex:* 21243 Bandari. *Cables:* Kenports. *Contact:* Managing Director. Captain A. J. Ketoyo, Senior Harbour Master.

AGENT: East African Commercial and Shipping Company, Mamujee Building, Mogadishu Road, P.O.Box 95103. Tel. 26251/2. Telex 21151. Cables "Kenship, Mombasa".

Animal Certificates.

PILOTAGE: Pilot available and must be informed of vessel's ETA 24 hours in advance through the Agent. Entering vessels are strongly advised to await Pilot one mile West of Fairway buoy. Pilot can be contacted by VHF on Channel 16.

ANCHORAGES: See Chart BA. 3269. Betio anchorage main anchorage. Inside the lagoon, safe in all weather although in rare strong winds it may not be possible to work vessel in the lagoon.

RESTRICTIONS: Vessels arriving after 1800 hrs. are advised not to enter the passage and should drift 5 miles away from the entry point.

MAX. SIZE: Any vessel drawing up to 26 ft. may enter at LWOST and 30 ft. HW. Length and breadth are not critical, however vessels over 600 ft. to navigate with extreme care.

HEALTH: Hospital available where suspected disease could be medically examined.

RADIO: Tarawa Radio (T3K) keep a continuous watch on 500 kHz.

TUGS: 3 tugs (available for towing barges).

BERTHING: None (lighterage port).

CRANES: 1 × 20 ton container crane on wharf (stationary). 2 × 5 ton mobile cranes.

STEVEDORES: Available 24 hours. Discharging rate 12 t.p.h. Labour available weekends and holidays if required.

MEDICAL: Medical attendance could be obtained through the Agent during working hours.

TANKERS: Vessels drawing up to 14 ft. can anchor close to the jetty where lines are connected to shore pipes. Maximum working pressure 50 lbs. No tanker berth and vessels must provide lines. Floats can be provided by Mobil Oil Agency with labourers if required.

DENSITY: Sea Water.

FRESH WATER: Available in limited quantities in an emergency only and delivered by water barge. Cost of water A$5.00 per 500 gallons. Delivery charge A$3.90 per 200 gallons.

FUEL: Diesel only, in restricted quantities and delivered by barge in tanks. Refuelling cost A$11.20 per 500 gallons.

FIRE PRECAUTIONS: No special precautions other than normal precautions for tankers.

CONSULS: British High Commissioner stationed at Bairiki (also see "General").

REPAIRS: Small but well equipped and capable workshop for light repairs.

DRY DOCK: Small, capable to slip ships of 250 tons displacement.

CUSTOMS ALLOWANCES: 25 cigarettes per day and 6 cans (310 ml.) beer per day.

SURVEYORS: Marine Superintendent of the Ministry of Communications and Works will also act as Lloyd's Sub-Agent and cargo surveyor.

HATCHES: Opened and closed by Stevedores.

WATCHMEN: Not required.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 13 miles from anchorage point. Air service to Nauru twice a week and to Fiji once a week by Air Nauru; and to Honolulu once a week by Air Tungaru (the national airline).

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday (April 11th); Easter Saturday (April 12th); Easter Monday (April 14th); Public Holiday (July 14th); Youth Day (August 4th); Christmas Day (December 25th) and Boxing Day (December 26th). No cargo work can be arranged.

POLICE/AMBULANCE: Police 646; Ambulance 718.

SERVICES: Ship's laundries.

SHORE LEAVE: All crew are allowed to go ashore after inward clearance is granted.

IDENTIFICATION CARDS: No shore passes issued. Passport or Seamen's Book are not required when on shore leave.

REGULATIONS: No food waste, ballast, engine oil to be discharged in the lagoon.

BANK: Bank of New South Wales, P.O.Box 66, Bairiki, Tarawa, Republic of Kiribati. Tel: 341 and 301. Cable: Wales Tarawa.

DELAYS: Expected delays can be caused by heavy rain and port congestion.

DEVELOPMENTS: Plan is being made to develop container yard. Work will begin when aid from overseas is received.

GENERAL: Tarawa is the main port of entry for Kiribati. Other entry port is Christmas Island.

Tarawa Atoll is roughly triangular in shape. A number of islets, separated by shallow passages, dry at low water, form the Southern and Eastern sides of the Atoll. The Eastern side is approximately 19 miles North and South and the Southern side is 16 miles in an East-West direction.

Causeways link up the islets along the Southern side and part of the Eastern side. On the Western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26ft. at LWOST and 30 ft. at HW.

The President's and Main Government Offices are at Bairiki Islet which is connected by causeways to the Tungaru Central Hospital, Government Schools at Bikenibeu and the international airport at Bonriki.

AUTHORITY: Ministry of Communications & Works, P.O.Box 506, Betio, Tarawa, Republic of Kiribati. *Tel:* 628. *Cables:* Harbour Master Tarawa. *Contact:* Captain W. Schutz, Marine Superintendent.

AGENT: Shipping Corporation of Kiribati, P.O. Box 495, Betio, Tarawa, Republic of Kiribati. Tel: 621. Cable Address: Portco Tarawa. Contact: Captain T. D. Murdoch, General Manager.

Korea, Democratic Peoples' Republic of

GENERAL

ETA PROCEDURE: The Notice of ETA is applicable to the Owners (operators and charterers) and the Master of foreign vessels calling at ports of the D.P.R.K.

1. The Owners who fix vessels every month, provide the monthly fixture of ships to the Ocean Shipping Agency of the D.P.R.K. (Head Office) and Branches (herein after called the Agent) before 25th of the previous month and advise immediately if any change.
   (1) Vessel's name, flag and call sign.
   (2) ETA and port of call.
   (3) Description and quantity of discharging and loading cargo.
2. The Owners send the Agent the following documents before arrival in the port: 1) Bill of Lading 3 copies, 2) Manifest 3 copies, 3) Stowage Plan 3 copies, 4) Charter party or handling terms, 5) Others if any.
3. The Owner or Master advise the Agent of the Notice of ETA at the Pilot Station 10 days and 3 days, 24 hours, 12 hours and 4 hours prior to arrival.
   1) 10 days' Notice:
      (1) Vessel's name, flag and call sign.
      (2) ETA and port of call.
      (3) Vessel's particulars (g.r.t., n.r.t., d.w.t., number and size of hatches, derricks and their capacity, LOA, breadth, draft.)
      (4) Numbers of crew, passengers and nationality.
      (5) Description and quantities of discharging/loading, details of heavy lift if any.
      (6) Copies of charter party or handling terms.
      (7) Provisions, ship's stores, repair.
      (8) Flag of the D.P.R.K.
      (9) Last port and ship's position.
      (10) Full address of Owner or Operator, payer of disbursements and banker.
      (11) Others if any.
   2) 24 hours', 12 hours' and 4 hours' Notice of ETA at the Pilot Station; Ship's position and speed only.
   3) The Master should advise the Agent of the ship's position and the time when she passes the following line.

	Lat.	Long.
(1) Korea East Sea.		
	Lat. 42° 24′ N.,	Long. 131° 10′ E.
	Lat. 41° 43′ N.,	Long. 132° 20′ E.
	Lat. 38° 00′ N.,	Long. 130° 00′ E.
	Lat. 38° 00′ N.,	Long. 128° 45′ E.
(2) Korea West Sea.		
	Lat. 39° 50′ N.,	Long. 123° 20′ E.
	Lat. 37° 00′ N.,	Long. 123° 20′ E.
	Lat. 37° 00′ N.,	Long. 126° 30′ E.

4. The Master should navigate to the pilot station at least 15 miles from the coast after passing the above lines mentioned in item 3-3.
5. On arriving at the pilot station the Master should give the Agent the Notice and enter the port under pilotage.
6. The Owner should deposit disbursement funds before ship's arrival at the port and inform the Agent of the following;
   (1) Name, amount, date, No. and other details of T.T.
   (2) Ship's name and port of call.

CHUNGJIN: 41.43 N. 129.42 E. (See Plan Book)

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of crew members.

The following information should be radioed to Port Authorities before arrival:
Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to give a position report every 3 hours to KCSA Chungjin. Pilot and Port Authorities board in position 41° 30′ N. 130° 05′ E. where vessels should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGES: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main and emergency transmitters and all optical equipment is sealed. An inspection team board the vessel to verify currency and valuables declarations. Seamen's Books required to be stamped with landing pass.

BERTHING: Berth No. 1 max. draft 24 ft. Berths 2 and 3 max. draft 27 ft. Berths No. 4 and 5 max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At Berths 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or leave the harbour area.

Unauthorised money changing forbidden, and it is prohibited to take Korean currency out of the country.

No bathing in harbour area.

SHIPMASTER'S REPORT: December 1980.
There are 2 harbours in Chungjin, the Western harbour and the Eastern harbour which are about 2.5 miles apart. Western harbour is mostly for export of coal and iron and Eastern harbour for import of general and bulk cargo.

The following port information is for the Eastern harbour:

Documents: Immigration, Customs and Quarantine Officials board the vessel at the pilot station. The Korean Authorities bring on board their own forms for ship's stores, currency, valuables, binoculars, cameras, etc., and fill these in by using the information contained in the ship's forms. However they also take the original of the ship's paper.

Papers required for entry:
5 copies Crew List (IMO Form).
1 copy Vaccination List (Cholera).
1 copy Crew's Effect Declaration (IMO Form).
1 copy List of Currency and Valuables (Free Form).
1 copy Ship's Stores Declaration (IMO Form).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.

A "General Information" sheet, containing such particulars as vessel's name, call sign, Port of Registry, official number and all the normal data contained in the ship's register, including cargo on board, amount and where loaded etc., was found to be of great help in filling out their forms and speeded-up the entry and clearance process. 5 copies of above should be made for distribution to Agent, Customs, Immigration, Harbour Master and Quarantine.

Master's Advice: It is important that all crew members strictly comply with the Rules and Regulations in Korea, especially concerning cameras and binoculars as photography and the use of binoculars is strictly prohibited in the harbour area as well as in the City and the surrounding area. If the Customs, during their second cabin check, find a camera or binoculars the matter will be treated very seriously.

For landing permit, Immigration will stamp the passports or the seaman's books. However I managed to persuade the Immigration Officer not to stamp the passports because of the trouble in certain countries when they see a D.P.R. Korean stamp but it took 2 days and higher Immigration Authorities to get this permission.

When filling out the Customs and Immigration Forms, the name North in North Korea should not be written on any of above mentioned forms or any other documents as well as on private letters. The Authorities don't accept a divided Korea and will cross out the name North, in any place it is written.

It is not necessary to take cash advance in Korean Won. American Dollars and Yen are most welcome.

Pilotage: Method of contact: VHF or radio contact not possible. Agent will inform the pilot station of vessel's ETA.

Boarding Position: Lat. 41° 42.8′ N., Long. 129° 50.5′ E. (4 miles S.S.E. of breakwater). Pilot is compulsory. Service Time: Daytime only.

Anchorage: From 0.5 miles – 4 miles S.S.W. of Chungjin Harbour in 8 – 30 fathoms. Good anchorage in mud/sand and protected from Northerly wind. However during strong South-westerly wind there is a heavy sea and swell.

Approaches: Simple and straightforward. Practically due North along Korea's East coast until abeam of Cape Kozakof, then straight for the Pilot boarding position or anchorage.

Restrictions: Entry: 30 ft. even keel on entry to the harbour.

Special Regulations: Vessel received orders by cable to navigate 15 miles off the Korean D.P.R. coast and pass through position 41° 38.9′ N., 129° 52′ E. en route to the pilot boarding position.

Max. Size: Max. draft alongside at the grain and general pier was 28 ft. and in the harbour 30 ft.

Health: Radio Pratique not available.

Radio: Contact through Congjin Coast Radio Station, call sign "HMC" frequency; Call on 500, work on 428 kHz., ships work 425 kHz. Traffic list every hour plus 20 minutes. After initial call on 500 kHz., usually followed by QRU. MF only.

After arrival, radio station on board is sealed and there is no VHF in the port. However after arrival in the port, Agent will bring on board a small transmitter/receiver for daily communication between Master and Agent's office. The set working on 24 volts. Very few people speak English. I found only the Pilot and Agent had a fair command of English.

Arrival Notice: Five days then 72, 48 and 24 hours to Agent. Also 5 days and 3 days to receivers.

Tugs: Two tugs available, about 500 h.p. maximum. Tugs always take ship's line.

Berthing: Mooring Method: Vessels drawing more than 28 ft. must first lighten her draft at anchor in the inner harbour. Vessel is brought up in a North/South direction in the harbour and moored aft to the bollards on the breakwater with 4 lines and port and starboard anchor forward, 6 shackles in the water (Mediterranean Mooring).

Along the grain pier, which is only 150 m. long, a strong mooring is recommended partly because the after part of the vessel overhangs the end of the pier and partly because of the occasionally heavy swell along the pier.

Grain Wharves: Vessels only allowed alongside with draft of 28 ft., but a sounding with a line showed about 32 ft. It was not possible to get exact information of water depth alongside the general pier. I found the total wharves length to be about 1,500 m. The grain pier is 150 m. long. Certain wharves in the Eastern part of the harbour, which are shown on BA. Chart No. 1271, do not exist anymore as usable wharves.

Facilities for Bulk Carriers: There are a total of 8 cranes in the harbour, each of about 10 tons capacity. Two of the cranes are serving the grain pier and connected with a conveyor belt system. No difficulty with height of vessel.

Cargo Operations: At the harbour anchorage (Mediterranean mooring) the cargo is discharged by ship's gear. Stevedores operating the cranes. Operation is slow and there is often damage to the vessel with grabs due to inexperienced stevedores.

Two cranes serve the vessel alongside the grain pier. They are able to discharge about 3,000 tonnes per day but actual quantity discharged per day (taken over a 7 days period) was only 1,600 tonnes, mostly due to lack of stowage space, transportation problems and crane break-downs.

Stevedores work 24 hours a day, 7 days a week.

The cranes bring the grain to a conveyor belt system which again brings the cargo to the store house. The store house has a maximum capacity of 12,000 tonnes.

There is a railroad system serving the grain and general pier. Stevedore damage must be reported to the foreman immediately. All damages are repaired before departure by shore repair workers.

Medical: Services available.

Density: 1026.

Fresh Water: Good quality fresh water available at the pier. Charge Won 2.75 per ton (US$ 1.75). Fresh water can also be delivered by barge to the anchorage.

Fuel: Available but expensive.

Repairs: According to the Agent, all deck and machinery repairs can be carried out. I expect that to be correct as there is a big shipyard in Chungjin.

Surveyors: Local Surveyor only.

Customs: The Bonded Stores are not sealed but all cameras and binoculars are collected before entering the harbour and sealed in a locker. Radio room and echo sounder also sealed.

When the vessel has berthed alongside the pier, Customs will once more come on board and this time check thoroughly for binoculars and cameras throughout the ship. It is possible they will confiscate all cameras and binoculars found during the second check.

Time: GMT plus 9 hours.

Shore Leave: Crew members are not allowed outside the harbour area. Permission is only given for a visit to the Seaman's Club, just outside the gate, but only a walk, straight from the gate to the club. There is an armed guard at the gangway to whom crew members must present their passport or seaman's book and also once more at the harbour gate. Shore leave is from 0800 hrs. to 2300 hrs. There is a new Seaman's Club near Western harbour (about 8 km. from Eastern harbour – by car about 10 minutes). Transportation to and from this club costs US$ 7.00 per bus.

General: Current: Experienced a slight South-westerly set towards the shore in Kyongusogu Bay when approaching from the South.

Tide: Port not effected.

Charts: BA. 1271, 1316. J.A. 162.

Swell: A heavy swell can cause problems for vessels alongside the wharves, especially in July/August. At times the swell may cause vessels to leave the wharf and shift to the anchorage.

Distress: In case of distress a long blast followed by a short blast with the whistle and repeated 3 times, this will warn the Harbour Master who will take action.

Derat: Derat exemption certificate can be issued.

Laundry: Available and requires about 3 days. Laundry service is satisfactory.

Provisions: Available in limited quantities.

HAEJU (Haijuube): 37.59 N. 125.42 E.

SHIPMASTER'S REPORT: August 1978.

DOCUMENTS: Same as Nampo, but Korean Forms must also be filled in on arrival.

PILOT STATION: B.A. Chart 1258. Situated between following points:

37° 40′ 30″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 32′ 24″ E.
37° 40′ 30″ N.	125° 32′ 24″ E.

The ship should anchor and wait. It is imperative to anchor within Pilot Station Area, which is used by North and South Korea, otherwise the Authority will not board the vessel. Approaches to Haeju are not covered by B.A. Charts, Korean (Nos. 15–1354, 1328, 1329) not obtainable. Pilot boards together with Quarantine and Immigration officer. The inspection starts immediately, all crew must have Seaman Book for identification. Food stores and pantries also inspected. Pilotage is carried out depending on tide and ship's draft, daytime only. Berthing at slack tide. After berthing arrival inspection continues (Harbour Master, Customs, Coast Guard).

ANCHORAGE: Ships sometimes complete loading at the Anchorage in position 37° 55.5′ N., 125° 46′ E., depth 11.4 m., but probably swinging space for one ship only. Ships waiting for berth anchor in the vicinity of the wharf. With no chart it makes the situation difficult, as there are no lights or light buoys. Position only obtained by radar. One anchor used due to strong tide which sometimes reaches 4 knots.

ARRIVAL ADVICE: The arrival notice to be sent to KZSA Haeju giving all particulars same as Nampo, first contact via Haeju Coast Radio Station, call sign HMJ, to be made 48 hours before arrival. Earlier contacts via Shanghai Radio.

RADIO: Haeju Radio, call sign HMJ.

BERTH: Old berth described in China Sea Pilot, Vol. III, page 540. Extension works in progress. Shore cranes. Depth at low water about 6.8 m.

EXPORTS: Zinc concentrates, cement from the new factory connected with Port by conveyor belt.

FRESH WATER: From hydrant alongside, at anchor by barge (dredger).

FUEL: In restricted quantities, price unknown.

SERVICES: Provisions and Laundry, available through Seamen's Club.

AUTHORITY: Port Master and Harbour Master.

HEUNGNAM: 39.50 N. 127.45 E. (See Plan Book)

SHIPMASTER'S REPORT: November 1983.

PILOTAGE: The pilot station is at Lat. 39° 44.8′ N. and Long. 127° 41.0′ E. When arriving at this position and no Pilot is available, vessels are ordered to anchor. Ships are also ordered to navigate at least 12 miles off the coast.

ANCHORAGE: The anchorage is secure and safe with a depth of water of at least 36 ft., however soundings were unobtainable because of the sealing of all equipment.

If vessels arrive with a draft of over 25 ft., cargo is discharged into barges at anchor approximately 1 mile South of the breakwater.

The white light at the end of the breakwater can be seen at a distance of approximately 5 miles.

MAX. SIZE: The minimum depth in the harbour is 28 ft. and ships of up to 25 ft. draft are allowed alongside.

BERTHING: The length and direction of the quays etc. in the harbour are reasonably accurate as they were obtained using radar (See Plan).

The berths are used as explained on the plan. Also the two cranes at the Southern end of the Pier "D" are used for the export of bulk cement.

NAMPO (Chinnampo): 38.43 N. 125.25 E. (See Plan Book)

SHIPMASTER'S REPORT No. 1.

DOCUMENTS:

8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of crew.

Bonded stores must be declared but not sealed.

ARRIVAL ADVICE: The following information should be radioed to KNSA Nampo before arrival:

(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E.
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival within area connected positions Lat. 37° 00′ N., Long. 124° 30′ E., Lat. 38° 08′ N., Long. 123° 35′ E., and Lat. 39° 50′ N., Long. 124° 07′ E. Also vessel should advise position and time passing above connected lines.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quarantine Officer and Immigration Officers) board at position Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E. where vessels should anchor awaiting Pilot.

Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Station the Radar, Echo sounder, VHF, DF, Radio Room and all optical equipment is sealed. On arrival in Port, Customs Officers board the vessel and together with Immigration Officers search the whole ship.

Seamen's books required to be stamped with landing pass, also seamen's books are taken ashore by Immigration Authorities for formalities.

BERTHING: Coal berth can accommodate vessels up to 20,000 d.w.t. There are 2 conveyor belts for coal loading but 1 only can work at a time. Conveyor belts are not movable, the vessel has to shift. Vessels loaded and unloaded mostly in the roads by ship's gear. There are 3 other berths but have no information.

RADIO: Nampo Radio. Call sign HML.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus only. Seamen are not allowed to leave harbour area. In order to visit other vessels in port, application should be made to Immigration Authorities.

GENERAL: *Currency:* It is prohibited to take Korean currency out of the country.

Bathing: Prohibited.

Fishing: Prohibited.

Provisions: Limited quantities available at the Seamen's Club.

SHIPMASTER'S REPORT No. 2.

Information covering Nampo, Democratic People's Republic of Korea, previously known as Chinnampo. See in connection with this B.A. Chart 1257 and 1656, China Sea Pilot III.

The following general information was produced by the navigating officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point Lat. 38° 37′ 5″ N., Long. 124° 49′ 5″ E. Wreck at Lat. 37° 38′ 2″ N., Long. 124° 48′ 2″ E., 3 masts above water at all states of tide. Radar echo good at 6 miles. Buoy – old position Lat. 37° 37′ 4″ N., Long. 124° 51′ 4″ E., moved to Lat. 37° 37′ 2″ N., Long. 124° 50′ 7″ E.

Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at Lat. 37° 37′ 4″ N., Long.124° 53′ 6″ E., flashes 18 sec.
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at 38° 41′ 7″ N., 125° 18′ 1″ E., (Bachishin) flashes 30 sec.
Light at Nanryoki extinguished
Light at Lat. 38° 43′ 3″ N., Long. 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: The Pilot boarding point is at the same time the outer limit of Nampo Harbour and the clearing inwards point. To await Pilot and further instructions before proceeding into Nampo, vessels must wait here. Information can be obtained via coastal radio Nampo (details in Nautical Wireless Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the bottom is a thin layer of grey mud with clay underneath it. With wind from the S.W., there is a slight swell. Depth of water between 25 m. and 26 m., vessels should anchor with a chain length of at least 100 m. on the capstan and calculate adequate room for swinging, since there is a very strong tidal flow at all states of the wind and weather, running up to 4 knots according to our observations.

The Pilot comes on board with clearance authorities. As pilot cutter (also no VHF) a normal tug is used, which in Winter is also used as an ice-breaker. The tug does not display a Pilot's flag, only the national flag. The hull of the tug is black, superstructure white with large Korean characters on the front of the bridge. Pilotage only available during daylight hours.

At clearance inwards point (pilotage boarding point) all binoculars, including bridge binoculars, and photographic equipment is gathered together and sealed for the total time in port. It is only released after the Pilot leaves the vessel on departure from the port. Likewise all echo-sounding, radar, direction finding equipment is sealed. The use of such equipment and filming and photography in Democratic People's Republic of Korea is completely forbidden.

From the clearance inwards point the journey to the anchorage in front of the town is usually at full speed for most of the way. The anchorage is selected by the Pilot. The Pilot gives a good impression and from our observations knows his job well. However, one can only expect very rudimentary English from him. The same applies to the clearance authorities who have only a very few words of English. Clearance proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, further official authorities come on board. These check the whole ship, and go through the deck and engine room areas accompanied by one chosen member of the crew. Whilst the ship is being examined, all other crew members must remain in their cabins. The crew member accompanying the authorities must have his seaman's book with him as identification. When the authorities leave the ship finally they take the log away, and bring it back after a few days. Going ashore is permitted, but normally only in the port area. There is a seaman's hostel there. Travel further inland is possible, but only by giving 24 hours prior notice to Immigration via the ship's Agent. Also from time to time it is possible for crew members to fly out, but this must be arranged via the state shipping Agent. Visits to other ships is also possible, but only by giving 24 hours prior notice to Immigration. Radios and cassette recorders may not be taken on land or even on deck. Their use is only permitted within the ship and cabins. Fresh water and fresh food are available. In the roads, water is delivered by water boats. Removal of rubbish is also possible by due notice through the Agent, and is even possible at the anchorage. Boat manoeuvring can likewise take place, but it must be reported, and may only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

7 Crew Lists.
1 List of Items in Possession of Crew divided into gold, valuables, money, signature.
1 Vaccination List.
1 Maritime Declaration of Health.
1 Passenger List, even if none on board.
1 Narcotics List.
1 List of Tobacco and Personal Goods.

The authorities bring a list of provisions with them and fill it out after declaration on board. Stores, such as alcohol and cigarettes are not sealed.

The Health Authorities place greatest score by cleanliness of toilets, refrigerators, food stores, kitchens, pantries, hospital and first-aid station.

Generally, it may be stated that the ship's broker and Agent speak and understand good English, but from the authorities normally one can expect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and enough room for swinging. However, in each case at least 170 m. chain should be allowed so that the vessel lies securely. The tidal current, in accordance with our observations, runs at a good 4 knots. The anchorage bottom is good and comprises grey mud. The depths of water shown in the charts are, in accordance with our observations, roughly correct.

To the West of the port on the town shore there is a large shipyard with a mobile gantry crane over a slipway under construction. The slipway is about 150 m. long. Normally, the crane is at night directly on the bank (high water mark) and is illuminated and thus constitutes a good bearing, particularly at night, since otherwise no long-range port lights are available.

Position of the crane is about Lat. 34° 43′ 2″ N., Long. 125° 24′ 1″ E. This area where the shipyard is located is designated as "Iron works" in chart 1656 map of Chinnampo Ko. The waterside there no longer has an inlet, but has been straightened out, and building work is still in process. See plan section of "Guide".

Likewise building works are in progress along the whole shore line between the shipyard and Nampo Ki. The shore line is also straightened here, and to all appearances has been developed as anchorage and repair yard for the Korean Navy. The 2 red/black buoys to the South of the iron works in the chart are no longer there. In this area there is only a small fixed buoy for guard boats and fishing craft.

In the middle of Shienshin Island there is a 9-storey white hotel, which is a good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the Southern end Nampo Ki is a bunker with a small house on top. The lower part of the house is pink and the upper part white. The West pier of Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. At the Southern end of the pier are 2 new large warehouses. A floating crane is available with a capacity of about 160 tons. On the Western pier is likewise a small warehouse and 2 mobile port cranes (up to 5 tons). At the Southern end of the Western pier, are two berths for deep sea freighters with a good 9 m. water depth N.W. alongside. At the Southern part of the Western pier there is a good 8 m. of water along a length of some 210 m. At berth 1 (West pier, Southern berth), vessels up to 32 ft. draft can go alongside in normal water conditions. The depth of water in the inner part of the port could not be exactly determined, but judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East of this pier is also a further coal pier, equipped also with conveyor belts and about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs available. The large tug acts as pilot craft and for the authorities to visit for clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely takes place. There are only a few lighters available. As the port is overloaded, a long waiting time must always be allowed for (at least 14 days).

Medical care for crew members here is somewhat difficult, since one tries with all means to avoid having to have the crew member transferred beyond the confines of the port. In this connection, the doctor comes only once on board and a decision is taken as to whether or not a visit to hospital is necessary. For such a hospital visit one has further to go through the Agent to the authorities to obtain permission to go beyond the port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. First bearing is Nampo Ki, second bearing is the pier light, fixed red, in front of the East pier:

Weather (Wind)	*Bearing*	*Time* (GMT)	*Measured depth, taking into consideration vessel's draft* (m.)
15° 8 kn.	344°, 38°	2330	21.15
100° 8 kn.	355°, 42°	0130	19.93
360° 5 kn.	355°, 39°	0715	15.97
340° 5 kn.	343°, 37°	0900	18.41
070° 9 kn.	340.5°, 38.5°	2330	21.15
060° 5 kn.	343°, 39.5°	0100	21.46
Circulating 5 kn.	324°, 41°	0430	16.88
270° 13 kn.	339°, 37°	0000	21.46
300° 20 kn.	357°, 40.5°	0300	19.93
290° 10 kn.	345°, 40°	0840	18.43
Circulating 5 kn.	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. 1 US dollar = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position Lat. 38° 35′ 5″ N. and Long. 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vesse First bearing – pier light East side Hibatsu To – fixed red. Secon bearing chimney at Lat. 38° 44′ 1″ N. and Long. 125° 25′ 9″ E. (shown o the chart as Chy.)

	1022	38°	24.18

SHIPMASTER'S REPORT: No. 3

VHF: Agent "KOSA" can be contacted on Channel 16. Generally por (Pilot, etc.) do not communicate with the ship directly. A communications (VHF) to be done through "KOSA". General watc keeping time (VHF) – 0900 hrs. to 1030 hrs.; 1200 hrs. to 1300 hrs 1400 hrs. to 1630 hrs.; 1900 hrs to 2100 hrs. and 2330 hrs. to 0030 hrs

FRESH WATER: Also available from shore connections alongside No. and 2 berths.

SURVEYORS: State surveyors of D.P.R.K. (Democratic People' Republic of Korea) available. Survey fees about US$1900.00 per visi

REPAIRS: Facilities available.

New Dry Dock: is in operation which can handle ships over 180 m. i length. *Shipyard* builds ships (2 – 3 ships at a time) of moderate siz (about 10,000 d.w.t.).

Dry Dock/Shipyard Workshop undertake ships repair. They have boa fully equipped with diving equipment and diver.

Factory Engineer/Technician (Electronic) undertake Radar/Echo sounder/VHF repairs.

GENERAL:

Marine Note of Protest: No Notary Public or Court of Law. Master wishing to lodge a "Note of Protest" can write to the Harbour Master wh will endorse his (Master's) letter.

People strongly object calling their country "North Korea", it is to b called Democratic People's Republic of Korea.

Fresh Provisions: Fresh provisions also available through the shi chandlers (owned/controlled by the Government). It is advisable to tak stores through the seaman's club, where quality can be checked befor the provisions supplied on board.

NOTES

Please also advise Shipping Guides Ltd.

Korea, Republic of South

GENERAL:

FOREIGN FLAGS: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in South Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessels under ownership of North Korea, Vietnam and China.

Item 2: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessel bound for North Korea or falling short of 90 days of departure from ports of North Korea.

Item 3: No restriction shall be applied on entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

BUKPYUNG: 37.29 N. 129.08 E. (See Plan Book)

SHIPMASTER'S REPORT: June 1982

LOCATION: Bukpyung (Lat. 37° 29.5′ N., Long. 129° 08.5′ E.) lies some 5 miles to the South of Mukho, it has been under construction for the past 4 years and now ranks as the third largest port (by tonnage) in Korea. The port consists of 2 breakwaters extending from the shore and has been constructed primarily for the export of cement in bulk, clinker and bagged forms.

The port is linked to the Donghai Cement Plant which in itself is the largest unit cement factory in the world with an annual production capacity of 8.7 million tons.

This report is mainly directed to the facilities associated with the export of cement, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

PORT LIMITS: Approximately 1 mile radius off the port but mainly to the North of the E./W. Line, passing through the South Breakwater Light. Port limits are indicated on Korean Chart No. 141.

DOCUMENTS:

6 Crew Lists (on blank paper).
3 Vaccination Lists.
2 Port Itineraries for past 6 months.
2 Passenger Lists.
2 Arms Lists.
2 Drugs Lists.
3 Personal Manifests.
3 Cargo Manifests.
3 Store Lists (including fuel on arrival).
3 Bonded Stores Lists.
Korean Maritime Declaration of Health.
Various Korean entry forms.

PILOTAGE: Generally operate from 0600 hrs. to 2100 hrs. 3 Pilots available and appear quite competent. As an exception they will sail vessels up to 2200 hrs. from the berth. Pilot launch painted white and small. No VHF (1982). Pilot ladder required almost to the water, no manropes.

In heavy swell the Pilot refuses to come out to the vessel and no dispensation is given for the vessel to come under the lee of the North Breakwater to pick the Pilot up, even though there is ample room. Pilotage is relatively simple with a wide deep water entrance to the port and a large swinging basin.

APPROACHES: BA. Chart 882, also Korean Chart 141. Best to run up 5 miles off the coast to keep clear of 3.5 fathom patch reported in position Lat. 37° 28.5′ N., Long. 129° 13.0′ E., then alter course to 270° for approaches to anchor area off the port.

ANCHORAGE: Recommended anchorage about 1 mile to 1.5 miles off the breakwater in about 12 fathoms to 14 fathoms of water. We anchored with South Breakwater Lt. Ho. bearing 180° (T)×1.27 miles, with 7 shackles down on the port anchor and happily rode out a day of winds in excess of 40 knots, though engines were kept on immediate notice. A confused back swell is sometimes thrown off the breakwater during strong onshore winds. Bottom mainly sandy with some rocks. Ample visual and radar targets available to check anchorage position.

MAX. SIZE: No limitations to length or beam. Max. draft 11.8 m. (SW).

HEALTH: Quarantine Officials generally attend at the anchorage and inspect store rooms, galley, etc. Derat sighted and Vaccination List required. Korean Maritime Declaration of Health made out. Pratique granted. Various vaccinations can be obtained at the Port Health Office at Bukpyung. The doctor/nurse will not attend onboard to do injections. No specific vaccinations required for Bukpyung unless vessel from infected area.

RADAR: No port radar at present.

VHF: Bukpyung Port Radio operates on Channels 16 and 12. Daylight operations only. Initial contact is made via this station and arrival time and ships' particulars noted. Berthing instructions are generally relayed through Mukho Radio, VHF Channels 16 and 26 from Agents. Local and overseas calls are also possible through Mukho, with a 24 hour watch kept.

TUGS: Three available: 2×2,000 b.h.p. and 1×1,000 b.h.p. Make fast with tugs' lines with the tugs joining vessel just inside the breakwater. There are an additional 2 tugs at Mukho (5 miles to the North) and these will work at Bukpyung if required. Communication with tugs is by walkie talkie.

BERTHING: Vessels generally berth port side alongside the South Pier (Ssangyong) and starboard side alongside the North Pier. Tugs join just inside the breakwater, the offshore anchor is used when off the berth. Boat takes the headlines only. The North Pier is more exposed than the South and a substantial tie up is recommended. The bollards are 25 m. apart and the jetties very well protected with modern horizontal rubber type fenders. The gangway can be swung out prior to berthing with no obstructions to cause damage. South Pier length 735 m., North Pier length 540 m.

Present Capacity: 4×30,000 d.w.t., 1×10,000 d.w.t. and 4×5,000 d.w.t.

Additional Future Capacity (1986): 6×50,000 d.w.t., 1×20,000 d.w.t. and 1×10,000 d.w.t.

BULK HANDLING FACILITIES:

Coal: One coal berth lies at the seaward end of the South Pier, whilst the other berth is at the inner end of the North Pier. Vessels use their own cranes and grabs for discharging the coal onto the quayside, whereupon it is handled by payloaders and loaded into road trucks. Discharge rate is in the region of 5,000 tonnes per day but could improve if more payloaders were brought in to handle the quayside operation. Generally speaking, only two payloaders are used at any one time. Road trucks carry the coal to a stockpile 3 miles away and there appears to be ample supply of trucks available. The final few hundred tonnes in each hatch is shovelled by stevedores into savealls and rubber mats. No bulldozers are available for hatch work.

If a vessel is not equipped with her own grabs then the complete discharge is handled using savealls and manpower. Using this method a discharge rate of about 3,000 tonnes per day could be expected. The crane drivers are quite competent and stevedores helpful. Any damage to ship can be repaired on the spot and stevedores accept full liability.

Bagged Cement: Two companies export cement from Bukpyung. Ssangyong Corporation, the largest, operate from the South Pier whilst Tongyan M&G work off the North Pier. Ssangyong have the facility for loading clinker/bulk and bagged cement by conveyors and loaders. Tongyan can only handle clinker and bulk cement by loader, any bagged cargo being handled by ship's gear.

The Ssangyong export terminal serves the largest unit cement plant in the world with an annual production capacity of 8.7 million tons. This main plant, situated a few miles away at Donghai, is linked to the port of Bukpyung by an extensive conveyor system. Further conveyors link the storage facilities to 2 ship loaders (for bagged cargoes) and 2 spout loaders for clinker and bulk cargoes.

The bagged ship loaders were each rated at 150 tonnes per hour, though actual loading rate worked out at nearer 75 tonnes per hour, with both loaders suffering occasional breakdowns. In addition to the loaders, ship's cranes were also used to lift bagged cement directly from lorries. In all, 5 gangs were used (2 loader and 3 crane) and a daily load rate of about 4,000 tonnes experienced. The cement was bagged in triple skinned paper/polythene and very little breakage was observed, the loader however throws off some cement dust and the ship receives a liberal covering.

The bagged cement was initially ordered, by Charterers, in nett weight i.e. bags each weighing 50 kg. (gross 50.17 kg.), however as loading progressed it became obvious that the actual weight loaded was considerably more than that tallied aboard. On checking the actual weight of a number of bags, all were found to be in excess of 50.50 kg. (gross). Initial instructions from Charterers required the vessel to load a cargo geared to a limiting draft of 32 ft. at the discharge port, but when realising the full shore tally weight could not be lifted then authorisation was received to load the shore figure. By shore tally and Bills of Lading we loaded 490,000 bags cement at 50 kg. nett per bag equalling 24,500 tonnes.

Actual deadweight on board by draft survey showed some 24,886 tonnes of cargo. One per cent. of spare bags were also loaded with the cargo.

The bagged cement was pre-slung wherever possible in the hatch to facilitate a quick discharge, the discharge port, was not nominated however, this depending upon the number of cement ships discharging on the Indian coast. Ahjin intend sending a supercargo to India to assist in the discharge.

No problem exists with the loaders regarding height clearance over the coamings, however conversely if the vessel is too deeply ballasted then the base of the shoot cannot reach the tank top and it is then necessary to de-ballast to bring the ship up to the loader.

Cargo manifests, etc., were prepared, by the Agents, prior to sailing. Normal procedure is to authorise Agents to sign Bills of Lading on Master's behalf.

Stevedore companies: Ssangyong Cement Co. Ltd., Tongyan M&G Co. Ltd., Korea Express Co. Ltd.

MEDICAL: Doctor and hospitals situated at Mukho some 5 miles away. Agents will arrange car to transport crew members to and from doctors. Medical attention is quite expensive. Medical reports issued on request. An ambulance service is available if required.

FRESH WATER: Available by barge in 100 tonne quantities.

FUEL: Supplied only by barge either alongside or whilst the vessel in the anchorage. The bunker barges are not equipped with heaters and consequently the pumping rate very slow (about 90 tonnes per hour for heavy oil and 120 tonnes per hour for diesel oil). Each barge has a capacity of about 400 tonnes; No blending on the barge, this being performed at the refinery. The barges generally sail up from Pohang and have to clear customs formalities at Bukpyung. Fenders on the barges are virtually non-existent and if taking bunkers at the anchorage in any kind of weather extra tyres etc., should be used. We were supplied by Korean Marine Bunkering: Seoul 776-8531.

REPAIRS: Engine and general dock repairs possible from Donghai Marine Engineering Co. Ltd. The company has a staff of about 12 and are capable of handling most repairs. Welders are Korean registered. Various Customs formalities have to be completed before spare parts are removed from the port area. Prices appear reasonable though slightly higher than Ulsan and Inchon. Radar repairs can be arranged with ample notice. Chemical cleaning of heaters, etc., can be arranged.

SURVEYORS: Local Korean inspectors/surveyors are available at Mukho for draft surveys, on/off hire surveys, etc.

Lloyd's and Bureau Veritas are available from Seoul and will attend vessels at Bukpyung if necessary, with ample notice.

WATCHMEN: Available from Sanghyup Kongsa (again) recommended mainly for their ability to use telephone especially with the Agency 5 miles away. Cost about £12 per day.

CUSTOMS: Attend on berthing. Quite casual and friendly. Spirits and cigarettes sealed though beer and wine left unsealed. Normal allowances per person and an issue available after vessel has been in port for 5 days. One Customs Officer remains on the vessel during the stay in port, he requires a cabin and meals. Drugs are also sighted and sealed.

REPATRIATION: No difficulties in this area. Seoul some 300 km. away is served by an express bus service. Sub-Agents liaise with main Agents and all repatriations seem to run smoothly. An overnight stay is normally arranged at Seoul for incoming and outgoing crew members though this depends on flight times. The journey between Bukpyung and Seoul takes about 4.5 hours. It is necessary for joining crew members to fill out a personal manifest once aboard the vessel, this is collected prior to sailing.

TIME: GMT plus 9 hours throughout the year.

HOLIDAYS: See "Mukho".

Arbor Day (April 5th) is also an official holiday at Bukpyung. Work is possible during all holidays.

TELEPHONES: Available at all berths. Only local calls taken.

SHORE LEAVE: No restrictions, no curfew.

GENERAL:

Weather: Refer to Pilot Book.

During the latter part of March and April long periods of relatively calm weather were disturbed by severe Lows and Fronts causing strong on shore winds and high seas. During these periods the port remains closed for berthing vessels, though sailing is possible. Smaller ships in the anchorage generally steam offshore during these periods.

Stores: Fresh supplies and all chandlery items supplied by Sanghyup Kongsa Co. Ltd., Bukpyung (the only chandler in the area). Fresh vegetables, fruit, fish, etc., are in plentiful supply locally. Deck and engine stores also available in the area, though more selective items can be obtained from Seoul. Local supplies are reasonably priced, though meat expensive. Bonded stores are also available. Medical supplies can be obtained from Seoul as well as current BA. Charts and Admiralty publications. These again are quite expensive.

Immobilisation: Possible with Port Authority approval.

Port Regulations: Bukpyung also serves as a naval port and consequently no photography allowed. No written port regulations. Painting over the side not allowed for fear of pollution, similarly no painting allowed from the quayside.

Launch Service: A launch service is available from the anchorage and is useful for crew repatriation. It can also be used for shore leave, once vessel has been cleared, though price is unknown.

Garbage: Arranged by Agents, taken away from ship by road truck. Rubbish should be retained on board, even at the anchorage, various naval craft regularly patrol around the port area and anchorage.

Consuls/Notary: No Consular offices at Bukpyung or Mukho, it being necessary to travel to Seoul for these purposes. It is also impossible to Note Protest at Bukpyung or Mukho.

Laundry: Adequate laundry facilities exist at Mukho, again arranged by Sanghyup Kongsa Co. Ltd., a 24 hour service is available.

Cleaning Gangs: These are available and will clean hatches between cargoes. It is not possible to pump out hold residue whilst alongside. Cleaning gangs do not generally work at night so some pre-planning required if vessel to discharge and load at the same port. Work requires constant supervision. Labour for the gangs picked up off the street.

Immigration: All passports inspected: Shore passes issued for all crew members and these renewable every four or five days. No Curfew exists at Bukpyung or Mukho. It is necessary to pass through Customs Office and Immigration Office before leaving the port area. Again all Immigration Officials most helpful and friendly and eager to practise their English. Shore passes collected prior to sailing before obtaining clearance.

Air Freight: Little difficulty in obtaining spare parts, air freight etc., from other countries. Main Agents at Seoul arrange necessary customs clearance and transport.

Agency: Main Agents at Bukpyung: Chokwang Shipping Co. Ltd. They are sub-Agents for most of the main Korean Agencies. Their office is situated at Mukho. With the number of vessels entering and using Mukho and Bukpyung they are kept extremely busy, however all Agency work is eventually attended to and their services are quite satisfactory. Telex and telephone facilities exist at their office, most telexes are directed through the main Agents in Seoul, however a direct line can be obtained if necessary.

Other Agents: Shiwyang Shipping Co. Ltd., Mukho.

AUTHORITY: Donghai Port Authority (Mukho Branch Office).

AGENT: See "Busan" or "Inchon".

BUSAN (Pusan): 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
4 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore. Strict curfew from midnight to 0400 hrs.

Certificates:

Derat Certificate or Exemption.

Inoculation and Vaccination Certificates for all crew members.

PILOTAGE: Professional Pilot service is available at Busan and contac can be made by telephone No. 44-1651. Necessary for arriving vessel t notify Pilots of arrival 24 hours in advance. VHF unavailable. Forma address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Busan, Korea. Blas signal from vessel used to call Pilots. Pilot station positio Lat. 35° 05′ 58″ N., Long. 129° 02′ 37″ E.

Pilotage is compulsory and available day and night. Pilot boards of the entrance to the outer harbour. Pilot boat is white launch with pilo signals. Tugs cannot be employed unless Pilot is on board.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports withi 3 months of contemplated entry of Busan needs to obtain permission o authorities.

MAX. SIZE: No restrictions on length or breadth of a vessel. Draf should be less than 10 m. when vessel is alongside a pier, or 12 m when anchored at an anchorage.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in Outer Harbour. Quarantine Inspection can be arranged by day or night if sufficient advance notice given althoug regular hours are sunrise to sunset. Valid Cholera Certificates required Inoculations against typhoid and typhus may be required depending o prevalent conditions.

Quarantine Anchorages:
(a) Lat. 35° 05.14′ N., Long. 129° 07.34′ E.
(b) Lat. 35° 04.78′ N., Long. 129° 07.12′ E.

BERTHING: Normally in daylight only.

STEVEDORES: On basis using full gangs per day, the capacity is 1,000 L/tons on general cargo; 1,200 L/tons on grains (Silo capacity, 6,000 – 12,000 tons); 1,500 L/tons on anthracite or coal (Pier No. 7, 3,000 – 8,000 tons).

CRANES: 6×30.5 ton capacity gantry cranes at the container terminal (No. 6).

TUGS: Tugs join an arriving vessel immediately inside the breakwater of Busan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater.

RADIO: Busan Harbour Radio Station: call sign, "6MF".

Vessels to submit ETA to Busan Port and Maritime Authority 1 day – 3 days before vessel's arrival, message also to include name of Owner and Agent. 3 hours before arrival vessel must communicate with Busan Port Control.

Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.

Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.

VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.

RADAR: A radar station is sited in the Harbour Office to assist vessels approaching the port in poor visibility.

TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North Harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.

MEDICAL: Service is available at short notice.

FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.

FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.

FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.

GANGWAY/DECK WATCHMEN: This service is available.

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

CONSULS:

Consul, Republic of China	Tel: 23-3617
Consul, Japan	Tel: 43-9221

REPAIRS: All repairs can be effected.

DRY DOCKS:

Name of facility	*Capacity* *g.r.t*	*d.w.t.*	*Location*
Korea Ship Building Eng. Corp. No.1	3,000	4,000	Busan

REPATRIATION: World wide connections are available from Busan via Seoul or Tokyo.

AIRPORT: Airport is at Kim Hey about 28 km. from Busan. Japan-bound plane takes off every 3rd day.

TIME: Korean Standard Time. 9 hours ahead of GMT. No alterations during year.

HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 24th December; Buddhist Birthday 8th April (by the Lunar Calender), Choo Sug (Thanksgiving Day), 15th August (by Lunar Calender).

POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Busan Quarantine Station, 44-0119/0619.

TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.

SERVICES: Adjustment of compass available.

SHORE LEAVE: Allowed.

DELAYS: Port congestion is experienced occasionally.

AUTHORITY: Busan District Marine and Port Authority.

AGENT:

Busan: Tong Jin Shipping Service Co. Ltd., Room 301, Dongil Building, 84-10, 4-ka, Chungang-dong, Chung-ku, Busan, Korea. Tel: (051) 44-8001/3, 44-6794/5. Telex: K53443. Cables: "Eastship". Mailing Address: P.O.Box 39.

CHINHAI (Jinhae): 35.07 N. 128.42 E.

SHIPMASTER'S REPORT: 1977.

LOCATION: Lat. 35° 09′ N., Long. 128° 40′ E. (Town); Lat. 35° 07′ N., Long. 128° 42′ E. (Pier).

DOCUMENTS:

8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.

All documents are Standard Form. Although currency lists are required, there are no restrictions on importing or exporting either Korean or other currencies.

PILOTAGE: Pilotage not compulsory but recommended. Pilots are ordered through Agents and board vessel about 10 cables West of Kadok Do Island. VHF not available. No pilotage during night hours. Pilot boat is a wooden launch exhibiting International pilotage signals.

ANCHORAGE: Recommended 7 cables in Northwesterly direction off Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage in sand and mud. Quarantine anchorage is located about 1 mile N.N.W. from Chori Som Island.

RESTRICTIONS: Curfew effective from Midnight to 0400 hrs. daily.

HEALTH: Radio Pratique not available. Pratique granted after inspection.

RADIO: Busan Radio, call-sign "HLP".

TUGS: Required for mooring and unmooring. 2 tugs available of 600 h.p. and 1,000 h.p.

BERTHING: Chinhai is a principal naval base. Vessels drawing up to 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East of Madang So, to the only berth available for deep-sea vessels about 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinhai Chemical Co. and can accommodate vessels with a maximum draft of 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officially 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mud, and density 1025.

Vessels not exceeding 34 ft. saltwater draft berth 2 hours prior HW., and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

Also see "Masan" – Bulk cargo facilities.

STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without mealbreaks.

MEDICAL: Attention available.

FRESH WATER: Available ex-barge from Masan, minimum 200 tons at US $3.00 per ton.

FUEL: Available ex-barge from Masan.

CONSULS: Nearest at Busan.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available and recommended.

REPATRIATION: Possible from Busan.

CUSTOMS ALLOWANCES: No restrictions. Stores remain unsealed.

TIME: GMT plus 9 hours. No alterations.

SHIPMASTER'S REPORT: February 1979.

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots only available during daytime.

Pilots board in position Lat. 35° 02′ N., Long. 128° 47.5′ E. Ships waiting for a Pilot should anchor in the recommended anchorage situated North-east of the recommended track 306°/126° and extending from about 1 mile West to about 2 miles S.E. of Yon Do Island.

PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area" is situated between the existing prohibited area (approx. position 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Island.

The Northern limit of the "prohibited anchorage" area consists of a line running from position Lat. 35° 01.4′ N., Long. 128° 47.2′ E. in a 070° direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from Lat. 34° 58′ N., Long. 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok To Island.

According to the naval authorities, anchoring within the above mentioned area is prohibited because of existing submarine cables.

BUOYS: The red conical Buoy "No. 14" in position Lat. 35° 04.9′ N., Long. 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables from the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp. Fl(2) 6 sec. in position Lat. 35° 04′ N., Long. 128° 42.8′ E. is to be moved 4 cables in a 043° direction.

AUTHORITY: Masan District Marine Bureau.

AGENT: See "Busan" or "Inchon".

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

INCHON: 37.28 N. 126.37 E. **(See Plan Book)**

DOCUMENTS:

Arrival:

8 Crew Lists.
4 Cargo Manifests.
4 Stores Lists (Bond and shop).
4 Crew Customs Declaration.
4 Narcotics List.
4 Arms and Ammunitions List.
4 Ports of Call Lists (last 90 days).
1 Vaccination List.
2 Money Lists.
4 Passenger Lists (Marked Nil).
Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only 2 copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are 2 Pilot stations for entering Inchon:

Ando: At the Ando Light 38 miles off Inchon, position Lat. 36° 58′ N., Long. 126° 10′ E. located in entrance to Channel approaching Inchon from the Yellow Sea. 48 hours advance notice to Agent required for vessels requesting to meet Pilot at Ando, customary boarding point for deep-draft vessels.

Palmido: Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This pilot station is at Palmido Island and Light, 8 miles off Inchon, position Lat. 37° 21′ N., Long. 126° 31′ E.

ANCHORAGE: Anchorage is divided into 5 large areas according to cargoes of the vessels.

A 1 – 5 (Logs, pulp)
B 1 – 6 (Ships waiting for entry to the inner harbour)
B 7 – 10 (Oil tankers and ships unloading scrap. Coal)
C 1 – 8 (Small tankers, LPG ships)
D 1 – 3 (Logs)
E 1 – 5 (Ships waiting for entry to the inner harbour)

RESTRICTIONS: A peculiarity of Inchon Port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Maritime and Port Authority at least 24 hours before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

Lock Particulars:

	For 50,000 d.w.t. Vessels	*For 10,000 d.w.t. Vessels*
Lock Chamber	1 base	1 base
Total length	381.0 m.	288.25 m.
Usable length to		
Inner gate	280.0 m.	183.00 m.
Outer gate	310.0 m.	208.00 m.
Width	36.0 m.	22.50 m.
Height from sill	18.5 m. from sill	18.50 m. from sill
Height	19.0 m. from bottom	19.00 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38.0 m.	24.50 m.
Width of gates	8.3 m.	6.40 m.
Height of gate	18.5 m.	18.50 m.
Weight per gate	1,050 tons	590 tons
Time required for opening-closing	5 minutes	3 minutes

HEALTH: The Quarantine Anchorage is located outside the harbour in position Lat. 37° 22′ 37″ N., Long. 126° 32′ 06″ E. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hours quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

RADIO: Inchon Radio.

	Frequency	
Call Sign	*Calling*	*Working*
6 MF3	MF 500 kHz	MF 512 kHz 520 kHz
or		
Inchon Harbour Control	VHF Channel 16	VHF Channel 12 Channel 14 Channel 20 Channel 22

TUGS: There are 17 tugs (1,000 h.p. – 3,200 h.p.). 2 – 3 tugs are required for each vessel.

All tugs are operated by private companies.

BERTHING: 32 berths in Inner Harbour.

Pier	*Length of Quay* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)
No. 1	1,185	7.5 – 8.0	2,000 4,500 8,000
No. 2	1,442	9.5 – 12.0	8,000 20,000 30,000
No. 3	1,250	9.5 – 12.0	8,000 10,000 20,000
No. 4	1,160	10.0 – 13.0	10,000 50,000
No. 7	905	10.0 – 12.0	50,000

CRANES: 3 Gantry Cranes (30 ton class), 4 Transtainers (30 ton class), 3 Floating cranes (20 ton – 100 ton class), 101 land-based cranes (10 ton – 100 ton class).

BULK CARGO FACILITIES: No. 7 Pier is exclusively used for grain by 2 silo operators. Handling capacity is 4 million tons per year and storage capacity is 326,000 tons.

SPECIALISED CARGO HANDLING FACILITIES: No. 4 Pier is used exclusively for containers. It has 2 container yards which are capable of storing 15,457 TEU.

TANKERS: There are six private companies handling oil, LPG and liquids. Maximum quantity of LPG loaded in a single operation is 1,500 tons.

Kyung In Energy Co. Terminal:

Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine terminal is situated at Lat. 37° 30′ 12″ N., Long. 126° 36′ 19″ E. The face of the dolphin fendering system is on a bearing of approximately 347° true.

The vessel will be berthed alongside the main and secondary berthing dolphins with the vessel's hull against the fenders, which are an integral part of the dolphins. All the dolphins are equipped with electric capstans and quick-release mooring hooks. A navigation light and fog horn is located on the Southern Exterior Mooring Dolphin (Exterior Mooring Dolphin No. 1). A navigation light is also located on Exterior Mooring Dolphin No. 2 on the N. side of the terminal facilities. When a vessel of the 50,000 d.w.t. class is moored to the terminal, the bow and stern lines will perform the function of the breast lines. Therefore, the spring lines must be led out through the chocks on board which will provide sufficient leads ahead and astern to restrict the movement of the vessel along the face of the dolphins. In this regard, due consideration must be given to the rise and fall of the tide.

Loading Arms: There are 3 "Continental-Emsco" loading arms situated on the loading platform. The one to the extreme North and the middle one of the three are for the discharge of crude oil. Both are fitted with 16 in. swivel connections having 150 pound flanges. The loading arm to the extreme South is for the loading of naphtha and is fitted with a 12 in. 150 pound flange. The loading arms are designed for a working pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms to the vessel, the loading arms will be manipulated and positioned by shore personnel. During the period of time when the loading arms are connected to the vessel's manifold, they will be in the "float" position and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's crew activate or operate the controls for the loading arms. Authorised shore personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a minimum amount of transverse movement by the vessel in either direction. In other words, the movement of the vessel along the face of the dolphins is restricted. For this reason, it is mandatory that the vessel be kept in position, and that the mooring lines be properly tended. It is the responsibility of the vessel to maintain sufficient deck crew on duty to properly tend the mooring lines, and to ensure that the vessel maintains proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approximately 2.2 km. (1.4 miles). A 30 in. block valve is situated near the location where the trestle joins the island causeway. Block valves are also installed in the pipe-line system near the inlet to each of the crude oil storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each has a capacity of 200,000 barrels. The tanks are 48 ft. in height with an overflow at 46 ft. There are no check valves in the crude oil pipe-line system. Thus, the vessel must take precautions against back-filling due to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil when changing from one tank to another ashore. The vessel will be given adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the waters of Inchon Harbour. Severe penalties may be invoked against the vessel by the Republic of Korea in the event of pollution of harbour waters.

The centre loading arm provides a dual function. It is used for discharging ballast from the vessel as well as for the discharge of crude. The ballast flows through a 12 in. pipe-line to the ballast storage tank on Yul Do Island. This tank has a capacity of 30,000 barrels, and is situated about 1.1 km. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which has a capacity of 125,000 barrels. Three pumps provide the flow for shipping naphtha. Each pump has a capacity of 1,600 g.p.m. The pumps are on independent circuits. Thus, the loading rate of the naphtha can be governed by the number of pumps used.

The pipe-line from the pumps to the loading platform is 18 in. and is reduced to 12 in. on the loading platform. A block valve is located in the 18 in. pipe-line near the point where the island causeway joins the trestle. Another block valve is provided in the 12 in. pipe-line on the loading platform.

The pumps which are used for shipping naphtha can be stopped from the Marine Terminal Loading Platform, but they must be started from the mainland. Under normal conditions the vessel's deck officer on watch should give the terminal personnel 10 minutes notice prior to requesting that the loading rate be reduced, and the same notification prior to the completion of loading. As previously stated, the pumps can be stopped from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage tanks to the loading platform is 5.4 km. (3.35 miles).

Regulations:

1. Sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading rate of the naphtha, and at least 10 minutes notice prior to the completion of loading cargo.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.

6. Smoking will be permitted in such *Interior* spaces as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and supplies will not be permitted during the time ballast is being discharged, or naphtha is being received by the vessel.
8. Ullage hole screens are to be used at all times while bulk oil transfer operations are in progress.
9. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
10. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
11. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N., Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipe-lines.

Union Oil Terminal, 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

MEDICAL: Launch is provided in emergency call to evacuate sick men. Modernised hospital is available.

STEVEDORES: There are 16 stevedoring companies with 105 fork-lifts and 17 cranes. Annual cargo handling capacity is 11,625,000 tonnes.

DENSITY: Varies between 1022 and 1024.

FRESH WATER: Can be supplied by lighter, max. quantity 500 tons.

FUEL: Available by barge only.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REPATRIATION: Facilities for crew changes or repatriation.

GANGWAY/DECK WATCHMEN: Ship security guard service is supplied by 2 companies.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CONSULS: None locally. Many Consuls and Embassies in Seoul, 50 minutes by train from Inchon.

REPAIRS: Deck and engine repairs possible by Inchon Shipbuilding Company.

AIRPORT: Regular flights worldwide from new international airport.

POLICE/FIRE/AMBULANCE: Police (883) 0011, Fire (882) 4069, Ambulance (73) 9000 (Inchon City Hospital).

TELEPHONES: Portable communication facility is available.

TIME: Korean Standard Time. 9 hours ahead of GMT.

HOLIDAYS: 1st – 3rd January, 1st March, 5th April, 6th June, 17th July, 15th August, 1st October, 3rd October, 9th October, 25th December.

GENERAL: Tide condition is critical, swift currents (high tide: 9 m. to 10 m.) special attention is required.

ACCOMMODATION LADDER: Essential for Port Officials on entry. Also for tanker berth no access allowed through plant. Rig on port side.

SHORE LEAVE: Launch service provided by 3 private companies.

DELAYS: Can be caused by bad weather.

DEVELOPMENTS: New bulk terminal (No. 8 Pier) to handle scrap and various bulk cargoes such as salt and sugar, to be built by the end of 1986.

Coal Terminal to be built by the end of 1985 to accommodate vessels up to 60,000 d.w.t. Length of berth 240 m., depth 16 m.

SHIPMASTER'S REPORT: 1974.

Approaches: Inchon, the port for Seoul, the capital of South Korea, is situated in Lat. 37° 28′ 20″ N., Long. 126° 37′ 09″ E., and is approached from the South through the Yellow Sea. From Kyoknyolbi Do (Clifford Is.) LH. a course should be set to pass 1 mile North of An Do LH., in the vicinity of which the pilot boat will be waiting. Pilotage is not compulsory from this point but is recommended and the Pilot should be ordered at least 48 hours before arrival through the Agent, in Inchon.

From An Do, vessels proceed via the Dong Soodo (East Channel) which is very winding and narrow in places. All lighthouses now show lights in accordance with B.A. Charts and Publications (1984).

Pilotage is about 38 miles to the Inchon Anchorage for deep-sea vessels, about 3 hours steaming. The Pilot was good even in thick fog, and all Pilots seem to speak reasonable English. The pilot launch is fitted with VHF.

The anchorage is extensive, with room for about 30 ocean-going vessels, holding ground is good and no trouble was experienced in currents of 5 knots, although even stronger currents are experienced at Spring tides.

The Port: Can be divided into three sections according to location and function; the Inner Dock, Outer Harbour and Northern shoreline.

The Inner Harbour basin is presently operated for the accommodation of cargo ships up to 50,000 d.w.t. The Outer Harbour, of new construction, is largely for coastal and fishing vessels of less than 500 tons, and is located just outside and to the S.W. of the Inner Basin.

The Northern shoreline, North of the closed basin has unloading facilities at many private plants. These are lighter berths.

With the completion, in May 1974, of the new lock system and second tidal basin, the berthing facilities in the port have changed the cargo handling capacity from 1,420,000 tons to 6,270,000 tons per year by providing 3,820 m. length of quay and container berths.

Within the Inner Harbour is the first tidal basin (the older lock system dating from 1923). This basin is accessible through the new lock system.

Equipment in Use (August 1974): Tugs, 2 of 2,000 h.p.; 3 of 3,600 h.p.; Floating cranes, 1 of 75 tons capacity; 1 of 30 tons capacity; Container crane, 1 of 30 tons capacity.

Bulk Grain (1984): Pier No. 7: Jetty berths Nos. 71 – 72: 2 discharge towers, 1 conveyor belt, 1 ship at a time can be handled, capacity 800 t.p.h.

Pier No. 7: Jetty berths Nos. 73 – 74: 2 discharge towers (simporters), 1 conveyor belt, 1 ship at a time, capacity 22,000 tons per day.

However, due to congestion of cargo in the elevators the maximum capacity on both jetties is reduced to 6,000 – 8,000 tons per day each.

Additional Equipment Planned: Tug boats, 4 of 7,000 h.p. Floating cranes, 1 of 100 tons capacity; 1 of 70 tons capacity. Container cranes, 4 of 35 tons capacity.

Further expansion is planned for the Northern side of the inner harbour. When completed there will be an additional 800 m. of quay at Pier 6 and 780 m. at Pier 8. This will add a total of 10 new berths for vessels from 5,000 to 50,000 d.w.t.

The Port of Inchon is administrated, managed and operated by the Government, represented by the Inchon District Marine Bureau (IDMB) in the Ministry of Transportation.

Decisions on administration and operation of the port, particularly to daily activities, are made by the Director, District Marine Bureau of the above Ministry.

Port activities, such as cargo in transit sheds, or in storage and port facilities of Government property, are in the custody of the Association of Port Management. This Association is formed from members of the various port users associations and was formed in 1972, under the control of the Minister in charge of Port Operations.

Port service companies and Stevedoring companies are still privately owned.

Repatriation and relief of crew members was made without any apparent difficulty. Flights to and from the U.K. being routed through Tokyo.

SHIPMASTER'S REPORT: 1975.

The Ando pilot vessel is equipped with VHF Channel 16. If berthing in the tidal basin it is necessary to use vessel's sewage tank or sanitary tanks provided from ashore. Immigration require 2 copies of crew list forwarded before arrival to Agents, also require ports of call list for previous 3 months. If any crew member is caught smuggling in South Korean ports the vessel is liable to be detained indefinitely.

AUTHORITY: Inchon District Maritime and Port Authority, 1, 7Ga, Hang-Dong, Jung-Gu, Inchon, 160 Korea. *Tel:* (132) 882-0044-7. *Telex:* Impa 23380. *Contact:* Kyu Jin Whang, Director General.

AGENT: Tong Jin Shipping Service Co. Ltd., 6th Floor, Kongseong Building, 4, 3-ka, Chungang-dong, Chung-ku, Inchon, Korea. Tel: (032) 72-3210, 72-3028/9. Telex: K23209 Tongjin. Cables: "Eastship". Mailing Address: P.O.Box 48.

KUNSAN (including Changhang): 35.55 N. 126.45 E.

The Port of Kunsan is situated on the Southern mouth of the Kum River which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:
6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Store List.
9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange Pilot if necessary.

RESTRICTIONS: Vessels should enter during daylight hours only. Many small Korean fishing and cargo boats in this area display dim navigation lights or none at all at night. Pilot is not compulsory but all vessels calling at this port recommended employ a Pilot in view of the hazardous channel and tidal difficulties. Controlling depth 8 ft. at Bar. Keel clearance of 2 ft. required.

PILOTAGE: The pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at Lat. 35° 56′ N. and Long. 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5 miles West of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484 kHz.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) and 80 h.p. (2) are available. 1 floating crane with capacity of 30 tons owned and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine Bureau and all vessels come under jurisdiction of Kunsan Custom House. The anchorages in stream inner harbour can accommodate 1 or 2 vessels less than 1,000 gross tons, and outer anchorage (Yubudo Anchorage) accommodates 1 ocean-going vessel drawing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 for Changhang) each of which can accommodate an ocean-going vessel with maximum draft of 27 ft.

STEVEDORES: There is 1 stevedoring company with 14 wooden barges, 3 steel barges and 3 tug boats. Discharging capacities: average records per day of 24 hours: coal 1,500 tons; grain and wheat 1,600 tons; fertilizer 1,300 – 1,400 tons; cement 1,000 – 1,100 tons; lauan log 500,000 B/F. Daytime only.

MEDICAL: Crew members should be in possession of health certificate showing vaccinations for typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

CURFEW: In Korea the curfew is still effective from midnight to 0400 hrs. every day.

TIME: Korean Standard Time, GMT plus 9 hours.
HOLIDAYS: Public Holidays – New Year (January 1-3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Year's Day and the Moon Festival, about 15th August.
SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office.
AUTHORITY: Kunsan Maritime Bureau.
AGENT: See "Busan" or "Inchon".

MASAN: 35.11 N. 128.35 E.

PORT LIMITS: *Port Boundary:* 35° 09′ North.

Arrived ship: A vessel is considered as "arrived" when in the Quarantine Anchorage.

Laytime: (Subject to Charter Party). Generally commences at 0800 hrs. if Notice of Readiness tended p.m. day before and 1300 hrs. if tended a.m. day of arrival.
DOCUMENTS:
11 copies of Crew Lists (inward and outward).
3 copies of Personal Effects.
3 copies of Store Lists
3 copies of Bonded Stores Lists.
11 copies of Passenger Lists.
3 copies of Narcotics Lists.
3 copies of Arms and Ammunition Lists.
4 copies of Manifests (entry clearance only, excluding manifest for consignee, stevedore, checkers firm and other related firms)
2 copies of Bill of Lading.
5 copies of Entry Report (only entry clearance).
Ship's Certificates and Seamen's books or passports.
PILOTAGE: Kaduk Pilot Station: Lat. 35° 02′ N., Long. 128° 47′ E. ETA required 24 hours prior to arrival.

Two pilot boats "An Se" and "Be Yun". VHF to be installed in pilot boats.

At the present time contact with Pilot made through Agent or Masan Harbour Control on VHF. Vessels to display usual pilot signals.

In case of bad weather vessels wait for Pilot at the pilot station.
ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 30 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 Depth 23 ft. Quarantine Station Depth 36 ft.
RESTRICTIONS: Should take Pilot's guidance as a Korean Navy base is located very close to Masan port.
MAX. SIZE: 30,000 g.r.t. with 33 ft. draft.
HEALTH: Crew members should be in possession of health certificate showing vaccination for typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a Masan National Quarantine Doctor.
RADIO: Seoul Radio.
VHF: VHF at Masan District Maritime and Port Authority (Call "Masan Harbour Control").
RADAR: None.
TUGS: Two tugs, "Chung Ryong" (Government owned) 1,000 h.p. and "Yong Ma" (Private) 2,000 h.p. Generally, ship's lines used and tugs join vessel at Quarantine anchorage.

BERTHING:	*Depth (m.)*	*Length (m.)*	*Max. Size*	*No. of Berths*
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1
Chang Won Pier	11.0	210	20,000	1
Electric Power Plant Pier	6.5	115	3,000	1
Central Lighters Wharf	1.2	1,022	—	—

CRANES: Cranes with capacity 40 – 60 tons expected to be installed at Chang Won Pier. Cargo operation is generally by ship's own gear.
BULK CARGO FACILITIES: There are two bulk cargo piers (No. 1 and 3), average discharge rate is 1,500 – 1,800 tons (0800 – 2100 hrs.) a day, and sulphur is generally discharged at port of Chinhae, where there is a chemical firm.

Length of pier: 210 m. Depth (low tide) 11 m. and one gantry crane (capacity 6 tons bucket) discharging rate is approximately 5,000 tonnes a day (24 hours).
SPECIAL CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Advise stevedores number of hatches, number of derricks and capacity, and supply stowage plan on arrival.

Average discharging rate by commodities: (0800 – 2100 hrs.)

Coal	1,500 tonnes
Grain	1,500 tonnes
Wire Rods	700 tonnes
General Cargo	700 tonnes
Others	600 tonnes

MEDICAL: Masan National Quarantine Office is responsible for any matters relating to vaccinations. Master should prepare a medical report form for patients visiting Masan hospital.
TANKERS: No facilities (Transhipment if any, carried out by lighters).
FRESH WATER: Available at Masan.
FUEL: Available by grades.
FIRE PRECAUTIONS: One fire boat stands by 24 hours a day at Central Pier.
CONSULS: None.
REPAIRS: Available anytime (two companies).
DRY DOCKS: 3 minor dry docks.
SURVEYORS: Various survey firms located at Masan, but not Lloyd's or ABS.
HATCHES: Generally, first opening and last closing is by ship's crew and others by stevedores.
GANGWAY/DECK WATCHMAN: Available at Masan.
CUSTOMS ALLOWANCES: Daily consumption quantity only.
CARGO GEAR: Using of cargo gear (utilization) depends on negotiation.
REPATRIATION: Possible. Application for transferring and reason required. Agent's guarantee letter (for Crew) also required.
AIRPORT: Kimhae Airport: 70 km. from Masan. Kimpo Airport: 436 km. from Masan. Regular services.
TIME: Korean Standard time GMT plus 9 hours, no alteration made to clock during the year.
TELEPHONE: Not available on board vessels.
SERVICES: Security guard, garbage disposal, line handling, shoring, launch, laundry and provision supply available at Masan.
POLICE/AMBULANCE/FIRE: Telephone Numbers:

Police (Foreign Section) 2-1206; Fire 2-1334; Ambulance 2-1151.
HOLIDAYS: New Year's Day (January 1st); New Year's Day (by Lunar calendar) (January 1st), Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Buddha's Birthday (Lunar calendar) (April 8th); Children's Day (May 5th); Memorial Day (June 6th); Constitution Day (July 17th); Indpendence Day (August 15th); Armed Forces Day (October 1st); National Foundation Day (October 3rd); National Alphabet Day (October 9th); Christmas Day (December 25th).

Cargo operations on the above days depend on negotiations.
IDENTIFICATION CARDS: Shore pass available from Immigration.
DELAYS: There are no delays for berthing or bunkering.
GENERAL: ETA to authorities concerned no later than 24 hours before arrival.
SHORE LEAVE: Crew shore pass issued by Immigration and has to be extended every 120 hours.
DEVELOPMENTS: A large container yard to be built.
AUTHORITY: Masan District Maritime & Port Authority.
AGENT: See "Busan" or "Inchon".

MOKPO: 34.37 N. 126.23 E.

DOCUMENTS:
6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Stores List.
9 copies Manifest (Dis./Loading only).
PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 125° 02′ E. 30 miles from Mokpo. 24 hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot.
NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.
RESTRICTIONS: Mokpo is located at the South-Western end of the Korean peninsula. The port is at the mouth of the Yungsan River which flows through the Yungsan Peninsula. Kasako Island protects this port from heavy winds and swell. The Yungsan River provides 5 anchorages where 5 vessels of Liberty type can berth at a time.

Tide Information: max. tide level at high water 4.5 m.; min. tide level at high water 2.8 m.; average tide level at high water 3.5; Max. tide level at low water 0.5 m.; Min. tide level at low water 1.3 m.; Average tide level at low water 0.7 m.
ANCHORAGE: Five anchorages in depths from 11 m. to 20 m. Anchorage Nos. 2, 3, and 4 are better than No. 1 and 5 for discharging cargo because No. 1 is sometimes very dangerous due to strong tidal currents.
RADIO: Mokpo Radio. Call sign HLM operating on 500 and 484 kHz.
VHF: Pilots on Channels 12 and 16.
TUGS: Three tugs available, up to 150 h.p.
BERTHING: Sam Hak Do Pier, length 168 m. and width 18 m., where only one 8,000 ton ocean-going vessel can operate in 13 m. depth.
STEVEDORES: There are 3 stevedoring companies with 28 wooden barges (1,680 tons), 7 steel barges (1,200 tons) and 3 tug-boats.
MEDICAL: Crew members should be in possession of Health Certificate showing vaccinations for typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.
FRESH WATER: Available at rate of 150 tons per day. 24 hours notice required.
CURFEW: In Korea, the curfew is still effective from midnight to 0400 hrs. every day.
TIME: Korean Standard Time, GMT plus 9 hours.
HOLIDAYS: Public Holidays; New Year (January 1st-3rd); Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.
SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.
DEVELOPMENTS: Berth under construction, completion 1984. Max. LOA 200 m., max. draft 10.5 m.
AUTHORITY: Mokpo District Marine Bureau.

MUKHO: 37.33 N. 129.07 E. (See Plan Book)

PORT LIMITS: The port limit is established by lines joining the following points:

A.	Lat: 37° 33′ 12″ N.	Long: 129° 07′ 25″ E.
B.	Lat: 37° 33′ 12″ N.	Long: 129° 08′ 12″ E.
C.	Lat: 37° 32′ 00″ N.	Long: 129° 08′ 23″ E.
D.	Lat: 37° 32′ 00″ N.	Long: 129° 07′ 02″ E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists (In case of any passenger aboard)
3 Store Lists
3 Personal Effect Lists
3 Cargo Manifests (In case of any cargo on board)
2 Port Itinerary Reports (For the last 6 months)

PILOTAGE: Compulsory and 3 licensed Pilots are available from 0500 hrs. to 2200 hrs., and usually join ship in position Lat. 37° 32′ 30″ N., Long. 129° 08′ 25″ E.

VHF Radio is available for contacting pilot station.

ANCHORAGE: Outer Harbour offers anchorages for the vessel awaiting docking order with a rocky and sandy bottom.

Vessels lying anchored in this anchorage which is open roads, are recommended to pay attention to weather conditions. The depths vary from 9 m. to 26 m.

RESTRICTIONS: Pilot for entering inner harbour is available from 0500 hrs. to 2200 hrs. due to close of port and curfew.

The max. available depth of inner harbour is 8.5 m. or 28 ft. The max. tidal range is 0.4 m.

MAX. SIZE: The max. permissible length, breadth and draft for entering inner harbour is as follows:

Length – 180 m. Breadth – 25 m. Draft – 8.5 m.

HEALTH: Pratique is automatic. For Pratique it is necessary to prepare the following documents: Yellow cards. Derat Certificate and/or Derat Exemption Certificate. In the event of any suspected disease or fever on board it should be reported without delay to Quarantine Station and/or Agent in Mukho.

RADIO: Shore Radio Stations: Seoul Radio, Kangreung Radio, Busan Radio and Mokpo Radio.

Mukho harbour Network 6MF2.

VHF: Call sign "Mukhoradio" Channel 16 for calling station. Channel 26 for communication.

RADAR: None.

TUGS: 2 tugs of 1,000 h.p. each equipped with their own towline are available.

BERTHING: *No. 1 Pier.* (Exclusively for loading Coal/Graphite in bulk).

Berth A: Exclusively for loading Coal/Graphite in bulk. Length 100 m. Available draft at LW 7.5 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 300 tonnes.

Berth B: Exclusively for loading Coal/Graphite in bulk. Length 110 m. Permissible draft at LW 8 m. 2 lines of belt conveyor and 2 loaders, height above HWL. 7 m. Loading rate per hour per loader 400 tonnes.

No. 2 Pier: Exclusively utilized for Naval and Coast Guard ships. Length 140 m. Depth available 4 m.

No. 3 Pier: For loading bulk cement, bagged cement and cement clinker in bulk, and loading/unloading general cargoes. Length 330 m. Available draft at LW 8.5 m. or 28 ft. 1 line of conveyor and 1 loader (air slider) for loading bulk cement. 2 lines of belt conveyor and 2 loaders for loading bagged cement. 1 line of belt conveyor and 1 loader for loading cement clinker in bulk. Available height above HWL 8 m. Loading Rate: Bulk cement 400 tonnes/p.h. Bagged cement 1,500 tonnes per day per loader. Cement clinker 350 tonnes/p.h.

Loading rate for General Cargo as follows:

Average discharging rate per hour/gang:

Steel material	Various	30 tonnes
Machinery	Case	30 tons
Grain	Bulk	25 tonnes
Gypsum	Bulk	25 tonnes
Coke	Bulk	15 tonnes
Fertilizer	Bag	20 tonnes

Average Loading Rate per hour/gang:

Iron Ore	Bulk	20 tonnes

No. 4 Pier: For loading bulk cement and loading/unloading general cargoes. Length 150 m. Permissible draft at LW 7.5 m. 1 line of belt conveyor and 1 loader (air sliding chute) for loading bulk cement. Height above HWL 8 m. Loading Rate: Bulk Cement 400 tonnes/p.h. Loading rate of general cargoes same as at No. 3 Pier. Discharging rate of general cargoes same as at No. 3 Pier.

Central Pier: For loading/unloading general cargoes. Length 120 m. Permissible depth at LW 6.5 m. No shore facilities. Loading/unloading general cargoes same as at No. 3 Pier.

CRANES: Mobile Cranes 1×20 ton and 1×30 ton.

BULK CARGO FACILITIES: No discharging facilities. Loading facilities see "Berthing".

STEVEDORES: Vessels bound for this port are to radio Agent Shipper/Consignee and Harbour Master, at least 24 hours prior to arrival, draft on arrival, description/quantity of cargo.

Average Discharge Rate per gang/hour:

Steel materials	Various Types	30 tons
Machinery	Case	30 tons
Grain	Bulk	25 tons
Ores	Bulk	25 tons
Fertilizer	Bag	20 tons

Average Loading Rate per gang/hour:
(Only with labourer hands – manually)

Ores	Bulk	20 tons

Average Loading Rate per gang/hour:
(By shore loading facilities)

Coal/Graphite	Bulk	350 tons
Cement	Bulk	350 tons
Cement	Bag	60 tons
Cement Clinker	Bulk	350 tons

MEDICAL: Several hospitals available.

TANKERS: No facilities.

DENSITY: Average salinity of water in the port is 1.025.

FRESH WATER: Supply of fresh water available by water barge and from shore water works.

Supply at pier	50 t.p.h.
Supply by barge	100 tons per day

FUEL: Most grades of domestic and bonded oil available with 4 days prior notice.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: None.

DRY DOCKS: None.

SURVEYORS: Classification Surveyors are in Seoul and/or Busan.

GANGWAY/DECK WATCHMAN: Owners/Master's option.

HATCHES: First Opening/Final Closing by crew and intermediate handling by stevedores.

CUSTOMS ALLOWANCES: Cigarettes: 1 carton. Wine /Spirit: 2 bottles.

CARGO GEAR: Shore loading facilities see "Berthing". No heavy lift cranes.

REPATRIATION: Possible.

AIRPORT: No airport locally, however there is an express bus service between Mukho and Seoul.

TIME: GMT plus 9 hours.

HOLIDAYS: *Official Holidays are as follows:*

The New Year Day	1st January	Work cannot be arranged
Independence Movement Day	1st March	Can be arranged
Memorial Day	6th June	Can be arranged
Constitution Day	17th July	Can be arranged
Independence Day	15th August	Can be arranged
National Foundation Day	3rd October	Can be arranged
Hangul (Korean Alphabet) Day	9th October	Can be arranged
Armed Forces Day	1st October	Can be arranged
Festival Days:		
Lunar Calendar New Year	1st January (Lunar)	Work not possible
Labour Day	10th March	Work possible
Children's Day	5th May	Work possible
Buddha's Birthday	8th April (Lunar)	Work possible
Moon Festival Day	15th August (Lunar)	Work not possible
Christmas Day	25th December	Work possible

POLICE/AMBULANCE/FIRE: Police – 3112. Ambulance – 3900. Fire – 119, 3005.

TELEPHONES: None.

SERVICES: None. Should be arranged from Busan/Inchon.

SHORE LEAVE: Possible, curfew in effect from 2400 hrs. until 0400 hrs.

IDENTIFICATION CARDS: Shore passes are issued for every Crew member who wishes to go ashore.

REGULATIONS: No particular regulations.

DELAYS: Normal delays.

GENERAL: None.

AUTHORITY: Mukho District Maritime & Port Authority.

POHANG: 36.01 N. 129.24 E. (See Plan Book)

PORT LIMITS: The sea within the line joining the position of Yeonam Southern Cape Long. 129° 25′ E. to that of Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E.

DOCUMENTS: See "Busan".

PILOTAGE: Compulsory, 4 licensed pilots available.

ANCHORAGE: 4 anchorages in depth 12 m. – 22 m. With muddy and sandy bottom.

MAX. SIZE: The first pier depth 16 m. Length 930 m. Max. d.w.t. 100,000.

The second pier depth 5.5 m. – 12 m. Length 840 m. Max. d.w.t. 50,000.

The third pier depth 5.5 m. – 9.5 m. Length 440 m. Max. d.w.t. 5,000.

The fourth pier depth 11 m. – 12 m. Length 420 m. Max. d.w.t. 30,000.

The fifth pier depth 7.5 m. – 11 m. Length 695 m. Max. d.w.t. 50,000.

The sixth pier depth 5.5 m. Length 220 m. Max. d.w.t. 2,000.

Ship Operator's Report: Posco Mineral Quay:

July 1979: Vessel of 142,767 d.w.t., with 112,012 tons of cargo on board docked at No. 1 B-2 with a draft aft of 49 ft. 6 in. (15.08 m.). The officially accepted draft is 14.50 m.

HEALTH: Certificates required.

TUGS: 3 tugs available of 3,000 h.p. The tugs are stationed at the third pier.

BERTHING: Quay height above sea level: 3 m. at high tide and 2.8 m. at low tide. Total quay length 3,575 m.

REPATRIATION: All facilities available for crew changes.

CRANES: 12 Shore cranes. (Lifting capacities 3,138 t.p.h.)

CUSTOMS ALLOWANCES: Tobacco: 400 cigarettes. Wine: 1,500 cc.

HOLIDAYS: New Year's Day – 3rd January, 1st March, 5th April, 5th May, Buddha's Birthday, 6th June, 17th July, 15th August, 3rd October, 9th October, Christmas Day.

POLICE/AMBULANCE/FIRE: Police 2-3419. Fire 119. Ambulance 2-5269.

FRESH WATER: Can be supplied alongside the quay or by water barge.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION: Seaman's book is sufficient.
AIRPORT: Kimpo 200 km., Kimhae 150 km.
FUEL: All grades obtainable from oil companies.
SERVICES: Sub-Agents. Ship's laundries, etc.
MEDICAL: 2 hospitals available.
DEVELOPMENTS: Central breakwater under construction.

Works in progress to increase capacity at first pier to 150,000 d.w.t. and draft to 16.5 m.

SHIPMASTER'S REPORT: 1975.
Pilot: Usually boards the vessel after anchoring in position Lat. 36.03 N., Long. 129.26 E.
Anchorage Position for Quarantine Clearance: Same as for Pilot.
Berthing: Entry and departure are only permissible during daylight hours, vessels are not allowed to berth at night.
Fresh Water: Available at all times ex-wharf without limit on quantity taken.

SHIPMASTER'S REPORT: 1975.
Approaches: There are no British Admiralty Charts covering this port. The coastal approach to Yongil Man can be made on Chart BA. 3666, thereafter an American Chart No. 95166 (formerly HO. 3257) is suitable for making the approach to the quarantine anchorage.

There are no offlying dangers, and depths shelve gradually from the entrance to the head of the bay.

A good lookout should be maintained for fishing nets which are very profuse.
Quarantine: Port Health Officials board at the Quarantine Anchorage – Position Lat. 36° 02′ N., Long. 129° 26′ E., in a depth of 19 m. No Radio Pratique available.

If vessel arrives at night, officials board at daybreak next morning. No port movements during the hours of darkness.
Notice of Readiness: Accepted at time of Free Pratique granted.
Pilotage: Pilot boards with Port Health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.
Entrance Channel: Entrance to harbour is made via dredged channel, commencing between two buoys, (No. 1 & 2), about 200 ft. apart, situated about 1 mile off Southern breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. minimum probably refers to the basin within the harbour entrance.
Tide: The rise and fall of tide is only about 1 ft.
Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.
Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m. (39 ft. 04.5 in.) Max. permissible draft 11.2 m. (36 ft. 09 in.) Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.
Moorings: A minimum of 3 headlines, 1 breastline, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.
Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.
Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.
Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.
Curfew: A curfew is in operation in South Korea, from midnight to 0400 hrs.
Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.
Documents: The following arrival papers are required:—
Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.
N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons.*
Agent: Pohang Shipping Agency Co. (Teladdress "Pohangship Pohang"), are sub-agents for Young Jin Shipping Co. Ltd; Seoul, (Teladdress "Three Young Seoul"). The Agent was very helpful and attentive.
Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.
Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges (call collect). Average waiting time about 1 hour.
Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Busan, about 3 hour's journey. Lloyd's Hull & Engine Surveyors based in Busan.
Future Port Developments: Work is at present in progress on the construction of a new bulk-handling facility, seaward of the present installation. The approach channel to the new facility will have a minimum depth of 16 m., and the berths will be capable of taking vessels of up to 100,000 d.w.t., at drafts of up to 14 m. Scheduled for completion in 1977.

SHIPMASTER'S REPORT: July 1975.
Port Limits: By a line drawn from Lat. 36° 04′ 10″ N., Long. 129° 25′ E., to Lat. 35° 59′ 50″ N., Long. 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.
Documents: See "Busan".
Pilotage: Pilots board either at the Quarantine Anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.
Anchorages: In roadstead, open to the N.E. in depths of 15 m. to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.
Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.
Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.
Pratique: It is advisable to give advance notice of Pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in Lat. 36° 03′ 20″ N., Long. 129° 25′ 25″ E.
Radio: All messages to Pohang should be routed through Busan Radio HLP.
Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.
Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position Lat. 36° 05′ 50″ N., Long. 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the inner harbour fairway entrance, which is marked by two buoys marked 1 and 2 and Qk. Fl. G. and Fl. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.
Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a minimum depth of 12.4 m. Harbour developments are still in progress.
Stevedores: Arranged through Agents. Advance notice desirable.
Medical: Available.
Fresh Water: Limited quantities available by barge, if advance notice given.
Fuel: None.
Consuls: None.
Repairs: Only repairs of a minor nature can be undertaken.
Drydock: None.
Surveyors: Lloyd's available from Busan.
Gangway/Deck Watchmen: Not required.
Opening/Closing Hatches: By Crew.
Customs Allowance: See "Busan".
Repatriation: Not available.
Airport: Busan (Suyeng).
Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.
Identification: Shore Passes.
Curfew: 2400–0400 hrs.
Developments: Considerable reclamation and harbour developments in progress.
General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book supplement No. 9 1978 on page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt. – Lat. 36° 05′ 18″ N., Long. 129° 33′ 35″ E.
Buoy RW – Lat. 36° 05′ 30″ N., Long. 129° 30′ 30″ E.
Buoy RW – Lat. 36° 03′ 12″ N., Long. 129° 28′ 20″ E.
Buoy – Lat. 36° 01′ 25″ N., Long. 129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour is engaged sweeping up excess fallout off hatches etc. Food and some form of accommodation has to be provided for the shift foremen on a continuous basis.

Fresh stores and provisions of good quality and reasonable price were obtainable but no frozen foods of any description available. Laundry service available and fair results.

Fuel oil bunkers were available by previous arrangements with Owners.

Shore leave is by launch only. Launch lands personnel in the old harbour about 5 miles away outside the breakwaters of the new harbour. No shore gangways available. Accommodation ladders required on each side as Port Officials and Agents board via the quay and ship's personnel are not allowed to walk on quay.

Repatriation for 26 Officers and Crew was done with very little effort and minimum paperwork. Personnel travel by coach to Busan thence by air to Osaka and Tokyo for London.

Arrival papers were as those required for Pusan and some company forms readily accepted.

The present maximum draft for the port is 14.5 m. but this is expected to increase to 14.75 m. next year.

Port limits have been extended and now join the following positions: Lat. 36° 04′ 30″ N., Long. 129° 25′ 20″ E.; Lat. 36° 03′ 00″ N., Long. 129° 28′ 00″ E.; Lat. 36° 01′ 12″ N., Long. 129° 29′ 54″ E.

SHIPMASTER'S REPORT: September, 1982.

Health: Radio pratique not possible.

VHF: 16 then 6 with Pilot boats; 16 with Pohang Port Authorities; 16, 25, 26 and 27 with Pohang Radio.

Tugs: Four modern tugs.

Berthing: Depth alongside Berth No. 1 is 17 m. Vessels berth either side alongside. Berthing in daylight only for large vessels.

Fuel: All grades of bunkers and lubricants available from Korea Marine Bunkering Co., Ltd. Cable address: K Bunker Seoul. Telex: K28412.

Repairs: Sae Won Marine Engineering Co., Ltd., Cable address: Sae Marine Pohang. Telex: K4395. Tel: (72) 5400-1 (riding crew are available for ship repairs on passage).

Sam Yang Marine Engineering Co., Ltd., Telex: Symeco K4415. Tel: (3) 2251-2, (3) 4451., Agent for Unitor Service.

AUTHORITY: Pohang District Maritime and Port Authority.

AGENT: See "Busan" or "Inchon".

SAMCHEOG HAN (SAM CHUCK): 37.30 N. 129.10 E. (See Plan Book)

SHIPMASTER'S REPORT: June 1981

DOCUMENTS:

Ship's Register (1 copy required to be kept ashore)
Last Port Clearance.
10 Crew Lists.
3 Lists of Private Tobacco and Liquors.
4 Personal Effects Lists.
4 List of Foreign Money.
4 Stores Lists.
4 Ship's Property Declarations.

PILOTAGE: Pilot will board at Quarantine Anchorage.

After departure Sam Chuck vessel has to return Pilot to Buk Pyong. During night time no pilotage.

HEALTH: On arrival Sam Chuck the vessel has to proceed to Buk Pyong, about 5 nautical miles North of Sam Chuck, and has to anchor at the Quarantine Anchorage in position: 37° 29′ 36″ N., 129° 10′ 30″ E.

The Port Health Officers will board the vessel and arrange Free Pratique.

Documents Required:

1 Crew List.
1 Maritime Declaration of Health.
1 Vaccination List.

VHF: "Mukho Radio" calling Channel 16, communication Channel 26 (slight interference).

TUGS: One tug available, equipped with own tow line.

BERTHING: Conveyor pier, left side of port entrance, exclusively for loading cement clinker in bulk.

Draft allowed according to Pilot is 6.8 m. Other berths, draft allowed is 6.7 m.

One belt conveyor with a loading rate about 300 tonnes per hour.

DENSITY: 1027.

TIME: GMT plus 9 hours.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits. Bonded store will not be sealed, as long as the Master only has the key.

One Customs Officer will stay on board for the whole time at berth.

SHORE LEAVE: Possible, shore passes issued for every crew member, have to be returned before departure.

GENERAL:

Ship Chandler: Available from Mukho.

Currency: 680 W (Won) = 1 US $.

SAMCHEON PO: 34.52 N. 128.05 E. (See Plan Book)

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: Formalities similar to other Korean Ports, but local Authorities are not used to Foreign going ships yet and Port Clearance is very slow. All crew members issued with shore passes by Immigration Authorities, these passes are collected in again before sailing, to hand back to Immigration.

PILOTAGE: Although the Port Information Sheet states that pilotage is not compulsory, I feel that it would be unwise to attempt both berthing and sailing without the benefit of local knowledge. The streams can be very strong, we estimated up to about 4 knots whilst we were there.

Pilot boards at the Quarantine Anchorage. Pilot boarding regulations similar to those at other Korean ports.

Requests for a Pilot should be made through the vessel's local Agents.

ANCHORAGES: Quarantine Anchorage 34° 51′ 56″N. 128° 05′ 23″ E. (600 m. radius). Good holding ground – yellow mud. Depth 17.2 m. Anchorage is open to South. Channel to quay dredged to 18 m. and is well buoyed.

RESTRICTIONS: Berthing/unberthing carried out at slack water, during daylight hours only.

MAX. SIZE: 100,000 tonnes deadweight. Max. depth alongside 18.1 m. Rise of tide 1.6 m.

TUGS: Two tugs are required. They come from Masan, 3 hours' notice required.

BERTHING: Wharf is 540 m. long and is divided into 2 berths. Principal commodity is coal for the power station.

	Length	*Depth*	*Max. Size*
Northwest end	270 m.	15.10 m.	50,000 d.w.t.
Southeast end	270 m.	18.10 m.	100,000 d.w.t.

Wharf is very well fendered, and has lrage rubber, 'Buffer', type fenders at regular intervals. There is a 2 m. high wall, which runs along the entire wharf frontage, the mooring bollards are set in breaks in this wall; but the set up is dangerous; very awkward for the linesmen, and virtually impossible to get a gangway out, ship to shore.

BULK CARGO FACILITIES: Two ship unloaders with 35 tonne grabs available for coal discharge. Capacity 1,500 t.p.h. each.

STEVEDORES: Working hours per day – 16 hours.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Nearest Consuls at Busan.

REPAIRS: Limited repairs may be undertaken by local boat yard.

GANGWAY/DECK WATCHMEN: Three Watchmen and two Customs Officers on board at all times, and have to be fed and accommodated. The Watchmen will use one room, but the Customs want to be accommodated separately.

AIRPORT: Nearest at Pusan.

SHORE LEAVE: Shore leave by Liberty Boat only, takes crew to the small fishing port of Sam Cheon Po, itself about 1 mile further West. There is a curfew in force at the power station, no boats may approach from 2000 hrs. to 0400 hrs. Crew members are not allowed to walk ashore through the power station, so only the Liberty Boat can be used.

IDENTIFICATION CARDS: See "Documents".

GENERAL: Fairly good quality fresh provisions may be obtained, Agent handles chandler's work as well. Agents very willing to be of assistance, but there are very grave language problems, hardly anyone speaks English, and those that do are usually very limited in what they understand.

SHIPMASTER'S REPORT: May 1984.

CHARTS: B.A. No. 127; American 95142; Korean 452.

DOCUMENTS:

9 copies Crew List.
1 Declaration of Health.
1 Vaccination List.
3 Passenger Lists (Nil return required).
2 Crew Declaration of Personal Effects.
2 Currency Lists.
2 Ship's Currency Lists.
2 Bonded Stores Lists.
2 Ship's Stores Lists (all foodstuffs on board to be declared).
1 List of Ports of Call (previous 9 months ports and countries).
2 Ammunition and Firearms List.
2 Narcotics Lists (sealed once checked).
7 Reports of Entrance/Departure (Agent supplies and completes).

ARRIVAL: 2 Customs and 2 Immigration officials and 1 army official board when vessel alongside, Agents assist.

PILOT: Boards in position Lat. 34° 50′ N., Long. 128° 6.5′ E., from small blue coloured boat. Advance notice of arrival important as Pilot comes from Massan (3 hours by bus) and there are no telex facilities in Samcheon Po. All messages in and out by telephone from/to respective radio stations. Best to use Seoul Radio. At least 24 hours notice after which it is too late to change. Pilot boards and takes vessel to Quarantine anchorage, waits onboard until vessel cleared, then berths vessel alongside, with the aid of 2 tugs.

BERTH: The berth is 1,550 m. long with depths of 14 m. at West end and 16 m. at East end. Very well fendered for whole length, but high due to very heavy swell during S.W. Monsoon, sufficient bollards along whole length.

There are 2 gantries for 2 berths with 20 ton grabs, onto conveyor belts to large storage yard. Air draft at least 25 m. from quay. Outreach about 30 m.

Only import at this berth is coal for power station (Korean Electric Company).

SHORE LEAVE: Possible by launch from ship, nobody allowed through installation except Master. No boat/launch allowed to move from sunset to sunrise.

FRESH WATER/FUEL: Available by barge only. Bunkers by barge from Yusan or Busan. Fresh water obtained locally but costs US$4.0 per ton.

PROVISIONS: Available locally, usual Korean standard.

AGENT: Only one Agent in Samcheon Po. (Boo Young Shipping Co. Telephone No. 8111) No telex available.

ULSAN: 35.27 N.129.23 E. (See Plan Book)

DOCUMENTS:

3 copies of Manifested Parcels on board.
3 copies of the Store List.
3 copies of List of Narcotics on board.
3 copies of List of Arms and Ammunition on board.
3 copies of List of Vessel's Foreign Currency.
3 copies of List of Crew's Foreign Currency.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Derat Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions, and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit) bearing 333° true distance 2,915 yd.
Pongjin Hang Light „ 053° true „ 4,770 yd.
(end of breakwater)
Chuck To (centre cut) „ 255° true „ 3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco Buoy, at 1.5 miles.

Lights ashore, lights on the Imodco Buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipe-lines are located at this site and anchoring is strictly prohibited.

RESTRICTIONS: No night mooring at any time at SBM. Unmooring possible at any time.

MAX. SIZE: Max. mooring capacity 260,000 d.w.t. Max. draft 64.5 ft.

HEALTH: Entry prediction to be supplied to Quarantine Authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

VHF: Communication available in Ulsan Port 24 hours a day.

"Ulsan Harbour Control" on Channels 14 and 16 for reporting vessel's arrival and departure.

"Ulsan Pilot" on Channels 13 and 16 and "Ulsan Radio" on Channel 16 for calling and working channels are Channels 25, 26 and 27 for public messages.

BERTH DESCRIPTION: 2 berths at single buoy moorings.

Yukong Terminal No. 1 SBM:

Position: Lat. 35° 27′ 14″ N., Long. 129° 23′ 31″ E.

Description: A 3 m. diameter yellow cylindrical pillar type marker buoy installed at No. 1 SBM position in May 1984, and has top mark yellow "X" shape in accordance with IALA Regulations. The original SBM, 12.5 m. diameter red and white vertically striped buoy and 2×12 in floating hoses (730 ft.) removed to shore for repairs.

Light: Fl. Y. 3 secs. visibility over 5 miles, activated by storage battery, automatic sun switch.

Radar Reflector and Fog Horn: No radar reflector and no fog horn on marker buoy.

Yukong Terminal No. 2 SBM:

Position: Lat. 35° 26′ 44″ N., Long. 129° 23′ 20″ E.

Description: A 11.4 m. diameter yellow coloured buoy.

Lights: On buoy: Fl. Y. 6 secs. visibility over 5 miles. On hoses: 4 red winking marker lights equally spaced along the 980 ft. floating hoses, visible for 2 miles.

Fog Horn: A battery powered fog horn with a range in excess of 0.5 miles.

DRY CARGO BERTHS: Commercial harbour mainly serves export of chemicals, fertilisers and by-products of the refineries. The harbour lies about 4 miles in from the sea and there are 4 berths available with depths up to 33 ft.

Quarantine/pilot station situated in position Lat. 35° 27′ 26″ N., Long. 129° 24′ 30″ E.

Entrance at night is not permitted. Only 1 tug is available. Water is available. No VHF. Max. tide in harbour is 1 ft. Also see "Shipmaster's Reports".

TUGS: 2 or 3 tugs assist in mooring operations and 1 tug assists with unmooring operation.

Tugs will join vessel about 1.5 miles East of No. 2 SBM.

BERTHING: 2 workboats (16 tons and 10 tons) are in attendance during mooring operations.

1 workboat will keep the hoses clear and the other handles the mooring ropes.

Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy.

Anchors are never to be used while at the buoy. They can foul buoy cables and pipe-line on the bottom if released.

No. 1 Buoy: Not in use.

No. 2 Buoy: The vessel will be moored with 2×18 in. nylon polypropylene ropes, 300 ft. in length, floating off the buoy.

Two ship's mooring ropes will be run to the buoy to pick up the buoy mooring ropes one by one when about 200 m. distance from the buoy.

Before approaching the buoy, 8 pieces of rope lashing (3 in. diameter and 10 m. length) and stoppers should be provided for mooring operations at forecastle.

HOSES:

No. 1 Buoy: Not in use.

No. 2 Buoy: There are 2×16 in. hoses, 980 ft. and 945 ft. respectively in length. The hose connections are made to the port manifold of the vessel only and lifted one at a time to the ship's manifold. Each hose, when full of cargo is over 10.5 tons in weight.

Hose Mooring and Connection: Mooring and hose connection, disconnection will be carried out by Harbour Master and shore gangs, and while the vessel is at the buoy, 1 Harbour Master and 7 crew will remain on board during entire operations on the buoy. The vessel will be required to provide sleeping quarters and meals for them. They are mainly kept on board for emergency.

BUNKERS AND WATER: Available by barge at the anchorage.

BALLASTING: After the vessel has discharged about half of her laden cargo, the vessel should be ballasted to a safe margin, to draw not less than 18 ft. forward.

This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will be moored at all times about 120 ft. from buoy.

REPAIRS/DRY DOCKS: All types of repairs possible at Hyundai Mipo Dockyard. Seven docks available, largest being 380 m.×65 m.×12.7 m.

ENGINES: The ship's engines must remain ready with full power for immediate use and to keep the vessel a safe distance from the buoy. Any repair work or hot work prohibited without the Harbour Master's permission.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REPATRIATION: Nearest facilities for crew repatriation are at Busan.

TIME: Korean Standard Time, GMT plus 9 hours. No alterations during year.

HOLIDAYS: 1st, 2nd, 3rd January; 1st March; 10th March; 5th April; 5th May; 6th June; 17th July; 15th August; 1st October; 3rd October; 9th October; 25th December and New Year's Day, (Lunar Calendar Day 1st January); Buddha's Day (Lunar Calendar Day, 8th April); Moon Festival Day (Lunar Calendar Day, 15th August).

SHORE LEAVE: Allowed up to midnight.

CHIEF OFFICER'S REPORT: 1975

Vessel's Particulars:

Length Overall – 162.18 m. Breadth – 22.8 m.
Summer Draft – 10.382 m. Summer d.w.t. 21,705 m./tons.

Dry Cargo Berths

Anchorage: Local Agents generally wireless the Quarantine Anchorage position which is approx. 1.5 miles W.N.W. from the position shown on BA Chart No. 898. Care should be taken while anchoring as there are innumerable fishing floats, nets, etc. North of 35° 28′ N., and West of 129° 23.7′ E.

Restrictions: No pilotage between sunset and sunrise. Curfew from 0000 – 0400 hrs.

Pilotage & Berthing: The standard of pilotage was generally good. Pilot arranged by Agents and embarks at Quarantine Anchorage after vessel is cleared by Authorities. 1 anchor is used while going alongside. 1 tug of unknown h.p. and 2 mooring boats assist while berthing. 4 berths are available:

No. 1 Pier – Length 300 m. Depth variable (see "Plan Book")
No. 2 Pier – Length unknown. Depth supposed to be 36 ft.
No. 3 Pier – Length 165 m. Depth 29 ft.
No. 4 Pier – No details known.

Local Authorities themselves do not have any idea as to the actual depths alongside. It is advisable to sound the bottom twice daily especially at No. 1 Pier as the depths were found to vary almost every 10 ft. Cargo is loaded/discharged by vessel's cargo gear. Rate of loading bagged urea is approx. 400 m/tons per gang per day. Working hours are normally between 0700 hrs. and 1900 hrs. every day, Saturdays and Sundays included. Only on National Holidays no cargo is worked. Discharge of bulk sulphur and gas/product carriers is around the clock. A vessel carrying 28,000 tons of bulk sulphur was discharged in 5 days. There is 1 crane and conveyor belt on No. 1 Pier only for handling sulphur. It was observed that sometimes small coasters were loaded/discharged by mobile cranes.

Stevedores: Ulsan Port has a rule that a gang engaged for one particular hatch will only work that hatch from start to finish and will not work any other hatch, not even the other end of the hatch if the hatch has more than 1 set of derricks. Gangs have to be ordered before noon for the next day.

Medical: Local hospital used, patients normally taken there by watchmen.

Density: Apparently varies. Once 1016 was obtained while 10 days earlier 1020 was obtained.

Fresh Water: Available from barge whose capacity appears to be 150 tons. At least 24 hours notice necessary.
Fuel: Not available.
Repairs: Facility available but rates high.
Dry Docks: Hyundai Shipyard located at Ulsan builds VLCC's.
Watchmen: Essential on foreign vessels. Arranged by Agents.
Hatches: As per charter party but suggest use own crew as labour are only experienced with wooden hatchboards.
Repatriation: Usually done through Seoul which is about 5 hours away by bus. We changed Radio Officers and experienced no difficulty.
Telephones: Placed on board, but only for local calls via exchange.
Services: Only 1 shipchandler who handles everything including providing watchmen, laundrymen, etc.
Identity Cards: Shore pass issued for Ulsan valid for 3 days. To be renewed every fourth day. Usually done by watchmen who collect all passes and go to Immigration Office.
Surveyors: Lloyd's can be arranged from Busan.
General: Ulsan is a very busy port with a large amount of local and Japanese coastal traffic. Local Agents keep trying to shift bigger vessels ahead and astern to try and squeeze in small coasters. It is advisable to strictly adhere to the charter party rules at all times in this port to prevent delays and expense on vessel's account.

SHIPMASTER'S REPORT: May 1979.

Vessel: Summer d.w.t., 37,300; LOA, 194 m.; breadth, 28 m.; Summer draft, 36 ft.

Vessel loaded 30,000 tonnes of bagged fertiliser at No. 2 Berth using ship's cranes. The loaded departure draft was 33 ft.

Port Limits: As shown on Korean chart 119, arc passing through:

Lat. 35° 28′ 29″ N.,	Long. 129° 24′ 25″ E.
Lat. 35° 26′ 00″ N.,	Long. 129° 24′ 23″ E.
Lat. 35° 24′ 13″ N.,	Long. 129° 22′ 00″ E.

Documents: As per "Guide to Port Entry", the 3 copies of crew's foreign currency were found not to be required.
Pilotage: The Pilot was ordered through the Agent. The Pilot joins the ship in the anchorage from a white coloured pilot boat which has no VHF. A portable VHF is carried by the Pilot for communication with tugs and pilot station. Only 2 Pilots are on duty each day and there are no movements in port between 1900 hrs. and 0600 hrs. The standard of pilotage was good.
Anchorage: The Quarantine Anchorage as shown on Korean chart 119 is centred on Lat. 35° 27′ 25″ N., Long. 129° 25′ 34″ E. (Radius 400 m.)

Depth in this anchorage is 33 m. to 47 m. This anchorage is outside the harbour limits. A good anchorage was found 1 mile N.E. of No. 2 Imodco Buoy in 24 m. A boat service is available from the anchorage.
Restrictions: No night movements.
Max. Size: Not known.
Health: As per "Guide".
VHF: "Ulsan Radio" maintains a listening watch on Channel 16, contact is made on this Channel then switched to a working Channel. This station is used for local calls only.
Radar: No port radar.
Tugs: There are 2 tugs available of unknown horsepower. The tugs join the vessel off the berth and use their own lines.
Berthing: No. 2 Berth: Length approximately 250 m. The depth alongside was 11 m. with 13 m. offshore, the density varied but averaged 1006. There are no fixed shore facilities at this berth and it appears that it is often used by car carriers.
Cranes: Stevedores have 100, 60, 30 and 10 tonne mobile cranes available.
Bulk Cargo: 30,000 tonnes of bagged fertiliser was loaded using 4 ships cranes. Cargo was delivered to the berth in trucks and made up into slings on the jetty. The loading rate was 700 tonnes per hatch/day.
Stevedores: Gangs should be ordered before 1400 hrs. the previous day. There are a limited number of gangs available. Normal working hours are from 0700 – 1900 hrs. with 1 hour break. It is possible to shift gangs to different hatches under certain circumstances and night working is possible but not advised as same men work through to next day. The standard of cargo handling equipment supplied by stevedores is good.
Medical: Medical treatment and hospital facilities are available.
Hatches: Hatches should be opened before stevedores arrive on board or waiting time is incured.
Fresh Water: Fresh water is available and is delivered by barge.
Repatriation: Repatriation was carried out via Busan about 2 hours drive away without any problems.
Airport: Nearest airport Busan, regular daily flights to Seoul.
Telephones: A telephone is placed on board which is for local calls only via exchange. Overseas calls can be made from shore, these calls are collect, person to person, only with a waiting time of 2 hours (approximately).
Shore Leave: Shore leave is allowed but a strict curfew is enforced from 0000 – 0400 hrs.
Identity Cards: A shore pass is issued for Ulsan which is renewed every fifth day, usually done by watchmen who collect all passes and take them to the Immigration Office.
Stores: There is only 1 ship chandler and all stores are ordered through him. The quality is poor and the prices high.
Port Authority: Ulsan District Maritime and Port Authority.

AUTHORITY: Korea Oil Corporation, Ulsan.
AGENT: See "Busan" or "Inchon".

YOSU: 34.44 N. 127.45 E. (See Plan Book)

(A) SINGLE BUOY MOORING, HONAM OIL REFINERY
(B) CRUDE WHARF, HONAM OIL REFINERY
(C) PRODUCT WHARF, HONAM OIL REFINERY
(D) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION
(E) PIER, DAE SUNG METHANOL PLANT
(F) DRY CARGO, YOSU HARBOUR

DOCUMENTS:

- Last Port Clearance.
- Register.
- 13 copies of Crew List.
- 12 copies of Passenger Manifest.
- 3 copies of Store List.
- 3 copies of Bonded Store List.
- 3 copies of Arms and Ammunition List.
- 3 copies of Livestock List.
- 5 copies of Cargo Manifest.
- 1 copy of Vaccination List showing dates of last yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat. 34° 39′ N., Long. 127° 58′ E.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Agent is Channel 16, name Agent and switch to Channel 26 to talk.
RESTRICTIONS: Two overhead power cables with clearance of 27 m. and 39 m. respectively in approximate position: Lat. 34° 44′ N., Long. 127° 45′ E.
HEALTH: Before proceeding to SBM vessels must anchor at the Quarantine Station to obtain Free Pratique.
RADIO: Yosu Port Radio station calling sign 6MY operates on 500 kHz on 24 hour service.

The station's range is about 100/150 nautical miles and it is recommended that tanker Masters should contact the station giving their ETA at the pilot station.

Also see "Radio" in Section "A".
TUGS: Available, up to 2,000 h.p.
MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long. 127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long. 127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.
DENSITY: 1025.
FRESH WATER: Fresh water is available for delivery to ships.
FUEL: Bunkers available by barge subject to advance notice being given.
REPAIRS: There are repair facilities in Yosu.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
REPATRIATION: Crew changes or repatriation can be arranged.
TIME: Korean Standard Time, GMT plus 9 hours. No alterations during year.
HOLIDAYS: 1st, 2nd and 3rd January, 1st March, 10th March, 5th April, 5th May, 6th June, 17th July, 15th August, 1st October, 3rd October, 9th October, 25th December. 1st January (Lunar Calendar), 8th April (Lunar Calendar), 15th August (Lunar Calendar).
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
SHORE LEAVE: Shore leave for ship's personnel is arranged by ship's Agent and the local authorities.

(A) SINGLE BUOY MOORING, HONAM OIL REFINERY

GENERAL DESCRIPTION: The 10 m. diameter IMODCO Single Buoy Mooring Terminal is located at the approximate position of Lat. 34° 51′ N., Long. 127° 47.3′ E. The terminal is modified to provide a safe mooring for tankers up to 200,000 d.w.t. under the environmental condition of about 40 knots maximum wind speed.
PILOTAGE: Pilot boards at Sea anchorage position 1.5 miles to 2 miles S.E. of Tae Do. (VLCCs only).

The approach to Yosu Gulf from the South is open and clear of dangers until vessel approaches "Tae Do", near which the pilot station is located.

Vessels up to 30,000 g.r.t. must use the pilot station approx. 1.5 miles East of Odong Do and use the inner Quarantine anchorage.
ANCHORAGE: About 1.5 miles to 2 miles S.E. of Tae Do. The depth at the anchorage is approximately 90 ft. and good holding ground (Mud) is reported.
APPROACHES: Although the approach of Yosu Gulf is open and free of dangers, great care must be taken navigating these waters due to dense concentrations of fishermen and fishing nets/stakes.
RESTRICTIONS: Daylight berthing on slack water ebb tide.

Unberthing prohibited between 2200 hrs. and 0400 hrs.
MAX. SIZE: The safe depth of Samg i Channel which is located 4 miles South of the Terminal is 19 m. at about LLW.

The tidal rise in this area is 2 m. to 3.5 m. at high tide. Therefore, the terminal accepts tankers having draft up to 19 m.
NAVIGATIONAL AIDS: Vessels calling Honam Oil Terminal should have charts No. 242 and 209 published by the Republic of Korea Hydrographic Office. Within the area, there is no port radar service.

NOTICE OF READINESS: Notice of Readiness will be tendered and accepted at the time when the vessel is in all respects ready for cargo operations and in accordance with charter party agreed.

TUGS: 2 diesel tugs.

BERTHING: Mooring operations are done jointly by ship's crew on the forecastle and mooring gang from Yosu on mooring boat.

The vessel shall prepare 2 strong messenger lines of more than 50 m. each and pass them to the mooring boat. The mooring gang will tie the vessel's messenger lines to 18 in. buoy ropes' messenger lines. Upon signal from mooring gang, vessel will heave in both mooring ropes up to chafing gear of the ropes on deck and make fast to the vessel's bollards by the 8 turn method.

Normally starboard rope is heaved in first and or both port and starboard ropes are heaved in simultaneously.

It is compulsory to moor with 18 in. buoy ropes. For the use of these ropes Honam Oil charges a nominal fee for each call at the SBM.

CONNECTING HOSES: The vessel must install 2 × 16 in. ASA type flanges to her starboard manifolds, rig starboard derrick doubled and capable of lifting up to 10 tons of weight prior to berthing and have standing by a derrick operator and responsible ship's officer at her manifolds upon berthing.

Connecting/disconnecting cargo hoses will be done by shore team. The team leader will co-ordinate with ship's cargo officer for cargo hose handlings.

DISCHARGING: Discharging should be commenced by the signal of Terminal representative. The Terminal receiving facilities have a working pressure of 225 p.s.i. with safety factor of 7:1, but the pumping pressure must be raised gradually and then the pressure should be raised up to 225 p.s.i. at ship's manifolds. The vessels are required to find out discharging rate at least every 4 hours.

SHIP'S READINESS: During discharging the international code flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile and show an unbroken light all around the horizon. The vessel's engines must be ready while discharging at a moment's notice and the Master is responsible for having sufficient officers on duty both on bridge and in engine room to take action immediately upon instructions from Honam Oil representative.

In order to avoid riding up on the buoy and the cargo hoses, astern movements of the vessel are required. For turbine vessels when for various reasons, the Chief Engineer officer is unable to completely stop his engines, the r.p.m. must be kept at a minimum by using the turning gear. The propeller must also propel the vessel astern only. Vessels which are not able to conform with these regulations should advise Honam Oil representative in writing. In addition to the lights usually displayed, vessels discharging cargo during darkness, will illuminate the area around the ship and especially the IMODCO Buoy to the satisfaction of the terminal representative in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels should provide suitable floodlights for working on deck during night operation.

BALLAST: There are no facilities for reception of dirty ballast. It is the ship Master's responsibility to see that no oil or oily ballast is spilled or pumped overboard from his ship. Drip-pans must be used at all times and all scuppers must be plugged. The waters in or adjacent to the terminal must not be polluted and only oil-free bilge water may be discharged at the terminal. If, during inspection or during progress of discharging, it is revealed that the vessel's tanks are not oil-tight, she will be refused further discharging facilities.

SAFETY: Sufficient officers and crew personnel must always be on board to attend to the vessel and to cargo. Power must be available at all times on deck winches and windlass while the vessel is in the moorings.

The presence of unauthorised craft alongside is extremely hazardous, and Masters are requested to require all unauthorised craft to clear the vessel's side prior to commencement of cargo discharging. Master should shut down all cargo operations during severe electrical storms and under any circumstances which imperil the cargo operation.

While bunkering barge is alongside the crude tanker, it is required that ship's Master shall check mooring lines, fenders or engines of bunkering barge or other safety items.

RADIO: In Korea there are 4 coastal radio stations, Busan, Inchon, Mokpo and Yosu as listed in International communication publications. Vessels calling Yosu would call Busan, Mokpo, and Yosu.

For the vessels visiting Honam Oil Refinery, it is recommended to call Mokpo coastal station, call sign HLM and address to: Honam Oil Yosu Refinery Telex number K762 or K764, via: Mokpo Radio. The Mokpo Radio keeps telex operation network with telex room of Honam Oil Yosu Refinery and messages can be handled within half an hour during the service hours of Honam Oil Yosu Refinery Telex room (weekdays: 0830–1930, Saturday: 0830–1500, Sunday/Holiday: off-service). Also vessels within VHF voice radio range of about 100 km to Yosu, call Channel 16 (Simplex), Switch to Channel 26 (Duplex) and then ask for vessel Agent, Harbour Pilot or Honam Oil Yosu Refinery. Honam Oil Yosu Refinery provides the telephone service every day from 0830 to 2300 hrs. local time with telephone number 3141-9. (Terminal representative located on extension 279 for office hours, 370 for out of office hours).

The communications from tanker to shore when moored at the IMODCO Buoy will be made by ferry boat and refinery matters are made by transceiver handled by refinery personnel on board.

GENERAL: Vessels properly equipped will be permitted to discharge crude oil and load clean ballast simultaneously.

The vessel is required to provide accommodation and meals for Loading Master, his assistant and Customs Officer. Meals also required for four shore watchmen. COW is permitted provided terminal is notified in advance and given details of COW schedule.

AUTHORITY: Honam Oil, Yosu Refinery.

(B) CRUDE WHARF, HONAM OIL REFINERY

GENERAL DESCRIPTION: The crude wharf is located at Lat. 34° 51′ N., Long. 127° 46′ 55″ E. running in a 336°/156° direction.

PILOTAGE: Pilot station for crude tankers is located at outer harbour in positon: Lat. 34° 39′ N., Long. 127° 58′ E. in the vicinity of Tae Do Island, where the Harbour Pilot boards to lead the vessel to Quarantine Anchorage.

APPROACHES: En route to the wharf, at approximately Lat. 34° 47.3′ N., Long. 127° 48.8′ E. vessels pass narrowest part of channel, Sam Gi, which has about 19 m. depth of water at MLLW, and marked by 5 light-buoys and one lighthouse. The course is laid midway between the 5 buoys. At about 1 mile from the wharf, there is a patch with 13 m. depth which is marked by a light buoy.

RESTRICTIONS: Berthing and operating restrictions are as follows:

1. Maximum approach angle: 10°
2. Maximum approach velocity: 0.15 m./sec. normal to fender line
3. Maximum current speed: 2.1 m./sec.
4. Winds

(a) Non-operating conditions
Maximum design velocity 38 m./sec.
(b) Operating Conditions (Moored at berth)
Maximum sustained velocity 18m./sec.
Maximum instant gust 27 m./sec.
(c) Maximum berthing wind velocity
13 m./sec. of Southerly wind
15 m./sec. of Northerly wind

MAX. SIZE:

Maximum crude carrier:	255,000 d.w.t.
Maximum products carrier:	80,000 d.w.t.
Maximum draft:	19 m.
Minimum crude carrier:	30,000 d.w.t.
Minimum products carrier:	30,000 d.w.t.

HEALTH: Normally vessels who could not be granted Radio Pratique anchor at the Quarantine Station which is located at around Lat. 34° 42.5′ N., Long. 127° 52.6′ E. At this anchorage, Quarantine doctors come on board. After quarantine inspection, the vessel should have port clearance of Customs, Immigration and so on.

BERTHING: *Approaching the Wharf:* It will be normal tanker practice that all tankers be berthed bow seaward to ensure a quick and uncomplicated departure in the event of an emergency. Main conditions for following this practice are as below:

1. Natural environment's conditions to be favourable.
2. Early passage of Sam Gi channel prior to high tide to meet slack tide while berthing.
3. Vessel should swing to the North of crude wharf with the assistance of tug-boats and approaching course will be about 160°.

When the above is impracticable due to the limited effective manoeuvring space in the vicinity of the wharf, vessels will approach almost parallel to the wharf whose direction is about 336°.

While passing 13 m. patch, 1 mile off the wharf, loaded vessel should reduce speed to about 3 knots and all tugs will come alongside to the vessel's bow, mid-ship and quarter. At about half mile off the wharf, the vessel's speed should be 2 knots and when abreast of the wharf, the vessel should be stopped. When stopped, the abreast distance between vessel and wharf should be about 100 m. – 200 m.

Abreast distance will be reduced with the assistance of tug-boats. Closing speed must be 10 cm./sec. or less at a distance of 20 m. and less than 5 cm./sec. at a distance of 3 m. between the vessel and wharf. Distance and speed for both bow and stern will be displayed on the gangway tower of wharf upon vessel reaching about 160 m. from wharf.

Mooring: The wharf has 8 dolphins for mooring VLCCs as shown in the "Plan Book". Nos. 1 and 4 dolphins are to be used for head and stern lines, Nos. 2 and 3 for breast lines, and Nos. 5, 6, 7 and 8 dolphins for fore and aft spring lines. Each dolphin has quick release hooks with a capstan and about 100 m. of 3 in. messenger lines to pick up mooring wires/ropes.

To monitor tanker approach, the wharf is equipped with docking sonars which detect distance and approaching speed, which are also displayed on top of the gangway tower with visibility of about 200 m.

Line handling service agency will render services to handle lines on the wharf. The agency will provide 2 launches relaying mooring lines from berthing vessel to the wharf and 9 men including a chief in charge of the team hooking mooring lines to the dolphins.

About 20 mooring lines for 200,000 d.w.t. tanker are required. Type and quality of mooring lines are in accordance with ISGOTT paragraph 3.3.3 i.e. "Preferably the mooring lines used to secure the tanker should all be of the same materials and construction. Wire ropes are recommended especially for larger tankers as they limit the tanker movement at the berth. Moorings composed entirely of fibres, especially synthetics, are not recommended as their high elasticity can allow excessive movement due to strong wind or current forces or passing ships. Wire ropes and fibre ropes should never be used together in the same direction because of the difference in their elastic properties".

Vessel puts out springs first, then breast lines and finally head or stern lines or vice versa. Normally breast and long lines will be relayed by launches to the wharf. While making fast spring lines, vessel should adjust centre of her manifolds to wharf loading arms at the request of shore operator. Vessels should be held tightly to breasting dolphins with the assistance of tug-boats, mainly by tug-boat stationed midship, until mooring has been completed.

Anchoring in the vicinity of the wharf is not allowed except in an emergency.

Unberthing: Tug-boats will be stationed on seaward side of the vessel's bow, midship and quarter as necessary and will push the vessel so as to hold the vessel tightly to the breast dolphins while letting-go all mooring lines. Sequences of letting-go lines is the reverse of mooring. Therefore, long head and stern lines let go first, breast next and springs last.

DISCHARGING: *Prior to arrival:* Prior to arrival at the wharf, vessels should designate 3 manifolds which are convenient for unloading cargo. The designated manifolds should be marked by rags or other materials so as to be able to identify them easily from the wharf and adjust the vessel's position correctly to loading arms of the wharf. All the vessel's manifolds should be kept blinded until vessel is moored. Also, all crude oil tankers must be equipped with 16 in. ASA type flanges on her manifolds.

Connection of hoses: Discharging arms are as follows:

3 × 16 in. flanged for crude oils.
2 × 12 in. flanged for products (naphtha).

After completion of berthing, terminal representative and wharf operators will come on board and check readiness to connect discharging arms, fire fighting equipment, drip pans and oil removing materials. The 3 × 16 in. discharging arms for crude oil are rotary counter-weighted marine arms with hydraulic quick connect couplings. Remote controlled hydraulic positioners are provided and wharf operators will position and connect the outboard flanges of the arms to the tanker manifold. The vessel's crew, consisting of one responsible officer and 4 other crew, standby at the manifolds, prepare manifolds to be used, and co-ordinate with wharf operators in adjusting, connecting and securing discharging arms.

Operating Envelope: The unloading arms have been designed for an operating-height envelope that accounts for the elevation changes due to tide and varying freeboard of the largest and smallest tankers for which the wharf is designed. The 16 in. unloading arms will accommodate a maximum 255,000 d.w.t. tanker and a minimum 80,000 d.w.t. tanker, or heights of 26.3 m. to 5.2 m. above the lowest water level. The 12 in. unloading arms will accommodate a maximum 80,000 d.w.t. tanker and a minimum 30,000 d.w.t. tanker, or heights of 19.6 m. to 4.6 m.

A longitudinal drift of ±5.0 m. and a lateral drift of ±4.57 m. have been allowed for both sizes of unloading arms.

Rates and Pressure: After hoses have been connected, all shore valves will be opened and vessel's Chief Officer informed of shore readiness. Vessel will open all valves necessary to discharge except manifolds' valves which will be opened just prior to start of discharge.

After confirming that the cargo is flowing into designated shore tank, tanker rail pressure for all vessel sizes shall be 140 p.s.i.g., and maximum discharging rates are:

Arab Medium Crude Oil	70,000 b.p.h.
High Pour Low Sulphur } Crude Oil	40,000 b.p.h.
Naphtha	30,000 b.p.h.

Crude Oil Washing (COW): Crude oil washing of cargo tanks using fixed tank washing machines in conjunction with fully inerted gas tanks is permitted on Master's acceptance of Honam Oil's conditions to carry out COW at the crude wharf which will be delivered to the vessel. The vessel requiring COW should notify it to Honam Oil in advance together with the information of previous COWs conducted and COW schedules to be carried out.

BALLAST: The ballasting operation should be discussed and agreed with the terminal representative regarding the approximate time of commencement and duration of ballasting both into permanent ballast tanks and cargo tanks.

To obtain quick turn around, the terminal encourages simultaneous handling of cargo and ballast, other than permanent ballast, if the vessel is so equipped. Ballasting should be minimum after discharging cargo.

FRESH WATER: Not available.

FUEL: Not available.

SERVICES: Honam Oil provide the following services: Telex service every day from 0845 to 2130 hrs., except Saturdays when service is available from 0845 to 1500 hrs., and no service on Sundays and holidays.

Telephone service every day from 0845 to 2300 hours.

A list of emergency telephone numbers will be available at the wharf.

AUTHORITY: Honam Oil, Yosu Refinery. *Tel:* 90101 to 90109. *Telex:* 762 and 764 (domestic).

Head office: Seoul. *Tel:* 77155. *Telex:* Honam K-27234 or K-23261.

(C) PRODUCTS WHARF, HONAM OIL REFINERY

BERTHING: The 4 products berths are located in approximate position Lat. 34° 51′ 38″ N., Long. 127° 44′ E., in East-West direction and designed to accommodate 4 tankers simultaneously viz. No. 1 and No. 4 Berths for about 5,000 d.w.t. tankers, No. 2 for 3,000 d.w.t., and No. 3 for 20,000 ton tankers. No. 3 Berth is under modification and installation of Chicksan loading arm. The Honam Oil Product Wharf is designed to moor and unmoor tankers on a 24-hour basis, depending on the condition prevailing at the time and the Master's judgement. The wharf is well and sufficiently illuminated for night work.

Minimum mooring line requirements are:

Forward: 3 headlines	Aft: 3 stern lines
1 spring line	1 spring line
1 breast line	1 breast line

In strong wind 1 more head and 1 more stern line are required.

The direction of the tidal stream in the vicinity of the products wharf is nearly rectilinear and parallel to the berths, the flood running in a 272° direction and the ebb in an 084° direction. The maximum velocity is 2.5 knots or more. The duration of the ebb stream is about 6.75 hours, and the flood stream 5.5 hours.

The tidal range is about 4 m. Therefore, ship's crew must adjust vessel's ropes with tidal height so as to avoid damage to the ropes.

MAX. SIZE: There is shallow water of about 10 m. depth at LLW en route approaching the channel to the wharf. With this depth of water, the Terminal limits vessel's draft to less than 32 ft.

CONNECTING HOSES: It is the policy of the Honam Oil Refinery Co., Ltd. that the ship's crew shall be responsible for the connecting and disconnecting of the cargo hoses at the ship's manifold. The wharf crew will operate the cargo hose winches.

LOADING: The refinery can furnish loading at 5,000 b.p.h. or more. The Chief Officer should, however, state the loading rate he requires which should be maximum consistent with safety at all times. A qualified deck officer should, however, be on deck during the entire loading operation. The international code flag "B" shall be displayed from the signal yard-arm during daylight hours. A red light shown during hours of darkness. Lines for loading and deballasting are as follows:

Product	*Lines Dia., inches*
LPG	6
Regular gasoline	10
Military and Premium gasoline	12
Kerosene/JA–1	10
Naphtha	10
JP–4	12
Solvent	6
Diesel	12
LRFO/NSFO	10
Bunker–C	14
Bunker–C	12
Asphalt to Cosmos Wharf	3
Bunker–A	10
Ballast water	10
LPG Vapour return	3

FRESH WATER: Vessels requiring fresh water request required amount of water to ship's agent in advance.

REPAIRS: There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite vessels from the wharf and a quick turn around.

RADIO: See "Radio" in section "A".

AUTHORITY: Honam Oil Refinery.

(D) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION

A straight berth which could accommodate one 50,000, one 30,000 and two 20,000 d.w.t. vessels is located at about Lat. 34° 51′ 40″ N., Long. 127° 44′ 40″ E. The wharf is handling raw material by 800 tons crane and product of fertilizer by 300 tons crane.

(E) PIER, DAE SUNG METHANOL PLANT

Located close to the product wharf of Honam Oil Refinery at about Lat. 34° 51′ 30″ N., Long. 127° 44′ 05″ E. Maximum vessel size and draft are about 4,400 d.w.t. and 5.5 m. respectively.

(F) DRY CARGO PORT

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N., Long. 127° 45.3′ East and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pier for vessels of less than 20 ft. draft and max. draft at No. 3 Pier is 26 ft. At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity is available.

RADIO: See "Radio" in section "A".

AUTHORITY: Local Port Authority, Yosu.

AGENT: See "Busan" or "Inchon".

Kuwait

GENERAL

VISA REGULATIONS: *Crew Changes:* Crew members joining ships at Kuwaiti ports can enter Kuwait with a valid Seaman's book, against a "Seaman's Guarantee Letter" from Agent, allowing 24 hour transit only to join a vessel in port.

For the preparation of a Seaman's Guarantee Letter (S.G.L.) and to arrange an "Airline's OK Board Telex" from Kuwait (to allow crew to board a flight to Kuwait without Kuwaiti visa), please telex the following particulars to vessel's Agent:

Full Name
Nationality
Seaman's Book Number/Date and Place of Issue
Age/Date of Birth
Profession
Flight Details

Once a seaman enters/joins vessel on S.G.L. as above, it is not permitted for him to sign off/leave the vessel in Kuwait due to Immigration restrictions applicable to seamen entering on S.G.L.

Visitors to ships, repairmen and business visitors should obtain a visa before travelling to Kuwait. It is also possible for the Agent to obtain a visitor's visa (N.O.C.) locally in Kuwait. However, visitors must send, well in advance, a photo-copy of the passport pages containing full passport particulars (imperative) to the Agent in order to apply for such a visa.

SPARES/MAIL: *Air Freight of Ship's Spares, Mail etc.:* Air-freighted spare parts and ship's mail should be addressed to the Master c/o the Agent, and marked: "Ship's Spares (Stores) in Transit" and be accompanied by packing list and commercial invoice and Certificate of Origin both in original, with name and address of manufacturer (imperative) and certified by Chamber of Commerce and legalised by any Arab Embassy/Consulate (except Egypt).

Contents and weight of consignment should be correctly stated in all documents and air way-bill.

Customs clearance formalities and delivery of air freight consignments in Kuwait will take 10-14 days. It is, therefore, advisable to despatch air freight parcels sufficiently well in advance of ship's arrival. The flight details and air way-bill number should be telexed to the Agent enabling the Agent to collect delivery order from the airline and commence clearance formalities immediately.

N.B.: No documents are needed for ship's mail. It is advisable to send ship's mail/printed matter/documents by air courier, due to faster handling at airport, and to avoid the lengthy procedures applicable to air freight consignments.

PACKING REGULATIONS: *Chemicals in Bags:* The following is from the Director General, Ports Public Authority.

"You will appreciate that chemical materials arriving in bags require careful and special handling to prevent tearing and contamination, and we would, therefore, request you to ask all Steamship Agents and Owners of vessels to give their best attention to shipments of this type of cargo, in an effort to ease its handling by the stevedoring labourers without obstacles.

The bags should properly be bundled and placed on pallets, covered by thick plastic and/or canvas covers for safety and security of the cargo and fast discharging.

It should be noted that unless this type of cargo is shipped on vessels under the condition mentioned above, the Ports Public Authority shall not permit discharging and the cargo will remain on board the on-carrying vessel".

In Transit and Kuwait Cargo Mixed Together in Ships' Holds: The Kuwait Ports Public Authority have reported a recent incident which occurred during discharge of cargo from a vessel.

The berthing of the vessel as usual was arranged according to the cable from the Master that Kuwait cargo was clear for discharge in all respects, but when the discharging operation was carried out, they observed that the in transit and Kuwait cargo in all hatches were mixed together. Such being the case the Ports Public Authority were compelled to move one truck out to receive Kuwait cargo, and then bring back the truck of receivers of the in transit cargo, and so on until the discharging was completed. This situation naturally entangled the work altogether and caused considerable delay in discharging the cargo from the vessel.

Therefore, the Ports Public Authority have requested that we draw Principals' attention to this and ask you to take good care in stowing cargo properly in ships' holds and that it not be mixed together.

NOTICE: From The Under-Secretary – Ministry of Communications (dated 8th November, 1982).

We wish to inform you that we have received a cable from our Embassy in Baghdad on 6.11.82, stating that the Ministry of Foreign Affairs in Baghdad, notified the Embassy of a declaration made by a Military spokesman on 1.11.82 relating to limitation of the Naval operational area in the Northern part of Arabian Gulf, the text of which is as follows:

1. Zone starting Area – Lat: 29° 30′ N., Long: 48° 30′ E.
2. Lat: 29° 25′ N., Long: 49° 09′ E.
3. Lat: 28° 23′ N., Long: 49° 47′ E.
4. Zone of ending Area – Lat: 28° 23′ N., Long: 51° 00′ E.

We therefore request all maritime companies and oil tankers not to approach or sail from this prohibited area which is considered a Military Operational Area. The Iraqi Authorities shall not undertake any material or moral responsibility towards ships and tanker owners.

MINA ABDULLA: 29.02 N. 48.11E. **(See Plan Book)**

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 55′ N. on the East by Long. 48° 18′ E. and on North by a line joining following points:

(1)	29° 01′ 45″ N.	48° 09′ 25″ E.
(2)	29° 01′ 45″ N.	48° 10′ 06″ E.
(3)	29° 02′ N.	48° 10′ 18″ E.
(4)	29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during daylight hours. Flags may be obtained from Agent.

APPROACHES: 2 oil-loading berths supplied by 3 pipe-lines are situated here. A number of large tanks define tank farm area. A refinery stands to S.W. of tank farm. The flare is conspicuous. Other conspicuous objects in area are the radio tower, Mosque Minaret and the 4 leading beacons for 2 berths. These are lit for night berthing by 3 white lights on each beacon in the form of triangles, the beacon lights for Berth No. 1 are occulting every 5 seconds, the lights of No. 2 Berth are fixed.

When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.

DOCUMENTS: Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

Enter	*Clear*
Ship's Manifest.	Register.
Bill of Health.	Load Line Certificate.
Crew List.	Radio Certificate.
Clearance from Last Port.	Safety Certificate.
Light Dues Certificate.	Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.

Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.

PILOTAGE: Mooring Master normally meets vessels within 1.5 miles of terminal sea berths and will act as Pilot and as Company's Representative and remain on board during vessel's stay in port. Vessels requested to have Pilot ladder of an approved pattern, safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. When it is necessary for a vessel to anchor before being berthed she should do so in the recommended anchorage area. Two 45 ft. tugs painted black with white superstructure assist berthing by running mooring lines to stern buoys. Two pilot boats painted black with white superstructure and are radar equipped. The name of the first boat is "Independent" and the second one is "Sahara".

Vessel with a Mooring Master on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Mooring Master, display a flag indicating berth to which vessel is proceeding.

ANCHORAGES: Vessels requiring to anchor for any reason in port limits should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.
29° 02′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arises in anchorage area.

All vessels and craft within the port shall be navigated with care and caution, at a speed, and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels which are mooring or moored at terminal buoys, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, when and where required by the Marine Officer, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.

Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Marine Officer, necessitates their doing so.

MAX. SIZE: Vessels of unlimited length can be accommodated in Berth No. 2 only. Approximately 90,000 d.w.t. tankers fully loaded up to a maximum draft of 46 ft. on arrival, calling for bunkers only, can be accommodated. Vessels up to a maximum of 200,000 d.w.t. can be accommodated arriving in ballast condition for loading part cargoes up to a max. sailing draft of 51 ft. or for normal bunkering requirements when remaining in ballast.

HEALTH: Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.

Vessels calling at Mina Abdulla are requested to send following information to "Health Shuaiba Port":

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until Free Pratique has been granted.

Adequate covers shall be placed over all overside discharges.

Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

RADIO/VHF: Master shall inform "Mina Abdulla Marine" at least 72, 48 and 24 hour's notice of time of arrival via Kuwait Government Coastal Radio Station, call sign "9KK".

Mina Abdulla Marine is provided also with VHF radio. All Channels are available.

MOORING: Mooring Masters may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

Vessels shall provide such tackle as may be required for loading or discharging cargo.

Vessels berthed at sea terminals shall provide not less than 6 good quality mooring ropes and/or wire hawsers aft, each not less than 120 fathoms in length. An eye shall be spliced in ends of ropes to secure lines to pelican hooks on buoys. Ships must have both anchors ready for immediate use each with minimum of chain as follows Below: d.w.t. 10,000, 8 shackles. Between d.w.t. 10,000 – 20,000, 9 shackles; 20,000 – 30,000, 10 shackles. Above d.w.t. 30,000, 11 shackles; 40,000, 12 shackles. Above 60,000, 13 shackles; and above 80,000, 16 shackles. The term shackles is to be interpreted as a length of 15 fathoms. Masters shall be responsible for seeing that a strict watch is kept on their vessel's moorings to prevent ranging.

BERTHING: Master shall, before berthing, advise Marine Officer of any special damage or disability to the vessel. No.1 Berth Lat. 29° 01′ 16″ N., Long. 48° 11′ 52″ E. approximately, situated about 2 miles offshore in 43 ft. water LWOST over sand and coral with fair holding ground. A spar-buoy painted white marks end of submerged steel pipe-lines. A common bunker line to the berths, off-branches approximately 1,000 ft. South of Berth No. 1 and runs in to meet the direct line from shore to this berth. Ends of attached loading hoses marked by can-buoys on either side of the spar. 4 mooring buoys in Berth No. 1 and 5 in Berth No. 2 painted white located in an arc, 1 – 2 cables approximately E.S.E. through South to S.S.W. spar-buoys for vessel's stern moorings. Ship's anchors only are used forward in No. 2 Berth (situated approximately half a cable South and 9 cables East of Berth No. 1); Lat. 29° 01′ 0″ N., Long. 48° 12′ 51″ E. approximately. Depth of water in Berth No. 2 is 56 ft. LWOST over mud and clay which is excellent holding ground.

LOADING: Terminal has facilities to load at max. rate of 800 t.p.h. in Berth No. 1 and 2,800 t.p.h. in Berth No. 2, but this loading rate can be achieved only when vessel is furnished with appropriate equipment.

Caution: The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by shore crew as advised by Mooring Master who will remain on board while ship is mooring, loading or discharging and unmooring. Vessels will provide winch drivers and remove such manifold blanking flanges and fit reducing pieces as required.

Deck hose connections from submarine lines as follows:

Cargo: 10 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges. Bunker flanges 8 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges.

Loading and discharging of petroleum vessels shall not be undertaken without permission of Marine Officer.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to Marine Officer that all necessary valves are open and that vessel is in proper condition to receive or discharge cargo.

(2) Master or Chief Officer has certified to Marine Officer that all ship's sea valves are closed or blank flanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible Ship's Officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines and hoses shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

Signal Flag by Day	*Starting*	*Light Signal by Night*
1 Red Flag	Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

Load Lines: Masters are warned that their load lines are subject to scrutiny by the Port Officer from Mina-Al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

BALLAST: As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there clean tanks and segregate slops.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are 2 amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 Dinars and not more then 40,000 Dinars. In the event of his committing a similar crime within a period of 1 year from the date of his conviction, such a person shall be punished by a fine of not less than 3,000 Dinars and not more than 40,000 Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of not less than 6,000 Dinars and not more than 40,000 Dinars".

For each offence a bond of 40,000 Kuwaiti Dinars must be deposited prior to release of vessel.

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

MEDICAL: Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h. for fuel oil cargoes only.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 year's imprisonment and a maximum fine of KD 300 or by only 1 of the 2 aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CONSULS: See "Shuwaikh". Consuls are situated just outside Kuwait town, some 30 miles from the terminal.

REPAIRS: No facilities.

REPATRIATION: See "Visa Regulations" under General before first port

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: K.N.P.C. does not provide any chandlering facilities. Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quantities. Prices a little more expensive than in Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.

CERTIFICATES: See "Documents". There is no organisation for dealing with Derat Certificate at Mina Abdulla. Agents are responsible for presentation of Oil-discharging Certificate to Customs Authorities as guaranteed by them. All Cargo Discharge Certificates duly attested by the Arab Consulate are to be sent to Agents directly.

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla, and this rule will be strictly adhered to.

REGULATIONS: Main engines shall always be kept ready for use. Steam pressure shall be maintained at minimum necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of Marine Officer.

Master shall at all times retain on board sufficient crew to work vessels.

Vessels shall have both anchors ready for immediate use on arrival and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of Marine Officer.

Vessels berthing during hours of darkness must if available provide a portable light of an approved gas-tight pattern capable of being placed on either quarter of vessel to illuminate vessel's mooring ropes sufficiently for mooring boat.

Vessels shall provide an efficient accommodation ladder and boat rope for port authorities and, during hours of darkness, shall install adequate approved lighting for same. Failure to comply with this may lead to inward clearance being delayed by authorities, thus incurring delays to vessel.

No swimming in vicinity of vessels or from vessels in berth is allowed.

SHIPMASTER'S REPORT: December 1978.

Berth No. 1: This berth is now reserved for loading of naphtha only. Loading rate 800 t.p.h. Cargo line is 10 in.

This berth is also fitted with a line of 8 in. for fuel oil bunkers. Rate for bunkering: 500 t.p.h.

Berth No. 2: This berth is operated for loading either crude oil or fuel oil. The cargo line is 10 in. Loading rate: 2,800 t.p.h.

This berth is also fitted with a line of 8 in. for fuel oil bunkers. Rate for bunkering: 500 t.p.h.

For loading of crude oil cargoes, only the cargo line is used and the actual loading rate is 2,800 t.p.h.

For loading of fuel oil cargoes, both cargo and bunker lines are used simultaneously, and the loading rate is increased to 3,300 t.p.h.

At the end of loading operations, the cargo line is flushed when a different grade of cargo is to be loaded on the following vessel.

AUTHORITY: Kuwait National Petroleum Co., Mina Abdulla Refinery, P.O.Box Safat 69, Kuwait. *Tel:* 960233 ext. 3028/3029. *Telex:* Kunpema 44204 Kt. *Cables:* Kunpema Kt–Marine Mina Abdulla. *Contact:* Captain Hani S. Omar, Senior Mooring Master.

MINA AL-AHMADI: 29.04 N. 48.09 E. (See Plan Book)

OPERATORS: Kuwait Oil Company.

LOCATION: Port of Mina Al-Ahmadi is open roadstead situated on Western shores of the Gulf.

PORT LIMITS: From the shore at Lat: 29° 02′ 50″ N. Eastward to Long: 48° 09′ 42″ E. Thence in a S.E. direction to position Lat: 29° 02′ 45″ N., Long. 48° 09′ 47″ E. then in an Easterly direction towards Long: 48° 11′ 30″ E. and the Northerly limit Lat: 29° 10′ 00″ N. from the shore to Long: 48° 11′ 30″ E.

Note: Southern limits liable to slight modification due to Shuaiba Port expansion. Changes of no consequence to visiting vessels.

FLAG: National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from the "Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals

A fog signal on the extreme South end of South Pier with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 04′ 05″ N., Long. 48° 10′ 00″ E.

A fog signal situated on the North Pier with a characteristic of 2.5-second blast, 3-second silence, 2.5-second blast, 3-second silence, 2.5-second blast, 46.5-second silence, Approximate position Lat: 29° 07′ 24″ N., Long: 48° 09′ 00″ E.

A fog signal situated on the Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position Lat: 29° 06′ 48″ N., Long: 48° 17′ 29″ E.

A fog signal situated on the Single Point Mooring with a characteristic of a 10-second blast every 60 seconds. Approximate position Lat: 29° 06.9′ N., Long: 48° 19.2′ E.

DOCUMENTS:

1. To obtain clearance inwards, following documents required by Agents:

(i) Ship's Register.
(ii) Safety Equipment Certificate.
(iii) Safety Radio Certificate.
(iv) Load Line Certificate.
(v) Last Port Clearance.
(vi) Two copies of Crew List showing names, nationalities and passport/seamen's book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:

(a) One copy of Crew List.
(b) Log Books covering period from last visit.
(c) Completed Customs Declaration Form (supplied by boarding officer).
(d) List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
(e) Completed Ballast Form (form also supplied by boarding officer).

3. Immigration officials require the following:

(a) Valid Passport or Seamen's Book – the latter is preferable for landing.
(b) Letter of Guarantee from Agents.
(c) Two copies of Crew Lists.

4. Early Departure Procedure. KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered onboard by launch. Weather conditions may prolong such delays on occasions.

5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

ANCHORAGES: The suggested anchorages in the port of Mina Al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised, prior to arrival, of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-West or South-East of the Sea Island and inside of the restricted area.
2. To the East of the North Pier, outside of the port limits and to the North of the prohibited anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the prohibited anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a prohibited anchorage and a restricted area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

Prohibited anchorage	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 11′ 30″ E.	to	48° 15′ 00″ E.
	29° 07′ 00″ N.		29° 07′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
Restricted area	29° 05′ 00″ N.	to	29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.
	29° 09′ 00″ N.		29° 09′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.

HEALTH:

Vessels calling at Mina Al-Ahmadi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Cholera Certificates
(5) Request for Free Pratique

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that Free Pratique has been granted.

Regulations.

(i) All vessels must exhibit quarantine signals until quarantine formalities are completed or Free Pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.

(ii) Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.

(iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.

(iv) Maritime Declaration of Health Form (supplied by boarding quarantine officer) to be completed.

(v) One copy of Crew List containing dates of vaccination and inoculation is required.

(vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.

(vii) Details of air-conditioning available in vessel (form supplied by boarding officer).

(viii) A valid Derat Certificate must be produced. Facilities are available locally for renewal.

RADIO:

1. *Station:* All radio communications to the Company should be quoted in Greenwich Mean Time and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) 29° 10′ 09″ N., 47° 45′ 42″ E.

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On request
(9KK3) 6,370	A1	0.75 kW.	On request
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kHz. each even hour; 8,525 and 12,895 kHz. each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kHz. each odd hour plus 05.

2. *ETA:* 72 hours before arrival Masters should transmit to KUOCO through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.

1. ETA.
2. Cargo and Bunkers required.
3. Notice of any repairs which may immobilise vessel.
4. Any special requirements regarding cargo documents.
5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew to see doctor or dentist.
5. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

VHF: A short range VHF Radio Telephone. Port control system is in operation and continuous watch is maintained on International Channel 16. Port working Channels are:

11 12 14	General Port Working.
15 17	Sea Island Operations and General Port Working.
73 74	Pilot/Tugs Pier Controller North Pier/South Pier.

Vessels bound for Mina Al-Ahmadi should make contact, as soon as they are within range, calling "Mina Al-Ahmadi Port Control" on Channel 16.

Note: As Channel 16 is reserved for calling, safety and emergency, stations should refrain from using this Channel unnecessarily.

RADAR: A Decca harbour radar system is operated from the Harbour Master's office at the South Pier.

NOTICE OF READINESS: Vessel are accepted for loading either by being given a range date or "As convenient". If a Crude Oil Loading Tanker arrives within her nominated range date (a three day period) her N.O.R. will be taken as the time of her arrival whether or not she is berthed on arrival. An L.P.G. vessel is nominated an "Acceptance Date" plus 1 day and her N.O.R. will likewise be taken as the time of her arrival, whether or not she berths so long as her arrival time is within her range. If a vessel arrives "As convenient" or for lifting bunkers only then her notice of readiness will be taken as the time that the Pilot boards. Time of anchoring, together with position relative to South Pier Control should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready on receipt of one hour's notice from Port Control, this notice will be given by VHF or Lamp and vessels should ensure an efficient watch is maintained to receive notice.

Cancellation of N.O.R.: In all cases, including vessels having Range Dates, if after having received 1 hour's notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original N.O.R. will be cancelled and the Pilot withdrawn. The new N.O.R. will be the time the Pilot re-boards the vessel concerned. As vessels are normally berthed in strict N.O.R. sequence, a vessel could lose considerable time through not being ready and Master should ensure that delays of this nature do not occur.

TUGS: K.O.C. maintain 3 diesel tugs for port use. They are 5,200 h.p. with a designated bollard pull of 70 tons. 2 tugs are normally on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions no tugs or other craft will come alongside the vessel before the Pilot boards. Ship's personnel must not signal for tugs or other boats to come alongside.

MOORINGS: When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina Al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

BERTHING: Vessels can berth at any time of the day and night. Berths are allocated by the Harbour Master depending on various factors and the berthing position is advised by VHF. All vessels must establish contact with Mina Al-Ahmadi Port Control before anchoring to ascertain position. Vessels should remain at 1 hour notice for berthing at all times and maintain a continuous listening watch on VHF Channel 16.

The Port facilities consists of 3 Piers, 1 Buoy Mooring (Sea Berth), Sea Island and Single Point Mooring.

South Pier: The South Pier is connected to the shore by an approach trestle, which leaves the shore in position 29° 03.6′ N., 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° direction for 2,805 ft. (855 m.) and the South arm running in a 174° direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above zero tide. The South Pier has 5 oil-loading berths, plus 2 L.P.G. berths, and 1 for K.O.C. cargo discharge and local bunkering.

Bitumen Pier: A Bitumen Pier, for the export of Bitumen is located in an approximate position 29° 03.9′ N, 48° 09′ E. The Pier approach projects out from the shore opposite the Bitumen plant in an 071° direction for approximately 600 m. The Pier head is 100 m. long and runs in a 341° – 161° direction. Water depth approximately 20 ft. 6 in. (zero tide). Largest vessel to be accommodated 5,000 ton S.D.W.

North Pier: The North Pier is situated 3.5 nautical miles North of the South Pier and is connected to the shore by an approach trestle which runs seaward from 29° 07.1′ N., 48° 08.2′ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.). The head is formed by the Oil Pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above zero tide. The North Pier has 4 oil-loading berths.

Sea Island: The loading platform of this Terminal is located in position 29° 06.8′ N., 48° 17.5′ E. approximately 7.4 miles East of the North and South Piers. It is a steel piled structure in 94 ft. of water (zero tide). It consists primarily of a central loading platform with control tower, 6 mooring and 8 breasting dolphins all interconnected by catwalks. The Terminal which lies in a 330° – 150° direction, is some 1,620 ft. in length (494 m.). The height of the loading platform above zero tide is 44 ft. The Sea Island has 2 loading berths. Crude oil is fed to the Terminal by a 48 in. submarine line and heavy fuel oil by a 20 in. submarine line. The submarine lines are marked by 3 light buoys letttered "A", "B" and "C". Details are given in the navigational aids. L.F.O. and D.O. bunkers are not available at the Sea Island.

Multi-pile Single Point Mooring: A Single Point Mooring established in 1979, is located in position 29° 06.9′ N., 48° 19.2′ E. approximately 1.5 nautical miles East of the Sea Island. This fixed, multi-piled structure is connected by a 48 in. submarine crude line and a 20 in. submarine bunker line. Both are extensions of the lines serving the Sea Island and connected to them on the Sea Island loading platform.

The S.P.M. has a distinguishing light, the characteristic of which is Fl. 3 ev. 10 seconds, visible 10 miles. The strings of hoses are marked by fixed orange lights. The S.P.M. lines are within the present restricted area and all vessels approaching the Port shall only anchor as and where directed by the Harbour Master. L.F.O. and D.O. bunkers are not available at the S.P.M.

Sea Berth: There is 1 sea berth located South of South Pier. Berth "A" is maintained only for the import of refined products.

Limiting Depths and Berth lengths:

Berth	*Depth at Zero Tide (ft.)*	*Nominal Length (ft.)*
South Pier		
1.	47	800
2.	46	535
3.	48	705
4.	49	765
5.	41.5	765
6.	43	705
9.	44.5	615
10.	49	1,050
North Pier		
11.	59	1,008
12.	59	1,296
15.	57	792
16.	57	740
Sea Island		
20.	94	1,620
21.	94	1,620
Single Point Mooring		
22.	100	Accommodates any type of vessel

Loading Manifold, Loading Connection Sizes:

South Pier: Berths 2–6 are equipped with 10 in. cargo hoses and 8 in. bunker hoses – standard 150/ASA.

Berth 1 is equipped with	5×16 in. Cargo Arms.
	2×12 in. Bunker Arms.
Berth 10 is equipped with	4×16 in. Cargo Arms.
	2×12 in. Bunker Arms.
Berth 9 is equipped with	6 in. bunker hose only.
	All Standard 150/ASA.
North Pier:	
Berths 11 and 12	3×16 in. Cargo Arms.
Loading Arms	2×12 in. Bunker Arms.
	1×12 in. Chiksan for KLD/KNG.
Berths 15 and 16	4×12 in. Cargo Flanges.
Chiksan Units	2×8 in. Bunker Flanges.
	Standard 150/ASA.
Sea Island:	
Berths 20 and 21	4×16 in. Cargo Flanges.
Loading Arms	2×12 in. Bunker Flanges.
	Standard 150/ASA.
SPM:	
Berth 22	2×16 Cargo Flanges.
Floating Hoses	1×12 in. Bunker Flanges.
	Standard 150/ASA.

Reducers: All vessels using the port of Mina Al-Ahmadi should be equipped with reducing spools to fit these loading connections. These fittings should be in place, prior to berthing to help expedite the vessel's turn around.

Slops: A 6 in. slop-line is available on all berths on North and South Piers for reception of slops. For first 3 hours use of this facility is free, for each additional hour or part thereof, a charge is made. Reception of slops is necessarily slow and a vessel may be considerably delayed in having to pump slops ashore. Vessels are therefore expected to arrive with clean ballast and Masters are asked to certify that all tanks and lines have been thoroughly washed unless "load on top" techniques are being operated.

Crude/Product Loading Rates: The following table shows the crude and products available at each berth and the nominal loading rates.

Grade	Location	Nominal Rate (t.p.h.)	Maximum
Crude Oil	Sea Island	15,000	19,600
Crude Oil	S.P.M.	11,500	—
Crude Oil	North Pier	7,200	12,000
Crude Oil	South Pier	2,100	4,500
HFO Bunkers	S.P.M.	750	—
HFO Bunkers	Sea Island	750	—
HFO Bunkers	North Pier	500	—
HFO Bunkers	South Pier	500	—
HFO Cargo	North Pier	2,000	2,500
HFO Cargo	South Pier	2,000	—
LFO Bunkers	North Pier	500	—
LFO Bunkers	South Pier	500	—
LFO Cargo	South Pier	1,100	1,500
D.O. Bunkers	North Pier	500	—
D.O. Bunkers	South Pier	500	—
Line Blend Fuel Oil	South Pier	1,200	—
Gas Oil	South Pier	1,500	2,500
K.L.D.	N. & S. Piers	2,000	—
K.N.G.	N. & S. Piers	2,000	—
Bulk L.P.G.	South Pier	2,000	2,000

Note: All blended cargoes containing crude oil as one of the components can be loaded at any crude berth.

K.O.C. are in the process of installing a new metering system for Exports.

FUEL: Heavy, light and diesel fuel can be supplied on all berths except the Sea Island and S.P.M., where only heavy fuel is available. There are no bunkering facilities on the Bitumen Pier.

	API	Viscosity	Sulphur content
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or less
Light Fuel	19.0–20.0	600	3.5 or less
Diesel Fuel	35.5–36.5	36	1.5 or less

LUBRICATING OILS: The stock of marine products of BP, Shell and Gulf Oil are maintained at Mina Al-Ahmadi and requests indicating the quantities are to be made in advance. All drums are to be handled during deballasting or before loading. Vessels will not be allowed to load more than 9 drums after loading unless under special circumstances and depending on shipping congestion. No bulk luboil delivery service available in Kuwait.

MEDICAL: Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800 – 1200 hrs. and 1500 – 2000 hrs. daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

FRESH WATER: Fresh water is not available at Mina Al-Ahmadi. Vessels should contact their Agents for supply from alternative sources, such as Shuwaikh Anchorage, Shuaiba Port, etc.

STORING: Vessels can only be stored by barge at the anchorage. When storing alongside at the berth, trucks can only proceed to the head of the jetty. From this point hand carts are used to the berth. No fork lifts can be used on the jetty. The labour force is supplied by the Ship Chandler who also deals with the Customs Regulations.

DEEP WATER DEPARTURE CHANNEL: A comprehensive survey was carried out to determine the route of the departure channel for the larger and deep draft vessels leaving the port of Mina Al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madira Reef. In addition to the above aids, Madira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.

(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least 5 short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give way to vessels exhibiting and sounding these signals and indicate this intention by giving one short blast followed immediately by 1 long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within the deep water departure channel.

The departure channel is marked by the following buoys and beacons conforming to the I.A.L.A. "A" system:

Number/ Letter	*Shape & Colour*	*Position N. Lat.*	*E. Long*	*Character*	*Port/Starboard/ Special/Cardinal*

CUSTOMS: Customs Officials will board vessels to inspect log books to ascertain violation of Israeli Boycott Rules and seal the liquor bond during stay in berth. An accurate list of alcoholic drinks in *Bonded Store* only is to be presented to the officials sealing the bond and the seal is not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for re-sale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers' invoices and Certificate of Origin are required for clearance.

(ii) Importation and the sale of alcoholic beverages is strictly prohibited.

(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.

(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

IMMIGRATION:

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.

(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.

(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.

(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance.

N.B. Thursdays and Fridays are Company holidays.

(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.

(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

Also see "Visa Regulations" in "General" before first port.

CONSULS: Most friendly countries maintain Embassies or Consulates in Kuwait Town.

TIME: Kuwait State bases local time on the 45th meridian (GMT plus 3 hours). This time is in force the whole year.

SERVICES: To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details.

Repairs.

(a) *Ship Repair.* All running repairs are undertaken through local contractors.

(b) *Radar/Radio and Electronic Equipment.* Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

Supplies. Supply of chemicals, paints, spare parts and provisions are available through local Agents.

Laundry. Laundry service is available on advance notice.

Oil Inspection. An independent oil inspection service is maintained at Mina Al-Ahmadi by the following: E. W. Saybolt & Co., B. & R. Redwood Ltd., and Chas. Martin.

Seamens' Services Centre. Situated at South Pier. Provides recreational facilities for all visiting seamen. Personnel mail service, beverages, snooker, toiletries, souvenirs and Walport Film Exchange service available. Open 0800 hrs– 2000 hrs. daily.

Classification Societies. Lloyd's Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

Divers. Divers' services are available, including underwater hull cleaning service, through KOTC.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) *Local laws.* The laws of Kuwait are in force at the port of Mina Al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) *Pollution.* The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. For information, the following are two paragraphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 and not more than 40,000 Kuwaiti Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction such a person shall be fined not less than 3,000 and not more than 40,000 Kuwaiti Dinars, and in the event of his committing yet another crime within a year from the date of this last conviction he shall be punished by a fine of not less than 6,000 but not exceeding 40,000 Kuwaiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

(c) *Certificates.* All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island and S.P.M. are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: Introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

AUTHORITY: Kuwait Oil Company (K.S.C.), P.O.Box 20007, Ahmadi-22, Kuwait. *Tel:* Kuwait 989111. *Telex:* Kuoco 44211 KT. *Cables:* Kuoco Kuwait. *Contact:* I. Barrak, General Superintendent, Marine Services.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B Minatank Kwt. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 26, Agency Working. Channel 27, Agency Working.

MINA SAUD: 28.45 N. 48.24 E. (See Plan Book)

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company (hereinafter referred to as the Company) 7 days a week. Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16 in., and 10 in. oil pipe-lines, and 8 in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position Lat. 28° 44′ 13″ N., Long. 48° 23′ 19″ E. Other objects conspicuous to the navigator are: Northern Radio Mast, Lat. 28° 44′ 32″ N., Long. 48° 23′ 38″ E. surmounted by a fixed red light at night; Ras Al Zour Beacon: Lat. 28° 44′ 48″ N., Long. 48° 24′ 16″ E. A 35 ft. high frame exhibiting 3 flashes every 10 secs.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madira Reef Light Vessel, thence make good a course of 242° to an anchorage off Mina Saud in 9 fathoms.

DOCUMENTS:

Ship's Manifest.	Passengers Manifest, if any.
Bill of Health.	Store List.
Crew List.	Bonded Store List.
Clearance from Last Port.	

Agents are responsible for presentation of Oil Discharging Certificate to Customs Authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading.

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative.

ANCHORAGES: Centre of anchorage area recommended is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5 miles thence 180° 1.75 miles thence 270° 3.0 miles to refinery flare.

MAX. SIZE:

Guidance for Maximum Dimensions:

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.
Beam	No limit	No limit
Max Sailing Draft	41 ft.	52 ft. (56 ft.*)
Max. d.w.t. (for full cargo) approx.	50,000†	approx. 140,000†
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels (300,000 d.w.t.) are allowed for part cargo or bunkers providing other parameters are satisfied.

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free Pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agent or Harbour Control that Free Pratique has been granted.

TUGS: None.

READINESS: Notice of Readiness will be received by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 hrs. and 1800 hrs. local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. VLCCs must retain ballast during early stages of loading and discharge ballast as necessary during latter stages of loading.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 2×10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in length should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manila and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 150 U.S. Dollars per hour (approx.).

BERTHING: There are 2 loading berths, each conventional multi-buoy moorings which are connected by a 20 in. submarine line for cargo and a 12 in. submarine line for bunker fuel. Each berth has 2×10 in. cargo hoses (tanker rail hose is 10 in. diameter in all cases), and a 10 in. hose for bunkers. Hose connections should be prepared for one 10 in.×150 ASA standard hose on forward side of manifold and one 10 in.×150 ASA standard hose on after side of manifold (10 in. hose is normally utilised for loading cargo after completion of bunkers).

The outer berth, 073° – 2.6 miles from refinery flare, is equipped to take vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels can be accommodated for bunkering only or part cargo. Max. draft allowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is allowed. See Appendix below.

Appendix A. Mina Saud Tidal Loading Procedure December, 1975: Assuming 1000 ft. ship has berthed. Starboard anchor between 150 ft. and 300 ft. South of starboard anchor marker and one ship's length (1000 ft.) inside, (Course made good 270°T). Starboard anchor ranged along bottom and port anchor let go when 11 – 12 shackles out on starboard. i.e. 1000 ft. West of starboard (allowing for slack). Vessel would be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. Vessel should manage to remain in at least 16.4 m. charted depth, heading about 340°T with stern in line with, or to seaward, of manifold marker buoy.

Every effort should be made to pick up port anchor without slacking too much on starboard anchor. Ideally, last shot of port cable is dragged home whilst starboard cable is fairly tight, so that when port anchor is aweigh vessel swings to starboard and presents her port side to the ebb, thus regaining a mid berth position. (Sometimes necessary to put engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboard anchor is aweigh. Vessel should then steam North or slightly West of North in order to maintain a distance of approx. 1000 ft. from starboard anchor marker buoy. Vessel should start turn to starboard (bearing in mind ebb tide) when abeam of starboard anchor marker buoy, and endeavour to turn on radius of about 1000 ft. with starboard anchor marker buoy at centre. A course of 066°T should be made good until deep water is reached. If this procedure is followed, the minimum depth should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attention must be paid to vessel's position, as depths of less than 16 m. are in close proximity to exit channel.

Vessel should finish loading cargo or bunkers at least 3 hours before HW thus ensuring maximum height of tide for bottom clearance plus ebbing tide for easier control. (Ebb tide usually commences 2 hours before HW).

Divers should be utilised to check clearance at LW or some convenient time before ship is committed to a tidal loading. (In case of tidal anomaly).

16.4 m. must be reckoned governing depth. (53.8 ft.) and "Alaska Getty" must never be loaded to max. draft unless it is certain that she will sail with at least 1.8 m. of tide above chart datum.

For other vessels calculate thus: 16.4 + height of tide then subtract 1 m. Result will be max. allowable draft (only if weather conditions are ideal).

eg. Alaska Getty
16.4
+ 1.8 ht of tide
18.2
– 1.0 clearance
17.2 allowable draft (56 ft. 5 in.)

It must be borne in mind that mentioned clearances are the absolute minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipe-lines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berth, 073° – 2.0 miles from refinery flare, has a minimum depth of 44 ft. at LLW and can accommodate vessels up to 800 ft. in length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths. Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. A quick release hook connects ship's ropes to the buoy.

(d) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(e) 9 good quality synthetic ropes should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys.

(f) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than ten 15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

RADIO/VHF: *Communications:* Messages should either be telexed direct (Telex: 23074 Kt) or by cable via Kuwait Radio (call sign 9KK on 500 kHz) for onward transmission to Getty Mar Mina al-Zour (Mina Saud).

Kuwait Radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 MHz). Operating hours: 0700 to 1200 hrs. and 1300 to 1600 hrs. local time.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 24 hours distant from the Port.

It will assist if the following information is passed to "Gettymar Mina Saud" before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.

Cargo requirements in long tons or U.S. bbls. at 60° F.

Confirmation that only clean ballast is to be discharged and expected deballasting time.

Confirmation that ballast and pipe-lines are clean, both anchors forward and 9 synthetic ropes available aft.

Arrival draft fore and aft, expected sailing draft fore and aft.

ETA should be confirmed 24 hours before arrival.

When berthed at Mina Saud Contact with the shore is maintained by VHF R/T portable units supplied by the Company.

LOADING: Submarine line marked by permanent buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing gauges.

Loading rate at present averages 1,500 t.p.h. Max. 2,000 t.p.h.

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1 equivalent to 80 Cst.) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth 1, and 10 in. hose at Berth 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CONSULS: See "Kuwait."

REPAIRS: No regular repair facilities available. However, fully qualified divers are available from Terminal. Underwater cutting gear and welding equipment available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

REPATRIATION: Crew changes normally effected through Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: GMT plus 3 hours. Permanent.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside the Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside the Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low Waters during a 24 hour period. Range of tide is average 7.5 ft. at Springs and 5 ft. at Neaps.

Commencement of ebb stream (direction 190°) after HW may be taken as 2 hours before predicted time of HW at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams are 010° and 190° respectively. Direction is extremely variable between LHW and HLW period. Average direction during this period about 045°.

Tides subject to meteorological conditions and may be affected in height by more than 3 ft. in extreme circumstances. Times of High and Low Water may also be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

STORES: Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

SHORE LEAVE: Can be arranged through Agent.

AUTHORITY: Getty Oil Company, P.O.Box 1, Mina Al Zour (Mina Saud), Kuwait. *Tel:* 950444 (ext. 339) or 950221. *Telex:* 23074 Kt. *Cables:* Gettymar. *Contact:* Captain P. W. Hodges, Marine Superintendent.

AGENT: See "Shuwaikh".

Communication is by road by personal visit of agency staff. Distance about 50 miles.

SHUAIBA: 29.02 N. 48.09 E. (See Plan Book)

PORT LIMITS: Shuaiba port limits defined as follows:

North: This separates port of Shuaiba and Mina Al-Ahmadi and is defined by the point of intersection of coast line with Lat. 29° 02′ 50″ N. in an Easterly direction until it intersects Long. 48° 09′ 42″ E. Thence in a South-easterly direction to the intersection of Lat. 29° 02′ 45″ N. and Long. 48° 09′ 47″ E. Thence in an Easterly direction along Lat. 29° 02′ 45″ N. seawards to Long. 48° 15′ 07″ E.

East: Long. 48° 15′ 07″ E.

West: Coast line.

South: This separates port of Shuaiba and Mina-al-Abdullah and is defined by the point of intersection of coast line with Lat. 29° 01′ 45″ N. Extends due East till Long. 48° 09′ 59″ E. and runs on 45° direction to Lat. 29° 02′ 00″ N. then due East on that line until Long. 48° 15′ 07″ E.

Note: The above limits will be extended in the near future.

Ships whilst in port limits during daylight hours shall fly their National Flag at the after part of the ship and where a ship is of foreign registry also the Kuwait National Flag at the fore.

DOCUMENTS:

Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in transit a separate transit cargo manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copy Bills of Lading, i.e. ordinary carbon copy Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List are also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

N.B. Since all cargo for discharging at Port of Shuaiba has to go on direct delivery, and Customs clearance has to be completed prior to berthing of a vessel, it is therefore imperative that all documents, as above, are in Agent's hands for submission to relative authorities at least 7 working days prior to vessel's ETA, otherwise berthing of vessel is likely to be delayed.

PILOTAGE: Pilotage is compulsory and requests for Pilots may be made to Shuaiba Port Communications Centre (call sign "Shuaiba Port"). The Port Communications Centre is equipped with VHF Channels 16, 9 and 13.

ANCHORAGES: Lat. 29° 02′ 24″ N., Long. 48° 12′ 18″ E. Depth is 18.5 m. with good holding ground.

Notice No. 11/84:
SHUAIBA PORT ANCHORAGE

Ships bound for Shuaiba Port for loading/unloading/bunkering will be permitted to use Shuaiba Port Anchorage between Lat. 29° 02.75′ N. and Lat. 29° 02.00′ N. and between Long. 48° 15.11′ E. and Long. 48° 12.72′ E. Ships are not permitted to anchor to the West of Long. 48° 12.72′ E.

In the event of the anchorage becoming congested, ships may be directed to anchor in one of the following positions situated within the co-ordinates of the Shuaiba Port Anchorage as stated above:

A1	89° 30′	2.62 miles	D1	89° 30′	3.86 miles
A2	97° 30′	2.65 miles	D2	95° 30′	3.89 miles
B1	89° 30′	3.05 miles	E1	89° 30′	4.25 miles
B2	96° 45′	3.08 miles	E2	95° 00′	4.28 miles
C1	89° 30′	3.49 miles			
C2	96° 00′	3.45 miles			

The above bearings and distances are from Port Communication Tower (Shuaiba Signal Station) in position:

Lat. 29° 02.44′ N., Long. 48° 09.91′ E.

All other ships not falling in the categories listed in the first paragraph, such as vessels waiting for orders or which have not been nominated for bunkers, are not permitted to anchor in the Shuaiba Port Anchorage and must anchor well to the East of Long. 48° 15.11′ E.

Charts affected: B.A. 1223, U.S.H.O. 62430, 62432.

Authority originating above information: Director General, Shuaiba Area Port Authority, Kuwait.

RESTRICTIONS: Vessels over 650 ft. berth/unberth during daylight hours only.

MAX. SIZE:

Dry Cargo Berth	*Max. Draft Permitted (m.)*	*Max. Ship LOA (m.)*
1	8.53	120
2	9.75	120
3	10.67	180
4	6.71	170
5	6.71	170
6	10.00	180
7	10.00	180
8	10.00	180
9	13.00	180
10	13.00	180
11	13.00	180
12	13.00	180
13	13.00	180
14	13.00	170
15	13.00	As these berths will be utilised by container and Ro/Ro vessels, no limitations and subject only to berth occupancy.
16	13.00	
17	13.00	
18	13.00	
19	13.00	190
20	13.00	190

Usage of Berth Nos. 4, 5, 6, 7 and 8 is restricted to good weather conditions only.

Agents of vessels with dimensions in excess of the above must make due representation to the Port Department for permission for these vessels to be accepted and ample notice is necessary when submitting such requests.

Also see "Berthing".

HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Cholera Certificate
(5) Request for Free Pratique

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Shuaiba Port Communications Centre that Free Pratique has been granted.

TUGS: 4 tugs of 2,100 h.p. are available. The use of tugs is mandatory whenever directed by the Pilot or Harbour Master.

BERTHING:

Southern Quay Mole: Berth Nos. 1 to 5.

The Western side of the mole consists of three berths, Nos. 1, 2 and 3, with a total berthage of 500 m., whilst the Eastern side consists of two berths, Nos. 4 and 5 with total berthage of 350 m.

Berth No. 1	present maximum allowable draft	8.84 m.
Berth No. 2	„ „ „ „	9.75 m.
Berth No. 3	„ „ „ „	10.67 m.
Berth No. 4	„ „ „ „	6.70 m.
Berth No. 5	„ „ „ „	6.70 m.

There are two storage sheds but all cargo is direct delivery. The present cranage of three 5 ton and two 3 ton electric cranes on the Western side will be phased out in the near future.

An overhead conveyor belt system, with two ship loaders, is presently under construction at Berths 1 and 2.

Northern Quay Mole: Berth Nos. 6 to 14.

Berths 9 to 14 have at present a max. allowable draft of 13 m. which will increase to 14 m. upon completion of final dredging programme. Berths 6, 7 and 8, which are on the seaward side of the breakwater, have a max. allowable draft of 10 m. and are restricted to good weather. Berths 12 to 14, equipped with 4 quayside cranes with max. capacity of 15 tons.

Total berthage of the Northern quay mole is 1,833 m.

A marginal berth (No. 15) extends 300 m. to the South from the foot of No. 6 berth. This marginal berth has at present a max. allowable draft of 12.50 m. which will increase to 14 m. upon completion of final dredging programme.

Petroleum Products Pier: Located to the East of the Southern Quay Mole and consisting of four berths for the accommodation of tankers. Berths 1 and 3 comprise the Eastern Berths whilst Berths 2 and 4 are located on the Western side.

Berth No. 1	Length 350 m., draft 13.71 m.
Berth No. 2	Length 369 m., draft 12.19 m.
Berth No. 3	Length 369 m., draft 13.71 m.
Berth No. 4	Length 331 m., draft 12.12 m.

The above lengths are inclusive of mooring dolphins positioned Northward and Southward of the pier. Because of draft restrictions at Berths 2 and 4, tankers in excess of 230 m. in length will be subjected to the Port Authority's acceptance. Each berth is supplied with 2×20 in. fuel lines and 5×16 in. supply lines for naptha, avtur and gas oil. All lines reduce to 12 in. at the loading arms. Additionally at No. 2 Berth there are lines for discharging lubricating oil and for loading liquid ammonia. An 8 in. line for slops is available. Each berth at the Petroleum Products Pier is equipped to provide bunkers by means of 2×20 in. lines for fuel oil and marine diesel oil whilst light fuel oil is supplied by an 8 in. line.

Small Craft Harbour: Situated S.W. of the Southern Quay Mole and comprising 3 berths accommodating vessels of less than 4 m. draft.

Berth No. 1	Length 100 m.
Berth No. 2	„ 200 m.
Berth No. 3	„ 175 m.

Berth No. 3 is reserved for loading sulphur.

The allocation of berths is at the sole discretion of the Port Manager.

The Harbour Master's Office, Port Communications Centre, Customs, Immigration and Port Health are all situated at the Southern Quay Mole.

CONTAINER FACILITIES: *Shuaiba Area Container Terminal (S.A.C.T.):* The S.A.C.T. is the Terminal Division of the Shuaiba Area Authority and the first fully integrated purpose built container terminal in Kuwait.

S.A.C.T. is fitted with 4×41 ton Marubeni/Sumitomo gantry cranes for discharging/loading of containers, plus a fleet of forklift trucks with top lifting devices for handling containers ashore, capable of stacking three units high. In addition the container terminal is equipped with usual tugmaster/container trailers.

There is an intermediate stacking area for loaded containers, of approximately 80,000 sq.m. adjacent to the container berth Nos. 15 and 16, which is approximately some 400/600 m. away, where the ships are berthed.

There is a separate storage area for empty containers in the hinterland of the port, East of the container berths, approximately some 600/800 m. away from the water front.

Due to the present non existing terminal facilities for LCL/Reefer containers (to be available in the near future) it has for the time being until further notice been decided that ship's documents such as Manifest and Copy Bills of Lading have to be lodged at Shuwaikh Customs where Customs Clearance has to be completed. In addition same documents also have to be submitted at Mena Al Ahmadi and Shuaiba Customs.

SHORE FACILITIES: Berths 1, 2, 3, 4 and 5 are equipped to supply fuel and fresh water.

STEVEDORES: Stevedores shall be nominated by Owners or Agents from a list of stevedores registered by the port for cargo handling operations. A common tariff published by the port applies.

Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying.

Permission for the landing of heavy lifts on the quays must be obtained from the Port Manager each time in advance.

RADIO: Vessels calling at Shuaiba Port are required to submit an initial ETA 48 hours prior to arrival followed by a firm ETA 24 hours before arrival. ETAs should be passed through Kuwait Radio (9KK) either to the ship's Agents or to the Harbour Master, Shuaiba. In the case of tankers, cable advice of ETAs via Kuwait Radio (9KK) must be submitted to Kuwait Oil Tanker Company (KOTC) giving 72, 48 and 24 hours' notice of arrival.

Vessels equipped with VHF should contact Shuaiba Port Communications Centre when within range.

ETAs should contain details of arrival draft.

MEDICAL: Advance notice required if medical attendance needed on board.

TANKERS: See "Berthing" and "Shipmaster's Report".

DENSITY: 1025.

FRESH WATER: See "Shore Facilities".

FUEL: The Kuwait National Petroleum Co. KSC, Kuwait, supply marine fuel and diesel oil at cargo wharves and Petroleum Products Pier at Shuaiba.

Specifications as under:

	FO 1500	*FO 600*	*MDO*
Ash % wt. max.	0.5	0.5	0.01
Pour point °C (°F.) max.	10 (50)	2 (50)	2 (35)
Specific Gravity 60/60 °F max.	0.99	–	–
Sulphur % wt. max.	3.8	3.5	1.8

Bunker nominations may be arranged through Kuwait National Petroleum Co. (U.K.) Ltd., 25 St. James Street, London S.W.1. Cables: "Kunpetco", London S.W.1. Telex: 261998 or KNPC, PO Box 70 Safat, Kuwait. Telex: KNPC 2006 KT, KNPC 2689 KT and KNPC 2457 KT. Tel: Kuwait 449400, 443486, 437427. At least 3 days' notice required.

Bunker fuel, gas oil and marine diesel oil is available at the Petroleum Products Pier and at the dry cargo berths as outlined under "Shore Facilities". Fuelling from barges is not carried out.

GANGWAY/DECK WATCHMEN: Watch to be maintained by ship's crew.

CERTIFICATES: All usual documents such as:

Ship's Manifest.
Crew List.
Clearance from Last Port.
Passenger Manifest.
Store List.
Bonded Store List.
SOLAS Certificates.
Bill of Measurements, etc.

CUSTOMS ALLOWANCES: Tobacco. No restrictions. Wine and/or Spirit. Alcoholic beverage strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

IDENTIFICATION CARDS: Passport or seamen's book necessary.

CONSULS: See "Shuwaikh".

REPAIRS: Small repairs can be arranged if sufficient notice is given.

DRY DOCK: No dry dock available.

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

TIME: GMT plus 3 hours.

HOLIDAYS: Every Friday, New Year's Day (1st January), Kuwait National Day (25th February). The following Islamic holidays are celebrated but dates are subject to alteration: Prophet's Birthday, Prophet's Ascension, Eid Al Fitr, Eid Al Haj and 1st Muharram.

TELEPHONES: There are presently no facilities for shipboard telephones but it is programmed to provide telephones for the use of ships in the future.

SPECIAL SERVICES: The services of Classification Society Surveyors, Tank Cleaning Operators, Compass Adjusters, Divers and Underwater Cleaning and D/F Calibration Adjusters are available in the area.

SHORE LEAVE: Permitted.

PORT REGULATIONS: .The following are excerpts of some of the more important port regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.

The presence of a Pilot on board a vessel shall not relieve the Master of his responsibility regarding the safety of the vessel. The Port Authority shall have the right to claim against a vessel for any damage caused by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ship's life-boats, launches or life-rafts to navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the Port Limits. Engines should be stopped when approaching their working area at a circle of 150 m. The launch attending divers displays the International flag letter "Alfa" during diving operations.

NOTICE: Dated 8th March, 1984.

Nomination of Vessels to Shuaiba Port:

In an effort to carry out the procedure of vessel's nomination to Shuaiba Port in the most satisfactory manner to all concerned parties and at the same time protect the interest of your Principals, Member-Agents are kindly requested to adhere to the following:

1. Even though the Director Marine Operations Department, Ports Public Authority is aware of a vessel nomination to Shuaiba Port, the Master should still cable the Director Marine Operations Department, Ports Public Authority when approaching Kuwait Territorial Waters and ask for orders, instead of proceeding direct to Shuaiba Port.

2. When a vessel completes discharge of a part cargo in Shuaiba and thereafter has to call at Shuwaikh Port to discharge the remaining cargo, the Master should still send the usual ETA cable to the Director of Marine Operations Department, Ports Public Authority containing all the information required.

It will therefore be greatly appreciated if you kindly notify your Principals to instruct Masters of their vessels to comply accordingly in order to avoid any confusion that would lead to unnecessary delay to a vessel which is proceeding to Shuaiba Port direct without prior knowledge of the Director Marine Operations Department, and then call at Shuwaikh Port.

Signed: General Manager.

DEVELOPMENTS: Quayside cranes of 15 tons lifting capacity each will be installed at Jetties Nos. 11, 12, 13 and 14, for discharge of general cargo.

Although there will be no quayside cranes available at Jetties Nos. 6, 7, 8, 9, 10, 17, 18, 19 and 20, where vessels have to use their own gear for discharging, the Port of Shuaiba are contemplating laying crane lines at these jetties in case they decide to install cranes on any of them in future.

SHIPMASTER'S REPORT: May 1980. Vessel loading Ammonia.

Approaches: Charts BA.3773 and BAP1223. The complex lies about 1.5 miles South of the port of Mina Al-Ahmadi.

At the time of call the Decca chain was not operating. Approach is fairly straightforward with good positions being obtained by radar and from the various light floats and buoys that abound.

Currents appear to follow the trend of the coastline.

Anchorage: There is no night berthing allowed on the ammonia berth. Vessels arriving during the hours of darkness are asked to anchor about 2 miles due East of the berth.

Pilotage: Pilots will board the vessel about 1.5 miles due East of the berth, usually from a tug.

Call Port and Pilots on Channel 16 VHF, usually work 13 or 14 thereafter. Communication was good, fluent English. Vessel has the option of berthing either side alongside and, if not heavily loaded, would suggest starboard side to with the head out.

Two powerful tugs available for berthing, usually only one required for sailing. Tug's lines, lying alongside.

Length of pilotage about one and a half hours to being secured.

Berth: Consists of a "T" jetty, the head of which lies about 340°/160°. The stem of the "T" is 1,000 m. long and the head about 800 m. long.

The ammonia berth lies on the Northern side of the "T" and inside.

Quoted depth is 40 ft. which was borne out by soundings. The Pilots however quoted a max. sailing draft of 36 ft.

The ammonia berth itself is about 350 m. long. The concrete sections of the jetty are currently undergoing repair and this affected the mooring arrangements. Besides this there are lamp standards which may interfere with lines in the future. Usual mooring arrangements, 3 headlines, 2 breastlines and 2 springs.

Gangway: It is only possible to use ship's gangway when lying starboard side to as it fouls the chicksan area when head in. Careful positioning and tending is required.

There is a group of chicksans which handle oil products about halfway along the jetty and the ammonia chicksans lie just South of these.

No VRL. No venting.

Shore personnel connected the chicksan (bolted) and no reducer was necessary.

Cooldown: Charterers asked us to limit the amount of coolant taken to 300 tonnes.

Petrochemical Industries Company (who operate the berth) would have allowed us to take this coolant into more than one tank had it been possible or necessary. They were very conscious of us having to vent excess pressure (using 'cascade' system for atmospheres) and went to great lengths to ensure no ammonia vapour was discharged to atmosphere.

Control of cargo rate was very good.

Vessel has to anchor at least three miles off berth to complete cooling.

Notice of Readiness: Was tendered on arrival and again on completion of purging/cooling operations. Cable "Ammoniaship". This was not accepted until secured in the loading berth and ready to load.

Loading: Despite the length of pipe-line from the refinery the product was reasonably cold and they have a recirculating system which enables stopping cargo at very little notice.

Berth operators were quite happy with bottom temperatures only at −32°. Loading rate is quoted at 1,000 t.p.h. but our overall average was only 605 t.p.h. at which the operators expressed themselves as satisfied.

Throughout the whole cooling and loading programme the vessel was under continual close scrutiny from shore personnel. The technical ability of these people was very high indeed (although very fair and practical minded). Pressure graphs and temperatures were checked and noted hourly together with hourly rates.

Redwoods attended as surveyors throughout. Bills of Lading are presented before sailing and are usually claused "Freight Prepaid".

Output of the plant is quoted as about 700 tonnes of liquid per day, but the fertiliser division apparently has first call on product which may result in short loading.

Note: The port office, which is situated at the junction of the "T", is very sensitive to ammonia smells and the personnel there test the atmosphere using Draeger tubes.

Bunkers: Diesel oil taken at this call and vessel has to position under the oil chicksans. This requires shifting ship to or from the loading chicksans.

Bunker suppliers, KNPC, will NOT accept bills signed over Time Charterer's stamp. Ask Owner for permission to sign the bills 'clean' prior to arrival.

General: Shore passes required, available at Immigration office on shore.

Transport is necessary to get from jetty to shore. This is provided on a continual basis.

Alcohol: Customs will allow alcohol to be issued to bars. It is better to arrive with these emptied and ask for an allowance. As usual, it is a very grave offence to offer alcohol to shore personnel.

Fresh Water: Available but none taken.

Medical: There is a medical centre ashore which provides a very efficient service for vaccinations.

General: Service is available for radars and Decca Navigator.

No stores taken.

Items may be landed for despatch to UK after informing the Customs and providing a description of the packages, etc.

Personnel may be repatriated (no alcohol in baggage) and there is a frequent service to UK.

Agents: Kuwait Oil Tanker Company, cables 'Minatank Kuwait'.

In case of emergencies they have an office on the shore which is manned 24 hours. If necessary to telephone UK one has to go to the head office at Ahmadi. Agents usually work Channel 26 VHF.

Departure: About four hours should be allowed for completion of paperwork before sailing. Vessel may leave the berth at night.

AUTHORITY: Director, Shuaiba Area Authority.

AGENT: For dry cargo vessels: International Shipping Agency Limited, POB Safat No. 20637, Old KIC Building, 1st Floor, Safat Square, Kuwait, State of Kuwait. Tel. 2441860 to 2441867. Facsimile No. (965) 2415732. Telex: 22208 (Answerback "Isaship Kwt") and 22396 (Answerback "Isatug Kt"). Cables: "Shipagent, Kuwait".

In the case of tankers agency services are provided by the Kuwait Oil Tanker Company.

SHUWAIKH (Kuwait Harbour): 29.21 N. 47.56 E.

(See Plan Book)

PORT LIMITS: According to the General Port Rules (1959) the Seaward Limits comprise all waters in the area confined by line drawn in direction 000° from Ras Al Ajuza, (Lat. 29° 23′ 27″ N., Long. 48° 00′ 24″ E.) to the parallel of Lat. 29° 30′ 00″ N. Hence in direction 230° to Ras Al Ashairij Lat. 29° 23′ 15″ N., Long. 47° 51′ 00″ E. For the seaward boundaries of the Port within which a vessel is considered to be on "arrived ship", refer to "Anchorage".

DOCUMENTS:

Manifest: 15 copies which should clearly indicate weights in metric tons and measurements in cubic metres and each copy should be duly signed and stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies but it is imperative that the stamp and signature made by the loading port Agent is appearing in original on each copy.

If cargo is carried in transit a separate transit cargo manifest (15 copies) is also required in same fashion as above.

Bills of Lading: 5 sets of non-negotiable copy Bills of Lading i.e. ordinary carbon copy Bills of Lading. Photostat copies will not be accepted.

In addition the following documents are to be provided:

4 copies of Final Cargo Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

4 copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List is also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

1 copy of Crew List, 2 copies of Passenger List, all seamen's books or passports, 1 photograph of each crew member for the Immigration Office.

1 copy of Crew List, 1 copy of Vaccination List, all vaccination books for Quarantine Office. Immediately on berthing place the rat guards on mooring lines.

Ship's Registry, Loadline, Cargo Safety Equipment Certificate, Safety Radio Certificate and Last Port Clearance to be presented for port clearance.

PILOTAGE: Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage. Pilotage not compulsory in the Outer Anchorage.

ANCHORAGES: Ships may take up anchor berth in the Outer Anchorage, without the Pilot.

Because of congested anchorage, and for the benefit of all concerned, the Outer Anchorage (BA Chart 1214) was divided into areas, and the approach waterway of 0.75 miles in width from Ras Al Ardh to anchorage and vice versa, is left free for navigation.

Ships bound for Kuwait, in order to *discharge their cargo* should anchor in the area marked by the following co-ordinates, and in the depth of water, according to their drafts.

Lat. 29° 25.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 27.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 27.0′ N.	Long. 48° 02.5′ E.
Lat. 29° 25.0′ N.	Long. 48° 02.5′ E.

Ships which have *no cargo* for Kuwait, and calling only for fresh water, provisions, crew changing, transhipments or any other reason, but not discharging cargo, should anchor: North of Parallel 29° 25.0′ N. and East of meridian 48° 03.0′ E. If mentioned anchorage area described is congested the ship could take temporary anchorage: North of Parallel 29° 24.0′ N. and East of Meridian 48° 05.5′ E. but change their position to the area described, immediately as opportunity occurs. The ship should leave the anchorage immediately after they have received the facilities, and proceed to the anchorage of the Port they are bound for.

Ships which have received instructions of possibility of berthing in the morning, should change their position to the area reserved, marked by the following co-ordinates:

Lat. 29° 25.0′ N.	Long. 47° 57.6′ E.
Lat. 29° 27.0′ N.	Long. 47° 57.6′ E.
Lat. 29° 27.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 25.0′ N.	Long. 47° 58.7′ E.

When the movement is confirmed the vessel should hoist:

By Day: "G" Flag over a Black Ball or Shape.

By Night: A White Light over a Red Light, visible all round.

Note: (1) The Master shall advise the Director of Marine Operations (D.M.O.) and/or the Pilot of any damage or disability to the ship under his command, *before berthing*.

Ship unable to comply with the berthing instructions, should notify the D.M.O. in ample time of their inability to do so, by VHF, Visual Signals or via Kuwait Radio:

500 kHz 9 KK 4 – 6381 kHz
450 kHz 9 KK 6 – 8525 kHz

Any ship sailing from the outer anchorage for any reason, should notify the Kuwait Harbour Control that she is sailing and give the reason.

The Area North of Parallel 29° 25.0′ N. and West of Meridian 47° 57.6′ E., is reserved for ships of *National Fleet*, who require repairs, waiting for orders, changing crews, etc.

(2) The D.M.O. may direct any vessel to move from one berth to another, or vacate a berth as circumstances demand.

(3) (a). A ship whose turn is defined in the Morning Meeting, and whose Agent is notified, and upon calling her no reply is received shall be prohibited from her turn for *3 days*, and after its elapse will be given another turn.

(b). A ship which is defined as a temporary one on the record in the Morning Meeting, and upon calling, is not ready shall be prohibited from taking her turn for *2 days*, after which it will be given a normal turn.

(c). A ship which is registered and then sails, if she delays her return for her specified turn for berthing will be prohibited for *15 days*, as delay penalty.

MAX. SIZE: Max. draft at Berth Nos. 1 to 14, 31 ft. 6 in., and Berth Nos. 15 to 18, and dolphin berths, 26 ft. 6 in. Max. draft at Fishing Harbour Berth Nos. 1 to 3, 19 ft. 6 in. These drafts allow 2 ft. of water under the keel. Tidal range is about 2.8 m. (9 ft.). Berthing draft dependent upon tidal conditions at time of arrival, and vessels exceeding 26 ft. have to wait for tide.

HEALTH: Vessels calling at Shuwaikh Port must send the following information to "Health Port Shuwaikh" by cable:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Cholera Certificates
(5) Request for Free Pratique

Vessels arriving at Outer Anchorage must hoist "Q" flag, and keep it hoisted until Free Pratique is granted.

Free Pratique will be granted usually at anchorage, and in some cases alongside, at the discretion of the Quarantine Officer.

No person, except the Pilot, shall board the vessel, before Pratique is granted.

TUGS: Join vessel entering dredged channel, Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of D.M.O. or Pilots. Number of tugs used for each movement: *(a)* 2 tugs for ships exceeding 400 ft. in length. *(b)* 1 tug for ships between 250 ft. and 400 ft. in length.

16 tugs available, 8 of 1,000-2,400 h.p. and 8 of 300-600 h.p. Use of tugs is compulsory.

REGISTRATION PROCEDURE: Notification of vessel's arrival. According to port regulations a questionnaire issued by the D.M.O., duly filled in and signed by the Master of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the D.M.O. directly, 48 hours before arrival:

(a) ETA.
(b) Total cargo for discharging Kuwait.
(c) Distribution quantity each hatch.
(d) Declaration hazardous, flammable and explosives cargo, and guns and ammunition.
(e) Declaration all vessel's winches in good working condition and cargo clear for discharging at Kuwait.
(f) Draft fore and aft.

We quote below specimen cable covering the above:

"Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, flammable explosives guns ammunition stop All winches derricks good working condition draft fore 24 ft. Aft 27 ft.".

The above cable sent to the D.M.O. will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.

Also see "Shuaiba – Notice".

Also cable Health, Port of Shuwaikh: ETA, last port, crew health, validity of certificates, and request Free Pratique.

Apart from above, on dropping anchor contact Port Health, Tel: 811344, through Kuwait Maritime Channel 16 and request Free Pratique, and on receiving same inform Agent by VHF or by cable.

When approaching the anchorage vessel should hoist her "Call Sign" and "Quarantine" flag.

On arrival at anchorage contact Harbour Control and standby VHF Channel 16 when at anchorage.

Also send acknowledgement to ship's Agent stating time cable sent to Director Marine Operations Department.

RADIO/VHF: *Signal Station:* (Call Kuwait Harbour Control)
There is Lookout Signal Station at Ras Al Ajuza (Lat. 29° 23.3′ N., Long. 47° 59.8′ E.) and a Port Operation VHF/RT Service at the same position. The VHF/RT is a Single Frequency Simplex Service, operating on Channel 13 (156.650 MHz), 12 (156.600 MHz) and 11 (156.550 MHz). Working restricted to messages relating to the Movements and Safety of Ships.

All vessels arriving should establish contact with either one of these Stations as soon as possible by VHF or Visual Signals:

Tel: 443785, 443788, 443796 and 435873 Telex: 22733, 22740

Kuwait Coastal Station (9 KK) operates from 0600 hrs. up to 2400 hrs.

Radio Station:

2182 kHz	8802.4 kHz
2765 kHz	13182.5 kHz
2750 kHz	17328.5 kHz
4434.9 kHz	22699.0 kHz
6518.6 kHz	

Radio Telegraphy – 9 KK:

9 KK	9 KK 2 — 4299 kHz
500 kHz	9 KK 4 — 6381 kHz

Marine Communications

This Service links the ship directly with their Agent or Principal in Kuwait and the Call for this Branch is "Kuwait Maritime".

The "Kuwait Maritime" Service covers all the ship's calls with Kuwait and abroad. The procedure is as follows:

Agent to Ship

Call by telephone No. 108 Kuwait Maritime, asking for connection, giving the Name of the Ship, and her Call Sign. The Kuwait Maritime operator will contact the ship for you on Channel 16 (156.800 MHz) and then transfer to vessel's frequency for communication.

Ship to Agent or Abroad

Call "Kuwait Maritime" on VHF Channel 16 (156.800 MHz) and ask to be connected to Agent or abroad.

BERTHING: The present Port consists of 18 deep water wharfs each 190 – 200 m. long.

14 of these berths have −10 m. depth (B.A. Chart Datum), and remaining 3.35 −8.53 m.

2 dolphin berths with depth alongside of −8.50 m. below B.A. Chart Datum, and capable to take ships up to 185.0 m. in length.

3 shallow berths with depth alongside of 6.71 m. below B.A. Chart Datum, and capable of taking ships up to (1 × 182 m., 1 × 156 m. and 1 × 200 m.).

Ships may under certain circumstances and at the Port Authority discretion, divert to Shuaiba Port, during the congestion periods.

There are 3 basins known as:—

Small Craft Harbour:	431.58 m. × 91.43 m.
Yacht Basin:	76.19 m. × 76.19 m.
Maintenance Basin:	118.86 m. × 82.90 m.

The entrance to Small Craft Harbour and Yacht Basin is 60.95 m., and to Maintenance Basin is 41.45 m.

These Basins are dredged to a depth of −3.35 m., and are used at present mainly by Barges, Tugs, Launches, Yachts, Security Boats and Navigational Aids Craft.

Berth turn is decided at a port meeting, held in the morning on all port-working days. With the exception of the dolphin berths, berthing takes place any hour, day or night.

Vessels carrying less than 400 tonnes of cargo, or vessels carrying cargo in one hatch only and/or when one hatch only remaining operational, alongside berth will not be granted.

A vessel that intends to stay in the anchorage in Kuwait until her turn will be allowed to shift over-stowed cargo while waiting, provided that the vessel asks for permission from the Port Authority through her Agent.

CRANES:

Berth		*3 Tons*	*6 Tons*	*Grain Elevator*
No.1	Bulk Grain	2	1	1×150 t.p.h. 1×500 t.p.h.

No.6	General Cargo, Bagged Cement	3	1	—
No.7	General Cargo, Bagged Cement	3	1	—
No.8	Bulk Cement	3	1	—

Floating Crane: A self propelled Floating Crane 100/25 tons capacity is available, and could be hired on request.

At 10.5 m.	100 tons
At 12.5 m.	80 tons
At 16.5 m.	60 tons
At 20.5 m.	40 tons
At 23.5 m.	35 tons
At 25.0 m.	25 tons

Total Jib's length is 47 m., less 3.3 m. base.

Maximum weight to be loaded on the crane platform is 200 tons at one time but this depending on availability of space.

Draft at full equipped condition is 1.8 m.

Berth		*3 tons*	*6 tons*	*30 tons*

No. 16	General and Refrigerated Cargo	2	—	—
No. 17	General Cargo	2	—	—
No. 18	General Cargo and Cattle	2	—	—

Maximum Loads on Wharves:

Berth No. 1	3 tons per sq.m.
Berth No. 2-8	600 lbs. per sq.ft.
Berth No. 9-18	3 tons per sq.m.
Fishing Piers	1.5 tons per sq.m.

STEVEDORES: All stevedoring and transport inside the port is performed by an authorised contractor.

Container work is handled by Shuwaikh Container Terminal (SCT). There is at present a total area of 400,000 sq.m. allocated to container storage. Plans are under consideration for specialised container berth facilities.

There are four Cement Silos of capacity 14,000 tons each adjacent to Berth No. 8. Discharging rate is 350 tons per hour.

Working Hours: 0600 – 1300, 1500 – 2230 hrs.; Overtime 1300 – 1500, 2200 – 2400 hrs. Overtime is compulsory for all vessels. On Fridays, only work on vessels which are to be completed during the day.

MEDICAL: Masters to radio prior arrival if medical attendance required on board. Hospital facilities available.

A rescue vessel, 90 ft. and 20 knots speed, equipped with surgery, operating theatre and all medical appliances is maintained by the Ministry of Health.

DENSITY: 1028 (Winter); 1036 (Summer).

FRESH WATER: All berths except Berth Nos. 1 to 7, have fresh water connection, and water can be supplied by pipe-line. Rate 20 to 25 t.p.h.

In addition to water available alongside the berths by pipe-line and hose, water may be supplied by barge to ships alongside dolphin berths. There are 2 private companies supplying fresh water alongside and at anchorage by barge.

FUEL: At all berths except Berth Nos. 15 to 18 and fishing harbours, fuel oil can be arranged through pipe-line. At other berths gas oil can be arranged by road tankers. For quality and prices please enquire from the Agents.

FIRE PRECAUTIONS: Shuwaikh Fire Brigade is responsible for all fire fighting in port areas and storage areas. There is also a fire station situated near the Small Boat Harbour, where the 3 fire fighting tenders are berthed. A salt water main for the fighting services is laid at all berths. There are two 90 ft. fire fighting tenders capable of pumping 5,000 gallons of water per minute from 4 nozzles. In addition they can pump 900 gallons of foam per minute. The 98 ft. fire fighting tender is capable of pumping 9,000 litres of water per minute and 650 litres of foam, and the capacity of her pump is 4,500 litres of water or 143.5 litres of oil. The tender has 8 nozzles for water and 2 nozzles for foam. These modern fire-fighting units are equipped with radio, radio-telephone, radar etc.

GANGWAY/DECK WATCHMEN: Gangway Watchman compulsory (see "Regulations").

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CERTIFICATES: A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

CARGO GEAR: Ship's gear and cranes used for discharging.

IDENTIFICATION CARDS: Passport or seaman's book necessary.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyard. Repair facilities available for Gyro, Radar and electronics.

DRY DOCK: Floating dock lifting capacity 35,000 tonnes, dimensions 190 m. × 32 m. Syncrolift rated lifting capacity 2,000, tonnes.

SURVEYORS: Lloyd's Register of Shipping (Kuwait); American Bureau of Shipping (Kuwait); Bureau Veritas (Kuwait); Norske Veritas (Bahrain).

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: Served by regular airlines. Airport 17 km. from town.

HOLIDAYS: New Year's Day, Id Al Fitr, National Day (February 25th), Mount Arafat Day (Wakfa), Id Al Adha, New Hijra Year, Birthday of Prophet Mohammad, Isra walma'raj. The above days are subject to alteration.

No overtime work allowed on holidays and Fridays.

TELEPHONES: Cannot be arranged on board.

PROVISIONS: All kinds of food available at reasonable prices.

SERVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. Butterworth Tank Cleaning Machines and Equipment and also underwater cleaning.

SHORE LEAVE: Permitted. Shore passes are issued and must be returned to Immigration prior to departure, if not returned a heavy fine will be imposed. Crew members require a photograph but this is not returned.

GENERAL: The following is required from all vessels calling at Kuwaiti ports for the first time:

Quote:

> The Harbour Master Department of the Ports Public Authority, with immediate effect, request that Masters of vessels calling for the first time at Shuwaikh Port should give in their ETA cables, details of cargo on board, the length, width, number and condition of hatches, discharging facilities, and any other information which they may consider necessary in assisting the Ports Authority to allocate the vessels the best berth possible.
>
> Such information will considerably help all concerned and at the same time prevent unnecessary delay and unjustified extra charges to owners, since in the event that the allocated berth is not suitable, the Harbour Master shall have no alternative but to shift that particular vessel to another suitable berth, or take it out to anchorage.
>
> Futhermore, it has been observed some Masters of vessels are not indicating in their ETA cables to the Harbour Master the word "Kuwait" when indicating the tonnage figures of cargo onboard, clear and ready for discharging. It is imperative that the Master should say in his cable 'ETA . . . hours. Cargo for Kuwait . . . tons clear and ready for discharging draft . . . ft.
>
> *Unquote.*

REGULATIONS: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than forty thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than forty thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of forty thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of forty thousand Kuwaiti Dinars to the official entrusted with the execution of such order".

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:

By day: "G" Flag, over a black ball or shape.

By night: A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh Wharf or dolphin berth, shall ensure that:

(a) Vessel not allowed to use VHF to any vessel except to call Kuwait Harbour Control or Kuwait Maritime.

(b) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(c) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations. Gangway must be lifted up whenever vessel is not working, and at 2200 hrs. daily.

(d) The crew or watchman to attend the mooring ropes and lines, and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(e) That no substance, matter or material is thrown overboard, either into the water or on to the wharf.

(f) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(g) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(h) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(i) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(j) The Master shall at all times retain on board sufficient crew to work his ship.

(k) Ratguards to be fixed to all ship's mooring ropes.

(l) The Master shall not shift his vessel while alongside the wharf, prior to receiving permission from the Harbour Master or Berthing Master.

(m) The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

(n) The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropylene hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

Ship's Life Boats:

In the Harbour: It is prohibited to use the ship's boats for transportation or boat-drill.

In the Outer Anchorage: It is permitted to use the ship's boats for transportation, but the crews land *only at Niga's Dhow Harbour* situated in Lat. 29° 22.7′ N., Long. 47° 58.2′ E., and every crew member must have in his possession a valid passport or seaman book.

NOTICE:

Supplied to Ship's Master, on arrival, by Agent (October 1984).

1. One watchman to be kept regularly on gangway.
2. Immediately the labourers leave the vessel after each night shift the gangway should be taken up and not to be lowered before 0600 hrs. next working day.
3. Strictly forbidden to sell any alcoholic drinks onboard or to bring on to jetty.
4. Rat guards to be fixed properly on the ropes.
5. No cleaning of decks, painting of hull or welding on deck is allowed when vessel is alongside jetty.
6. Neither fresh nor dirty water should be pumped out alongside jetty for any reason and under any circumstances.
7. No garbage should be thrown either on jetty or in to sea at any time and under any circumstances.
8. Any pollution either during supply of bunkers or at any other time and for any reason is entirely your responsibility.
9. No repairs or dismantling of engines are allowed unless prior written approval from the Harbour Master is granted.
10. Vessel's draft should not exceed that draft on which she was allocated a berth.

Maximum drafts of/on various berths are:

Jetty Nos. 1 – 14 inclusive	31 ft. 6 in.
Jetty Nos. 15 – 18 inclusive	26 ft. 6 in.
Dolphins	26 ft. 6 in.
Fishing Harbour	19 ft. 6 in.

TIME: GMT plus 3 hours.

DEVELOPMENTS: The North Basin extension plan will add 20 berths to the existing berths, 5 of which will be container berths, 2 for Ro-Ro ships, 2 for steel and timber, 2 for cattle vessels, 2 for car carriers, 2 for free trade zone, 1 for grain, 1 for refrigerated and general cargo and 3 tanker berths.

The outer curvature of the navigation channel is being widened.

AUTHORITY: Ports Public Authority, State of Kuwait, P.O. Box 3874 Safat, Kuwait. *Tel:* 812636. *Telex:* Hmshp-KT 22740 and Tcra-KT 22733. *Contact:* Captain Mohammed Essa Al-Hashash, Director Marine Operations Department.

AGENT: International Shipping Agency Limited, P.O.B. Safat No. 20637, Old KIC Building, 1st Floor, Safat Square, Kuwait, State of Kuwait. Tel: 2441860-67. Facsimile No.: (965) 2415732. Telex: 22208 (Answerback "Isaship Kwt") and 22396 (Answerback "Isatug KT"). Cables: "Shipagent" Kuwait.

NOTES

Please also advise Shipping Guides Ltd.

Lebanon

GENERAL:

NOTICE: November 1984.
The Lebanese Armed Forces Command has announced that it will close the illegal ports effective from 3rd November. Ships arriving in Lebanese waters will be prevented from heading towards the illegal ports and forced to go to one of the 3 legal ports which are Beirut, Juniyah and Tripoli. According to the announcement, ships disregarding the new regulations will be confiscated or destroyed. Information from another source indicates that the "Fifth Dock" at Beirut port is considered to be illegal.

BEIRUT (Beyrouth): 33.54 N. 35.30 E.

DOCUMENTS:
Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 Copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

For cargoes loaded for Lebanon, there are new regulations concerning documentation as follows:

Original Cargo Manifest to be presented to the Authorities should be rubber stamped and signed by the Customs Authorities at the port of loading.

Copy of each Bill of Lading should be attached to the above Manifest.

A letter from Owners/Charterers indicating the Agents at the respective port.

PILOTAGE: Agent arranges Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hours and 24 hours prior arrival. Pilot boat white with red funnel. Sound signals, 2 long and 1 short or contact can be made via VHF to Harbour Master. Pilot boards outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs., For tankers outside harbour, the pilotage dues will be 100% extra.

Also see "Shipmaster's Report – January 1982".

ANCHORAGE: In Roads outside breakwater. Also see "Shipmaster's Report – January, 1982".

RESTRICTIONS: No particular restrictions. Pilot normally available between sunrise and sunset otherwise by special agreement.

MAX. SIZE: Max. draft in port 13 m. No limitation to breadth or length.

HEALTH: Health Authorities board in Roads. Health Form obtainable from Agent or doctor. Yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: VHF Channels 13 and 16, Frequency 156.6 and 156.7.

TUGS: Tugs of 1,000 h.p. join vessel inside port when necessary. Ship's lines to be used.

BERTHING: If port congested priority given to vessel already registered. Passenger-tourist vessel and cargo for Army have priority. Harbour capable of berthing 24 ships simultaneously and 3 moored on buoys, discharging into barges. All discharging is by ship's gear.

Dock No. 1: Surrounded by Quay Nos. 1, 2, 3. Depth of water varies between 3 m. and 8 m. Parts of Quay No. 1 and Quay No. 2 with 3 m. depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

Dock No. 2: Surrounded by Quay Nos. 4, 5, 6, 7, with water depths varying between 8 m. and 10.5 m. On Quay No. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

Dock No. 3: Surrounded by Quay Nos. 8, 9, 10, 11, with depths varying between 10.5 m. and 13 m. All these quays can berth ships bringing general cargo. At Quay No. 8 of 13 m. depth, priority of berthing is given to grain ships.

Grain Silo: At the present time bulk grain ships are unloaded by means of removable suction machines, which can be installed on the ships and deliver the grain to lorries for direct transport. There are 105,000 tonnes capacity silos. Ships will be unloaded by means of 2 gantry type suction machines, mobile on rails with a capacity of 6×100 t.p.h.

Containers: A ship's Master advises that containers should be loaded on one side of the vessel and vessel berth that side to the berth as crane unable to reach outboard side.

Ro-Ro: There is a ramp between Quay Nos. 13 and 14.

STEVEDORES: Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800 – 1200, 1300 – 1600. Otherwise overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

TANKERS: Notice: The Coral Oil Co. Ltd.: Dated November 1984. To the Master.

TANKER MOORING AND DISCHARGING PROCEDURE AT CORAL OIL TERMINAL, BEIRUT.

We should be grateful if you would kindly note the following:

1. Berthing: The following is for your guidance:

Our moorings have been laid so as to give you a stern mooring for the old lines and amidships mooring for the new line (see item 2 below) using ship's anchors at the head. It is recommended that both anchors should be dropped when the vessel is discharging.

The ideal position for your ship is such that she would be heading N.N.W., in which position you will be clear of all obstructions in the event of an emergency. As you are aware, there is a wreck lying on the sea-bed to the East of the moorings and a half-submerged rock to the West.

When the significant wind speed is 10 knots, it is recommended that you stop cargo operations and advise our representative on board (see item 4 below) accordingly. Our hoses will be disconnected immediately after that. Please ensure close co-ordination with him.

When the significant wind speed rises to 15 knots you are recommended to unmoor and leave the berth. It is your responsibility to ensure that arrangements are made for the Pilot's mooring boat to unmoor the ship's lines.

Please keep in touch with the Meteorological Office in periods of unstable weather, and keep your engines in a state of readiness.

N.B. For amidships discharge (see item 2 below) you are advised to have enough mooring ropes available to cover extra distance to our mooring buoys (roughly 4 × 200 m.).

Please do not "Hang On" in wind speed beyond the above limits.

2. Cargo Discharging System:
There are two systems:

(a) The "Old Lines": The so called "Old Lines" system is to be connected through our submarine hoses to your stern discharge point. At that point the following products may be discharged: Lubricating base oil through one line and Jet A-1 and a limited number of chemicals, Gasoline or Gasoil through another line. In this particular case, you are requested to pump sweet or sea-water plugs, as the case may be, to clear our submarine and shore line between products.

(b) The "New Line": The so called "New Line" is for amidships discharge and is exclusively used for chemicals through a 'pigging' arrangement. Ideally, you should have Nitrogen aboard as well as compressed air for use in conjunction with this system, bearing in mind that Nitrogen must be used (not compressed air) with low flash point products.

3. Quality of Cargo: Please hand our representative the Certificate of Quality, issued by the Refinery, corresponding to the cargo destined to us.

The cargo may not be discharged unless the Certificate of Quality is handed to us beforehand and found to be fully conforming to the latest issue of the relevant specifications.

Furthermore, we shall carry out a few tests on representative samples drawn from your tanks before discharge.

If the results of the analyses are unsatisfactory, the cargo may not be discharged.

4. Personnel on Duty: A member of our staff with a few assistants will be on duty day and night on your ship and we trust they will be allowed to use your mess-room from time to time. Installation personnel are also on constant watch checking the shore tanks, inspecting the pipe-lines and manipulating the signals.

We would ask you to ensure that a responsible member of your crew remain on duty at the stern or amidships to answer shore signals promptly and react accordingly.

A member of our staff is always present at the Installation while the ship is discharging and you are requested to contact him if anything should be required.

5. Security and Safety:

(i) No engine repairs should be carried out at this berth.

(ii) The Port Authority forbids gas freeing while the tanker is berthed. Besides, fishermen's practices in the immediate vicinity of the berth may endanger your ship in case of gas-freeing.

(iii) You will appreciate that we cannot be held responsible for the security of your ship or prevent unauthorised persons from going on board.

Peddlers might attempt to board tankers, in which case the safety of your operations might be affected. It is strongly recommended that you post watchmen to prevent their access to the ship.

6. Communications: (a) Pumping Signals: Shore signals are made with White and Red discs by day and coloured lights by night from the Yard Arm of the signalling mast at the shore end of our jetty.

Ship signals are a series of short blasts of 5 seconds' duration.

(i) Amidships Discharge:

	Shore Signals		Ship Answering Signals
	Day	Night	
Launch pig or sphere	One disc	One white light	One blast
Pump product	Two discs	One green light	Two blasts
Pump air or Nitrogen	Three discs	Two green lights	Three blasts
Stop pumping product, air or Nitrogen	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

(ii) Stern Discharge

	Shore Signals		Ship Answering Signals
	Day	Night	
Pump water	One disc	One white light	One blast
Pump product slowly	Two discs	One green light	Two blasts
Pump product full speed	Three discs	Two green lights	Three blasts
Stop pumping product or water	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

In the event of the ship having to stop pumping, please sound 4 short blasts before closing the valve, whereupon pumping should not be resumed until the appropriate signal has been run up again on our signal mast.

(b) "Walkie-Talkie": Walkie-Talkie communication is established between ship and the shore, but the equipment may fail and the above signals are essential.

(c) Motor-boat: Motor-boat is on Company service while the ship is at mooring.

7. Pumping and pumping speed: Delivery of all products may proceed day and night.

(i) "Old Lines" Jet A-1, some Chemicals, Gasoline or Gas Oil:

When delivering the above products through the "Old Line" (i.e. using water plugs), the following pumping speeds must be observed:

During the first half hour, pump slowly to clear the water plug in the pipe-line and avoid development of unrelaxed static electricity. The pumping rates must be limited as follows: Kerosene/Jet A-1 90 t.p.h., Water 115 t.p.h.

After the first half hour, the rate of pumping should be commensurate with a pressure at the stern connection to the submarine hoses not exceeding 100 p.s.i. It should not be less than 300 product t.p.h.

At the end of the cargo pumping operation, sea-water is to be pumped to clear the product contained in the pipe-line into the shore tanks. Pumping speed must not exceed 115 t.p.h.

(ii) "Old Lines" – Lubricating Base Oils: No restrictions except to pressure at the stern which is not to exceed 100 p.s.i.

(iii) "New Line" – Chemicals: No restrictions except to pressure at the amidships discharge point which is not to exceed 150 p.s.i.

The detailed procedure concerning the use of the sphere or pig and Nitrogen, Compressed Air, or Chemical products to push the sphere or pig will be discussed and agreed with you beforehand.

8. Quantities to be discharged: Will you please ensure that the quantities discharged agree with the B/L figures. Any difference in these figures should be confirmed in writing to the member of our staff on board your ship. In any case, the shore tanks' dips are those that will serve as a final basis for acknowledgment of the cargo received. They are witnessed and certified by the shore Customs Authorities, as well as the Insurance Surveyor.

9. Ship's Agent: The ship's Agent is expected to deal with all questions of port and harbour regulations, currency, health, etc.

Reminder: Hose-lifting derrick, air compressors and nitrogen; the tanker must be fitted with derricks of 3 to 4 tons lifting capacity (depending on the height of the connection above sea-level) to lift part of the submarine 8 in. hoses required for connection to its stern discharge or amidships discharge, as the case may be.

In the case of lubricating base oils, the tanker must be provided with an air compressor to clear the line before pumping the next grade of base oils.

In the case of chemicals, except for those to be discharged at the "Old Lines", the tanker must have Nitrogen and compressed air available in adequate quantity.

Signed: Manager Operations.

Also see "Shipmaster's Report" dated February 1983.

DENSITY: 1025.

FRESH WATER: The port company has equipped all quays with hydrants. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 t.p.h. Outside harbour double price per barge.

FUEL: Fuel, gas oil, diesel obtainable. 48 hours. notice required.

FIRE PRECAUTIONS: Special berths for tankers.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners, by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: (Tobacco) 40 cigarettes per Crew member (Master 2-3 cartons). Customs very strict, and will search crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of 2 packets per crew member, passenger per day and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port - not central Africa; and for 2 months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted port of call, until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within 1 month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: 1 bottle per crew member. Master allowed 3 or 4 bottles.

CARGO GEAR: Ship's gear to be used but mobile cranes can be hired. Shore cranes except mobile cranes only available at Quays 9 and 11. Floating crane of 120 tons available.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and seaman's book to remain in Master's care.

CONSULS: Most countries have consulates.

REPAIRS: Most types of repairs carried out.

DRY DOCKS: None except for 500/1,000 tonner.

REPATRIATION: Very good facilities for repatriation.

AIRPORT: About 10 km. distant, served by regular airlines.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Labour Day	May 1st	1
Good Friday (Orthodox)	Varies	1
Al Fiter (Ramadan)	Varies	1
Assumption Day	August 15th	1
Al-Adha	Varies	2
Moslem New Year's Day	Varies	1
Achoura	Varies	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

Port closes completely: New Year's Day, Al-Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 16, Ambulance 18, Fire 17.

TELEPHONES: On request by shipping agency, berthed ships can be connected to telephonic network of city.

SERVICES: Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.

SHORE LEAVE: Crew allowed onshore.

DELAYS: 1. Unavailability of berth or barges due congestion mainly during Winter months (December to April). 2. Vessel already registered will lose turn if not returned to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.

DEVELOPMENTS: There are plans for a new container berth with crane and container park at the fifth basin.

SHIPMASTER'S REPORT: 1978.

Navigation Buoy: The buoy off the end of the breakwater has been replaced in approximately the same position as the original buoy. The present buoy is painted green with a 'cone top mark'. Although the buoy is a light buoy the flash was not observed. On no account should the vessel pass between the end of the breakwater and the buoy as rubble is being dumped to extend the breakwater. The actual dumping position is marked.

The local Pilots are now working VHF Channel 16 from the Harbour Office.

SHIPMASTER'S REPORT: January, 1982.

Vessels approaching Beirut Harbour from a Southerly direction are advised to make Ras Beirut Light on a bearing of 132°. When the light is approximately 3 miles away alter course to 090° until the Eastern end of breakwater is abeam and alter course to 150° to pass Green Buoy (near end of breakwater) to starboard. The Pilot will board vessel near the green buoy or at anchorage.

Good anchorages may be obtained East of breakwater with good holding ground. In view of the prevailing tension it is advisable to approach Beirut during daylight hours as incidents of sniper fire and shelling have been reported.

Shore leave for seamen/ship's personnel may be granted during daylight hours from 0900 to 1500 only in the Christian (Eastern) Sector. It is not advisable to visit the Muslim sector of the Western Beirut.

Provisions, bonded stores and good shopping available despite tension.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following are the requirements for product delivery vessels calling at tanker berths operated by Dora-Terminals.

Medco Terminal:

I – TECHNICAL CONDITIONS

1. Tanker mooring should take place during daylight at the berth specially provided for discharging opposite our installations at Dora i.e. "Baie Saint Georges".
2. Tanker's d.w.t. (dead weight tonnage) must not exceed 25,000 - 30,000 metric tons.
3. Only stern discharge is permissible.
4. Submerged portion of the tanker's stern must not exceed 28 ft. - 29 ft.
5. Discharge hose facilities provided are of 6 in., 8 in. and 10 in. diameter. Working pressure must not exceed 5 – 6 kg./sq.cm.
6. Upon arrival, the Shipmaster shall abide by the instructions given to him by Beirut Pilot and Harbour Master and by employees of this company, it being understood that putting the ship at anchor immediately upon arrival is subject to weather conditions. In other words mooring, anchorage and discharge of load are not possible when sea is rough.
7. Ship must be equipped with all necessary international documents in accordance with universally accepted rules and regulations because discharging takes place under supervision of Lebanese Customs Authorities and other Government Officials.
8. Swivelling tanker's crane boom to extend outside tanker minimum 3 m. in order to lift vertically flexible hoses. Also suitably located hang-off bitts for submarine hose.
9. Discharge line to be fitted with ASA 150 8 in. flange connected (or ASA 150 6 in. connection) and pressure gauge, conveniently located.
10. Pumps to be preferably centrifuge with by-pass (or relief valve) set at 9 kg./sq.cm.

11. Tanker shall be responsible for any and all damages which may occur to our installations whether it be due to weather, natural or technical reasons. Tanker shall likewise be responsible for damages caused by negligence or faulty manoeuvres on the part of the Master or the crew.
12. The company's Superintendent at his own discretion may refuse admission to a tanker or discharge of a cargo when he notices that the tanker is not adequately equipped technically for the discharging process as is usually required. Shipowners shall then carry out all necessary repairs, wherefore demurrage, if any, shall be exclusively at the tanker's expense.
13. When the discharge process has been completed and all formalities done, hose disconnected and mooring ropes released, the tanker, using its anchor to move forward, shall leave the mooring place immediately and clear a suitable distance off marine installations without using the propeller.
14. Should weather conditions worsen during discharge operations, the Superintendent shall have the right to disconnect the hose and request Shipmaster to leave discharge berth immediately for protection of human lives, installations and ship.
15. All harm befalling divers and/or company workmen during discharge activities shall be at the tanker's expense as long as these men are on board the tanker.
16. Both tanker and company shall be prepared to tie-in the discharge hose within 6 hours period effective from the time mooring at company's berth has been performed by Beirut Pilot.
17. Master is requested to give 72/48/24 hours pre-notice of arrival through "Radio Orient" to our cable address "Geochammas Beirut".

II – GENERAL CONDITIONS

1. Details of tanker arrival and discharge must be arranged beforehand. Should two tankers arrive at the terminal preference shall be accorded the tanker that has arrived first.
   In those cases where a Government-bound tanker comes in for unloading at the same time as another tanker is discharging at our installations, no demurrage shall be due by the company.
2. Quantities received are those measured in our tanks. The company shall not be responsible for any shortage due to leakage or otherwise, notwithstanding the fact that the company shall spare no effort to avoid any such loss.
3. It is clearly understood that all discharge activities such as anchorage, discharge, material receiving, storage, etc. are for the responsibility and expense of the Government. It is likewise agreed that all damage which may befall our marine installations, tanks and the company's other installations at Dora, irrespective of cause, even if it be a force-majeure, are the responsibility of the Government as the company shall then be working in accordance with the Government's request and for its account.
4. All port dues and other charges connected with the tanker or the cargo are for the Government expense.
5. All expense for products delivered by tank trucks are for the account of the receiver.
6. Under all circumstances the company shall be held free of any responsibility whether for reasons mentioned above or omitted. It is likewise not responsible in all instances where the terms "cas fortuit, force majeure" and applicable.
7. The company may be contacted through the following means:
   (a) Radio Orient Ogero.
   (b) Telex: 22259 Menira/20816 Mecham/20112 Ctctco.
   (c) Telegram: Geochammas-Beirut.
   (d) Tel: 894.077 (working hours: 0800 – 1400 hrs.)
   (e) Marine Band: Channel 16 when 30 miles away.

Wardieh Terminal:
Max. draft at our Beirut Terminal 30 ft.
Max. quantity which can be received through our sealine is 200 metric tons per hour.
Type of flange – 8 in. flange.
Pumping can be effected through a 10 in. submarine pipe-line.

AGENT: Gulf Agency Co. (Lebanon) Ltd., PO Box 4392, El Arz Street, Modern Building, Beirut, Lebanon. Cable address: "Gacship" Beirut. Telex 20906 (Answerback "GAC 20906 LE") or Athens 216344, 218687, 214548 ("GAC GR"). Telephones, 296733, 256516. AO 324445.

CHEKAA: 34.20 N. 35.43 E.

See "General" before first port.

Port is used for cement loading and discharge of sulphates.
ANCHORAGE: Safe anchorage in Chekaa Bay.
MAX. SIZE: Draft up to 26 ft. 6 ins. (in calm weather) alongside quay. In event of swell, vessel required to leave quay and anchor in bay.
LOAD/DISCHARGE: 800/1,000 metric tons per 24 hours.

REPORT: Dated November 1982.
Slag is from time-to-time discharged at this port.

1. Max. draft permissible: 27 ft.
2. Length of berthing quay: about 40 m. – 45 m. Therefore vessels must do several shifts ahead and astern in order to discharge all holds.
3. Discharging by 2 shore cranes (1 fixed at quay and 1 mobile) using grabs.
4. Daily quantity discharged: about 2500 – 3000 tons per weather working day of 24 hours (receivers and stevedores working 24 hours round the clock, subject weather permitting).
5. The quay is at an open road, not sheltered and well exposed to South Westerly winds.
6. Agency attendance was monopolised in Chekka since 1975 (when war started in Lebanon) and the only agents attending are:
   (a) Messrs. Kfoury, the Pilots of Chekka for:
   The Societe des Ciments Libanais Sal Chekka.
   (b) Mr. Paul Adem, for:
   The Societe Nationale de Cements Sal Chekka, the company who owns the above mentioned quay.

AGENT: See "Beirut".

RAS SELAATA: 34.17 N. 35.40 E.

See "General" before first port.

Port is used for discharge of sulphates, sulphuric acid, grain and soya beans. When facilities are completed vessels of 70,000 tonnes will be accommodated.
MAX. SIZE: Up to 21 ft. draft (in calm weather) alongside pier which has 2 cranes.
AGENT: See "Beirut".

SIDON: 33.30 N. 35.21 E. (See Plan Book)

BERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE AND ALL MOORING BUOYS HAVE BEEN REMOVED. THE SUBMARINE LINE IS STILL THERE.
BOTH THE WHITE AND THE RED SEABUOYS ARE MISSING.

OPERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipe-lines and exports from terminal South of Sidon (Saida). Terminal operates 24 hrs. a day, 7 days a week.
Advance Information: Prior to acceptance of nomination of vessels, Tapline requires advance information regarding maximum draft, vessel's equipment and location of manifold in reference to distance from the stern of the vessel, permanent ballast, simultaneous loading of cargo and discharging of ballast, etc. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.
FLAG: All vessels required to fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.
LOCATION: Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of city of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.
DESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, 2 large and 2 small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.
NAVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from beach, S.E of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position Lat. 33° 30′ 04″ N., Long. 35° 20′ 31″ E. Tower also marked with 2 sets fixed red lights located respectively 45 ft. and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hr. basis on frequency of 296.5 kHz, with "SAD" as the identifying call sign. It will signal 2 times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2.5 miles S.W. of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it. Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

"Sailing Directions for the Mediterranean" (U.S. Navy Hydrographic Office Publication No. 154A Vol. IV) reads in part:

> *"Caution:* As the coast between Saida and Tyre, 20 miles South-South-westward, is bordered in places by rocks and shoal water extending as far as 1 mile offshore, it should not be approached closer than 1.5 miles, nor within depths of less than 16 fathoms."

During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted aluminium) on a tower located Lat. 33° 29′ 27″ N., Long. 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located Lat. 33° 29′ 31″ N., Long. 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at Lat. 33° 29′ 35″ N., Long. 35° 20′ 03″ E.

Berth Locations:

Berth No. 1 (7 buoys) Lat. 33° 30.8′ N., Long. 35° 19.9′ E.
Berth No. 3 (6 buoys) Lat. 33° 32.0′ N., Long. 35° 20.4′ E.
Berth No. 4 (5 buoys) Lat. 33° 32.4′ N., Long. 35° 20.8′ E.

DOCUMENTS:

Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.

PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tapline Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.

Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

Vessels must not arrive with more than 50,000 tons cargo on board.

MAX. SIZE: Berth No. 2 depth approx. 67 ft. Tankers up to 80,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 80,000 d.w.t. should not be nominated for liftings at Sidon during period November-April. In Summertime max. 100,000 d.w.t.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 80,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 80,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

Summary of Recommendations for Vessels over 40,000 d.w.t.:

1. Capable, efficient and reliable anchor windlass(es).
2. 15 shots on starboard chain – 13 shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

BERTHING: 7 buoys at berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

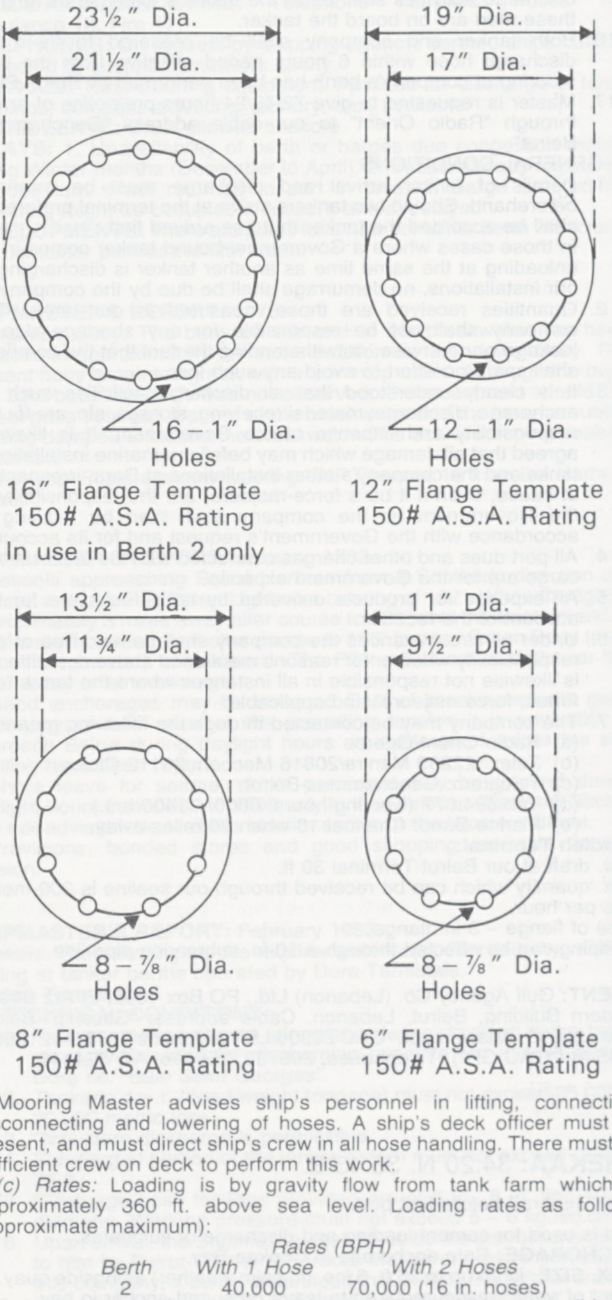
Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawings below. Ships should provide manifold fittings to allow connection of flanges shown.

DETAIL OF 16", 12", 8" & 6" HOSE CONNECTIONS
FROM SUBMARINE HOSE TO SHIP



16" Flange Template
150# A.S.A. Rating
In use in Berth 2 only

12" Flange Template
150# A.S.A. Rating

8" Flange Template
150# A.S.A. Rating

6" Flange Template
150# A.S.A. Rating

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983.

Cargo discharged through 8 in. line (old bunker line).

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

RADIO:

(a) Facilities. Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight, and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 b.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delays incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead", and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

STORING: See "Prelims", page viii.

1. Barge only.
2. No storing during loading or discharging.
3. Open sea-berth.
4. Open sea-berth.
6. No.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

....19............

Master..

Your vessel is scheduled to moor in Berth No.............at.....................
hours..............................19.........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon
OIL POLLUTION ADVICE

..............................19.......

Captain...
Master...
Sidon, Lebanon

Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property,* resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby.

Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan Book)

(a) DRY-CARGO PORT (b) OIL TERMINAL

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:

1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 13 (frequency 156.6) and 16 (frequency 156.7).

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

ANCHORAGE: Good anchorage.

MAX. SIZE: Depth at entrance 22.5 ft. Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

BERTHING: New pier about 600 m. length. 2 berths. 4 shore cranes suitable for vessels up to about 7,000 tons only. 2 heavy-lift cranes, capacities 25 tons and 50 tons. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0800 – 1200, 1300 – 1600, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

DENSITY: 1025.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

That the number of passengers to be taken into account on a tourist vessel will be the number of berths the vessel can accommodate and not the number of passengers on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Lebanese port and not aware of such regulations, and it was found on board her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure of the vessel will be lifted when the Bank guarantee equalling the amount of fine and dues is placed, or a Personal Guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled, the usual penalties will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for one reason or another she is carrying an excess quantity, this excess must be, as per official regulations, be shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut.

Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or spirits: 1 bottle per crew member; Master allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used. A floating crane maximum lift 50 tons is available.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and seaman's book to remain in Master's care.

CONSULS: Most countries have consulates in Beirut.

AIRPORT: Beirut.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Labour Day	May 1st	1
Good Friday (Orthodox)	Varies	1
Al Fitr (Ramadan)	Varies	1
Assumption Day	August 15th	1
Al-Adha	Varies	2
Moslem New Year's Day	Varies	1
Achoura	Varies	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

BANKS:

The British Bank of the Middle East, Mina Street, Tripoli, Lebanon. Telex: 21850 Bbme.

Banco di Roma, Tell Street, Tripoli, Lebanon. Telex: 21818 Romtri.

STORING: See "Prelims" page viii.

1. Cargo ships can be stored by barge and truck and tankers by supply launches.
2. Cargo ships Yes. Tankers can be stored only at anchorage.
3. Yes.
4. Yes.
5. Storing can be done around the clock.
6. Storing is done by ship chandlers or their Agents.

SURVEYORS:

1. Cargo inspectors are available in Tripoli.
2. Surveyor's (Lloyd's, American Bureau . . Independent) are also available in Tripoli.

AUTHORITY: Mr. Victor Ghazi, Port Captain, Tripoli.

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O.Box 2575, Zeilaa Building, 1st Floor, Tripoli El Mina (3100), Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 600101, 600102, 600146, After hours 601515. Telex: 40730 Hidaya or Athens 216344, 218687, 214548. Head Office: Beirut (which see).

(b) OIL TERMINAL.

Note: Terminal storage tanks were partly destroyed in late 1983. Sea berths were re-commissioned in March 1984.

DOCUMENTS: See "Section A – Dry-cargo Port".

PORT LIMITS: There are three spar-buoys to indicate the limits of the Company's Sea Terminal boundaries.

The location of these buoys is as follows:

1st.	Lat. 34° 30′ 03″ N.	Long. 35° 52′ 30″ E.
2nd.	Lat. 34° 29′ 42″ N.	Long. 35° 52′ 26″ E.
3rd.	Lat. 34° 29′ 03″ N.	Long. 35° 51′ 04″ E.

ANCHORAGE: Good anchorage immediately W.N.W. of No. 4 sea berth buoys.

MAX. SIZE: Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1.5 ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an under-keel clearance, in the berths, of 6 ft.

VLCC's will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

PILOTAGE: The company's Mooring Masters will meet tankers 2 miles N.E. of Tripoli Breakwater Head. Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

HEALTH: See "Section A – Dry-cargo Port".

RADIO: The Lebanese Oil Installations Limited, Tripoli, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

Tripoli Terminal Radio Station. Call Sign – ODC 8.

Waveband	*Hours (GMT)*	*Watch Details*
High Frequency	0800–0830	ODC 8 Broadcast Traffic List and calls ships on 8514 kHz. Listens on 8354–8374.
	1200–1230	Will transmit on 12831 kHz on request.
	1600–1630	
	2230–2300	
Medium Frequency	0000–2400	Monitor 500 kHz for calls and answers only.
	0730	Broadcast on 500 kHz QSW 442 kHz.
	0730–0800	Transmit Traffic List on 442 kHz, receives ship frequencies – 425, 454, 468, 480 and 512 kHz.
	1130	Broadcast call on 500 kHz, QSW 442 kHz.
	1132–1200	Transmit Traffic List on 442 kHz, receives on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	1530	Broadcast call on 500 kHz QSW 442 kHz.
	1532–1600	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2200	Broadcast call on 500 kHz, QSW 442 kHz.
	2202–2230	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2232	Broadcast call QSY QSX 500 kHz.

Cables to Agents may be routed through Beirut Radio.

VHF: Tripoli:

Equipment:	Fixed Station sited in Terminal Building and used by Control Room.
Call sign:	Tripoli Control
Range:	Approximately 15 miles.
Frequency:	Transmitting on 163.6 MHz. Receiving on 159.1 MHz.
Watches:	Continuous.

Mobile Station

Equipment:	Portable, battery operated, carried aboard vessel with Mooring Master.
Call sign:	Ship's name (before mooring), or Berth No. (after mooring).
Range:	Approximately 8 miles.
Frequency:	Transmitting on 159.1 MHz. Receiving on 163.6 MHz.
Watches:	Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158.8 MHz. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

TUGS: There is no tug at Tripoli.

BERTHING: *Sea Line Berths.* 4 berths numbered from N.E. to S.W. specifications as follows:

Berth No.	*Max. t.p.h.*	*Fixed Sea Line*	*Strings of Flexible Hoses*	*Approximate Limits Draft*	*Approximate Limits Deadweight*
1	5,000	2×24 in.	2×16 in.	56 ft.	140,000
2	6,000	1×32 in.	2×16 in.	60 ft.	250,000
3	5,000	1×32 in.	2×16 in.	47 ft.	87,000
4	Products	2×16 in.	2×12 in.	32 ft.	25,000

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

LOADING:

1. *Readiness to Load,* will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*

(a) Two hoses are connected on the port side amidship.

(b) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.

(c) A minimum SWL of 5 tons is required for 12 in. hoses.

(d) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the port side.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*

(a) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.

(b) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

Caution: The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.

To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any mal-operation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "Topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*

(a) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

(b) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.

(c) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.

Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.

(d) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.

(e) The Mooring Master brings a portable radio on board for ship to shore communication.

Products: *Requirements for a Product Delivery Vessel:*

1. The discharge berth is an open sea berth.
2. Tripoli Terminal Call Sign is ODC 8 and Master's ETA should be sent at least 48 hours prior to vessel's arrival on 500 kHz.
3. Vessel to be equipped with centrifugal pumps capable of maintaining a ship's rail pressure of 120 p.s.i. (reciprocating pumps are totally unacceptable).
4. Max. draft loaded 32 ft. in Berth No. 4 and 62 ft. in Berth No. 2.
5. 5 ton derrick SWL.
6. 6 mooring ropes 120 fathoms each.
7. Port and starboard anchors to have a minimum of 8 working shackles each.
8. Midship connection (Portside 1×12 in. 150 ASA).
9. Pumping is against a head of 270 ft.
10. Laytime to be calculated at an average discharge rate of 250 t.p.h.

DENSITY: 1025.

FRESH WATER: May be available at anchorage before berthing, but it is expensive.

FUEL: Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 100 t.p.h. to 350 t.p.h.

CUSTOMS ALLOWANCES: See "Section A – Dry-cargo Port".

GENERAL:

1. *Ballast*

(a) Vessels should arrive with sufficent clean ballast for safe handling of vessel under prevailing weather conditions.

(b) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

(c) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMO London.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.

It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*

(a) Anchor to be fitted with marker buoys and 20 fathoms line.

(b) 4 good mooring lines of not less than 150 fathoms each and of suitable size for the vessel. 2 additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.

(d) 4 suitable rope stoppers to be available aft.

(e) 2 good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).

(f) 2 good 4.5 in. circumference boat ropes 200 ft. long placed one on each side of the vessel.

(g) 2 good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: February, 1983.

Documents:

1 Copy Cargo Manifest.
3 Copies Crew Lists.
1 Copy Personal Effects Declaration.
1 Copy Bonded Stores List.

Approaches: Admiralty Chart No. 2903 – Tripoli Roadstead.

Ramkin Isle Light visible on approaches to the port but cannot be relied upon for full power.

Fairway Light Buoy (flashing green every 4 seconds):
Position: Lat. 34° 30′ 00″ N.
Long. 35° 52′ 28″ E.

N.B. – The fairway buoy has been removed.

All buoys should be treated with caution as some removed and all unlit. Breakwater and mooring buoys give good radar targets.

Pilotage: Pilotage is compulsory. In an emergency, vessel could dock/undock without Pilot. Area on chart marked 'Pilots' should be avoided due to a wreck with only 21 ft. clearance. Most suitable position for boarding is 1 mile East of this area.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water (U.K. Merchant Shipping – Pilot ladders – Rules 1965 is relevant).

Pilot ladder used for boarding. Accommodation ladder unsuitable due to swell.

Anchorage: Area for boarding Pilot is also suitable for anchoring, if awaiting berth due to adverse weather, and for approaches to the sealine berths. Good holding with 7 shackles of cable.

Restrictions: No night navigation.

Max. Size: Draft restricted to 62 ft. No restrictions on length or beam.

Health: Pratique granted on arrival.

Radio: Initial ETA sent to Beirut via Portishead Radio.

(a) Advice of ETA, is required 48 hours prior to vessel's ETA stating quantity of cargo required, max. loading rate, SWL of derrick for lifting hoses, and confirming that the ballast for discharge in port waters is clean.

(b) Lines of Communication:

i. Tripoli Terminal Radio Station. Call sign ODC8.
ii. By cable to "Petriraq Tripoli – Lebanon".
iii. International VHF 156.8 MHz – range approx. 15 miles. Call sign "Petriraq Tripoli".

Tripoli Oil Installations – Lebanon.

Station: Tripoli Oil Installations – Lebanon, Tripoli Lebanon, private station for communication with tankers bound Tripoli, Lebanon.

Call sign: ODC8. Address: Toil, Tripoli Lebanon.

Periods open for traffic: ODC8 keeps a continuous 24 hours watch on 500 kHz for calls and answers only.

Medium Frequency Schedules: ODC8 transmits traffic list on 442 kHz and listens in the band 425-512 kHz.

0750 – 0800 hrs. GMT. 1530 – 1600 hrs. GMT.
1130 – 1200 hrs. GMT. 2200 – 2230 hrs. GMT.

High Frequency Schedules: ODC8 transmits traffic list on 8514 and 12831 MHz simultaneously and listens in the band 8554 – 8374 MHz:

0800 – 0830 hrs. GMT. 1600 – 1630 hrs. GMT.
1200 – 1230 hrs. GMT. 2230 – 2300 hrs. GMT.

Note: In addition to above, Tripoli Terminal keeps a continuous watch on the international calling frequency of 156.8 MHz. This has a range of approximately 15 miles and its call sign is "Toil, Tripoli Lebanon".

It is essential that tankers bound Tripoli Lebanon, communicate with station ODC8 at least 48 hours before arrival, and thereafter maintain contact (It may, at any time, be necessary to change orders regarding port of loading).

Radio station reported to be operating at reduced power but no contact made at all to date. Reasons given: No operators, no technicians, no maintenance, to name but a few. Contact made by VHF to 'Tripoli Oil Terminal', range varies from 15 miles down to 3 miles.

VHF: See "Radio". Pilots Channel 16, Port Channel 16, Agents' Channels 16 and 14.

Tugs: Not available. Vessels can dock/undock without tugs under favourable weather conditions.

Berthing: There are 4 berths numbered from North East to South West.

Berth No.	*Max. Ldg. Rate*	*Sealine*	Hoses	*Draft*
1	5,500 t.p.h.	2×24 in.	2×16 in./12 in.	56 ft.
2	6,000 t.p.h.	1×32 in.	2×16 in.	60 ft.
3	5,000 t.p.h.	1×32 in.	2×16 in./12 in.	47 ft. (49 ft. Summer)
4	(Products)	2×16 in.	2×16 in.	32 ft.

Max. loading rates are dependent upon the availability of shore tanks and loading lines.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above the seabed of the sea line header, is as follows:

Berth 1	Berth 2	Berth 3	Berth 4
62 ft.	66 ft.	53 ft.	36 ft.

No. 2 berth also used for the discharge of products using the fuel oil line. A slightly better rate achieved on this berth but only one ship can discharge products at any one time.

As No. 2 berth normally for larger vessels all ropes aft to be joined and maximum amount of cable (10 shackles) utilised until vessel in position alongside sealine marker buoys. A total of 10 ropes aft required but with mooring ropes of only 90 fathoms in length, 12 ropes will be required.

Gear to be provided by the ship:

(a) Anchor to be fitted with marker buoys and 20 fathoms line.

(b) Four good mooring lines of not less than 150 fathoms each and of a suitable size for the vessel. Two additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.

(d) Four suitable rope stoppers to be available aft.

(e) Two good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).

(f) Two good 4.5 in. circumference boat ropes, 200 ft. long placed 1 on each side of the vessel.

(g) Two good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

Conditions of Use:

Notice: The facilities and assistance provided by TOIL to ships visiting the port for any purpose whatsoever are subject to the following conditions whether or not any charge is made therefor:

1. Assistance, Advice or Instructions.

Neither the TOIL (which expression shall hereafter include any other owner of property used in conjunction with the property of TOIL) nor its servants or agents (in whatever capacity may be acting) shall be responsible for any loss, damage, injury or delay from whatsoever cause arising out of any assistance, advice or instruction whatsoever given or tendered in respect of any vessel. In all circumstances the Master of the vessel shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel, and the vessel and her Owners shall indemnify TOIL or its agent against all loss or damage sustained by TOIL or its servants or its agents, or for which TOIL shall be legally liable by reason of negligent navigation of the vessel.

2. Use of Sea Berths, Sea Loading Lines, Harbours, Jetties and Gear.

(a) While TOIL has taken all reasonable care to ensure that the berths, facilities and other premises of TOIL and the gear and equipment used in connection therewith are safe, TOIL does not represent or warrant that the sea berths, sea loading or bunkering lines, harbours and jetties of TOIL or the gear and equipment (including gangways where provided) used in connection therewith are safe or suitable for any vessel, and any vessel using them or any of them shall be and remain at the sole risk of the Owners or Master thereof and in particular (but without prejudice to the generality of the foregoing) the safety or suitability of the gangway is the sole responsibility of the Master.

TOIL does not warrant the seaworthiness of any craft hired or used by any vessel nor its fitness for any particular purpose.

(b) TOIL will not be responsible for the acts or defaults of any of its servants or agents or of any Port Authority or its servants or agents nor for any loss, damage, injury or delay from whatsoever cause arising that may occur to the vessel or her cargo or equipment or to the Master or any member of her crew whether on board or otherwise, or in the course of mooring or unmooring or raising or lowering of the loading or bunkering lines or loading or discharging or otherwise howsoever, or to any third party, and the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all claims, damages, costs and expenses arising therefrom.

(c) TOIL will not be responsible for any loss, damage, injury or delay directly or indirectly caused by or arising from strikes, lock-outs or labour disputes or disturbances whether TOIL or its servants or agents are parties thereto or not.

(d) If during or by reason of the use of the vessel of the sea line terminals, harbours or jetties or other premises of TOIL or its agents or the gear or equipment used in connection therewith or any craft of TOIL, any of them shall be damaged or become dangerous or unusable and irrespective of whether or not such damage has been caused or contributed to by the negligence of TOIL or its servants or agents or of any Port Authority or its servants or agents, the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all loss arising therefrom.

3. These conditions shall be construed according to the law of Lebanon and if so required by TOIL the vessel and her Owners shall submit to the jurisdiction of the Lebanese Courts.

Notice of Readiness: Notice of Readiness accepted by Mooring Master at his time of boarding.

Ballast: Our vessel required a minimum of 6,000 tons of ballast on sailing light.

No facilities for dirty ballast or slops.

Loading: Mooring Master remains aboard at all times. Mooring boat and crew also stand-by throughout. Meals to be provided for the extra personnel.

Loading/Discharge Operations: Ship's pumping pressure not to exceed 120 p.s.i.

Discharging: Reducers supplied by refinery. No problems for 10 in. manifold.

Programme of operations:

During Mooring Operations:	*Action*
1. Ullage, Water Dip and Sample Ship's Tanks.	Terminal for Refinery
2. Labelled Samples ex ship and any forwarded from loading port to Refinery for checking prior to commencement of discharge.	Terminal for Refinery
3. Authority to discharge cargo after testing of ship's samples.	Refinery
General Sequence of Operations:	
1. Ship to pump sea water to clear into shore tanks the amount of gas oil contained in the sea and shore lines.	All concerned
2. When advised follow up with ship's cargo, warning of any stoppages in the ship's pumps is essential.	All concerned
3. On completion of discharge, ship to pump sea water, as required, to clear sea/shore lines.	All concerned
4. Sea/Shore Pipe-line systems to be left with sea water.	All concerned
Prior to commencement of Discharge:	
1. Pressure gauge to be fitted at hose on ship's manifold connection.	Marine Supervisor
2. Discharge pressure at ship's manifold not to exceed 120 p.s.i. (9 kgs.).	Mooring Master
3. Refinery to gauge tanks and prepare lines for the reception of gasoline (estimated at 180 Long Tons) and to confirm to Terminal Shift Supervisor when ready to receive the stream (time to be logged).	Refinery
4. Terminal Supervisor to ensure shift attendants are on duty to operate and supervise the booster pump at the transfer manifold.	M.M.S. and Terminal Supervisor
5. A Fireman will be required to be in attendance at the Booster Pump Manifold throughout discharge operations.	Refinery
Commencement of Discharge:	
1. Vessel to commence pumping sea water, gradually increasing pressure to maximum when all the system to the shore tank is checked and shore tank is receiving stream.	Mooring Master on board, also Ref. and Terminal Shift Supervisor
2. The booster Pump will pick up the stream at the Transfer Manifold, Pump attendants must be instructed to maintain a minimum positive suction pressure of 5 p.s.i. and operate within permissible amperage readings.	M.M.S. and Terminal Supervisor
It is VERY IMPORTANT that ship/shore operations be co-ordinated to ensure that the Booster Pump is never on stream when the ship's pumps are stopped, as this would cause DANGEROUS overheating conditions, especially dangerous in low flash point refined products.	Mooring Master, (Terminal Shift Supervisor for immediate instructions to Pump Attendant).
3. Pressure readings at ship's manifold and at Foreshore Manifold to be recorded hourly by Foreman.	Mooring Master and Terminal Foreman
During Ship's Pumping/Discharge:	
1. Refinery to sample at manifold of Tank 39 or any other points and advise when the line content of gas oil has been displaced and pumping of sea water by the ship should stop.	Refinery to Terminal Shift Supervisor
2. Refinery to advise when vessel may commence pumping its cargo.	Refinery to Terminal Shift Supervisor
3. Refinery to sample stream at Manifold of Tank 39 etc., where sea water would be drained out and switch stream into appropriate storage tanks when the required product appears in the sampling.	Refinery
4. IMPORTANT: Comply with Safety Code precautions when gauging receiving tank, especially when the oil level is below roof supports, to avoid the discharge of static electricity by the introduction of any "Conductors", such as a metal gauge tape and weight, into the space between the roof and level of the oil being received.	Refinery
Completion of Cargo:	
a) Mooring Master to advise when cargo discharge is completed and ship's tanks are dry.	Mooring Master
b) When advised, vessel to resume operations by pumping sea water to displace the line content of Blend Stock.	Mooring Master, Terminal Shift Supervisor
c) Refinery to advise when pumping of sea water may be stopped.	Refinery to Terminal Shift Supervisor
d) Refinery to gauge tanks and prepare certificate of quantity for cargo received in accordance with general procedure.	Refinery/ Terminal
e) Shore line to be re-set to "CLOSED" and to be left with sea water up to Tank 39.	Refinery to Terminal Shift Supervisor

Also see "Loading".

Density: 1025.

Fresh Water: Available by barge. Arranged through ship's Agent.

Fuel: Fuel oil is available in berths 2 and 3 through a 12 in. hose lifted on the port side. Rates may vary between 100 and 350 t.p.h.

Diesel and lubrication oils not available.

Consuls: Nearest British Consul at Beirut.

Repairs/Dry Dock: Not available.

Surveyors: Lloyd's.

Gangway/Deck Watchmen: Due to attempted theft of paint stores by armed men, security guards recommended at the anchorage and on the berth.

Shore Leave: Not permitted.

Customs Allowances: Bond checked by Customs but not sealed.

Airport: Nearest at Beirut.

Services: Available. Laundry service, telex (unreliable), doctor, hospital, provisions, recovery of anchors, etc.

Not available: No facilities for discharge of slops or dirty ballast.

NOTICE: Responsibility for the safe conduct of operations on board your ship while at our terminal rests with you as Master. Nevertheless since our personnel, property and other may suffer serious damage in the event of accident aboard your ship, we wish before operations start, to seek your full operations and understanding on the safety requirements set out on the Ship/Shore Safety Check List.

The Safety requirements have been drawn up by ourselves in conjunction with other Terminal Operators in Middle East and representative section of the International Tanker Industry.

They are based upon the provision of the codes of safe Practice currently accepted by the Oil and Tanker Industries. We therefore expect you and all under your command to adhere strictly to them, throughout your stay in this Terminal. We, for our part, will ensure that our personnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operation.

In order to assure ourselves of your compliance with these Safety requirements we have instructed our Mooring Master to report to you or your deputy and join one of your officers in a routine inspection of Cargo Decks and accommodation spaces.

If you observe any infringement of these requirements by Terminal or any other personnel on board your ships; please bring this immediately to the notice of our representative. Should you consider any immediate threat to the safety of your ships arises out of any action on our part or equipment under our control, you are fully entitled to demand an immediate cessation of operations.

Our Mooring Master is the Company Representative on board. WE RESERVE THE RIGHT IN THE EVENT OF CONTINUED OR BLATANT DISREGARD OF THESE SAFETY REQUIREMENTS IN YOUR SHIP, TO STOP ALL OPERATIONS AND ORDER YOUR SHIP OFF THE BERTH FOR APPROPRIATE ACTION TO BE TAKEN BY THE CHARTERERS AND THE OWNERS CONCERNED.

NOTES

Please also advise Shipping Guides Ltd.

Liberia

COURTESY FLAG: Masters of vessels should check with the Pilot the correct times for raising and lowering (0600 – 1800 hrs.) the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

BUCHANAN: 05.54 N. 10.04 W. (See Plan Book)

DOCUMENTS:

1 copy Clearance from last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
6 copies Cargo Manifest (even in ballast).
6 copies Crew List.
3 copies Store List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.

PILOTAGE: The ship shall be considered to have arrived at Port of Buchanan when she cuts a circle with a 3 nautical miles radius from the beacon on the main breakwater head (Fl. G 3-sec.). Lamco provides pilotage. Pilot boarding approximately 1.5 miles off the main breakwater, bearing 095°/110°. Pilot to be provided with a clean and safe ladder on the lee side.

ANCHORAGE: If waiting for Pilot, anchor 2 miles off main breakwater on bearing 090° – 110°, 1.5 miles – 2.5 miles off main breakwater (South).

RESTRICTIONS: Harbour traffic hours – towage and pilotage (ore ships), 0000 – 2400 hrs. General cargo ships (tankers), 0700 – 2300 hrs.

MAX. SIZE: See "Bulk Handling Facilities".

RADIO: Dakar Radio, and on ship's telephone working frequency if stated in sailing telegram from last port of call. Buchanan Harbour will call on 6520 kHz 4 days before ETA at 0830 hrs. GMT, or when within 200 miles call Buchanan Harbour on 2182 kHz at 0800 hrs. GMT. Communications with ore ships per HF, call 2182 kHz. Traffic, 2638 kHz, 2738 kHz. VHF, call Channel 16. Traffic, Channel 9, 12 and 14.

HEALTH: Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberian ports where Free Pratique has been granted, Port Health will also board here.

TUGS: Lamco provides towage with two tugboats 1,640 h.p. and one tugboat 3,300 h.p. Tugs join vessel about 0.5 mile North of red buoy.

BERTHING: Number of berths for sea going vessels, 4. Length of quays, 2,800 ft. with 50-100 ton bollards and properly fendered. Depth of 33 ft. at commercial quay (at MLWS).

BULK HANDLING FACILITIES: *Deep Water Basin at Buchanan Ore Loading Quay.* With the completion of the deep water basin at the Ore Loading Quay the water depth alongside the quay is increased from 12.95 m. to 14.00 m. below the zero level of the General Elevation System.

The required keel clearance is still 3 ft. for ships up to 125 ft. beam. The max. permissible draft alongside the quay is thus:

$$14.00\text{ m.} - \frac{(\text{Beam in feet } 0.3)}{123}\text{ feet} + \text{tide}$$

Tidal range:
MHWS = +1.18 m. above zero level of the General Elevation System.
MLW = +0.05 m. above zero level of the General Elevation System.
MLWS = +0.15 m. below zero level of the General Elevation System.

Because of the necessity to save a rock shelf to support the sheetpiling of the cells when blasting and dredging the deep water basin, new fenders have been installed at the quay in order to keep the bilges of the vessels well clear of those rocks. The new fenders have a diameter of 1.20 m. against 0.55 m. of the old fenders. A ship loaded to maximum permissible draft can have a list of 5° without touching the rock slope but since she would touch the bottom with a list of about 3° such lists will not be tolerated.

Height of Shiploader: 16.5 m. above the water level at MHWS. A 2.0 m. safety margin is normally sufficient. Maximum shiploader outreach (including throw) from the new fender line is 22.8 m. whereby a max. 43 m. wide vessel can be loaded. Loading rate 6,000 t.p.h.

It must be clearly understood that the sailing drafts are unchanged. The width of the deep water basin is only 60 m. It gives however, the great advantage of being able to continue loading without stopping for low water, whereby loading can often be completed 12 hours earlier than without the deep basin.

An even greater advantage is probably the increased safety, should a large ship develop engine trouble after she has exceeded the former maximum permissible low water draft, in which case operators have no alternative but to pull vessel out at HW as "dead ship" which could very easily result in a major accident with enormous economic consequences. Now operators can let vessel remain alongside over the next low tide without any risk.

STEVEDORES: As early as possible advance notice of ETA required latest by 1500 hrs. on day preceding arrival if a weekday. Or Saturday before noon if arrival on Sunday. Shore working hours: Ore handling: Monday 0700 hrs. through Sunday 0700 hrs.: general cargo handling, 0700 – 1200 hrs., 1230 – 1500 hrs., overtime 1500 – 2300 hrs., and 2300 – 0700 hrs.

MEDICAL: Hospital and medical care is provided; advance notice should be given in serious cases. Yellow fever and cholera vaccinations are compulsory to enter the Republic. Vaccination book is required.

TANKERS: One tanker berth for discharging only. Hose connections are: 6 in. and 10 in. Max. draft 30 ft.

DENSITY: Varying but around 1020/25.

FRESH WATER: Fresh water is available, ex-quay only, rate is 20 t.p.h. Subject to availability.

FUEL: No bunker facilities available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Performed by stevedores.

REPAIRS: No commercial facilities available. In cases of emergency Lamco might assist with minor repairs.

CUSTOMS ALLOWANCES: Direct sales from ships are strictly forbidden.

IDENTIFICATION CARDS: Not required.

CONSULS: Swedish Vice-Consul only; however, most countries are represented either by Embassy or Consul at Monrovia.

REPATRIATION: Can be arranged.

AIRPORT: Roberts International Airport about 1 hour ride by car; several connections to the rest of the world.

TIME: GMT; no alterations during the year.

HOLIDAYS: January 1st; January 7th; February 11th; Second Wednesday in March; March 15th; Second Friday in April; May 14th; July 26th; August 24th; First Thursday in November; November 29th; December 1st; December 25th. Special holidays as proclaimed from time to time by the Liberian Government. No work will be performed on January 1st, July 26th and December 25th.

POLICE/FIRE/AMBULANCE: No phone available; however the Lamco Plant Protection Force should be contacted; one Officer is normally assigned to each quay/gate.

SHORE LEAVE: Apart from South African and Rhodesian citizens, who are not allowed ashore, no restrictions.

DELAYS: Generally, no major delays have occurred. For ore carriers and tankers the tide may occasionally involve 24/36 hours waiting time depending on the size of ships expected to load: general cargo ships; no delay.

GENERAL: Two Customs Officers stay on board the ship during ship's entire stay and they should be given meals in the Officers' Mess and if necessary night quarters.

AUTHORITY: Port Operators: Lamco J. V. Operating Company.

AGENT: All ore carriers must employ LJVOC as their Agent.
Other vessels:
Scanship (Liberia) Inc., PO Box 19 Lower Buchanan, Tel: 32.32.36. Telex via Monrovia 4281 and 4344.

GREENVILLE: 04.59 N. 09.03 W.

PORT LIMITS: Within 2 miles of the Breakwater.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
4 Customs and Crew Declaration.
2 Vaccination Lists and valid Cholera/Yellow Fever Certificates.
2 Copies Manifests.
2 Copies, Bills of Lading.
Load Line and Safety Construction Certificates.
Licences of Officers (for Coast Guard).
Cargo Gear Certificate.

PILOTAGE: Compulsory. Pilot embarks in position 059° by 1.5 miles from the Breakwater or at the authorised anchorage. Boarding is done from a launch painted black and white with the word "Pilot" inscribed. Contact can be established on a normal working day between 0730 – 1700 hrs., on Saturdays 0730 – 1200 hrs., holidays and Sundays – Office not open, but should a vessel be expected the Pilot can be contacted during the expected time of arrival on VHF Channel 16.

ANCHORAGES: Indicated on the Chart by a dotted line commencing in position Lat: 4° 58.8′ N., Long: 9° 03.4′ W. running in a direction 309° for 11 cables thence 092° for 10 cables then 188° for 7 cables with a minimum depth of 6.5 fathoms. Care should be exercised as there exists a 4 fathom patch at the edge of the anchorage area. Vessels proceeding to the anchorage area should proceed with the edge of the breakwater (at night indicated by a fixed green light) and the North Point Lighthouse, bearing 059° to within a distance of one mile from the breakwater, thereafter altering course for the anchorage.

RESTRICTIONS: Pilotage at present is restricted to daytime only, but sailing if necessary can be done at night. It is anticipated, with the renewal of the buoyage system in early 1983, night pilotage will be resumed.

MAX. SIZE: Length 155 m., beam no restriction, draft 8 m.

HEALTH: Pratique granted by Port Health Officer on arrival at berth, no Radio Pratique granted.

RADIO: None, ETA's should be routed to Agents via telex or cables.

VHF: Contact can be established with the Marine Office or the various Agencies during normal working hours Monday – Friday 0730 – 1700 hrs., and on Saturdays 0730 – 1200 hrs. on Channel 16 VHF.

RADAR: No Port Control radar.

TUGS: One twin screw tug of 1,450 b.h.p. available for assisting vessels. This tug is equipped with modern fire fighting appliances, and can also execute coastal towage of vessels if required. Ship's lines are preferable for towing, but if not available then tug's line can be used.

BERTHING: One jetty 585 ft. in length with a depth of 8.1 m. Smaller jetty for vessels not exceeding 180 ft. in length with a depth of 4.9 m. alongside. In addition vessels loading floating logs can be berthed safely in the middle of the basin parallel to the main jetty with a depth of 8.1 m. Under favourable weather conditions (November – April) a third vessel can be accommodated at right angles to the jetty in a similar depth to the inner basin. All loading and discharging must be done by ship's gear.

CRANES: None presently available, but plans are underway to purchase a 70 ton mobile crane.

BULK CARGO FACILITIES: Cargo handled-forestry products only i.e. logs, boules, sawn timber and plywood.

SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Arrangements can only be made on vessel's arrival as this depends on the availability of the logs and sawn timber to be loaded. The required loading rate for vessels alongside the jetty is 800 cu.m. per 24 hours and vessels in the basin 500 cu.m. per 24 hours.
MEDICAL: One Government owned hospital with 50 beds, and one private clinic, both with limited facilities available.
TANKERS: Small coastal tankers only.
DENSITY: November-April 1025; May-October 1010.
FRESH WATER: Available.
FUEL: Small amounts of diesel can be delivered by truck.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: Nearest at Monrovia.
REPAIRS: No facilities.
DRY DOCKS: None.
SURVEYORS: All classification societies are represented at Monrovia. Surveyors will travel to Greenville if arrangements made by Agents.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
HATCHES: Opening/closing carried out by crew but alternative arrangements can be made for shore labour.
CUSTOMS ALLOWANCES: 200 cigarettes/1 bottle spirits per crew member, but depending on duration of stay.
CARGO GEAR: Ship's gear only.
REPATRIATION: Carried out via Monrovia.
AIRPORT: Small domestic airport 5 miles from the port with two flights daily to Monrovia approx. 45 minutes flying time.
TIME: GMT is observed throughout the year.
HOLIDAYS: There are 16 National Holidays. No work is permitted whatsoever on January 1st, New Year's Day; April 12th, Redemption Day: July 26th, Independence Day and December 25th, Christmas Day.
POLICE/AMBULANCE/FIRE: Within reach. Not available by telephone.
TELEPHONES: Not available.
SERVICES: No facilities exist for tank cleaning or compass adjusting.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No unusual regulations.
DELAYS: Can be expected during the rainy season (April-November) when adverse weather conditions (heavy swell) exist causing vessels to part their moorings. This usually lasts not more than 2 days in any given period. At such times, vessels are moved to the inner basin or to the roadstead until the conditions improve.
GENERAL: The port designed for the handling of logs and related wood products has just completed a re-habilitation project which included the dredging of the basin and approaches, new rafting and lighting facilities, also the placing of both fresh and salt water mains to the quay. Feasibility studies are now underway with a view to increasing the length of the Main Quay by 33 m. Despite the fact that the present facilities are for vessels of 155 m., vessels of 160 m. were safely berthed in the past year.
AUTHORITY: National Port Authority, P.O.Box 165, Greenville, Sinoe County, Liberia. *Tel:* 9538/9. *Cables:* "Sinoe Port". *Contact:* Captain S. L. Wynter, Chief Pilot.

AGENT: See "Monrovia".

MONROVIA: 06.20 N. 10.50 W. (See Plan Book)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists or Statements "Nil" if none aboard.
2 Manifests for Customs. This should state ballast if no cargo aboard.
4 List of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of dates of yellow fever and cholera vaccination.
4 Store Lists.
2 Crew Custom Declarations.
Immigration now stamp all seamen's discharge books or passports.
2 Livestock Lists.
Report: 1983.

All ships calling at the port of Monrovia, must submit the following documentation to the operations department not less than 24 hours prior to vessel berthing at the port.

(a) Complete manifest for Monrovia discharge with tonnage recap – 1 copy.
(b) Dangerous cargo list – 1 copy.
(c) Hatch list or its equivalent showing cargo, consignee and stow location – 1 copy, and
(d) Cargo stowage plan – 1 copy.

Failure on part of the ship's Agent to provide this necessary planning data may result in the following:

(a) Ship arriving later than ship not having the proper documentation will be given priority berthing consideration.
(b) Late manifest charge in accordance with N.P.A. Tariff.

This documentation is considered a vital part of the Freeport's ability to plan for the reception of import cargo, therefore, it is considered mandatory that the ship's Agent comply with this requirement at all times in order that ship discharge and dock operations are most effective and efficient. In addition, the ship's Agent will provide Freeport with a copy of the stevedore's hatch lists and tonnage discharged.

Some Agents/stevedores are in the habit of not declaring the figure to be discharged or loaded. Hereafter, no ship will be given berth without specification of cargo to be discharged or loaded.

PILOTAGE: Pilot is compulsory. Pilot ordered through local Agent. 24 hours or minimum 12 hours notice of ETA by Radio Telephone on 2182 kHz. Pilot instructs ship through signal tower or direct on VHF Channel 16.

Pilot comes out from inside breakwaters by pilot launch, displaying "H" flag and "Pilot" in large black letters on side of the launch. Pilot will inform ship by VHF which direction to proceed to meet the pilot launch. Vessels should always keep clear of the Fairway Channel, as very large bulk carriers sail on deep draft.
ANCHORAGE: Good unlimited anchorage space available on roadstead S.W. of Leading Line, from 7 to 10 cables from Southern breakwater end, depth 7 to 10 fathoms. Anchorage safe but subject to moderate South-westerly swell during rainy season, April to October.
RESTRICTIONS: Pilot service is day and night. Loaded oil tankers berth in daylight hours only. Deep loaded vessels i.e. 40 ft. draft and over are restricted to tide for berthing and sailing. Maximum draft for main ore piers is 45 ft. Vessels up to 860 ft. length can be accommodated at these piers. No restriction on beam except that carriers with beam in excess of 126 ft. may experience difficulty in loading with present loading gantries. Bulk carriers of 90,000 tons d.w.t. and over will berth only in daylight hours.
MAX. SIZE: See "Restrictions" and "Berthing".
HEALTH: Vessels entering must fly International Code flag "Q". Port Health Officials board upon berthing. Pratique automatic for vessels having cleared at other Liberian ports, but vessel must still clear Customs.
RADIO: The Freeport of Monrovia maintains a continuous listening watch on HF 2182 kHz, and VHF Channel 16. Vessels are to call Freeport 24 hours or minimum 12 hours, giving ETA before arrival. Cables should be routed to Agents through Government radio station, ELC or via French Cables through Dakar or Abidjan.
TUGS: 3 tugs of 1700 h.p. available. Join vessels just inside breakwater entrance. For berthing, tug lines used; for sailing, ships lines often used. One additional tug, 3,000 h.p. is available.
BERTHING: Ships are discharged by their own gear. Mobile cranes of up to 40 tons are available.

Vessels loading at the Iron Ore Piers are limited to a maximum draft of 45 ft. and sail from 2 hours before high water up to HW. However, ships over 90,000 tons will sail from 2 hours before HW up to 30 minutes before HW. Vessels proceeding to the Bunker Pier are limited to a maximum draft of 32 ft. Tankers discharging at the Crude Oil Berth are limited to 38 ft. draft and a maximum length of 700 ft. Tankers at this berth moor by means of two anchors and starboard side to the breasting dolphin with the stern fast to the mooring dolphin. Discharge is by means of submarine and floating pipe-line connected to the starboard side midships. Fishing Pier has a 90 ft. wide channel and maximum draft of ships berthing there is limited to 16 ft. and maximum length of 240 ft. The main General Cargo Pier is 2,000 ft. long, and vessels up to 625 ft. in length can be berthed. The maximum permissible draft at this pier is 30 ft., at which draft vessels will berth on the tide, that is 2 hours before HW till HW.
STEVEDORES: Several stevedoring companies. Port Authority handles all cargo on shore and accepts cargo ex-ship's hook only.

Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.
MEDICAL: Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or during night. Hospital facilities available. Port Health require yellow fever vaccinations for crew members.
TANKERS: See "Restrictions" and "Berthing".
DENSITY: Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.
FRESH WATER: Available only on marginal wharf and two Iron-ore Piers by means of hoses from shore. Average rate of delivery approx. 20 t.p.h. Water also available at the LRC Pier.
FUEL: Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company. Fuel and diesel only available on bunkering pier.
GANGWAY/DECK WATCHMEN: Private security men are engaged by the Agent. Port security also maintain regular patrol.
OPENING/CLOSING HATCHES: Normally done by stevedores.
CUSTOMS ALLOWANCES: Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.
IDENTIFICATION CARDS: Not required, but seamen's books are endorsed aboard by Immigration.
CONSULS: Majority of foreign countries have Consuls.
REPAIRS: Limited deck and engine repairs can be carried out by private companies.
DRY DOCKS: One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work. There is also a synchrolift of about 250 tons, owned by private fishing company.
REPATRIATION: Repatriation of crews is possible.
AIRPORT: Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.
TIME: GMT.
HOLIDAYS: Many official holidays during year but cargo work carried out those days on overtime rates. Port closes 3 times a year: 26th July (Independence Day), Christmas Day and New Year's Day.
POLICE/AMBULANCE/FIRE: Port Authority have own Security Force and Fire Service, situated in port area. There is also an ambulance service.
TELEPHONES: There are no facilities for telephones on board.
SERVICES: Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyd, B.V., Norske Veritas, America Bureau Agents and most of the other classification societies.
SHORE LEAVE: No restriction on shore leave.

SHIPMASTER'S REPORT: February 1983.

Pilotage: Pilot launch has black hull, white housing and green housing top. The word "Pilot" is painted in large white letters.

Pilot boards near the Sea Buoy, 7.3 cables from Southern Breakwater.

Health: 2 Coastguard Officials and 1 Immigration Official board with the Pilot to complete formalities. We do not think that this is the case for all vessels.

Radio: The Freeport of Monrovia no longer maintains a watch on HF 2182 kc/s.

Tugs: 3 tugs available; 1×3,900 h.p., 1×2,300 h.p. and 1×1,900 h.p. Pilot advises that the 1,900 h.p. tug suffers frequent engine problems.

When sailing, vessel takes 1 tug at stern, using 2 ship's lines.

Gangway/Deck Watchmen: Port security personnel maintain continuous watch while vessel is berthed.

Opening/Closing Hatches: Normally done by ship's crew.

AUTHORITY: National Port Authority.

AGENT: Scanship (Liberia) Inc., PO Box 209, Bushrod Island, Monrovia. Tel. 22.28.32. Telex 4281 and 4344. Cables: "Scanship Monrovia".

NOTES

Please also advise Shipping Guides Ltd.

Socialist People's Libyan Arab Jamahiriya

GENERAL: All ports:

CLEARANCE: ETA to be advised to Port Authority 24 hours before arrival, including the following information: Ship's Name, type, Nationality and port of Registry; Owner, Master and Agent names; Gross and Net tonnage; Ship's length and draft forward and aft; Expected duration of stay in the port; Last port of call, tonnage, quantity and kind of cargo for discharging and loading; Full details of any dangerous liquids or cargo; Number of passengers and crew; Health situation.

Before arrival at the outer limits of the port, vessel requested to hoist the following signals: Flags of her call-sign; Flag of Quarantine; Flag of ship's Nationality; The Libyan Flag on the foremast; Red Flag during daylight and Red light during night-time, if carrying explosives or any inflammable cargo; Pilot Flag and the international flag code signals must be respected.

DOCUMENTS: *On arrival:* Last Port clearance; Full sets of cargo documents; Copies covering consignment; Certificate of origin; Bills of Lading, etc. 8 copies of Crew List; 8 copies of Passenger List; 7 copies of Cargo Manifest; 3 copies of Cargo Plan; 1 copy of Crew Declaration; 1 copy of Currency Declaration; 1 copy of Store List.

During the first 24 hours of arrival: Valid certificates to comply with all the International conventions in force for the State whose flag the ship is flying. Certificate of Registry. For the National ships, moreover, the official log book, engine log book and ship's articles.

Agency Requirements: The following agency requirements in respect of pre-arrival notices and documentation in addition to official documents and certificates needed for ordinary port clearance should be complied with. Pre-arrival notice to be communicated by telex to Agents containing following information:

(a) vessel's name and flag;
(b) g.r.t./n.r.t./s.d.w. and nature of cargo;
(c) ETA and quantity of cargo to be handled;
(d) exact address to whom disbursements accounts should be sent.

For dry cargo vessels further information should be submitted:

(e) conditions of stevedoring, whether basis liner terms or F.I.O.S.;
(f) net freight earned along with all cargo details specifically each Bill of Lading.

Upon arrival the following documents are to be handed over:

1. Masters of tankers should produce and hand over to Port Authorities 'Certificate of Discharge' pertaining to previous calls (non-compliance will cause delay in berthing);

Following only applying to dry cargo vessels:

2. 14 copies of cargo manifest (clearly stating measurements and weights);
3. 2 copies of freight manifest;
4. 2 copies each Bill of Lading;
5. 2 copies cargo plan.

Report: May 1984. From State Agent.

Agent to submit all ship's documents/certificates, cargo documents and crew documents and/or any other declarations connected thereto, in the Arabic language. This is effective from 1.6.84, noting until this date, we shall arrange for the required translation as a transitional period, after which and effective from the above mentioned date, all ships shall arrive with all above said documents/certificates/ declarations, etc., in the Arabic language.

Your full and strict adherence to the above is required avoiding unnecessary inconveniences to all parties concerned as any failure on your part shall never be tolerated by the concerned authorities.

Report: June 1984. From State Agent.

Please note: Temporarily vessels should arrive with the following ship certificates already translated into Arabic, otherwise vessels shall be delayed in sailing. The other documents we shall arrange for translation of same at our end on a temporary basis:

Certificate of Registry.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio Telegraphy Certificate.
Load Line Certificate.

Report: September 1984. From State Agent.

Following documents imperative to be translated at your end, and not by Agent:

1. Ship's documents:
    Registry Certificate.
    Load Line Certificate.
    Safety Construction Certificate.
    Safety Equipment Certificate.
    Safety Radio – Telegraphy Certificate.
2. All Cargo Manifests.
3. All other lists and declarations such as Crew List, Officers' List, Stores, etc.

Note that the competent authorities at our end (namely the Ports and Lights Department of Tripoli) are presently insisting on collecting from ship direct all the documents in question in Arabic translation upon vessel's arrival thus leaving no possibility whatsoever for any assistance previously rendered by the Agent.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boat will meet ships outside the harbour. Ships should wait for Pilot at anchor outside the harbour if weather is good. In case of bad weather, after getting permission from Harbour Master ships may enter the harbour at their own risk and anchor inside.

TUGS: Tugs are available at all Libyan Ports.

HEALTH: The following documents to be provided for the doctor: A valid Fumigation Certificate; International Vaccination Certificate for every person on board; Health Certificate for any animal or bird on board. No automatic Free Pratique between the Libyan Ports.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member or passenger. All kinds of alcoholic drinks are forbidden, even wine and beer, and to be kept in the store under the Customs seal. Also arms, perfume, saccharine and all kinds of anaesthetic. The sum of 10 Libyan dinars allowed for each crew member. All Libyan and Foreign currency to be declared in the currency declaration. All personnel effects and electronics to be declared in the Crew Declaration.

BLACK LIST: Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS: Foreign currency not to be taken ashore. Crew members' visits between ships are not allowed without the prior permission of Customs and Immigration. Ship's lifeboats are not to be used within harbours limits without the prior permission of the authorities. No engine repairs to be carried out in port whilst alongside or at anchor in the port without prior permission of authorities. Movements of ships in the port are not allowed without instructions. Using ship's propellers whilst in port is not allowed without permission. Ship's whistles not to be used without good reason. Cleaning funnels or making smoke whilst in port is strictly forbidden. Ship's gangway to be in position at all times whilst alongside. Rat guards to be fixed all times on every rope. Painting or scraping the outer hull of the ship not to be carried out without prior permission of authorities. Duty officer to be on board all the time accompanied by sufficient crew.

For tankers or vessels laden with dangerous cargo; moreover, the mentioned hereabove: Red flag to be hoisted in daylight and red light to be on in the night-time. No movements allowed between sunset and sunrise for such ships. Electricity to be off from ship's holds whilst loading or discharging. Towing wires with suitable shackle to be ready fore and aft. Smoking and any kind of fire are strictly forbidden on deck. All steps for safety to be carried out.

POLLUTION: Pollution of any kind is strictly forbidden. Any ship causing any kind of pollution will be liable to heavy fine.

BERTHING PRIORITY: The berthing priority scheme, according to law, as follows: 1) Passenger ships. 2) Animal ships. 3) Liner and mail ships. 4) Cargo ships. 5) Tankers and dangerous cargo ships. Ships with cargo of less than 300 tons, may not have to comply with the scheme; subject to Harbour Master's decision.

OPENING/CLOSING HATCHES: To be done by crew.

IDENTIFICATION CARDS: Seaman's book or Discharge book, Passports, Identity Cards — all should be valid.

HOLIDAYS: Friday is the weekly day off. Revolution day (1st Sept. yearly); Evacuation days (28th March, 11th June, 7th October; yearly), Syrian Revolution day (8th March, yearly); Sudanese Revolution day (25th May, yearly); Egyptian Revolution day (23rd July, yearly); Hijra New Year (1st Moharam, Muslim year); Ashoura (half day, 10th Moharam, Muslim Year); Mohammadan birthday (12th Rabih Awel, Muslim Year); Israa Wa Merag (half day, 26th, Rajeb, Muslim Year); Eid El-Fitr (1st, 2nd & 3rd Shawal, Muslim Year); Eid El-Adha (9th, 10th. 11th, & 12th Zi Al-Heja, Muslim Year).

TIME: Local time at all the seasons is GMT plus 2 hours.

SURVEYORS: The following addresses are Agents for the mentioned Classification Societies and may be contacted for the necessary surveys on request:–

Lloyd's Register of Shipping: P.O.Box 111115 Tripoli. Telephone: 74383. Telegraphic Address: Lloydsreg Tripoli Libya.

Bureau Veritas: Tripoli: Orfelli Agencies, 109 – 1st September Street, P.O.B. 2283, Telephone: 35338 and 37398, Telegraphic address: Shetaf Tripolilibia.

American Bureau of Shipping: Tripoli: Libyan Arab Shipping, Baghdad Street, Andalus Building, P.O.B. 882, Telephone: 41712 and 39358, Telegraphic Address: Arabship Tripolilibia, Telex 20033 Arabship.

Germanischer Lloyd: Tripoli: Johs Rieckermann, Baghdad Street, Andalus Building, P.O.B. 2121, Telephone: 37021 and 31069, Telegraphic address: Rieckermann Tripolilibia.

Registro Italiano Navale (RINA): Tripoli: Mr. Mahmoud Gamar, c/o Libyan Arab Shipping Co., Baghdad Street, Andalus Building, P.O.B. 2325, Telephone: 41712 and 39358, Telegraphic address: Gamarin Tripolilibia.

MINE FIELDS: The following areas are prohibited area and dangerous for navigation due to mines:

1)	Lat. 32° 52.78′ N.	& Long. 13° 24.6′ E.
	Lat. 32° 57.67′ N.	& Long. 13° 24.46′ E.
	Lat. 32° 57.67′ N.	& Long. 13° 18.00′ E.
	Lat. 32° 53.82′ N.	& Long. 13° 22.30′ E.
2)	Lat. 32° 53.70′ N.	& Long. 13° 20.61′ E.
	Lat. 32° 55.93′ N.	& Long. 13° 18.00′ E.
	Lat. 32° 55.93′ N.	& Long. 13° 15.00′ E.
	Lat. 32° 54.45′ N.	& Long. 13° 15.00′ E.
3)	Lat. 32° 37.00′ N.	& Long. 23° 13.00′ E.
	Lat. 32° 14.50′ N.	& Long. 23° 31.00′ E.
	Lat. 32° 10.50′ N.	& Long. 23° 28.50′ E.
	Lat. 32° 37.50′ N.	& Long. 23° 7.50′ E.

ATTENTION: It is imperative that vessels contact the wireless stations on the Libyan coast at a distance of 30 miles from the proceeding port, giving the ship's position. Ship's winches and cargo gear should be in good order otherwise they will be liable to heavy fine if any delay occurs.

FLOATING DOCK: See "Tripoli".

AUTHORITY: Port Affairs and Maritime Transport Bureau (Marine Department), P.O.Box 648, Tripoli, S.P.L.A.J. *Telex:* 20400, 20533 Minscon Ly. *Contact:* Head of Marine Department.

AGENCY: IMPORTANT.

Shahat Shipping & Stevedoring Co. will attend to all agency matters at Benghazi, Derna, Marsa el Brega, Marsa al Hariga, Tobruk and Zuetina.

Shahat Shipping and Stevedoring Co.,
P.O.Box 2973 and 1496,
Benghazi,
Cable Address: "Shahat Ship" Benghazi.
Telex: 40076/40105/40231 and 40019.

Germa Shipping and Stevedoring Co. will attend to all agency matters at Misurata, Es Sider, Ras Lanuf, Tripoli and Zawia.

Germa Shipping and Stevedoring Co.,
P.O.Box 985,
Tripoli.
Cable Address: "Germa Ship".
Telex: 20058.

AZZAWIYA: 32.48 N. 12.42 E.

Also see "General" before first port.

LOCATION: Azzawiya Oil Terminal is situated about 50 km. West of Tripoli.

PORT LIMITS: Vessels are considered to be "Arrived Ships" and (subject to charter party terms) lay time will commence, when the ship is approximately 2 miles off the S.A.L.M. berths.

DOCUMENTS: Masters are advised to have the following documents prepared before arrival in order to expedite ship's clearance:

(a) Crew List.
(b) Customs documents.
(c) Health documents.
(d) Bills of Lading.
(e) Ship's papers and certificates.

PILOTAGE/APPROACHES: Vessels are advised to anchor in a position 1.5 miles N.W. of S.A.L.M. Berth No. 1 to await Pilot and Agent/Customs clearance. Vessels must keep clear of the area deemed to be the pilotage area and not approach the berth closer than 1 mile without receiving Harbour Master's permission. Admiralty charts indicate an anchorage symbol in position:

Lat. 38° 49′ 00″ N., Long. 12° 42′ 00″ E.
and Flare symbol in position:
Lat. 32° 47′ 25″ N., Long. 12° 42′ 00″ E.

Azzawiya Oil Terminal is adjacent to the flare. Tankers are warned that it is unsafe to remain at anchor during adverse weather conditions and to keep to Northward of Lat. 32° 50′ N.

While at berths, tankers must have main engines ready for immediate use at all time. Sudden, and violent changes of weather may occur at any time, and vessels may be required to leave berths at very short notice. Pilot and service craft are available during day hours only until further notice.

RESTRICTIONS: Vessels must have sufficient ballast for safe manoeuvring and must not be trimmed more than 3 ft. by the stern.

If in opinion of the Marine Superintendent or the Mooring Master, the ship has insufficient ballast, she may not be allowed to berth.

The discharge of dirty ballast is strictly prohibited.

RADIO/VHF: Call sign: "Azzawiya Control".

Azzawiya Control keeps 24 hours watch on Channels 16 and 22.

Vessels approaching the anchorage area must give the following information when possible:

(a) Ship's name and flag.
(b) Cargo nomination (if available).
(c) Distance between ship's rails and manifold.
(d) Manifold sizes and derrick capacities (S.W.L.).

Cargo transfer is carried out through VHF Channel 12 and/or Storno Walkie Talkie radios as the situation may require under the Mooring Master's Supervision.

Tankers should have the port derrick rigged before berthing and capable of lifting 10 tons if nominated for S.A.L.M. berths and 7 tons for C.B.M.2.

BERTHING: There are 3 off-shore berths with the following descriptions:

1 *Conventional Buoy Mooring Berth:* Named C.B.M. No. 2 (Clean product berth). Lat. 32° 48′ 07″ N., Long. 12° 42′ 52″ E.

Vessels will lie in this berth on a heading of 318° (T) approximately. Using 2 anchors, each with about 7 shackles in water. Depth of water 21 m. approximately. Size of vessels allowable for this berth is 5,000 – 20,000 d.w.t. The berth is 1,200 m. offshore.

2 *S.A.L.M. Berths:* (Single Anchor Leg Mooring) for crude imports/fuel exports.

S.A.L.M. No. 1: Buoy is moored approximately 1,900 m. offshore with an average depth of 26 m. in position:

Lat. 32° 48′ 29″ N., Long. 12° 41′ 55″ E.

The berth is designed for vessels of 10,000 to 100,000 d.w.t. but not limited on size.

S.A.L.M. No. 3: Buoy is moored approximately 1,500 m. offshore with an average depth of 30 m. in position:

Lat. 32° 48′ 23.8″ N., Long. 12° 41′ 08.7″ E.

The berth is designed for vessels of 15,000 to 140,000 d.w.t. but not limited to the above mentioned sizes.

No lights have been installed as yet to mark C.B.M. No. 2.

S.A.L.M. Berths No. 1 and No. 3 are each equipped with a radar reflector and navigation light installed on the buoy deck with the following characteristics:

Colour: 1 white, 1 amber.
Code: Each transmitting morse letter "U" every 12 secs.

On all these berths, hose connection is carried out by ship's crew under Mooring Master's supervision.

HEALTH: Local Authorities will board vessels to grant pratique. Vessel must report any suspected disease or fever to local Health Authorities. There are shore facilities to treat serious injuries or major accidents.

GENERAL: No shore leave. No crew changes for non Libyan flag vessels. Fire and Safety regulations will be strictly enforced at all times. No fuel, diesel, fresh water or supplies available. Lifeboat not to be lowered in water.

AGENCY: See "General" before first port.

BENGHAZI: 32.06 N. 20.03 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and that which may fall within any new breakwater eventually constructed up to the bridge across the shallow water basin at the Eastern side.

b) The water area known as the navigational channel outside the harbour commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of 1 mile (2 km.).

RESTRICTIONS: Vessels are not permitted to enter harbour between sunset and sunrise.

MAX. SIZE: All types of ships with 27 ft. draft and less in Wintertime and 28 ft. and less in Summertime are safe to enter the harbour.

RADIO: Benghazi Port Radio, from 0800 to 1800 hrs., call sign 5AV, R/T 2182, V.H.F. Channel 16.

BERTHING:

Quay No.	*Length m.*	*Depth m.*
1	310	9
2	280	9
3	170	9
Libya No. 1	40	5.5
Libya No. 2	130	5.5
Libya No. 3	115	5.5
F.J. No. 1	135	5.5
F.J. No. 2	135	5.5
F.J. No. 3	135	8

Note: F.J. No. 3 not in use at the present time.

STEVEDORES: All stevedoring operations and formalities to be done by Agent, 2 stevedoring companies will be formed in the near future.

CRANES: Electric floating crane available up to 100 tons.

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside. Should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agents. A notice of 48 hours needed, advisable for Chief Engineer to check what grades are available.

REPATRIATION: Facilities exist without difficulty.

AIRPORT: Benina airport situated 29 km. away.

WATCHMEN: Compulsory, provided by Port Authority.

CONSULS: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, Syria, U.K., U.S.S.R.

REPAIRS: Minor repairs are possible. Also see "Tripoli".

POLICE/AMBULANCE/FIRE: Police 99, Ambulance: 2131, 2132, 2281, Fire: 5555, 5599.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Port extension project underway.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

DERNA: 32.45 N. 22.40 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and an imaginary line connecting the end of the breakwater and the damaged breakwater existing at the Southern side.

(b) The water area known as the navigational channel outside the harbour commencing as from harbour entrance for a distance of 1 km.

RESTRICTIONS: Vessels are not permitted to enter harbour between 2100 hrs. and 0600 hrs.

MAX. SIZE: Depth of Inner Bay – 8 m., Entrance – 9 m. and Outer Channel 10 m.

RADIO: Recommended that radio messages for Agents be sent via Malta Radio or any other near coast station.

BERTHING: Old Quay, Length 120 m., depth 6 m. New Quay, length 240 m., depth 9 m.

STEVEDORES: All stevedoring operations and formalities to be done by Agent. Two new companies will be formed in the near future.

TANKERS: Max. size 18,000 d.w.t. Max. draft 11.5 m. if weather conditions permit.

MEDICAL: Available.

FRESH WATER: Available alongside, to be supplied by Port Authority through ship's Agents.

FUEL: Available through Agents, a notice of 24 hours needed. Advisable for Chief Engineer to check what grades are available.
REPATRIATION: Available via Benghazi.
WATCHMEN: Compulsory, provided by Port Authority.
CONSULS: Nearest consuls situated at Benghazi.
REPAIRS: Not available. See "Tripoli".
POLICE/AMBULANCE/FIRE: Call Port Manager, 2063 and 2074.
SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.
DEVELOPMENTS: New port facilities to include 1 quay, length 280 m. for general cargo and container vessels, depth alongside 9 m. – 10 m. One quay, length 500 m., depth alongside 9 m. – 10 m. This quay will have 4 berths, one for grain cargoes, one for the Port Police, one for vessels loading and for mooring of a drydock.
AUTHORITY: Port Manager and Harbour Master.
AGENCY: See "General" before first port.

ES SIDER: 30.38 N. 18.22 E. (See Plan Book)

Also see "General" before first port.

DOCUMENTS: Oasis acts on behalf of tankers loading at Es Sider and shall prepare all crude oil loading documents. Germa Shipping and Stevedoring Co. is contracted by Oasis for all normal agency duties. This agency is currently the only agency used by the four Owner Companies.

After a tanker arrives at the anchorage or is moored in a berth, an agency representative will come aboard, accompanied by Jamahiriya Customs Officials and Immigration Police. The agency representative will present certain clearance forms to the Master, which should be completed as soon as possible. After these forms have been signed by the Master, they shall be returned to the agency representative, who shall make the necessary distribution.

Crude oil loading documents shall be prepared by the Oasis documentation group prior to and during loading operations, to expedite their final completion. When the tanker has been loaded, the documents shall be completed and endorsed by the Customs Officer and by the representative of the Secretariat of Petroleum. The documents shall then be distributed aboard the tanker and elsewhere, in accordance with previously arranged standard documentation schedules.

The tanker shall be considered clear to depart Es Sider when the crude oil loading documents have been delivered to the Master.

Jamahiriya Customs Authorities:

(a) List of the crew with a declaration of their personal belongings (Form supplied by the Customs Authorities).
(b) List of tanker's stores.
(c) List of passengers.
(d) Six copies of Cargo Manifest for cargo to be discharged at Es Sider.
(e) One copy of Cargo Manifest for cargo in transit.

Blank copies of "Certificate of Discharge" are placed on board every vessel at Es Sider. These certificates must be endorsed by the Customs, or other recognised authority, on completion of discharge. One completed certificate must then be forwarded to the Libyan Customs Authorities according to the instructions contained in the "Certificate of Discharge". At least one further copy should be retained on board, to be produced to the Customs on any subsequent voyage to a Libyan port. Failure to produce the certificate may result in delays to loading, or even rejection of the vessel by the Libyan authorities.

PILOTAGE: Vessels to be moored, anchored or manoeuvred will only be boarded within the recommended anchorage area (Pilot boarding area centred at Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E.). A vessel is not considered arrived until it is in the recommended anchorage area. The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area. All manoeuvring of ships shall be done only in accordance with the advice of an Oasis Mooring Master, subject to the understanding that in all cases and circumstances the Master shall remain solely responsible for the safety and proper manoeuvring of the tanker. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

Tankers not equipped with pilot hoists shall provide a pilot ladder, or ladders, constructed and placed in accordance with latest Safety of Life at Sea Convention. Tankers having a large freeboard are requested to use a combination of pilot ladder and accommodation ladder, which is also in accordance with the above Convention. A ship's officer, plus the necessary crew members, shall be present at the ladder or hoist to ensure the safe embarkation and disembarkation of Mooring Masters and Port Authorities. All such ladders and hoists shall be thoroughly tested and inspected before the vessel arrives in the recommended anchorage.

The Mooring Master shall be in direct control of all tanker communications while in the Terminal area. Any unauthorized communications will result in the immediate cessation of all operations excepting clearing of the berth. Such tanker immediately nullifies its Notice of Readiness.

ANCHORAGE: The recommended anchorage area is within an area centred on Lat. 30° 41′ 54″ N., Long. 18° 23′ 30″ E. with a radius of 1,000 m. The anchorage area has a sandy bottom with a depth of approximately 110 ft.

Great care should be taken approaching anchorage from the North or N.W. to give mono-moorings a wide berth.

APPROACHES: Coastal landmarks in the area are as follows:

(a) The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at Lat. 30° 38′ 00″ N., Long. 18° 21′ 01″ E. and displays a fixed red light at night.
(b) A communications tower in the Terminal area is a most conspicuous landmark. It is located at Lat. 30° 37′ 59.5″ N., Long. 18° 20′ 54.5″ E. Approximate height above chart datum of this tower is 246 ft. It is lighted at night with 2 vertical red lights, and has a height above ground of 200 ft.
(c) A radio antenna tower which is 395 ft. above sea level is located at Lat. 30° 36′ 56″ N., Long. 18° 16′ 55″ E. At night this tower is lighted by an occulting red light, flash two seconds, eclipse one second, and there is a fixed red light halfway up the mast. It is flanked by two dish shaped aerials.
(d) There is a water tower at Ras Lanuf Terminal with a highest elevation of 179.5 ft. above sea level located at Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is white in colour. A white light, characteristics:– flash two every 5 seconds, height above sea level 163 ft., is mounted on the seaward side. There is also a fixed red air warning light on the top of the structure.
(e) An omnidirectional aircraft radio beacon is situated at Lat. 30° 37′ 29.8″ N., Long. 18° 21′ 07.7″ E. transmitting "OJ" 5 times every 60 seconds on 300 kHz.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of the Mooring Masters at the Terminal and should be disregarded by any tankers using the Terminal.

MAX. SIZE: The following are the approximate berth limitations:–

		Length	Draft
No. 1 Berth		920 ft.	51 ft.
No. 2 Berth		890 ft.	51 ft.
No. 3 Berth		950 ft.	51 ft.
No. 4 Mono-Mooring		1150 ft.	62 ft. 6 in.
	Max. beam 158 ft.		Max. d.w.t. 250,000
No. 5 Mono Mooring		1,165 ft.	73 ft.
	Max. beam 184 ft.		Max. d.w.t. 300,000

Note: No. 4 Mono-Mooring: The max. length overall is 1150 ft. The max. draft to which vessel can load in good weather is 62 ft. 6 in., and when vessel lies within 30° of loading line. During adverse weather causing vessel to roll and pitch, draft may be restricted to 58 ft. The max. draft limitation in good weather is due to depth to top of loading line being 63 ft. at distance of 1,900 ft. from buoy.

Length, beam and d.w.t. could all be extended provided draft does not exceed 62 ft. 6 in.

All the above limitations are based upon standard tankers in normal weather conditions.

Oasis reserve the right to vary the above limitations, depending on vessel's freeboard, (OBO's – ore/oil vessels, etc.) and also the prevailing weather conditions.

RADIO/VHF: Oasis maintains direct communication with Tripoli Radio, details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Oasis also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Oasisoil Pipeline Tripolilibya. Cables addressed in this manner will be received directly by the Oasis communications centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider. Vessels with a telex facility on board should telex directly to 20158 Oasislibya, Attention Marine Superintendent.

Within 6 hours of clearing its last port for its voyage to Es Sider, each tanker shall provide the Terminal with the following information by cable addressed to Oasisoil Pipeline Tripolilibya:

(a) The name of the tanker.
(b) The name of the port from which the tanker last cleared.
(c) The date and hour of the ETA at Es Sider Terminal.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 72 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Pipeline Tripolilibya, or telex as above, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 24 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Pipeline Tripolilibya, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.
(c) Quantity of cargo required, maximum draft on departure Es Sider, and deballasting time required before vessel can commence loading.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 12 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Pipeline Tripolilibya, or telex as above, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

4 hours before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the Terminal by cable addressed to Oasisoil Pipeline Tripolilibya, or telex as above, and also pass the same by VHF radio, providing the following information:

(a) The name of the tanker.
(b) Precise ETA at Es Sider.

If the tanker is equipped with a FM radio-telephone in the 156–162 MHz band, communications may be established with the Es Sider Terminal dispatcher by calling on Channel 16, 156.8 MHz. This frequency is monitored continuously. The range of the Terminal station is approximately 100 miles.

VHF Channel 12 is also available for use as a marine working frequency, although it is not monitored.

When the Master submits his first estimated time of arrival to the Terminal he shall indicate if the vessel is to load a part cargo, in which case it should be stated clearly whether it is first or second part of loading.

Jamahiriya Local Time is GMT plus 2 hours (GMT plus 1 hour in Winter).

N.B. Vessels are requested to refrain from using VHF Channel 8, as this is used as a tanker loading frequency, until such time as other frequencies are available and equipment is installed.

ARRIVAL PROCEDURE: Tenders to load crude oil cargo will normally be accepted and berths will be assigned to tankers in order of arrival, provided they have valid nominations for cargo and carry clean ballast, if any, and are in all respects equipped and ready to berth. In the event that berthing is delayed on account of weather, tankers will normally keep their position in line. Tankers required to leave Terminal area on account of weather (port closed) shall maintain contact with the Terminal via Tripoli Radio or VHF so they will be available when the weather moderates. Oasis reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the Terminal may be open to other tankers. Oasis Marine Superintendent's decision shall be final.

As soon as practical after arrival, all tanks will be inspected for evidence of oil in ballast. Similar inspections will continue during discharge of ballast. If evidence of oil appears at any time, the tanker shall be rejected forthwith and shall not again be accepted until it is shown the ballast can be properly discharged.

If during inspection or during progress of loading it is revealed that tanks are not tight or that oil is leaking from the tanker, it shall be rejected from further loading. Tanker shall not be later accepted for loading unless satisfactory evidence of repair is submitted, duly certified by Lloyd's or ABS Surveyors, or other recognised surveyors.

Upon arrival at the Terminal of Es Sider, the Master shall give Notice of Readiness to load by wireless or VHF but not before one or other of the following events shall have transpired:

(*a*) The Master shall have received the Mooring Master on board; or
(*b*) The Master shall have dropped anchor in the anchorage.

However, the Notice of Readiness shall not be accepted unless the tanker is in every respect ready to load.

In reporting readiness to load, the Master of any vessel arriving at Es Sider for the first time shall state whether the flanges on the manifold of his vessel are such as to permit hose connections without modification.

A tanker shall have sufficient ballast for safe handling. Careful watch of the weather, frequent interchange of information between the tanker and the Terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker with minimum of ballast and thereby reduce the possibility of violating sea pollution requirements.

HEALTH: Tankers shall fly "Q" on arrival by day and display a red light over a white light at night to indicate quarantine conditions.

VHF: Tankers shall keep continuous watch on VHF Channel 16 when at anchor in the anchorage. Failure to keep watch on Channel 16 may lose them their berthing turn.

TUGS: Not required. Oasis maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

BERTHING: The 3 (7-Buoy) conventional berths are approximately 1 mile from shore and in approximately 65 ft. of water. Central Spar Buoys of these 3 berths are:

Berth No. 1 (Easternmost)
  Lat. 30° 38′ 58″ N.
  Long. 18° 22′ 43″ E.
Berth No. 2 (Middle)
  Lat. 30° 39′ 06″ N.
  Long. 18° 22′ 06″ E.
Berth No. 3 (Westernmost)
  Lat. 30° 39′ 35″ N.
  Long. 18° 21′ 53″ E.

To the West of the 3 conventional berths is a mono-mooring berth. It is about 2 miles from shore in approximately 80 ft. of water.

Berth No. 4
  Lat. 30° 40′ 31.5″ N.
  Long. 18° 21′ 43.7″ E.

To the East of the 3 conventional berths is a second mono-mooring berth. It is about 3.5 miles from shore in approximately 100 ft. of water.

Berth No. 5
  Lat. 30° 39′ 55.95″ N.
  Long. 18° 25′ 19.13″ E.

Three lightbuoys have been placed on the North, East and West Cardinal points of the manoeuvring circle for Berth No. 5. The manoeuvring circle circumscribes an area 4,000 ft. from the berth centre.

Conventional Berths:

The Mooring Master may reject a tanker if he deems that the tanker is not properly equipped; or that the tanker fails to have a full complement of trained personnel capable of carrying out all the berthing procedures and in particular the hose connecting as directed by him; or that the tanker has dirty ballast; or that the tanks are not suitable for carrying crude oil. Tankers having a separate system of ballast tanks shall be permitted to discharge ballast and load oil simultaneously; however, approval shall first be obtained from the Oasis Marine Superintendent.

Tankers shall be equipped with an adequate propulsion unit as certified by an appropriate Survey Society. Tankers with inoperative or partially inoperative propulsion units shall be rejected. No repairs shall be made while the tanker is in or near a berth.

Tankers shall have 2 bower anchors and ground tackle in good working condition and in sizes and class to qualify under either Lloyd's or ABS ratings, even though they may have been classified by other Societies, Vessels should be capable of running out a minimum of 165 fathoms (11 shackles) of chain on each anchor in order that they may be berthed at one of the sea loading berths.

Tankers shall have at least one winch, in good working order, on the poop deck capable of heaving on two ropes simultaneously. The winch drums must be of such a size to be able to take at least 5 turns of mooring rope.

Tankers shall have one winch on the after end of the main deck, so sited that ropes led through the fairleads at the after end of the main deck, port and starboard, can be hove on. The winch drum must be of such a size to be able to take 5 turns of mooring rope.

All tankers shall have suitable stoppers for all lines and stoppers for wire ropes. Wire ropes are a part of the permanent berths and all tankers shall pick up the wire ropes unless an exception is approved by the Marine Superintendent. The exception may be based upon tanker having suitable wires with nylon or synthetic rope tails for ease of handling by launch and launch crews. These tails should be of appropriate strength and of a suitable length to enable them to be manhandled on to the mooring buoy hooks. Constant tension winches may not be used except where they can be solidly locked and the constant tension feature not used. The making fast of berth mooring wires on ship's reels will be treated as a last resort to be used only in the absence of sufficient bitts.

Tankers shall have at least 9 good synthetic fibre lines of not less than 9 in. circumference and at least 120 fathoms in length, with an eye spliced in each end. These lines shall be placed out free for running; 3 on the after end of the main deck, and 6 on the poop deck. The 3 lines on the after end of the main deck shall be married together so that if the need arises the double length can be run on either side of the tanker. The Mooring Master may require the use of additional ropes or wires to effect a safer mooring, and these are to be supplied on his advice.

Tankers shall be equipped with blocks, tackle, booms, runners, and sundry equipment to efficiently hoist the submarine hoses (5 tons at conventional berths and 10 tons at monobuoys) from the sea bottom. Other necessary equipment includes wrenches, gaskets, nuts, bolts, strops, drip pans, sawdust, drift pins, etc. The derrick should be rigged with a single wire runner of sufficient strength to be able to lift 10 tons.

After the tanker is securely berthed, the submarine hoses shall be lifted amidships on the port side. The base lift may weigh up to 10 tons. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

It is believed that the facilities at Es Sider are similar to those of other Mediterranean Terminals, and that, generally speaking, no unusual or unique equipment shall be required by the tankers.

Shore Stops: If it is requested by the Master of the tanker that the cargo flow should be stopped from the shore at a predetermined tonnage, it must be clearly understood that Oasis Oil Company of Libya, Inc. will not be held responsible for any error, and that in the case of overloading, the excess cargo cannot be pumped back ashore.

Vessels are encouraged to load and deballast at the same time providing that segregated ballast tanks or double valve separation exists.

Mono Moorings: Nos. 4 and 5 Berths are single point buoy moorings. The body of the buoy is secured in a fixed position by means of 8 moorings, whilst the top of the buoy is in the form of a turn-table, allowing the ship's moorings and hoses to rotate and take up the position the vessel naturally lies due to wind, sea and current conditions.

Vessels are normally moored by 2 bow lines only, these being provided by Oasis. A selection of wire strops and shackles will also be placed on board for mooring purposes. The 2 mooring lines are hove in until the length of chafing chain to O.C.I.M.F. standards is brought inboard. According to the mooring arrangements, the Mooring Master will advise on the method of securing the vessel. Ship's wires or ropes may be required to back up mooring equipment supplied by Oasis. Smits towing brackets will be utilised when fitted in suitable position and if they are of adequate strength and size. Other O.C.I.M.F. standards chain compressors and fittings are acceptable. However, it should be noted that 2 ropes are provided and therefore 2 chafe chains must be hove inboard and properly secured. Under no circumstances shall the ship be moored with the lead-in ropes.

On advice from Oasis that a vessel is to load at the mono moorings, she will have the following ready before the Mooring Master boards:

(*a*) Port side derrick to be rigged ready to lift various wire strops, shackles, and hose securing equipment. This equipment will be placed on board at the same time as the Mooring Master boards, or as soon as possible thereafter, who will advise on its disposition.
(*b*) Forward, the vessel should have ready 2 good synthetic fibre mooring lines, at least 9 in. circumference, 2 good 4 in. circumference rope messengers at least 400 ft. long, or two 3 in. wire messengers of the same length, each fitted with a suitable screw shackle. Also a crowbar, spikes and hammers.
(*c*) No moorings will be required aft.
(*d*) The vessel shall make a good lee on the port side, taking due care that ladders and accommodation ladders are clear of the tanker's manifold area and overboard discharges.

It is essential on this berth that the hoses be picked up immediately mooring operations are complete. On advice from the Mooring Master, part of the ship's crew must be standing by at the port manifold for this operation.

Hose lifting and connecting operations are basically the same as in conventional berths, except that hose strings are floating and therefore may require bowsing in rough weather.

Vessel's engines must be ready at all times, and under no circumstances is the propeller to be turned ahead without prior consent of the Mooring Master. Failure to comply with this may result in cessation of operations, and possible rejection as being unsuitable for a single point mooring. Any damage caused to the berth or hoses as a result of turning the propeller ahead without consent will be charged against the vessel.

In adverse weather, a continuous lookout will be required on the forecastle head, by responsible persons, to keep watch on the moorings, manifold and hoses.

In adverse weather the Mooring Master may require cargo to be loaded, in the initial stages, into the forward compartments and this should be complied with when requested.

Vessels are encouraged to load and deballast at the same time, where this is possible. In the case of vessels with permanent ballast tanks, this ballast should not be started without first consulting the Mooring Master.

LOADING: Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, shall be performed entirely by the ship's crew. Lack of co-operation by the crew in this operation will result in the rejection of the tanker, her return to the anchorage and any consequent loss of loading turn until crew are prepared to perform this work.

Mooring Masters shall report unsatisfactory conditions to the Oasis Marine Superintendent, who may reject the tanker until corrections are made. All costs accruing from these conditions shall be for the tanker's account.

Loading Rates:

Conventional Berth Nos. 1, 2 and 3	40,000 b.p.h.
No. 4 Mono-Mooring	30,000 b.p.h.
No. 5 Mono-Mooring	50,000 b.p.h.

BALLAST: 4 hours deballast time (before commencing loading) is the maximum time allowable in consideration of the open and exposed nature of the berths. Vessels which take longer to deballast put the berth at unacceptable risk if the weather deteriorates. Should a tanker be unable to comply with this stipulation, Oasis Marine Superintendent may berth more suitable vessels ahead of her if poor weather conditions dictate. Vessels with an unduly long deballast time may be rejected.

There are no facilities at Es Sider for the discharge of dirty ballast, and vessels arriving with dirty ballast will not be authorised to deballast in the vicinity of the Terminal. Any tanker rejected because of dirty ballast or sea pollution will automatically nullify its Notice of Readiness to load and thereby relinquish any right to priority of loading position.

It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his tanker. This includes oily water from bilges, residuals from previous voyages or any other matter that may result in pollution of the sea. Owners and Masters are invited to examine all laws concerning pollution of the sea, especially in regard to the Mediterranean Sea area. Inspections may be made by the Libyan Ports & Lights Authorities, whose opinion of the cleanliness of the ballast shall be final.

The waters in and adjacent to the Terminal of Es Sider must not be polluted, and only clean oil-free ballast may be discharged anywhere inside of a line 100 miles to seaward and roughly parallel to the Libyan Coastline.

Prior to acceptance all tanks will be inspected for evidence of oil in the ballast and during discharging similar inspections will continue.

Masters are warned that when disposing of dirty ballast outside Libyan waters, all pipe-lines, sea-suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean so that there will be no chance of even a small amount of pollution when the clean ballast is pumped out.

Any vessel required to return to a position at least 100 miles offshore for cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Master's attention is directed to Es Sider Notices concerning oil pollution and to the serious consequences of discharging dirty ballast, besides having his tanker rejected.

MEDICAL: Medical assistance shall be on an emergency basis only. The Doctor will only board a vessel if it is physically impossible for the patient to attend the clinic ashore and there is no priority need for the Doctor's services on shore. Normally the Doctor will require the accommodation ladder rigged for boarding.

If it is necessary to land a patient at Es Sider, he must be accompanied by an officer able to speak English or Arabic. Patient and accompanying person must have their Passports and International Certificates of Vaccination and Immunisation, and the Authorities must be advised prior to their leaving the ship.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

WATCHMEN: Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

CUSTOMS ALLOWANCES: Cigarettes, cigars, matches, tobacco, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Customs seal from the time of arrival in port until such time as the tanker has left territorial waters.

Each officer and crewman is allowed the following ration for each day the tanker is in port: *(a)* 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. *(b)* One litre of beer or 0.5 litre of wine. *(c)* Special provisions are sometimes made for the Master.

CONSULS: Consulates are located in Tripoli, which is approximately 650 km. by road from Es Sider. Some countries having Consulates are: Algeria, Argentina, Belgium, Brazil, Chad, Czechoslovakia, Denmark, Finland, France, Ghana, Greece, India, Italy, Japan, Jordan (represented by Indian Embassy), Kuwait, Lebanon, Morocco, Nigeria, Nationalist Republic of China, Pakistan, Saudi Arabia, Spain, Sudan, Syria, Sweden, Switzerland, Tunisia, Turkey, United Kingdom, Union of Soviet Socialist Republics, Venezuela, West Germany and Yugoslavia.

REPATRIATION: No facilities exist for crew changes or repatriation.

TIME: GMT plus 2 hrs.

GENERAL: The Terminal of Es Sider operates 24 hours a day, 7 days a week, while weather permits.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of Mooring Masters at the Terminal, and should be disregarded by any tankers using the Terminal.

Oasis maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master. Any service and facilities provided by Oasis, including the services of the Mooring Masters, launches, or berthing equipment, are at the vessel's risk. The furnishing of a Mooring Master, launches, or other services and facilities shall not be construed to be, or give rise to, a personal contract. Oasis shall have benefit of all exemptions from the limitations of liabilities to which an owner or a vessel is entitled under the laws of the United States of America.

When a Mooring Master and his assistants, possibly apprentice Mooring Masters, are assigned to a tanker, the tanker shall supply them with accommodation of the same standard and meals in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required unless to comply with Moslem religious teachings. The intent is that the furnishing of meals to Oasis personnel be kept to the minimum, compatible with the ordinary working of the Terminal.

No boats may be lowered into the water, except in an emergency.

Adequate deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during hosing and loading operations. During the discharge of ballast at night, the sea area around the vessel must be adequately lighted. If vessel is berthed on mono-mooring buoy, in addition to the foregoing, lights MUST be provided on forecastle head and over bow to facilitate supervision of moorings.

Stores of any sort shall not be handled while tanker is under "Notice of Readiness". No stores shall be handled while the tanker is in or near a berth.

Use of anchor marker buoys recommended.

Should any tanker or craft become an obstruction in any part of the Terminal or approaches thereto, or in any area of the submarine pipe-line. Oasis shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the Owners. All expenses of such removal shall be borne by the tanker or craft or by those owning it at the time of the accident causing the obstruction, and Oasis shall be entitled to reimbursement by them for any such expenses incurred by it.

Power must be available at all times on all deck winches and on anchor windlass while the vessel is in the moorings.

If mooring wire winches are used, wires should be secured so as to enable them to be quickly let go from the vessel without damage.

Only in an emergency shall the tanker manifold valves be closed against crude flow, and then only with the Mooring Master's consent.

Should communications fail, the cessation of loading may be effected by a continuous sounding of the ship's whistle. This procedure will then stop the loading of all tankers in the area.

The bridge and/or control area shall not be locked nor otherwise arranged to prevent immediate entry at all times by the Mooring Master.

In adverse or marginal weather conditions Mooring Master may request that extra personnel be placed on duty on deck for tending moorings or hoses as required. Masters are advised to comply with this request.

The Mooring Master shall witness the plugging of all scuppers. Failure to plug scuppers shall result in the tanker's rejection.

The presence of unauthorized craft alongside a tanker will render it unacceptable. It shall be the duty of the tanker's personnel to clear all such craft away from the tanker.

When tankers are loading or discharging crude oil or ballast, and while tank tops are open or ullage plugs are open, boiler tubes shall not be blown. Every precaution shall be exercised to prevent sparks escaping through the funnel or stack or from the galley stack. The Mooring Master may demand all fires extinguished if he deems it necessary for safety.

Under the interpretation accorded to the Libyan "Boycott of Israel" Law, it is considered to be a violation thereof if a vessel calling at a Libyan terminal has on board any item of Israeli origin, irrespective of the nature thereof, including but not limited to manufactured products, fruit and vegetables, as well as empty crates, cartons, bottles and paper wrappings, regardless of the country where any of the foregoing was obtained. The law is strictly enforced, and the minimum penalty for violation thereof normally includes a fine and confiscation of all such items. Fines can exceed $1,000.

Charts: B.A. 3344 and Italian No. 431.

SHORE LEAVE: None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

AUTHORITY: Operated by Oasis Oil Company of Libya, Inc. Owned by The National Oil Corporation of Libya, Amerada Petroleum Corporation of Libya, Continental Oil Company of Libya and Marathon Petroleum Libya Limited.

Oasis Oil Co., P.O.Box 395, Tripoli, S.P.L.A.J. *Tel:* 31116/29 (ext. 6-212). *Telex:* 20158 Oasislibya. *Cables:* Oasisoil. *Contact:* Marine Superintendent.

AGENCY: See "General" before first port.

MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan Book)

Also see "General" before first port.

LOCATION: Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately 1 mile Eastward of Marsa al Hariga.

APPROACHES: Vessels bound for the terminal should approach the harbour of Tobruk from the North-East with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept in line with the conspicuous German War Memorial on the South side of the harbour.

When about 4 miles from Tobruk Point, course should be altered to 224.5° (true) to bring the leading lights on Marsa Umm esc-Sciausc in line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-draft vessels sailing from the terminal should avoid navigating North-Westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

DOCUMENTS:

A. Customs Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 copies of a Crew List.
2 copies of a List of Ship's Stores.
2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
4 copies of a Passenger List.
Last Libyan (cargo discharge certificate) to be checked for validity on boarding, if not correct vessel has to wait outside for ship's purposes.

B. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 copy of a Crew List.
1 copy of a Passenger List.
1 copy of the Ship's Manifest.
1 copy of a Port Declaration (form will be made available to each vessel on arrival).

PILOTAGE: Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

ANCHORAGES: If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

Anchorage position for tankers waiting to be berthed is 1.5 miles N.E. of the Outer Buoy.

MAX. SIZE: Max. Summer deadweight 150,000 long tons. Two berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a minimum depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water. Max. draft 56 ft., freeboard at any time whilst deballasting must not exceed 55 ft.

A buoy berth is situated some 1,200 ft. from the shore approximately 1,800 ft. West of the Jetty Berth No. 2. There is a minimum depth in the buoy berth and its approaches of 49 ft. However, the buoy berth is not currently in use.

HEALTH: The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessel's arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

COURTESY FLAG: On entering the territorial waters of the Libyan Arab Republic which commence 6 miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan flag must be hoisted before entering the harbour of Tobruk. Should a vessel arrive without a Libyan flag on board, one may be obtained from the Company's Berthing Master when he boards at the Outer Buoy.

ARRIVAL MESSAGES: In addition to their arrival messages to Agent, vessels must pass an arrival message to the terminal via the company's radio station giving at least 72 hours notice of ETA and advising their estimates of:

(a) The quantity of cargo (in long tons) to be loaded at the terminal.
(b) The cargo loading rate (in long tons) per hour.
(c) The quantity of ballast (in long tons) to be discharged ashore at the terminal.
(d) The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material change, a further ETA message must be passed via the company's radio station.

RADIO: Tobruk Radio 5 A1 (MF & HF). Position: 32° 02′ N. 24° 00′ E. Frequency: 420, 500 A1, A2, 0:5 kW. 4241 kHz at 2130 GMT, 8480 kHz at 1730 GMT, 16963 kHz at 0930 and 1330 GMT. All using A1 0:5 kW. *Note:* Station owned by Arabian Gulf Oil Company. Company telegraphic address: "Injaz Tobruk". Telex: No.: Agoco Ly 50023. All times given are GMT. Station keeps watch on 500 kHz during 24 hours.

TUGS: For berthing and unberthing at the terminal, vessels will be required to use the 2 diesel tugs which are available at the terminal. Each of these diesel tugs has a bollard pull of approximately 25 tons.

BERTHING: *Jetty:* Vessels will berth on the jetty starboard side alongside, depending on the prevailing weather conditions, though starboard side alongside is preferred. Each berthing head is "T" shaped and is protected by 4 breasting dolphins.

All moorings, except the backsprings to the outer breasting dolphins at Jetty Berth No. 1, attached to quick release hooks.

Buoy Berthing: (CURRENTLY NOT IN USE). Berthing/unberthing in daylight only.

Vessels will berth heading East or West depending on the prevailing weather conditions, though head East is preferred. The moorings consist of four buoys, 1 buoy being on each bow and 1 buoy on each quarter.

In addition to the vessel's mooring of 2 ropes to each buoy, the mooring wires provided by the company to each buoy must be utilised and vessels moored to the satisfaction of the company.

The company's Berthing Master will remain on board the vessel whilst the vessel is in the buoy, to supervise and co-ordinate the ballast discharging and loading operations.

HOSES: *Jetty:* Ship-shore connections, 4 flow booms with suspended rubber hoses, diameter of hoses 12 in. Flange size and rating 12 in. ASA 150. Full range of standard adapters available.

Buoy Berth: (CURRENTLY NOT IN USE). Ship-shore connections, 3 flexible hoses, 2 crude oil loading, 1 ballast discharging, diameter of hoses 12 in. Max. lift from ship's equipment 5 tons. Flange size and rating 12 in. ASA 150.

OIL BARRIER: "Gemlen" floating anti-pollution booms on reels at jetty heads. Boat with chemical dispersants standing-by.

BALLAST: Vessels should make every effort to arrive at the terminal with clean ballast and with the minimum quantity for safe handling under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by the company, unless it is clean ballast, carried in tanks which are completely isolated from the vessel's cargo system. However, the discharge of such ballast into harbour waters must not be commenced until the ballast has been inspected by a company official, and he has certified that it is in order to commence discharge.

Ballast can be accepted into the company's store tanks at rates up to 4,500 t.p.h. from the jetty berths. Ballast is discharged ashore over the jetty by way of a loading boom. Ballast is discharged ashore from the buoy berth through a separate 24 in. ballast discharge line connected to a 12 in. flexible hose. Max. quantity 35,000 tons.

LOADING: Cargo loading at each jetty berth is by means of four 16 in. flow booms to which 12 in. flexible hoses are attached. Cargo loading at the buoy berth is by means of a 34 in. submarine line to which two 12 in. flexible hoses are attached.

This system permits a max. loading rate of approximately 8,000 t.p.h. over each jetty berth, and 4,000 t.p.h. through the buoy berth. The actual loading rate for a particular vessel will be determined prior to the commencement of loading by agreement between the Master and the Company.

Jetty: Method: gravity loading, max. head 360 ft. rate regulated to requirements. Loading rates: 2 lines each 4,000 t.p.h. Two 8,000 t.p.h. maximum.

SAFETY: A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

CONSULS: No Consulates at Tobruk and the nearest locations of Consular officials are as follows:

Benghazi – 445 km. from Tobruk: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, United Kingdom of Great Britain and Northern Ireland, U.S.S.R.

Derna – 175 km. from Tobruk: Turkey.

El Berda (Beida) – 260 km. from Tobruk: Belgium.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes (the Master will be allowed 400); half bottle spirits (the Master will be allowed 1 bottle); 4 bottles of beer or wine per man per day.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS:

1. *Ship's Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ship's garbage is prohibited.
2. *Ship's Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ship's Boats.* Use of ship's boats not permitted within limits of harbour of Tobruk.

SHIPMASTER'S REPORT: April 1983.

Anchorage: Anchorage position for tankers is from 1.5 miles – 2 miles N.E. of the Outer Buoy. Holding ground is bad. As soon as wind increases up to force 7 and swell grows, it is best to heave up the anchor and to proceed to sea and wait, keeping watch on VHF Channel 16.

Many vessels have lost anchors.

Max. Size: Berth No. 1 – Max. draft 56 ft. Berth No. 2 – Max draft 52 ft.

AUTHORITY: General Ports and Lights Administration, P.O.Box 648, Tripoli, Libya.

Operator: Arabian Gulk Oil Co. *Telex:* Agoco Ly 50023. *Contact:* Marine Department or Terminal Manager.

AGENCY: See "General" before first port

MARSA EL BREGA: 30.25 N. 19.34 E. (See Plan Book)

Also see "General" before first port.

FLAG: All ships should fly the Libyan flag, which is plain green, when inside territorial limits. They should make sure that they have a Libyan flag on board before leaving the last port of call. Failure to fly the Libyan flag may result in a heavy fine.

Libyan Law does not permit ships using Libyan waters to retain Israeli flags, stores or literature pertaining to Israel on board, even though these may be normally part of the vessel's navigation equipment.

LOCATION: Marsa el Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ 3″ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

The Brega sea buoy is located in Lat. 30° 27.55′ N., and Long. 19° 35.1′ E.

A bow mooring oil loading fixed structure is located in Lat. 30° 26.0′ N., and Long. 19° 33.9′ E., with a fixed red light exhibited at a height 93 ft. above mean sea level. In addition, the structure is lighted by floodlights.

Brega is radar controlled with the shore installation scanner in position 30° 25′ 02.5″ N., and 19° 34′ 55.6″ E. The height of the scanner tower is 112.2 ft.

The Radio Beacon is located in Lat. 30° 25′ 00″ N., and Long. 19° 34′ 14″ E. The call sign is "MB" and it operates continuously on a frequency of 403 kHz.

A single point mooring is located in position Lat. 30° 26′ 45.26″ N., and Long. 19° 34′ 01.40″ E.

A single flare is located in position 30° 24′ 31.9″ N., and 19° 35′ 49.7″ E. Three other flares are located approximately 700 ft. to the West and S.W. The flares when burning can be seen at extreme distances.

Numerous lighted and unlighted navigational and mooring buoys are located within the restricted area shown on BA Chart 3350. Vessels are cautioned that these buoys may change position due to weather. Vessels are not permitted to enter restricted area shown on Chart BA 3350 without a Brega Pilot on board.

DOCUMENTS: Customs and Immigration Officials will board the vessel, except in adverse weather. All relevant documents are supplied by the Agent. The Master will fill in, sign and stamp the papers. These will then be handed over to the Authorities before clearance for loading is granted.

Letters on ship's business should be addressed to Esso Standard Libya Inc., P.O. Box 385, Essofield, (Marine), Tripoli, Libya, SPLAJ, and should be marked "Marine Documentation Section" (For Esso ships).

Vessels calling at Marsa el Brega should have the following documents in addition to the ship's register.

Customs and Ports and Lights Authorities Forms:

A. Port Declaration – Form P.L. 7 (1 copy)
B. (Title in Arabic) Inward Report – Form C.L. 128 (3 copies)
C. Cargo Manifest Inward – Form C.L. 1 (3 copies)
D. Report Outwards – Form C.L. 4 (3 copies)
E. Crew Manifest Inwards – Form C.L. 31 (2 copies)
F. Export Manifest Form C.L. 155 (6 copies)

G. *Certificate of Discharge:* If vessel has not called at a Libyan port since October 18th, 1973, then a letter is required from the Master, addressed to the Secretariat of Petroleum, stating that he undertakes to mail the Certificate of Discharge, for the present petroleum cargo, from the port of discharge and retain one signed stamped copy on board. It is essential that the Certificate of Discharge for any petroleum cargo loaded after October 18th, 1973, be on board the vessel and it must be clearly signed and stamped by the Authorities at the port receiving the last Libyan cargo. Vessels may incur delays or be refused loading permission where this is not complied with.

Required when ships clear inwards, lists each member of the crew and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with crew member's signature opposite name or rank. This form is ordinarily supplied in advance so that it may be completed prior to arrival at Brega. Ships making their first call at Brega must necessarily complete after arrival, but will then receive advance forms for future calls.

Cargo ships also require ship's cargo manifest form (3) with same information as C. above.

Ship's Forms required by Customs:

A. Crew List – ship's form (3 copies)

Submitted for inward clearance and containing the following information: List of crew members, type of vessel, nationality, date of arrival, place from which arriving, destination, and estimated date of departure. Sign and stamp with ship's stamp.

B. Stores List – Ships form (2 copies)

A list of ship's stores required when ship clears inward. Sign and stamp with ship's stamp.

C. Clearance from Last Port – Port's form (1 copy)

Required for inward clearance to load at Brega. Must be properly signed and stamped by Officials of port of previous call. There are exceptions on requirement for this clearance dependent on ship, nationality and last port of call.

Other Forms: (Not required of cargo ships)

A. Report of Cargo and Ship's Ullages (original)
B. Tanker Time and Loading Report (original)

(A mimeograph original to be signed by the Master and returned to ship's Agent).

C. Certificate of Cargo Discharge (6 copies)

Master signs and stamps 1 copy at bottom of form, and returns it ashore.

The other 3 copies are completed by Master at port of discharge and stamped and signed by Customs Authorities. 1 copy should then be air-mailed to Ministry of Petroleum, Tripoli. The second copy air-mailed to Marine Superintendent, c/o Essofield. Marine Division, P.O. Box 385, Tripoli, and the third copy retained on board for presentation when the vessel next calls at Brega. It is essential that the copy retained on board be clearly stamped and signed and the cargo figure should correspond with the cargo figure loaded at Brega.

Notes on Ship's Documentation:

E.S.L.I. no longer supply an agency service. Vessels should nominate Shahat Shipping and Stevedoring Co., which is a government agency for all vessels calling at Libyan oil ports. In the event that Shahat Shipping and Stevedoring Co. has not been nominated, the Master will be required to sign a letter nominating them before permission to load can be given.

Information required by Esso Standard Libya Inc. on vessel's assignment prior to vessel's arrival.

The Owner, Charterer or Agent should airmail or cable following to Esso Standard Libya Inc., PO Box 385, Esso Field, (Marine), Tripoli, cable address Essoship Tripoli:

(1) Name and flag of vessel.
(2) Dimensional characteristics, e.g. overall length, beam and max. draft.
(3) Total tonnage, number and type of products or cargo on board.
(4) Number and size of cargo hose connections on either side and distance in feet of each from the bow.
(5) Safe working load of derricks in vicinity those connections.
(6) Number of shackles of chain (90 ft. shots) on each anchor.
(7) Whether or not VHF fitted.

Information concerning dimensional characteristics need not be included in letter or cable after first call.

PILOTAGE: The services of a Pilot/Mooring Master are provided. He will normally board the vessel in the vicinity of the Brega Buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot/Mooring Master. Pilot ladder must conform to international safety standards.

The Master of the vessel shall notify the Mooring Master of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring, or loading the vessel. It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berths.

The Mooring Master will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Vessels must be moored to the entire satisfaction of the Mooring Master, and must be ready at all times to put out more lines or to adjust the lines as required by any change in the weather or as requested by the Mooring Master.

Pilot Ladders:

Several instances of the use of unsatisfactory, dirty and unsafe pilot ladders have been reported by Pilots.

Faulty ladders endanger the lives of Pilots.

Instructions have been issued to all Pilots to report immediately any pilot ladders which do not comply strictly with the following orders:

(1) The Officer responsible for the embarkation and disembarkation of the Pilot is a Watchkeeping Deck Officer.
(2) The Pilot ladder is secure, clean and free from oil.
(3) The Pilot ladder is adequately lit at night.
(4) Means are provided to enable the Pilot to pass safely and conveniently from the head of the ladder into the ship or onto the ship's deck.
(5) The ladder is in good condition and its tread remains *horizontal*.
(6) The length of the ladder does not exceed 30 ft. Whenever the distance from sea level to a point of access to the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.
(7) The ladder is rigged so that each step rests firmly against the ship's side.
(8) Spreaders are provided not more than 10 ft. apart to prevent the ladder twisting.
(9) Two manropes (not made fast to the ladder but to some independent structure) and safety lines are provided, and a lifebuoy with self-igniting light is available.

Vessels not complying with these rules will not be boarded by a Pilot and will suffer the consequent delay in berthing.

ANCHORAGE: Anchorages located 0.5 mile N.E. to East of Brega Buoy in 12 to 18 fathoms. *Vessels should not remain at anchor in bad weather.* Vessels *are not permitted* to anchor within half a mile of the channels into the bay and inner harbour, and are to keep clear of the 143° 41′ leads (East of the harbour).

RESTRICTIONS: Shahat Shipping Co., Benghazi, advised in January 1984 that only tankers and self-equipped Ro/Ro vessels with forklift and drivers are acceptable at the port, due to non-availability of labour.

No conventional general cargo ships can be discharged until further notice.

In February 1984 Shahat further advised that receivers may discharge cargo by their own labour.

MAX. SIZE: *Cargo vessels:* Maximum draft for vessels entering or sailing from the inner harbour is 10.0 m. (33 ft.). By prior arrangement and in good weather, vessels with drafts up to 10.6 m. (35 ft.) may be accommodated.

Tankers: See "Berthing".

HEALTH: Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice and shall be continuously displayed until pratique is granted.

RADIO: Vessels bound Marsa el Brega not required call Tripoli for inward or outward clearance. Radio messages should be sent through Tripoli (via Malta if beyond communication range of Tripoli) and ETAs should be sent at least 48 hours but preferably 72 hours in advance. Master should state whether ETA in GMT or local time.

Unless 24 hours notice of ETA is received by "Essoship, Tripoli", Notice of Readiness will not be accepted.

As cable office closed between midnight and 0800 hrs., allowance for delays in receipt of radio messages due to this and other causes should be made when sending ETAs and other urgent traffic.

VHF: *Port Control Short Range and Radio-Telephone Communications:* Esso Standard Libya Inc. Marine Terminal is equipped with a VHF radio port control system. It is intended that the following procedure should be adhered to:

Vessels approaching Brega and equipped with the appropriate VHF radio equipment, should call Brega Port Control on Channel 16.

Prior to Pilot boarding, the vessel will be allocated one of the four working Channels: 6, 9, 12, 13.

Esso Libya's craft are equipped to operate on these Channels.

Portable sets will be available for use of vessels not fitted with VHF radio equipment.

Note: Whilst in Libyan Territorial waters, it is prohibited for vessels to use Radio and Wireless Telegraphy. On arrival at a Libyan port such equipment shall be sealed by the Customs Authorities. However, VHF communications between such vessels and Libyan Ports Authorities are not affected by this prohibition.

BERTHING: Tankers: *Connecting of Cargo Hoses:* All cargo hoses used in the sea berth and at the bow mooring have 12 in. American Standard flanges. The hose used on No. 5 berth SPM has 16 in. American Standard flanges. Raising, connecting, disconnecting, and lowering of the hoses used in all berths will be performed by the ship's crew as advised by the Pilot/Mooring Master who will remain on board while the ship is in the mooring. Vessels should arrive with port derrick topped and ready for use.

Ballast: Esso Standard Libya Inc. has no facilities for the discharge of dirty ballast in Brega. Accordingly, all ships must arrive with clean ballast. International oil pollution regulations must be strictly observed by all ships while in Libyan waters.

Vessels should have sufficient ballast aboard for safe manoeuvring, but should not arrive excessively ballasted. The propellor should be submerged and the vessel trimmed not more than 8 ft. by the stern.

Vessels not properly ballasted will not be berthed in order of arrival and will not have their Notice of Readiness accepted.

Loading and Deballasting Simultaneously: Vessels properly equipped will be encouraged to discharge clean ballast and load oil simultaneously subject to the loading rate being reasonable, and that this procedure does not unduly delay the discharge of clean ballast.

Cargo Loading: In order to economise vessel's time and for the benefit of all concerned, it is requested that officers in charge of loading endeavour to receive oil as fast as is safely possible.

The vessel will be responsible to see that all vessel's filling lines are empty and clean prior to commencement of loading in order to prevent contamination of cargo being loaded.

The Master shall indicate on a form the maximum loading rate which is required, having regard to the safety considerations outlined above.

During loading operations at least one licensed Deck Officer and one licensed Engineer Officer shall be on watch and immediately available.

All operations in connection with the starting of loading, discharging, switching of tanks and topping-off of tanks should be directly and personally supervised by a ship's officer in the presence of the Mooring Master.

Mooring Ropes: Tankers calling at Brega to load at the crude/naphtha sea berth should be equipped with a minimum of eight 10 in. circ. fibre or synthetic mooring ropes in good condition, not less than 120 fathoms in length. Mooring wires of equivalent strength are acceptable. A fibre or synthetic mooring rope in good condition must be available for towing vessels into berths by tug. It is recommended that 4 ropes be ready for use on the main deck. One on each side and one amidships joined to the others.

Crude Tanker Sealine Berths Nos. 1 and 4:

Berths 1 and 4 are now out of service. Ground chains and clumps for the mooring buoys, and the *loading lines* are still in position.

Naphtha Crude Tanker Sealine Berth No. 2:

The least depth of water in this berth is 44 ft.

When berthed the tanker is heading 330° true with both anchors out forward, and 6–700 ft. of chain on each anchor. The stern is secured to 5 mooring buoys fitted with quick-release hooks. The submarine hoses are picked up amidships on the port side of the tanker and the vessel's derricks should have a safe working load of 5 tons.

A naphtha line with a single 12 in. connection is laid in this berth, the shore line being 24 in. A crude line with single 12 in. connection can be used if necessary. In good weather, Berth No. 2 can safely accommodate a 65,000 d.w.t. tanker with the following principal dimensions: 65,000 d.w.t.; length, 800 ft.; beam unrestricted, up to 42 ft. draft in good weather. Gravity of sea water about 1030.

Crude Tanker Sealine Berth No. 3 – bow mooring:

The bow mooring is located in approximately 95 ft. of water, and consists of a fixed pylon surmounted by a revolving boom from which hangs a submerged oil-loading pipe arm. The main structure has a diameter of 130 ft. and is 97 ft. above mean sea level at its highest point. The pylon is surrounded by a fender ring which is mounted on vertical steel piles. The revolving boom is 76 ft. in length from the centre of the pylon to the end. The loading arm hangs from a ball joint at the end of the boom and is approximately 560 ft. in length, terminating in a hose handling platform on the outer end. The hose platform is kept at the level of the ship's deck by means of a compressed air ballasting and deballasting system. Four 12 in. hoses hang from the platform. Vessels are normally berthed port side to the platform. Derricks should have a safe working load of 5 tons. A maximum loading rate of 65,000 b.p.h. may be realised with the loading pump in operation.

Vessels are moored in position using 2 head ropes to the bollards on the boom and with two 6 in. nylon back spring mooring lines to the hose-handling platform. In addition, a 6 in. nylon snubber line is used to keep the platform alongside the ship. In bad weather conditions two additional headlines consisting of 12 in. "Samson" nylon are available. Vessels with the following principal dimensions can be accepted: 100,000 d.w.t., overall 1,000 ft., beam unrestricted, draft 48 ft. – 49 ft., bow to manifold not to exceed 434 ft. Larger vessels may be accepted with prior approval.

Crude Tanker Sealine Berth No. 5 – Single Point Mooring:

No. 5 SPM is located in approx. 140 ft. of water and is in position Lat. 30° 26′ 47″ N., Long. 19° 34′ 01.4″ E. The mooring consists of a monobuoy to which are attached 2×15 in. synthetic lines. These are shackled to a single 3 in. chain partly around which is a flotation cover. On the end of the chain is a 9 in. polypropylene line. Vessels using this mooring should have a Panama lead of 12 in. minimum diameter or equivalent fairleads suitable for taking on board the 3 in. chain.

Mooring is effected by heaving the polypropylene through the bow as near the centre lead as possible until the chain is on board, and then shackling two 14 in. nylon strops to open links in the chain. The strops and shackles will be placed on board with the Pilot and vessels are advised to have the port derrick ready to hoist the gear on board at that time. The vessel is also required to have a good 3.5 in. to 4 in. messenger line of at least 75 fathoms in length, ready for use on the fo'c'sle head.

The 48 in. pipe-line is approx. 11,850 ft. long, terminating at the underbuoy structure on the seabed. Crude is loaded through one string of self-floating 24 in. hose with one 16 in. over-the-rail hose to the ship's manifold. Vessel's derricks should have SWL of 10 tons and if necessary be double rigged. The weight of a normal lift for connection to the ship's manifold amounts to less than 5 tons. This is for a hose free of oil, which is usually the case. Vessels with the following principal dimensions can be accepted in this berth: 300,000 d.w.t. Length, beam and draft unrestricted. Flow rate 48,000 b.p.h.

Berths Nos. 3 and 5:

Vessels entering the restricted area on the approach to, mooring and leaving, these two berths must at all times have their anchors firmly secured. No anchor work may be carried out at any time whilst a vessel is in this area.

Product Tanker Berth:

Tankers loading or discharging refined petroleum products at Marsa el Brega will be berthed at the Product Dock. Products will be loaded through a number of small pipe-lines approximately 2,000 ft. long. 4 in. or 8 in. hoses are provided according to the grades of oil being loaded or discharged. Vessels assigned to this berth must be suitably equipped with mooring ropes and have derricks capable of lifting 2 tons.

Vessels cannot be berthed or remain alongside the breakwater except in fine weather. The breakwater is equipped with resilient fendering and ample mooring points. Tankers will be berthed by an Esso Standard Libya Pilot/Mooring Master. Two tugs are available, and a launch will run the mooring lines. In good weather vessel with the following principal dimensions can be accepted: Overall length 500 ft., beam unrestricted, draft 26 ft. max.

Gas Docks: Two types of processed gas are loaded in Marsa el Brega: liquefied natural gas (LNG) and pressurized liquefied petroleum gas (Press. LPG).

These are loaded on 2 piled berths situated on the South-Eastern part of the harbour.

There are dolphins for head, stern and breast lines.

The springs are secured to the central pier and in addition springs from the pier are also made fast. Vessels alongside the gas jetties must be ready to leave at short notice.

On the North or "A" jetty the following products are loaded: Press. LPG and LNG. On "B" jetty: Press. LPG and LNG. There is also a caustic facility on "B" jetty. Minimum depth alongside gas jetties is 37 ft.

Acid Dock:

There is a small berth to deal with sulphuric acid.

Dry Cargo Dock:

To nominate vessels, carrying cargo for Esso Standard Libya, for direct call at Marsa el Brega, prior approval must be obtained from Esso Europe Inc., Traffic Coordination, 50 Stratton Street, London, W.1., England. Telex No: Euresspur, 21221/5. The approval of the Operations General Manager, Brega, is required for any other vessel.

Notice of ETA Port Brega must be given 72, 48 and 24 hours prior to the vessel's arrival. Master of vessel should also advise number of stevedore gangs required.

A Roll-on/Roll-off facility can be used by suitable vessels at times when the product jetty is not occupied. Vessel's dimensions should not exceed those described above for the product jetty.

Height of jetty above sea level is 1.5 m. (approx.).

Vessels assigned to discharge dry cargo at Marsa el Brega will be berthed alongside the dry cargo dock by an Esso Standard Libya Pilot/Mooring Master. The min. depth alongside and in the approach is 30 ft. Two tugs are available. A mooring launch will be available to run mooring lines. The dry cargo dock is fitted with resilient fendering and ample mooring points. During Winter it may be necessary to leave the berth during bad weather, and the Master is responsible for any damage sustained by the jetty and/or his vessel. A Pilot/Mooring Master will be standing by at all times.

All mooring ropes should be in good condition and none should have more than one short splice in the usable length. Crew shall keep the moorings tendered and properly lighted day and night. Shore ropes are also available when necessary.

Ships shall provide their own gangways and the crew shall keep them lighted and tendered, day and night.

Ships must be equipped with adequate unloading gear. All cargo will be off-loaded with the use of ship's gear. When weather permits, derricks should be topped at sea prior to arrival. Due to the increase in cargo vessels calling at Brega, considerable delay may be experienced. Vessels carrying Esso cargoes have priority over all other vessels.

The length of the dry cargo dock is 650 ft. The max. size ship which can be accommodated is 500 ft. overall, beam unrestricted, *max. draft 26 ft.*

TUGS: Esso Standard Libya Inc. maintains tugs and mooring launches to assist vessels to moor and unmoor.

INSPECTION/POLLUTION: *Arrival*: As soon as practicable after arrival and prior to acceptance, all of the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to sea and clean tanks, etc., in accordance with the procedures as laid down in the booklet entitled "Clean Seas Guide for Oil Tankers – The Operation of Load on Top" as issued by the International Chamber of Shipping – Oil Companies International Marine Forum.

Exxon owned vessels and Exxon chartered vessels should strictly adhere to all anti-pollution measures as published in the Vessel Instruction Manual and other publications and follow the Exxon worldwide oil pollution control program which prohibits the overboard discharge of persistant oils or oily water containing persistent oils (including bilge water) in any water of the world, except in extreme emergency affecting safety of life, vessel or cargo.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason automatically nullifies any Notice of Readiness already tendered, and at the same time loses priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival when a new Notice of Readiness will be tendered.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship to the satisfaction of the Mooring Master in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark. Vessels having sufficient illumination will take precedence in berthing order. Vessels should provide suitable floodlights for working on deck during night operations, and should designate a responsible person to keep a continuous watch on hoses and moorings at all times during sea berth occupancy.

Loading Precautions: Masters are responsible to see that no oil (crude, bunker, diesel or bilge) is pumped or spilled overboard from their ships. Cargo hose should be inspected to ensure proper connection; drip pans should be in place, especially when disconnecting hose; scuppers should be plugged tight to contain possible spills; loading valves should be checked and tested to ensure proper operation and tight shut off; unused cargo and bunker connections should be blanked off; stern discharge line, if any, should be closed and blanked off; all sea valves should be closed and lashed shut upon completion of deballasting; the ship should provide sufficient staff (a minimum of one officer and three other crew members are recommended) to ensure proper supervision of loading and topping off operations.

If, during first inspection or during progress of loading, it is revealed that ship's hull is not oil-tight, ship will be rejected and refused further loading. Ship will not later be accepted for loading unless satisfactory evidence, duly certified by Lloyd's or American Bureau of Shipping or other recognized survey agency, of effective repair is submitted.

Contamination of the Sea: In the event any vessel should discharge dirty ballast or spill oil in the vicinity of the Brega Terminal area, Esso Standard Libya Inc. retains the right to take any action that may be necessary to clean up the contaminated area whether the contamination is upon the sea or the shore, or upon any structures or properties located in or upon the sea or upon the shore. In addition, Esso shall have the right to settle any claims of third parties arising from such contamination. All costs and expenses incurred by Esso to carry out the cleaning up of such contamination, or the settlement of third party claims, shall be borne by the vessel or by those owning the vessel at the time of the said contamination, and Esso shall be entitled to reimbursement by said owners for any such cost and expenses.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the product being loaded, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply with or be in accordance with the following Safety Rules:

(a) *Smoking is prohibited on the open decks of vessels. Smoking is permitted on board vessels only in enclosed spaces specifically assigned by the Master as Smoking Areas.*

(b) Before any loading commences all scuppers on the loading deck through which oil might escape overside must be tightly plugged and must be so maintained throughout the period the vessel remains within the limits of the harbour.

(c) The Master is responsible to see that oil from the vessel is neither spilled nor pumped into the water. At all times while loading cargo, all openings to the loading deck from crew, engine, galley and other dangerous areas shall be tightly closed.

(d) Boiler tubes are not to be blown. Every precaution must be taken so that sparks do not at any time escape from the funnel or stack.

(e) Ship's wireless is not to be operated while vessel is in the berth.

(f) Two hoses with spray nozzles to be laid out near manifolds and pressure maintained on fire mains at all times. Two suitable portable fire extinguishers (foam or dry powder) should also be available and bags of sand kept near manifold to contain any small oil spillage.

(g) Please note carefully that the Mooring Master is authorised to suspend operations in case any of the foregoing Safety Rules are not observed and in all cases where dangerous conditions or practices are deemed to exist.

Shore Alarm Signals:

Category 2 (Serious Incident): Three 2 second blasts of the District siren.

Category 3 (Major Disaster): A series of three Category 2 alarms.

Ships:

Fire: Six (6) or more short blasts, followed by a long blast repeated until shore contact, and continuous ringing of vessel's fire alarm system.

VHF Radio: *All* vessels to stand by Channel 16.

Fire or Explosion on Board Crude Vessel Berthed Offshore:

A. Responsible officer to man bridge, engines to be put on standby and crew to disconnect hoses as soon as possible.

B. Loading to be stopped on other vessels berthed offshore. Hoses to be disconnected and hung off, engines put on standby and crew standing by to vacate berth if necessary.

C. Vessels at anchor in the vicinity of the Brega Buoy to have engines on standby, with crews ready to heave up and put to sea if need arises.

Fire or Explosion on Board Ships in Inner Harbour:

A. Master to call Port Control on VHF Channel 16 with details.

B. Loading arms or hoses to be disconnected as soon as possible.

C. Loading or discharging to cease immediately on other vessels in harbour and offshore berths. Vessels to standby to vacate berths if necessary.

Fire extinguishers and hoses with nozzles capable of projecting a fine spray (fog) should be rigged in the vicinity of the loading/discharging manifold with fire mains pressurised at all times. (See 13.2.2.3 of I.O.T. & T.S.G., 2nd Edition).

Crude Oil Health Hazards (Hydrogen Sulphide Content)

A sour crude can be defined as one containing Hydrogen Sulphide (H_2S) within the range of 0.05 cu.ft. to 8.8 cu.ft. per 100 gallons or capable of generating atmospheric Hydrogen Sulphide concentrations of 5 to 1,000 p.p.m. Hydrogen Sulphide vapours in air are extremely toxic and the Maximum Allowable Concentrations (MAC) for personnel exposure throughout an eight hour day is 10 p.p.m. The gas is highly odorous and a particular hazard is its special effect of causing paralysis of the olfactory nerve, thus destroying the sense of smell.

Escape of Hydrogen Sulphide vapours from crude oil is relatively facile and due to a heavier than air effect (S.G. 1.19) may justify additional precautions under some atmospheric conditions.

The following medical effects on personnel exposed to Hydrogen Sulphide represent an indication of the degree of vigilance necessary to prevent or minimise exposure:

	Atmospheric Concentration Range	*Personnel Reaction*
(i)	50–100 p.p.m.	Slight irritation after exposure for 1 hour.
(ii)	200–300 p.p.m.	Marked irritation after exposure for 1 hour.
(iii)	500–700 p.p.m.	Loss of consciousness after exposure of 30–60 minutes.
(iv)	700–900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.

The particular hazards introduced by the carriage of crudes containing Hydrogen Sulphide may be restricted by observing the following practices:

(1) Every opportunity should be taken to utilise closed loading facilities to discharge displaced gas remote from deck areas.

(2) During loading operations, where large volumes of gas are discharged to atmosphere, regular observations should be made of gas concentrations about the decks.

(3) Any persons engaged in sampling, gauging, sighting open cargo tanks or disconnecting cargo hoses, should work windward of the vapour source and should be kept under surveillance from a safe area.

(4) In the event of a person being rendered unconscious by vapours with high Hydrogen Sulphide content, urgent removal to a safe area and application of artificial respiration is of prime importance, followed by the early attention of a qualified medical practitioner.

(5) In respect of loading crude with a high Hydrogen Sulphide content, it is not necessary to take water dips after loading and ullages as indicated by "Whessoe" or other automatic gauges are acceptable on vessels fitted with this type of equipment. Cargo samples taken from the shore meter battery are acceptable.

(6) In respect of transporting crudes with a high Hydrogen Sulphide content, one day prior to arrival at the discharge port, the pressure/vacuum valves should be jacked open to allow gas concentrations to escape to atmosphere at the masthead; then prior to berthing those valves should be reset in the operating position.

The degree of sourness is normally indicated by the Hydrogen Sulphide content in p(arts) p(er) m(illion) *liquid measure.* The Hydrogen Sulphide contents of various types of sour crudes so defined are as follows:

Crude	*Hydrogen Sulphide (p.p.m. Liquid Measure)*
Agha Jari	20
Jambur/Bai Hassan	40
Kirkuk	40–70
Gach Saran	70
Brega	260
Qatar	200–300
West Texas	Up to 1,000

The *Atmospheric* Hydrogen Sulphide concentration varies materially with atmospheric conditions. Particular caution should be exercised when petroleum vapours generally tend to concentrate about the decks. H_2S is readily detected with a MSA Toxic Gas Detector.

The precautions referrred to above should be carefully observed at all times.

MEDICAL: There are limited medical and no dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. The cost of transport and treatment will be charged to the vessel. A form entitled "Charges for Ship Account" must be completed in quadruplicate and sent ashore with the person requiring treatment. This form can be obtained from the Pilot/Mooring Master.

Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio whenever possible.

FRESH WATER: No fresh water is available.
FUEL: No bunkers are available.
REPAIRS: No repairs are allowed to ship's engines while vessels are moored in the berths. Ship's engines should be ready for use on short notice in case the vessel has to vacate the berth suddenly because of bad weather. There are no repair facilities for ships available at Brega.
REPATRIATION: Crew members cannot pay off or leave the vessel at Marsa el Brega except in cases of emergency. Even in an emergency, it should be noted that seamen's Books are not valid under the Libyan law. A valid passport is required, and with adequate notice by radio it is possible to obtain an exit visa for a crew member leaving in an emergency.
SHORE LEAVE: Passengers and crew members are not permitted to land for reasons other than emergencies.

PORT REGULATIONS:
Cargo vessels: Also see "Max. Size".
The following restrictions, conditions, rules and priorities shall be observed by Masters, Consignees and Agents of Non-Esso cargo vessels calling at Marsa el Brega and berthing at the Esso cargo jetty.

1. The permission of the Operations General Manager must be obtained before a non-Esso cargo vessel can discharge. The Operations General Manager also designates certain priorities which may change from time to time. Agents of cargo ships must keep in touch with Marine Superintendent who will advise them of the priority assigned to their vessel.
2. Maximum vessel draft 26 ft.
3. Maximum length overall 500 ft.
4. No repairs may be carried out to the propulsion machinery during the unloading operation and the ship must remain mobile and be ready to manoeuvre at all times.
5. Vessels must be equipped with their own unloading Gear.
6. Unloading must be from ship to truck and no marshalling arrangements can be made available inside the reserved area. The unloading operations must be completed rapidly.
7. Unloading operations may not be performed except during daylight hours as determined by the Marine Superintendent.
8. Loading trucks will be required to adhere strictly to Esso's safety rules, particularly while operating within the limits of the Industrial area.
9. Arrangements for the entrance and movement of the stevedoring personnel must be coordinated with Esso's Industrial Security Division. No housing or victualling will be provided for stevedoring personnel. All expenses, costs, remunerations and compensations associated with this activity will be borne directly by the company concerned.
10. The stevedores will be held responsible for cleaning up after completion of unloading.
11. No victual, water supply or bunkering service is available for vessels calling at Brega.
12. Advance notification must be given to Esso's Marine Division at least 10 days prior to arrival of vessel at Marsa el Brega. ETA of vessel to be notified 72 hours prior to arrival and confirmation and reconfirmation 48 hours and 24 hours respectively prior to arrival.
13. A system of priorities for cargo vessels entering Brega is in operation as follows: 1st – Esso cargo, 2nd – N.O.C., 3rd – other vessels. This system will apply even though this requires interruption of operations of vessels already berthed.
14. Weather and sea conditions, particularly during the period December to April of each year, impose severe restrictions on the cargo pier usage. Among these restrictions are the discontinuation of unloading and the unberthing of the ships as a safeguard against ship and berth damage.

   One hour's notice will be given to Masters should it be deemed necessary to vacate the berth due to bad weather.
15. Esso shall not be held reponsible for any waiting period or delay (demurrage) related to the entry of cargo ships, nor be liable for any costs or compensation in that connection, regardless of the circumstances.
16. Esso shall not be held liable for any loss, damage or injury that may occur to any property or persons whatever the cause thereof as long as they are related to or resulting from the use of the port. Such loss, damage or injury shall be the liability of the Master, Consignee or Agent irrespective of whether they are real or alleged. The above named shall also undertake to indemnify Esso for any such losses and damages and to hold Esso harmless from any liability that may arise as a result thereof.
17. All vessel movements will be subject to the control and direction of Esso's Marine Division Superintendent.

GENERAL: *Charts:* Vessels calling at Brega should have on board B.A. charts 3350 and 3354, or H.D. chart H 203. No charts are available at Brega.
Provisions: There are no fresh or dry provisions available at Marsa el Brega, and Esso Standard Libya cannot undertake to obtain supplies from Benghazi.
Mail: The Ship's Agency will handle all official and crew ship's mail which should be passed to the Mooring Master before the vessel sails.
Harbour Work: Dredging is in continual progress in the vicinity of the inner harbour. Vessels are cautioned not to enter the restricted area (B.A. Chart 3350) without the services of a Brega Pilot/Mooring Master.

Master of cargo/product vessels calling at Marsa el Brega are cautioned that seaweed in suspension is present in the inner harbour area, and all precautions should be taken to avoid blockage of main engine room intakes.

All offshore loading is controlled by the VHF ship/shore radio. The Mooring Masters are equipped with portable VHF sets and the vessel will be assigned a frequency when the Mooring Master boards. In the event of total failure of ship/shore radio communication during loading, the ship should sound the emergency signal comprising a succession of short blasts on the ship's whistle. All loading operations will then cease until radio contact with the shore has been re-established.

All mooring lines to be fitted with adequate ratguards.

All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.

All vessels allocated berths in the inner harbour are therefore required to be ready to proceed to sea as directed by the Marine Superintendent or his representative when adverse weather prevails or is expected.

All tank lids to be closed and vented to the atmosphere via the agreed system.

Smoking is strictly prohibited on board all tankers except in locations approved by the Masters of the vessels. No smoking on deck even if gas free.

Full power must be available for all manoeuvring to and from all berths. During deballasting and loading, vessels must maintain engines and propulsive machinery in readiness at all times to leave the berth on short notice.

No repairs are permitted which will delay or interfere with this contingency. Contravention of this ruling constitutes a serious safety hazard and will entail towage from the berth and possible delay to the vessel for which Esso Standard Libya Inc. will accept no responsibility.

It is the responsibility of the vessel, before arriving, to see that ballast water is free of oil and to *discharge ballast water through ballast discharge lines* prior to arrival to ensure their cleanliness.

All tankers for sea berths must have port derrick ready for use.

Masters are warned that no contaminated ballast or bilge water may be discharged within Libyan territorial waters. It is the responsiblity of the vessel before arriving to ensure that ballast water is free of oil, and that all pipe-lines, sea suctions, strainers and pumps have been flushed clean of oil.

DEVELOPMENTS:
National Oil Company (NOC):
Governing body: G.P.L.A. East side of harbour opened 1978.
Tanker Berths:
Jetties 1 and 2: Facilities for loading of Ammonia and Methanol on both jetties. On Jetty 2 facilities for receiving Acid and Caustic.
Overall Moorings: 175 m.
Loading Section: 43 m. (141 ft.).
Dredged depth: 14m. (45 ft.).
Urea Jetty: Overall length: 216 m. (See "Shipmaster's Report).
Dredged depth: 9 m. (29 ft.).
Cargo Dock: Max. d.w.t.: 15,000 tons.
Overall length: 392 m.
Dredged depth: 11 m. (36 ft.).

Suitable Ro/Ro ships may berth alongside the Urea Jetty stern on to the Cargo Jetty, which has a height above sea level of approximately 2.7 m. (9 ft.).

SHIPMASTER'S REPORT: August 1984.
Charts: British Admiralty 3354, 3350. French 5792.
Approach: Refinery buildings are radar identifiable at over 20 miles and the fairway buoy (Lat. 30° 27.55′ N., Long. 19° 35.1′ E.) at over 6 miles, also at about this distance it is possible to make out the shape of the harbour breakwaters on radar. The line of soundings is very sharp on the echosounder, and the 50 m. line 7 miles out when coming from the North was raised very easily.
Pilotage: Pilot boarded at the fairway buoy from a large tug (Dutch company contracted to the port). Vessels are not allowed to proceed into the restricted area 0.5 miles South of the fairway buoy without a Pilot. The area inside the restricted zone having several tanker SPM's and other obstructions.

The Pilot was immediately concerned about the vessel's air draft for berthing at the Urea Berth. After berthing I made a rough calculation and would say a vessel with a main deck air draft of over 38 ft./40 ft. would have great difficulty accommodating them. Our main deck air draft at the time was 31 ft. When asked the Pilot stated that the maximum departure draft was 29 ft.

To approach the berth vessels enter with 2 tugs (2,000 h.p.) fast on the starboard shoulder and quarter, berthing being port side alongside. When the breakwater has been rounded vessel is headed East until clear of the Fl. 5 sec. elbow buoy when the swing to starboard with engines and tugs is started (starboard anchor ready in case of emergency). Once vessel is swung until heading about S.W., tugs then push her alongside as near into the corner with the general cargo berth as she she will go, in our case about 8 m. (this is also to facilitate the after elevator being used to work No. 1 Hatch, on this vessel LOA 169.1 m.).
Survey/Loading: Shippers are National Petroleum Co. and all cargo survey work is done by Societe Generale de Surveillances S.A. The surveyor was very helpful. Stowage factor for treated urea is approximately 48/49.5 cu. ft. per ton. The loading rate stated was 400 tonnes p.h. although in actual fact we never achieved an average of more than 300 tonnes p.h. Treated urea is very hydroscopic, with the climatic conditions in Libya, it is impossible to load if the relative humidity is over 75%. This usually involved stopping in the evenings around 1800/1830 hrs. and restarting in the morning 0800/0830 hrs., although on one occasion we did manage to work all night.

The elevator is self-trimming and does a reasonable job, however, with the high stowage factor some hatches were filled but because of the restricted height of the elevator, it proved impossible to get the loading chute high enough to fill the coamings as we would have liked, and thus our intake per hatch was reduced.
Clearance/Customs formalities: Libyan Government have issued a statement that from 7th June, 1984, all incoming ships must have all ship's papers and documents translated into Arabic. This we managed to have done but only because of the length of stay in the previous port. In actual fact the Agent took no notice of these translations, they wanted their own forms filled in by the Master. The Customs Officials were very courteous. No alcohol is allowed, also all cameras had to be locked in the bond as El Brega is a restricted port because of the oil installations, and hence no shore leave. The main transmitter was also sealed.
AUTHORITY: Esso Standard Libya Inc.
AGENCY: See "General" before first port.

MISURATA (Qasr Ahmed): 32.22 N. 15.13 E.

(See Plan Book)

Also see "General" before first port.

GENERAL: The harbour is enclosed by 2 rubble mound breakwaters armoured by tetrapods. The North Breakwater extends 1,400 m. due East from Ras Zarrugh Lighthouse and East Breakwater extends 1,800 m. due North from the shore near the prominent radio station about 2 km. South of the Ras Zarrugh Lighthouse. There are lights on the breakwater roundhead. On the North Breakwater a green flashing light (0.3 secs.) every 3 secs. and on the Eastern Breakwater a red flashing light (0.3 secs.) every 3 secs. The Ras Zarrugh Lighthouse at the foot of the North Breakwater is a square tower with black and white vertical stripes. The structure is 8 m. high and is on the top of a 16 m. hill. The light is flashing white (0.5 secs.) every 5 secs. with a range of 8 miles.

On the South side of harbour there is Steel Mill Harbour which is under construction.

There is a radio mast 7.6 miles W.N.W. of Ras Zarrugh with fixed red flashing lights.

For Harbour Entrance there are guides, 2 fixed red lights and 1 green flashing light, bearing 273° N.W. from breakwater roundheads. The Harbour Entrance Channel is 150 m. wide and 12 m. deep.

Inside the entrance there is a turning circle, diameter 470 m., depth 12 m. and the harbour dredged area 920 m. × 200 m. to a depth of 11 m. leads due South alongside the berth. A 500 m. × 300 m. dredged area to a depth of 8 m. leads to the West alongside the North Breakwater.

Directions: Keep 2–3 miles offshore before turning due West for entrance.

Currents: Predominantly N.W. at mean rate of 0.5 to 0.75 knots but in Winter winds can reverse the flow and induce S.E. set in excess of 1 knot.

DOCUMENTS:

Crew List.
Passenger List (if any).
Ship's Stock.
Stores List.
Animals Aboard List.
Ship's Log.
Last Port Clearance.
Safety Certificate Certificate.
Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.

Where possible Cargo Manifests and Stowage Plans should be forwarded by airmail to the local Agent, ahead of the vessel's arrival.

PILOTAGE: Compulsory, Pilot will board about 1 mile outside the port entrance.

ANCHORAGES: Bearing approximately 273° to lighthouse on Ras Zarrugh 13 m. depth 1 mile (2 km.) offshore but holding ground is poor and it is advisable to leave anchorage at signs of onset of bad weather.

RADIO: "Misurata Port Control" should be worked as early as possible.

VHF: A high powered base station operates at the top of a 16 m. hill at the foot of the lighthouse at Ras Zarrugh. A continuous watch is maintained round the clock on Channel 16. All other Authorities such as Harbour Master, Customs, etc., should be contacted through "Radio Misurata Port Control" on Channel 16. Channel 10 can be used inside the harbour.

TUGS: Join the vessel outside the Harbour Entrance. The tugs are m.t. "Sorman", m.t. Kiklah", each 565 b.h.p. and m.t. "Al-Keriat", 2,520 b.h.p.

BERTHING: There are 6 berths, totalling 1,120 m. of concrete quay dredged to 11 m. with timber and rubber fenders and bollards at 15 m. intervals, the quay deck is at an elevation of 2.25 m. The berths include a Ro/Ro facility.

CRANES: The following types of shore cranes are available and in the near future, a floating crane of 100 tons will be available. Capacity of cranes are 57, 45, 35 and 25 tons.

FRESH WATER: Available alongside and by barge "Ein-Tawourgah".

FUEL: Available.

MEDICAL: Full hospital facilities are available without prior notice.

STEVEDORES: *Working Hours:* 0630 to 2400 hrs., even on holidays.

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 220 km. from Misurata.

TIME: Local time GMT plus 1 hour from 1st day of October until 31st March, and GMT plus 2 hours from 1st day of April to 30th September.

HOLIDAYS: Fridays; 1st day of Lunar calander year; Idd-ul-Ahada, 4 days; Idd-ul-Zoha, 4 days; 2nd March; 8th March; 28th March; 11th June; 23rd July; 1st September; 7th October. Even on holidays cargo work continuously maintained.

CONSULS: Nearest consuls are at Tripoli.

SERVICES: All kinds of food and soft drinks are available except alcoholic drinks and pork.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

REPAIRS: See "Tripoli".

POLICE/AMBULANCE/FIRE: Call Port Manager Tel: 21101 & 21094.

DEVELOPMENTS: Grain silos are under construction.

Stage II has already been started for 4 general cargo berths, 4 container berths, 3 Ro/Ro berths and sheds, etc., and 1 oil terminal, which will be completed in 1984.

SHIPMASTER'S REPORT: December 1977.
Chart: British Admiralty Chart No. 3353 "Ras Ashdir to Sirte".

A mole has been constructed from Ras Zorog in an East direction, the length of which is approximately 1,100 m.

A second mole extends from the shore in a Northerly direction, approximately 1,800 m. in length. Entrance to the harbour is between the outer ends of both moles.

Wharves and sheds are being built along three quarters of the length of the Northerly direction mole, and around the South part of the inner harbour perimeter. At the time of the visit by this vessel about 350 m. of quay was completed, with depth alongside of 11 m.

All the construction work appears to be done by Yugoslavian labour. The "Overseer" acted as Pilot and was a very able and pleasant person. All questions regarding cargo and fresh water, provisions, etc., were dealt with by him. He supplied 10 tons of fresh water by road tanker, and organised a visit from a ships' chandler for a small quantity of fresh salad and potatoes.

There are 2 small tugs which were used in berthing under the Pilot's direction. These were very necessary owing to a number of obstacles in the harbour (divers boats, pipes, etc.). The Pilot's knowledge of English was limited and it is most necessary for the ship's Master to judge his intentions carefully.

Without a doubt the port of Misurata when open for commerce will be a very useful port, although a small port (inside harbour space was roughly estimated to be about 1,500 m. × 700 m.). The Pilot advised that it was expected to be opened about the middle of 1978.

The vessel anchored off the port entrance at 0800 hrs. and Pilot boarded at 1100 hrs., vessel berthed shortly afterwards. Discharge of 208 tons of construction material from No.1 hold commenced at 1330 hrs., and ceased at 2400 hrs. for the day. Work resumed at 0930 hrs. on the following day, and was completed at 1330 hrs. A mobile shore crane was used throughout for discharge into lorries.

All Agency work was attended to by our Tripoli Agent, who arrived onboard at 1700 on day of arrival. As Tripoli was our next port, he was most helpful in advising our berthing prospects at that port, and delivering ship's mail.

The entering and clearing formalities were attended to by 2 Customs Officers. They advised that there was strictly no shore leave for the crew. All accommodation was diligently searched including the Master's for alcohol, and none whatever was allowed to be in crew's possession. However when all was found to be in order, on request a small amount of bond stores was released for Christmas.

The vessel departed at 1600 hrs. for Tripoli where the Agent's estimate of 2 – 3 days waiting (although there were 50 ships at anchor) proved to be correct.

SHIPMASTER'S REPORT: March 1978.

Work is still in progress on the Southern Mole. More warehouses are to be erected there, also a grain silo. On the Western shore of the harbour more berths are to be constructed possibly for containers, but nothing finalised yet.

Misurata is to be principally a Ro/Ro port specialising in transit cargoes. A nearby motorway runs in a Southerly direction for 1,000 miles into Central Africa.

There will be facilities for conventional cargoes. Dredging is in progress in the Western part of the harbour in preparation for the new berths. The area is being marked by red marker buoys. The port is scheduled to open in June/July this year and to date there are no services excepting Customs who attend to all the Entering and Clearing formalities. All pilotage being performed by the Master, the contractors work boats will act as tugs if requested.

Documentation is similar to requirements for other Libyan ports also the same strictness regarding alcohol. All Officers and Ratings were allowed to retain a small quantity of beer, all other alcoholic drinks being placed under Seal.

AUTHORITY: Port of Misurata, P.O.Box 18218, Misurata, Libya. *Tel:* (051) 24457, 29428. *Telex:* 30221 Port Ms Ly. *Contact:* The General Manager.

RAS LANUF (Sirtica Terminal): 30.31 N. 18.35 E.

(See Plan Book)

Also see "General" before first port.

DOCUMENTS: Customs will require:

4 Crew Lists.
1 Crew Declaration of personal belongings (including cigarettes, etc.)
2 Stores Lists.
1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must be on the approved Libyan Government Documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits. Also required are:

6 Copies of Cargo Manifest for Ras Lanuf Discharge.
1 Copy of Cargo Manifest for transit cargo with a summary.
1 Copy of Passenger Manifest.

A copy of a certificate of discharge of the last cargo loaded at a Libyan port is required. Said certificate to be duly signed and stamped by Custom Authorities at the discharge port. Blank forms will be delivered with the cargo documents.

Clearance from the last port of call will be required by the Government authorities. The police will require 4 copies of a Crew List and a Passenger Manifest if any passengers on board.

PILOTAGE: It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival, giving estimated time of arrival. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or local time. The 72 hour signal should include the following: ETA, last port of call, if any sickness on board and if vessel has clean bill of health. Cargo quantity and grades expected to be lifted in net long tons at 60°F. The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Vessels to be moored at Ras Lanuf will be boarded by Mooring Master in the close vicinity of the suggested anchorage area mentioned below. The Mooring Master will advise the Ship's Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the mooring area.

NAVIGATION AIDS:

A Terminal Light Vessel, hull black, superstructures red and white name "Ras Lanuf" with white quickflash is located in approximately Lat. 30° 32′ 40″ N., Long. 18° 34′ 37″ E. Vessels in the vicinity should not navigate or anchor inshore of a bearing 120° – 270° running through this Light Vessel position.

A Fairway Channel Entrance Buoy flashing white every 2 secs. is located in a position approximately 30° 30′ 46″ N., 18° 37′ 44″ E.

A Channel Buoy flashing red every 5 secs. is located in a position approximately Lat. 30° 30′ 17″ N., Long. 18° 36′ 16″ E.

North Breakwater Light with occulting light green 2 every 10 secs. is located in a position approximately 30° 30′ 38″ N., 18° 35′ 43″ E.

East Breakwater Light with occulting light red 2 every 10 secs. is located in a position approximately 30° 30′ 29″ N., 18° 35′ 24″ E.

A Rear Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 56″ N., Long. 18° 34′ 09″ E.

A Front Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 54″ N., Long. 18° 34′ 17″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 20″ N., Long. 18° 35′ 21″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 12″ N., Long. 18° 35′ 35″ E.

The Mooring Area has been swept to a depth of 53 ft. in Berth Nos. 1, 2 and 3, at the SPM to a depth of 96 ft.

There are very few coastal landmarks in this area. The following should prove helpful to visiting mariners:

The Terminal Water Tower with highest elevation of 179 ft. 6 in. above sea level is located in Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is coloured white. A white light (characteristics: flash 0.2 secs., eclipse 1.05 secs., flash 0.2 secs., eclipse 3.55 secs.) is mounted on the seaward side of the structure at 163 ft. above sea level. There is also a fixed red warning light on top of the tower.

Large oil storage tanks with highest elevation 376 ft. above sea level are located in approximately Lat. 30° 27′ 24″ N., Long. 18° 29′ 58″ E. They are coloured white.

ANCHORAGE: Suggested anchorage area is within a 3,000 ft. radius of position Lat. 30° 33′ 00″ N., Long. 18° 37′ 40″ E. in approximately 90 ft. of water.

MAX. SIZE: Conventional berths: up to 60 ft. draft; up to 130,000 d.w.t.

Single Point Mooring: up to 75 ft. draft, up to 265,000 d.w.t.

HEALTH: By day – fly flag "Q" and by night display red light over white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "Pratique" services. Libyan Government Regulations are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO: Direct communication by radio between ship and shore is by VHF International Maritime Mobile Radio-telephone Service to Ras Lanuf Oil Movements Control Centre. All communication between ship and terminal should be by way of this station. ETA messages to Mobilpro, Tripoli, Libya, via Tripoli Radio (call sign 5AT). Ras Lanuf Oil Movements Control Centre keeps continuous watch on VHF Radio-telephone Channel 16 (156.80 mHz), Channel 14 (156.70 mHz) and Channel 11 (156.55 mHz). Vessels approaching the port should make contact on Channel 16 when shore will request her to switch to Channel 14. This Channel will also be used by terminal Marine Section for internal use and tanker mooring control. Channel 11 is reserved for communications between ships in mooring and Terminal Oil Movements Control Centre and should only be used for general purposes after obtaining clearance from Oil Movements Control on Channel 16. This is a safety measure since oil flow to ships is controlled through Channel 11 and therefore it must be clear at all times in case of need to stop oil flow for any cause. Channel 16 is for calling and safety use only.

BERTHING: There are 4 submarine loading pipe-lines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Lat. 30° 31′ 35″ N., Long. 18° 34′ 37″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Lat. 30° 31′ 55″ N., Long. 18° 33′ 58″ E., from which a submarine pipe-line runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Lat. 30° 32′ 18″ N., Long. 18° 33′ 19″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 198°. Depth of water at spar buoy 73 ft.

Berth No. 4: Lat. 30° 31′ 50″ N., Long. 18° 36′ 06″ E. – a Single Point Mooring buoy in 96 ft. of water.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

TUGS: Not available. The company maintain launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

LIFTING HOSES: After the vessel is securely moored the submarine hose will be hoisted on the port side. Berths No. 1 and 2 are each equipped with 2×12 in. loading hoses, the weight of each hose lift being approximately 5 long tons. Berth No. 3 is equipped with 2×12 in. loading hoses the weight of each hose lift being approximately 5.75 long tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 6 long tons. Hoses are lifted by ship's gear and crew, and all connecting of hoses will be done by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival.

The SPM is equipped with two 16 in. loading hoses.

MEDICAL: No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharine and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Each man allowed 1 litre of beer or half litre of wine per day. Special allowances are made for Master under special circumstances.

CONSULS: The only consulates are located in Tripoli which is 670 km. by road from Ras Lanuf. These consist of British, Danish, Dutch, French, German, Greek, Indian, Italian, Norwegian, Spanish, Russian (U.S.S.R.), Turkish, Yugoslavian.

REPATRIATION: Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

BALLAST: Positively no provision is made for dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new Notice of Readiness to load.

TIME: Libyan local time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).

GENERAL: No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (plain green).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crew are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

SHORE LEAVE: Not allowed.

DEVELOPMENTS: A new harbour has been established at Ras Lanuf oil terminal, to receive tankers and cargo ships.

The harbour is located in the area existing between:

(a) Lat. 30° 29′ North and Lat. 30° 34.5′ North.

(b) Long. 18° 32′ East and Long. 18° 38′ East.

The buoyed entrance channel to the port is dredged to a depth of 15.5 m. and berths are available with depths up to 14 m.

The new harbour is to accommodate tankers on 3 finger piers and cargo vessels on a cargo jetty. The tankers are to load products from the new refinery which is expected to go on stream in October 1984. The Owner and Operator of refinery and harbour is:

Ras Lanuf Oil and Gas Processing Co. Inc., P.O.Box 75071, Tripoli, S.P.L.A.J. Tel: 021 601310, 021 601311. Telex: 50617 Rasco Ly, 50618 Rasco Ly, 50650 Rasco Ly. Contact: Captain M. Khadrawi, Manager, Harbour Operations.

AUTHORITY: Mobil Oil Libya Limited – Ras Lanuf, P.O.Box 690, Tripoli, S.P.L.A.J. *Tel:* Tripoli 30081 (ext. 360). *Telex:* Mobproly 20260. *Cables:* Pegasus Tripolilibya. *Contact:* Captain Klaus Guenther, Marine Superintendent – Ras Lanuf.

AGENCY: See "General" before first port.

TOBRUK: 32.04 N. 24.00 E.

Also see "General" before first port.

PORT LIMITS: The complete water area existing within Tobruk Bay or that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

It is formed of 3 areas inside the Bay, namely Marsa Tobruk, the proposed naval base and Marsa Al-Hariga Oil Terminal.

MAX. SIZE: Max. draft: 29 ft., max. length: 400 ft.

RADIO: Tobruk Radio (Station operated by Arab Gulf Oil, Operating times 0900/0930, 1300/1330, 1700/1730, 2100/2130 hrs.) 5AL: 420, 425 and 500, VHF (24 hours) Channels 12, 16 and 19.

BERTHING: Berths in Tobruk Harbour:

Quay No. 3: Length 82 ft., draft 11 ft.

Quay No. 4: Berth 1: Length 560 ft., draft 20 ft.
Berth 2: Length 395 ft., draft 28 ft.
Berth 3: Length 410 ft., draft 30 ft.

TANKERS: Refer to "Marsa Al Hariga".

STEVEDORES: All stevedoring operations and formalities to be done by Agents. 2 companies to be formed in the near future.

MEDICAL: Available.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Available via Benghazi.

REPAIRS: Not available; see "Tripoli".

DEVELOPMENTS: Port extension project underway.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

TRIPOLI: 32.54 N. 13.13 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing inside the actual breakwater and that which may fall within any new breakwaters eventually constructed in accordance with the Port Developments Project.

(b) The outer water area known as the navigational channel commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of about 1 mile.

RESTRICTIONS: Any containers arriving on Ro/Ro ships should be on trailers.

MAX. SIZE: All types of ships with 27 ft. draft and less are safe in harbour.

RADIO: Tripoli Radio (coast station — 24 hours), 5AT, 476 and 500 kHz, R/T 2182 and 2197, VHF Channels 16 and 6.

Tripoli Port Radio (24 hours), 5AI, 500 kHz, R/T 2182, VHF Channels 10, 12 and 16.

STEVEDORES: Two companies available.

CRANES: Electric floating crane available up to 100 tons.

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside, should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agent. A notice of 24 hours needed, advisable for Chief Engineer to check what grades are available.

REPATRIATION: Crew changes are possible.

AIRPORT: A number of major air lines operate to and from Tripoli airport which is about 27 km. from the city.

WATCHMEN: Available.

CONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 32300; Denmark, 39413; France, 33526 & 33527; Germany, 33827 & 30554; Pakistan, 40072; Poland, 31768; Saudi Arabia, 30486; Spain, 35463 and 33275; Sudan, 39181 and 39182; Sweden, 32343; Switzerland, 32416; Greece, 36978 and 36689; India, 41835; Iraq, 34235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 33733 and 32289; Malta, 38081 and 38082; Morocco, 34239 and 40188; Netherlands, 41549 and 41550; Syria, 31783; Tunisia, 31051/2; Turkey, 37728; U.S.S.R., 30554; U.K., 31191/5; Venezuela, 36838; Yugoslavia, 34114 & 33392.

POLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. Karamanli wharf call: 30378, 35010, 31518.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DRYDOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at CL	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above KB	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint are available.

DEVELOPMENTS: 2.6 km. of new quays under construction with depths of 10.0 m. – 12.0 m. The second phase of new construction will include berths for container vessels and Ro/Ro vessels.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUARA: 32. 55 N. 12.07 E.

Also see "General" before first port.

PORT LIMITS: a) The water area existing between the actual breakwater and that which may fall within any new breakwater eventually constructed.

b) The water area known as the navigational channel existing outside the harbour entrance for a distance of about 0.5 miles (1 km.).

RESTRICTIONS: Port for ships laden with direct delivery cargo only.

MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in the harbour.

RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

BERTHING:

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 127 km. from Zuara.

CONSULS: Nearest consuls are at Tripoli.

REPAIRS: Not available, see "Tripoli".

POLICE/AMBULANCE/FIRE: Call Port Manager, Tel: 025305.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 18 berths to be constructed in a new master plan.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUEITINA: 30.51 N. 20.00 E. (See Plan Book)

Also see "General" before first port.

LOCATION: The Terminal Fairway Buoy, moored in position Lat. 30° 55′ 00″ N., Long. 19° 59′ 48″ E., is painted red; it shows at night a white light flashing "Z" every 10 seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position Lat. 30° 49′ 57.6″ N., Long. 20° 03′ 05.5″ E.; it displays at night 3 red lights in a vertical line – the top light flashing, the 2 lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position Lat. 30° 54.2′ N., Long. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. 14 large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.

Positions of Moorings:

"Alpha" berth	Lat. 30° 53′ 30″ N.	Long. 20° 01′ 05″ E.
"Bravo" berth	Lat. 30° 52′ 18″ N.	Long. 20° 01′ 24″ E.
"Charlie" berth	Lat. 30° 52′ 08″ N.	Long. 20° 00′ 11″ E.
"Delta" berth	Lat. 30° 50′ 56″ N.	Long. 20° 00′ 26″ E.
"Echo" berth	Lat. 30° 50′ 16.4″ N.	Long. 19° 59′ 16.1″ E.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.

DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Shahat Agency representative, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Zueitina.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Zueitina. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's logbook, append his own signature to it and stamp it with the ship's official seal, and address it to the Secretariat of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Secretariat of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Shahat Agent will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of loading
2. Cargo manifest
3. Time sheet
4. Certificate of Origin
5. Master's receipt
6. Export manifest

all of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

For information relating to ships' movements at Zueitina Terminal, such as arrival times, delays in berthing, quantities of cargo loaded in their vessels, tanker owners and agents, should contact Occidental International Oil, Inc. 16 Palace Street, London SW1E 5BQ. Telephone 01-828 5600.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime etc:*

Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Fairway Buoy and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 0600 hrs. (local time) to 1800 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 1800 hrs. and 0600 hrs. (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and
(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f), and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 0600 hrs. (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of Terminal Fairway Buoy and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded.)

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Fairway Buoy. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

RADIO: Cable Address: OXYPORT OXYLIBYA TRIPOLILIBYA (via Tripoli Radio) OXYOIL LONDON (via Portishead Radio). 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA, by cables sent both via Tripoli and via Portishead Radio to the addresses given above. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

(Cables to Agents advising of ETAs should be sent in addition to, and *not* in place of, those sent to OXYPORT, TRIPOLI and OXYOIL, LONDON.)

Cables should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours.).

TOBRUK: 32.04 N. 24.00 E.

Also see "General" before first port.

PORT LIMITS: The complete water area existing within Tobruk Bay or that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

STEVEDORES: Two companies available.

CRANES: Electric floating crane available up to 100 tons.

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside, should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agent. A notice of 24 hours needed, advisable for Chief Engineer to check what grades are available.

REPATRIATION: Crew changes are possible.

AIRPORT: A number of major air lines operate to and from Tripoli airport which is about 27 km. from the city.

WATCHMEN: Available.

CONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 32300; Denmark, 39413; France, 33526 & 33527; Germany, 33827 & 30554; Pakistan, 40072; Poland, 31768; Saudi Arabia, 30486; Spain, 35463 and 33275: Sudan, 39181 and 39182; Sweden, 32343; Switzerland, 32416; Greece, 36978 and 36689; India, 41835; Iraq, 34235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 33733 and 32289; Malta, 38081 and 38082; Morocco, 34239 and 40188; Netherlands, 41549 and 41550; Syria, 31783; Tunisia, 31051/2; Turkey, 37728; U.S.S.R., 30554; U.K., 31191/5; Venezuela, 36838; Yugoslavia, 34114 & 33392.

POLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. Karamanli wharf call: 30378, 35010, 31518.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DRYDOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at CL	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above KB	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint are available.

DEVELOPMENTS: 2.6 km. of new quays under construction with depths of 10.0 m. – 12.0 m. The second phase of new construction will include berths for container vessels and Ro/Ro vessels.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUARA: 32. 55 N. 12.07 E.

Also see "General" before first port.

PORT LIMITS: a) The water area existing between the actual breakwater and that which may fall within any new breakwater eventually constructed.

b) The water area known as the navigational channel existing outside the harbour entrance for a distance of about 0.5 miles (1 km.).

RESTRICTIONS: Port for ships laden with direct delivery cargo only.

MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in the harbour.

RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

BERTHING:

Quay No.	*Length*	*Depth*
Shore quay	2 ships	13 ft.
F.J. Stb.S.	165 ft.	13 ft.
F.J. Pt.S.	165 ft.	13 ft.

STEVEDORES: 2 companies available.

MEDICAL: Available.

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 127 km. from Zuara.

CONSULS: Nearest consuls are at Tripoli.

REPAIRS: Not available, see "Tripoli".

POLICE/AMBULANCE/FIRE: Call Port Manager, Tel: 025305.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 18 berths to be constructed in a new master plan.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUEITINA: 30.51 N. 20.00 E. (See Plan Book)

Also see "General" before first port.

LOCATION: The Terminal Fairway Buoy, moored in position Lat. 30° 55′ 00″ N., Long. 19° 59′ 48″ E., is painted red; it shows at night a white light flashing "Z" every 10 seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position Lat. 30° 49′ 57.6″ N., Long. 20° 03′ 05.5″ E.; it displays at night 3 red lights in a vertical line – the top light flashing, the 2 lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position Lat. 30° 54.2′ N., Long. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. 14 large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.

Positions of Moorings:

"Alpha" berth	Lat. 30° 53′ 30″ N.	Long. 20° 01′ 05″ E.
"Bravo" berth	Lat. 30° 52′ 18″ N.	Long. 20° 01′ 24″ E.
"Charlie" berth	Lat. 30° 52′ 08″ N.	Long. 20° 00′ 11″ E.
"Delta" berth	Lat. 30° 50′ 56″ N.	Long. 20° 00′ 26″ E.
"Echo" berth	Lat. 30° 50′ 16.4″ N.	Long. 19° 59′ 16.1″ E.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.

DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Shahat Agency representative, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Zueitina.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Zueitina. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's logbook, append his own signature to it and stamp it with the ship's official seal, and address it to the Secretariat of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Secretariat of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Shahat Agent will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of loading
2. Cargo manifest
3. Time sheet
4. Certificate of Origin
5. Master's receipt
6. Export manifest

all of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

For information relating to ships' movements at Zueitina Terminal, such as arrival times, delays in berthing, quantities of cargo loaded in their vessels, tanker owners and agents, should contact Occidental International Oil, Inc. 16 Palace Street, London SW1E 5BQ. Telephone 01-828 5600.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime etc:*

Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Fairway Buoy and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 0600 hrs. (local time) to 1800 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 1800 hrs. and 0600 hrs. (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and
(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f), and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 0600 hrs. (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of Terminal Fairway Buoy and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded.)

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Fairway Buoy. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

RADIO: Cable Address: OXYPORT OXYLIBYA TRIPOLILIBYA (via Tripoli Radio) OXYOIL LONDON (via Portishead Radio). 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA, by cables sent both via Tripoli and via Portishead Radio to the addresses given above. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

(Cables to Agents advising of ETAs should be sent in addition to, and *not* in place of, those sent to OXYPORT, TRIPOLI and OXYOIL, LONDON.)

Cables should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours.).

Masters of vessels equipped with VHF radio-telephones should contact Zueitina Marine on Channel 13 or Channel 16 when within range, and give a firm calculated time of arrival at the Zueitina Fairway Buoy. They should also again inform Zueitina Marine Duty Officer of the quantity and grade of cargo required, the last port, estimated deballasting time and the destination. They should confirm that they have in their possession a certificate of discharge for the last cargo loaded into their ships in Zueitina or, in cases of ships arriving in Zueitina for the first time, that they have ready for the Secretariat of Petroleum a letter which certifies that the cargo which they are about to load will not be discharged in any country against which the Arab Oil Embargo extends. In vessels paying their first visit to the Terminal, Masters should also inform the Duty Officer of the size and type of the manifold connections (i.e. 12 in. A.S.A., or 10 in. European, etc), and whether or not they have on board heavy wires and shackles for mooring at the mono-buoys.

(N.B. It is important that all ships arriving at Zueitina are fitted with VHF radio-telephones, capable of operating on the main working Channels. Without VHF communications, Zueitina Marine cannot always know with accuracy a vessel's arrival time, and as a result that vessel might well lose its loading turn and be subjected to an appreciable – and, with VHF, avoidable – delay in consequence.)

An aerial radio beacon is located on the North-Eastern arm of the Small Craft Harbour, in position Lat. 30° 54′ 05″ N., Long. 20° 04′ 12″ E., intended as an aid to navigation for aircraft flying to and from Zueitina airstrip. The beacon transmits continually the call sign ZUE, on 369 kHz: the signal, which is omni-directional, has a range in excess of 100 miles.

HEALTH: Pratique will be granted by the Custom's Official. He will examine the ship's logbook, and will inspect and seal the bonded storerooms.

All ships must display the appropriate quarantine signal until given pratique.

TUGS: One tug ("Saladin") of 4,600 h.p., bollard pull 55 tons now available to assist in berthing at CBM and LPG berths.

One to six mooring launches of 370 h.p. available, normally two launches assist berthing at SBM's.

BERTHING: The sea terminal consists of five berths for loading crude oil products, two of which – "Bravo" and "Delta" – are conventional buoy moorings, and the others – "Alpha" ("Alpha" buoy at present temporarily removed but position marked by Tower Buoy with same characteristic light) "Charlie" and "Echo" – are "single-point moorings", or "mono-buoys". Conventional buoy moorings "Bravo" and "Delta" are approximately 2.5 miles offshore, with an average depth of 70 ft. and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. To the header at the seaward end of each of these submarine lines are connected two strings of flexible reinforced rubber hoses, laid on the sea bed and buoyed when not in use. The forward of the two strings is made up of (from the header) three 30 ft. lengths of 24 in. i.d. hose, two 30 ft. lengths of 20 in. i.d. hose, and seven 30 ft. lengths of 16 in. i.d. hose. The after string is similar, but with one less length of 16 in. i.d. hose. To the seaward extremity of each hose string is fitted a 16 in. to 12 in. A.S.A. reduction flange. When the ship has berthed, each hose string is towed in to the ship's side below the manifold by the attendant launch, to be hove up by crane or derrick and bolted to the ship's connections, *invariably on the port side.* Where the ship's connections differ from the 12 in. A.S.A. flange on the hose, suitable reduction spools must be fitted. The weight to be lifted on each hose is approximately 7 tons.

Single-point moorings, "Alpha", "Charlie" and "Echo" are all approximately 3 miles offshore, in an average depth of 100 ft. of water. The submarine pipe-lines to "Alpha" and "Charlie" berths are of 48 in. i.d., that to "Echo" berth, 42 in. i.d. Particulars of the strings of hoses from the header to the ship's manifold are described in detail in the chapter on "Single-point Moorings". As in the conventional buoy berths, *the hoses are always taken up on the port side,* and the connecting flange on the hose is 12 in. A.S.A. pattern. The weight to be lifted is approximately 7 tons, but this is to some extent dependent on the ship's freeboard.

Mooring Equipment: As a guide to Masters who intend to save time and labour, especially in these days of reduced "general purpose" crews, by equipping their ship with the requisite mooring gear, the following standard requirements is suggested:

(a) Two (2) flexible steel slip wires, 1.75 in. dia., 5.5 in. circumference, 130 ft. in length, or longer if the distance from the fairlead to the bitts is such that 130 ft. would be insufficient to make fast safely. Such slip-wires will have an eye spliced in one end only.

(b) Two (2) screw-pin or threaded bolt and nut, bow shackles, bow size 2.5 in., pin diameter 2.75 in., minimum width, jaw to jaw, 4 in.: breaking strain 150 tons.

Single-point Moorings. The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four water-tight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre – hose-supporting – section, in such a manner that the vessel berthed on the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

To the mono-buoy is attached a 240 ft. length of chain cable, made up of 2.375 in. U3 steel studded links, and supported in polyurathene buoyancy collars, at the seaward end of which is a "chafing chain". This "chafing chain" is 20 ft. long and of similar construction to the main chain, but with three open links at the end: it is detachable for periodic renewal. To the end of the chafing chain is attached the "approach rope" – a 200 ft. length of 10 in. circumference plaited polypropylene which, when not in use, is allowed to float out free from the buoy.

The ship approaches the buoy from downwind, taking care to keep the wind right ahead (adequate ballast should be retained aboard to provide manoeuvrability). When sufficiently close, the crew will lower to the attendant launch the end of a good mooring rope, to the eye of which has been attached a stout nylon lashing, about 2 fathoms long. This mooring rope should be passed out through a central panama lead, if a suitable one exists, or over a fairlead on the port bow (when the ship is fitted with a bulbous bow, a line put out through a central lead, should be brought back down the bow and then lowered to the water, to avoid the possibility of the launch, when coming in to collect the end of the rope, coming into contact with the bulb). Meanwhile, two heavy 5.5 in. circumference flexible steel slip wires have been made fast in readiness – one on each bow, if the line is being hove through a central panama lead, both on the port side (and preferably on different sets of bitts) if the port fairlead is being used – in such a manner that there is an adequate number of turns around the bitts and that the end of the eye reaches to approximately 10 ft. and 10 ft. 9 in. respectively from the fairlead. When the chain comes aboard, it is quickly secured to the wires by two 150 tons B.S. shackles, which are bolted through two of the open links in the chafing chain. The strain on the approach rope (which had followed the ship's rope round the drum-end of the windlass) is now released, and the weight allowed to come on to the wires, shackles chain, and buoy composite: the approach rope is then "turned-up" as an additional mooring and the ship is now all fast in the berth. Ship's tension wires, or other mooring lines, should also be shackled or lashed to the chain, for added security.

When leaving the berth, the ship's additional moorings are first detached from the chain, any slack which is in the approach rope is taken in and that rope made fast very securely. The slip wires are then slacked off slowly and carefully until the strain comes on to the approach rope (when strong winds have tightened the mooring, it will probably be necessary to put the engine slow ahead before attempting to do this). The shackles can then be taken adrift, freeing the wires, and the approach rope slacked off until the chain reaches the water – care being taken to ensure that it is not allowed to fall across the hoses. The engine is then put astern, and the rope allowed to pay out easily (with half a turn around the bitts to stretch it clear) as the ship leaves the buoy.

(Reminder – unlash the ship's rope from the approach rope before unmooring from the buoy!).

Loading. Rate of loading is between 32,000 and 50,000 b.p.h.

Conventional Buoy Moorings. In berths "Bravo" and "Delta" the ship is berthed with two anchors streamed out ahead and mooring lines to 5 buoys round the stern and quarters. In addition, to all buoys except No. 3 (right astern) there are attached 5.5 in. circumference steel wires, laid on the sea bed, buoyed, when not in use — in all but the most settled weather these are brought into the ship by the mooring launch, hove up and made fast on board. Vessels should have ready a good 3.5 in. rope messenger to take up these wires, and strong chain stoppers, or "carpenter's stoppers", for use when securing them.

Before the ship reaches the berth, there should be three good mooring lines ready on the after end of the main deck, two of which have been securely married in readiness to be sent away first, to warp the ship round. At least seven good ropes should be ready for running out from the poop, with lashings ready in case one rope has to be married to another. Plaited polypropylene ropes, at least 120 fathoms long and of a diameter and strength appropriate to the size of the vessel, are recommended: large manilla ropes, slow and cumbersome to handle, are definitely unsuitable for berthing under these conditions.

Synthetic ropes on automatic winches are favoured in this port, but it is recommended that they be at least 150, and preferably 200 fathoms long. The winches must be capable of being firmly locked when in the moorings — any tension feature is not permissible.

When it has been necessary to slip moorings in order to leave the berth quickly and without the assistance of the mooring launches, the Company will make every effort to recover them and to return them to the vessel as soon as possible. Normally the Company makes no charge for recovering anchors and moorings, but it reserves the right to do so under exceptional circumstances.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and with sufficient chain leading ahead to ride out heavy swells, it is recommended that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required on each anchor should be more than the length of the ship. In vessels of 100,000 d.w.t., for which the berths were designed, it is recommended that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 10 shackles (150 fathoms) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

HOSES: The lifting, lowering, connecting and disconnecting of the cargo hoses will be done by the tanker's personnel in accordance with the advice and directions of the Mooring Master. Ship's derricks and deck winches should be capable of operating with a safe working load of 7.5 tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer-guys" in addition to normal guy tackles. The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

Sets of bitts, or strong staghorns, for hanging off the hoses, must be provided, suitably located near the manifold.

On the surface, extending from the buoy (to which it is connected by a Chiksan swivel (a universal joint)), is a hose string comprised of 24 (at "Echo") 26 (at "Alpha" and "Charlie") 30 ft. lengths of 24 in. i.d. floating hose, culminating in a floating junction box: from the other side of this junction box emerge two strings of four lengths of 16 in. i.d. hose. The end ones – the "over-rail" hoses – are fitted with 16 in. to 12 in. A.S.A. reduction flanges, which, after the hose has been hove aboard, are bolted or clamped to the ship's manifold.

For V.L.C.C.s, additional lengths of floating hose are inserted if necessary.

LOADING: *Occidental crude oils and debutanized condensate:* The principal cargo loaded at Es Zueitina Terminal is Occidental Field Blended Crude Oil, pumped in from the Company's wells, two hundred and twelve kilometres inland, but in addition certain other grades of Crude Oil are loaded, namely, Occidental Medium Crude, Occidental Premium Crude, and Occidental Debutanized (Stabilized) Condensate. Also loaded are Liquid Petroleum Gas products, Butane and Propane (LPG) see "LPG Loading Berth", and "Agip" Buattifel Crude Oil, from the wells of Agnezia Generale Italiana Petroli, in concession 100.

The following pertinent data will, we believe, be of interest to tanker owners and operators, Masters and Mates, and to refinery operatives in the discharging ports:-

Occidental Field Blend
Average A.P.I. 40.1
Average Specific Gravity 0.8246
Pourpoint +35
Reid Water Vapour Pressure +5.2 p.s.i. at 100° Fah.
H_2S less than 5 p p m.
Flash Point below 60° Fah.
Average loading temperature on board 108° Fah.
Barrels per long ton at 60° Fah. 7.741

Occidental Medium Blend
Average A.P.I. 36
Average Specific Gravity 0.8448
Pourpoint +85
Reid Water Vapour Pressure +5.0 p.s.i. at 100° Fah.
H_2S less than 5 p p m
Flash Point below 60° Fah.
Average loading temperature on board 98° Fah.
Barrels per long ton at 60° Fah. 7.582

Occidental Premium Crude
Average A.P.I. 43.5
Average Specific Gravity 0.8086
Pourpoint +30
Reid Water Vapour Pressure +5.6 p.s.i. at 100° Fah.
H_2S less than 5 p p m
Flash Point less than 60° Fah.
Average loading temperature on board 108° Fah.
Barrels per long ton at 60° Fah. 7.922

Occidental Debutanized (stabilized) Condensate and Debutanized Condensate:
Average A.P.I. 78.0
Average Specific Gravity 0.6706
Pourpoint −60° Fah.
Reid Water Vapour Pressure 11.0 p.s.i. at 100° Fah.
H_2S less than 1 p p m
Flash Point less than 0° Fah.
Average loading temperature on board 75° Fah.
Barrels per long ton at 60° Fah. 9.555

The grades of cargoes to be loaded will affect the berthing schedule, irrespective of the chronological sequence of vessels' arrival times.

It is recommended that vessels take the maximum flow with due regard to safety, in order to both expedite the turn-round time and to obtain the bottom-weight to counteract the possible effect of local winds which frequently spring up with little warning.

Care must be taken not to overload, as there is no provision whatsoever for cargo once loaded to be pumped back ashore.

Warning is given of the danger of closing hoses against an incoming oil flow. Such a procedure may create excessive pressures which result in damage to loading hoses, sea lines, and other Terminal equipment. Vessels which ignore this warning and do in consequence cause such damage will be held responsible for all costs incurred for the renewal or restoration of the damaged equipment.

The attention of Masters is drawn to Safety Precautions, wherein they are reminded of their responsibilities for ensuring that all persons aboard their ships are cognizant with the hazards involved in the loading operations, and with the need for strict observance at all times of the Fire and Safety Rules. Debutanized Condensate, in particular, is a highly volatile fluid which must be treated with the utmost prudence.

(N.B. particulars of cargoes included in the foregoing are for information only and do not constitute a guarantee of quality.).

Loading – A.G.I.P "Buattifel" Crude: Because of its high wax content – 37% – A.G.I.P. "Buattifel" Crude Oil, (hereafter referred to as "Agip") has to be maintained at a very high temperature throughout its entire transit from the wells to the Terminal system, and thence via the sea lines to the berth and the loading vessel: it will arrive on board at approximately 140° Fah., and the heating coils in the cargo compartments must be motivated in readiness and be capable of keeping the oil at above this temperature.

Two berths "Bravo" and "Charlie", have been modified for the loading of Agip cargoes – ships may be moored in either of these berths but because of the considerable heating problem involved only one of the berths at a time can be used for loading Agip cargo. Through the submarine lines to "Bravo" and "Charlie" central "gut" lines have been inserted – at "Charlie" berth where the sea line is 48 inches diameter, the gut line is of 18 inches diameter, and at "Bravo" – sea line 42 inches diameter – the diameter of the gut line is 16 inches. These two gut lines (which are, of course, tied in ashore with the Terminal tank and metering and pumping complex) terminate 20 ft. from the headers at the seaward ends of the sea lines. The area between the outside of the gut line and the interior wall of the sea line is called the "annulus". To the headers (from which emanate the strings of flexible hoses which are ultimately bolted to the ship's manifold connections) are fitted remote control hydraulic valves, operative from the loading station within the Terminal.

Immediately prior to the berthing of the prospective Agip loading ship, hot Occidental crude oil is circulated from its storage tank, through the gut line, and back through the annulus, heating the entire system. Once the ship is securely moored, preparations are made to replace the hot "Oxy" oil with hot Agip oil. (60,000 barrels is the full line content at "Charlie", 33,600 barrels at "Bravo"). This process will take about four hours, and ship and shore must work in conjunction to ensure that the deballasting and the recirculation of the line with hot Agip oil are completed at about the same time. This is of vital importance, for once the line system is filled with hot Agip cargo it cannot remain in circulation for more than one hour. If the ship is not then ready to receive it, the Agip oil must be replaced by Oxy oil, and only after this has been circulated round the line can the line be again replenished with another circulation of Agip oil. This entire process may take about twelve hours – a wastage of time which neither the Terminal nor the ship operators can afford to contemplate with unconcern.

When ship and shore are ready to begin loading, the remote control valves are opened and, at a very slow rate, the cold Oxy oil which has been in the flexible hoses is loaded – 1,500 barrels at "Charlie", 300 barrels at "Bravo".

At this point, the loading officer in the ship will transfer the cargo to other tanks to avoid intermingling of the two types of crude, for now hot Agip is entering the ship's system, from the gut line. Loading continues at a slow rate until the contents of the gut line – 6,000 barrels at "Charlie", 3,600 at "Bravo" – have been pumped into the ship, after which the loading of the Agip, at normal rate, is through the annulus only. (The gut line is, at this point, filled with Oxy oil, which will remain static throughout the loading of the Agip cargo).

With about 2,000 barrels of Agip cargo to go to completion, loading is stopped in order that the ship's loading officer may check his ullages and calculations. When, in "Bravo" there are 300 barrels to go, in "Charlie" 1,500 barrels, loading is again stopped briefly: this marks the completion ashore of Agip cargo being pumped into the circuit. Now the Oxy oil in the gut line is pumped into the flexible hose strings, so that when the required quantity of Agip oil has been loaded into the vessels, the hose strings – from the headers to the terminal flanges, disconnected from the manifold – are filled with Occidental crude oil, which will not solidify whilst the hoses lie dormant under the sea. Similarly, the Agip crude oil in the annulus of the sea line is pumped back into the tank ashore and replaced throughout the system by Occidental crude.

The foregoing explanation pertains to vessels loading Agip cargo only, taking the minimum essential Occidental oil solely as a line flush. If, however, a ship requires a part cargo of Occidental crude, it will load that after completing the Agip cargo, except for that small quantity used as the line flush at the commencement.

A.G.I.P. "Buattifel" Crude, particulars:-
Average A.P.I. 41.0 at 60° Fah.
Average Specific Gravity 0.806
Wax Content 37%
Pourpoint +95
H_2S Nil
Flash Point 68° Fah. (ABEL)
Average Loading Temperature on board 140° Fah. to 150° Fah.
Barrels per Long Ton 7.9 (approximate)

(N.B. The above data is for information only and does not constitute a guarantee of quality).

LPG LOADING BERTH: *Berth, location and nature:* The LPG loading berth is S.S.W. of the Small Craft Harbour, inside Tre Scogli Reef. It is designed for vessels of approximately 700 ft. in length, with a cargo capacity of 32,000 cu.m. The maximum permissible loaded draft (1977) is 28 ft.

The channel through the reef, between Trinity Buoy (painted yellow, quick flash green, Lat. 30° 53′ 30″ N., Long. 20° 02′ 48″ E.) and Wafeya Beacon – Scoglio Sud – (white skeleton tower, group flash, 6 every 10 seconds) runs in a 315° (T) – 135° (T) direction: it is marked by two leading marks, the front one in position Lat. 30° 53′ 16″ N., Long. 20° 03′ 42″ E., and the rear one 750 m. (2,460 ft.), 135° (T), from this position. Both marks are black steel pylons with black and red oblong grid topmarks: the front one shows at night an amber light flashing every 1.5 seconds, whilst the rear one shows an amber occulting light, the period of light being six seconds every ten seconds. A small white spar buoy, showing at night a quick flashing red light, marks the turning position for ships approaching or leaving the berth.

The loading platform is of structural steel, supported on concrete piles, and faced with heavy rubber fenders. Ships are berthed alongside four breasting dolphins (two of which are incorporated into the loading platform), with other mooring dolphins ahead and astern and on the inside bow and inside quarter. Ships approaching the berth swing round on the port anchor and about six shackles of chain – when moored, the chain is hove tight.

Only one loading line is used, with a connecting flange of 6 in. A.S.A. 1,300 lbs. It is hove on board the ship with the ship's derrick or crane, or radial davit. A 12 in. chicksan available for large vessels. Vapour line to "flare" only provided.

Such is the location of the berth – fully exposed to winds from most directions but sometimes protected partially by the reef from the worst effects of the swell – that on occasions LPG tankers cannot be berthed although the crude oil berths in the harbour are operational. And vice versa. Consequently, with regard to Port Closure Time, the LPG berth is regarded as a separate entity from the main harbour.

Arrival: On first contacting Zueitina Marine by VHF (Channel 13 or 16), the Master of an LPG tanker should, in addition to giving his ETA at the Terminal Light Float, inform Zueitina Marine of his last port, the intended port of discharge after leaving Zueitina, the quantity and grade of cargo required, the temperature at which he wishes the cargo to be loaded, the size of the ship's manifold connections, and whether or not he has aboard a certificate of discharge for the cargo loaded in Zueitina.

If the vessel is to berth on arrival, the Mooring Master will board in the close vicinity of the Terminal Fairway Buoy. If the ship is instructed to anchor, the Master should do so in the recommended anchorage.

Pratique, Customs Formalities: If the ship has been obliged to anchor, pratique and Customs formalities may be dealt with in the anchorage. Alternatively, they may be attended to on board after the ship has berthed.

For information regarding documents required on arrival, Customs and Immigration procedure see "Documents".

Loading: For a ship which needs tank purging and cooling prior to loading, the minimum rate will be approximately 100 b.p.h. Inert gas is not provided at Zueitina Terminal – the vessel must provide inert gas for purging after previous cargoes other than butane or propane. The ship will not be loaded until the air has been purged to a maximum oxygen content of 0.5%. When loading has commenced, the minimum rate permitted by the Libyan Secretariat of Petroleum is 1,500 b.p.h. The maximum rate available is between 6,000 and 7,000 b.p.h. For "topping off", the rate can, within these limits, be adjusted to the requirements of the loading officer. Arrangements can be made in advance for the LPG plant to stop loading when the desired quantity has been metered into the ship, or alternatively, the ship's loading officer can instruct the Terminal to stop loading when he sees that the correct amount has been received aboard.

Loading operations on board are the responsibility of the ship's personnel. The Master's attention is particularly drawn to the Terms of Acceptance as detailed in the "Tanker Loading Advice" letter which he has signed, and to the "Zueitina Marine Terminal, Fire and Safety Rules".

The loading platform – abreast of the ship's manifold and within easy hailing distance – is manned at all times during loading operations, and the ship *must* maintain a continuous verbal contact with the loading operative. In addition, VHF contact between ship and loading installations must be maintained on Channel 12. In the event of any emergency – fire, leakage, parting of moorings, etcetera – the operative on the platform can stop the loading by remote control.

Unberthing in bad weather: Should deteriorating weather conditions necessitate the vessel leaving the berth quickly, a Mooring Master will be speedily available at all hours.

Cargo Particulars: The following data will, we believe, be of interest to Masters and Mates and operators of vessels loading LPG products:-

Propane
Average A.P.I. 146
Average Specific Gravity 0.510 60/60° Fah.
Reid Vapour Pressure 175 p.s.i.g.
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0° Fah.
Average Loading Temperature −40° Fah. (−40° Cent.)
Barrels per Metric Ton at 60° Fah. 12.3 (approx).

Butane
Average A.P.I. 114.2
Average Specific Gravity 0.576 60/60° Fah.
Reid Vapour Pressure 48 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0° Fah.
Loading Temperature at Ship's Request, within Ranges +18° Fah. (−8° Cent.) to +35° Fah. (+2° Cent.)
Barrels per Metric ton at 60° Fah. 10.8 (approx.)

(N.B. The foregoing data is intended for information only, and does not constitute a guarantee of quality.)

Departure: Immediately after completion of loading, the manifold connections are unbolted and the loading arms retracted. Shortly afterwards the Mooring Master will board and, with the assistance of adequate mooring boats, unberth the ship and pilot it through the reef to a safe anchorage in the outer harbour before disembarking.

When the documents pertaining to the ship's loading have been completed ashore, a clerk will take them out to the ship. (On occasions he will be accompanied by a Customs Official, boarding the ship to ensure that the seals which were put on bonded storerooms on arrival have not been tampered with before the ship has left Libyan territorial water.) It is customary for Zueitina Marine to inform the ship's Master when the documents clerk leaves the Small Craft Harbour, so that the anchor may be hove up and a lee side presented to the launch.

After the documentation formalities have been completed on board, the Master is required to pass by VHF to Zueitina Marine the official sailing time of his ship.

MEDICAL: Medical facilities are limited to emergency cases only. Under certain circumstances, however, the Terminal medical practitioner will give advice to Masters by VHF in cases where Crew members appear to be suffering from undiagnosed ailments. If it is essential for a sick person to be landed, the ship's Agent must first obtain the approval of the Government authorities.

The sick person when coming ashore must be accompanied by an officer or other responsible person able to speak English, and both the patient and the person accompanying him must be in possession of passports. (Not seamen's discharge books, which are not recognised in Libya).

FRESH WATER: No fresh water available.

FUEL: No bunkers available.

REPAIRS: There are no engineering repair shops.

SURVEYORS: Various companies of cargo inspectors perform duties at Zueitina, but must be arranged prior to vessel's arrival through U.K. or Paris headquarters. No Classification Societies in Zueitina.

REPATRIATION: Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

CUSTOMS ALLOWANCES: Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco, one litre of beer, or half a litre of wine, for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition, and saccharine, will be retained under seal whilst the ship is in Libyan waters.

CONSULS: There are consulates in Benghazi for most of the maritime nations. Those nations not represented in Benghazi are represented in Tripoli.

BALLAST: Because of the exposed position of the sea berths, it is essential that vessels arrive with sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Experience has shown that a fair estimate of the amount required is one third of the summer deadweight. A tanker found by the Mooring Master to be insufficiently ballasted will be rejected. However, it is imperative for the safety of the ship and of the installation that deballasting should be as speedy as possible, to reduce the period wherein the ship is most vulnerable to any sudden deterioration in the weather. It is, indeed, to the advantage of everyone concerned if the ship is able to commence loading as soon as the hoses are connected, deballasting simultaneous with the loading of the cargo. In cases when it is essential to complete the deballasting before loading can start, and deballasting time in excess of six hours will be deducted from the lay time.

As there are at Zueitina no facilities for discharging it ashore, vessels must arrive at the Terminal with clean ballast: all lines, pumps, and strainers must have been flushed out prior to arrival within one hundred miles of the Libyan coastline.

The Mooring Master will inspect ship's ballast on boarding, and he has the power to reject any vessel that he deems would cause pollution in the Terminal waters. A vessel so rejected must proceed to a position over one hundred miles from the coast, re-ballast, and return only when the ballast is completely clean. A new notice of readiness must then be tended, and the loading turn will be counted as from this second arrival.

The sea area round the ship shall be adequately lighted, as frequent inspection by the Mooring Master will be made during ballast discharge. Any pollution whatever, including bilge discharge, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection – a vessel rejected on these grounds will not be re-accepted until satisfactory evidence of repairs has been certified by a qualified surveyor.

On completion of deballasting, all unused cargo connections must be blanked off, sea valves closed and lashed, deck scuppers securely plugged, and drip pans placed below the cargo hose connections. All the requirements listed on the Company's Safety and Fire Precautions Check Form must be seen to be complied with before loading is commenced.

In the event that the Company has to settle any third party claims as a result of damage to property caused by pollution attributable in any way to a vessel, the Company will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

WEATHER: Weather conditions in Zueitina are generally clement. The temperature during the Winter seldom falls below 10° C. (50° Fah.), and in the Summer, even at midday, is rarely in excess of 35° C. (95° Fah.). The prevailing winds are North-Westerly. During the mid-Summer months, the land- and sea-breezes phenomenon is very apparent: a North-Westerly wind springs up at about 1100 hrs. sometimes to reach near-gale force by late afternoon, then gradually dying away during the evening. At about 2300 hrs. the wind begins to blow off the land – again sometimes to a fresh breeze or near-gale – before falling away completely around dawn.

During the Spring and Autumn, and in the early Winter months, there are frequent prolonged periods of calm, tranquil weather. However, in Spring especially, and again in the Autumn, such periods may be interrupted by the onset of the "gibli", an off-shore wind which, like the "khamsin" wind in Egypt, springs up with little warning to reach gale intensity, laden with sand and dust to such an extent that visibility is reduced to a few yards.

In the Winter months, prolonged periods of strong North-Westerly gales, with very heavy seas and high swells, accompanied by frequent rain squalls, are experienced. Even after the strong winds have subsided, long, high swells may continue for several hours to prevent mooring operations. Such North-Westerly gales are usually accompanied by a sharply rising barometer, and follow the passing of a cold front, with winds from the West.

Rainfall is confined to the Winter months only. Fog is rare, though it does occasionally occur in the Spring and Summer around dawn, generally dissipating after two or three hours.

GENERAL: Vessels are advised not to have on board any articles whatsoever of Israeli origin. If anything of such a nature is found it will be confiscated and the ship be liable to a fine and possibly to a delay for further investigation.

Goods – and, in particular, alcohol and tobacco – must not be taken from ship to shore, or from ship to ship.

Being an open roadstead, vessels must keep engines in a state of immediate readiness. No repairs to main engine may be undertaken in berth. Steam or electric power must be available on deck in case adjustments to anchor cables or mooring lines are found necessary. Power must be available on ship's whistles and sirens. Ship's boats must not be lowered into the sea and detached from the falls. Swimming is prohibited. The Mooring Master (and, when applicable, his assistant(s)) assigned to a tanker, will remain on board until after the vessel has loaded, unmoored, has completed documentation formalities and has cleared the Company's installations and is safely heading for she open sea. During the time he is aboard he is to be provided with accommodation suitable for one of Master Mariner status, and with palatable meals.

SHORE LEAVE: No shore leave is permitted.

NOTES

Please also advise Shipping Guides Ltd.

AUTHORITY: Zueitina Marine Terminal, Occidental of Libya, Inc., P.O.Box 2134, Tripoli, S.P.L.A.J. *Tel:* Tripoli 38011 (ext. 116-119 Zueitina). *Telex:* 20289 Oxy Ly. *Cables:* Oxyport, Oxylibya Tripoli. *Contact:* Captain J. Folkestad, Marine Superintendent.

AGENCY: All ships must have an approved Agent to look after their interests. As from 1st June, 1978, all shipping agencies in the Socialist People's Libyan Arab Jamaharaya have been superseded by one nationalised company, known as The Shahat Shipping Agency.

See "General" before first port.

Cables of estimated time of arrival sent to the Agent should be in addition to, and not in place of, those sent to Oxyport, Oxylibya, Tripolilibya. Total charges are 750 Libyan dinars for the first 30,000 tons summer deadweight, or part thereof, plus 2 dinars 500 Dirhams for every 100 tons or part thereof in excess of 30,000 tons, plus 2% of the total sum in revenue stamps.

Madeira

FUNCHAL: 32.38 N. 16.55 W. (See Plan Book)

DOCUMENTS:

Maritime Declaration of Health Form.
5 Crew Lists.
12 Lists of Passengers finally landing.
5 Lists of Passengers in transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of shops on board.
6 Copies of Manifest of Cargo for discharge.
2 Copies of each B/Lading of Cargo for discharge.
1 Copy of Manifest of Cargo in Transit.
1 List of Passengers finally landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

PILOTAGE: Vessels should radio their ETA to Agents who order Pilot. 24 hours' notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with VHF, Channel 16 (calling) and Channel 6 (working).

ANCHORAGE: Permitted anchorage within 800 m./900 m. East from end of breakwater or 300/500 m. South of breakwater within a limit of 400 m. from shore.

RESTRICTIONS: None.

MAX. SIZE: No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay max. permissible length 990 ft. max. draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Max. length of oil tankers than can berth at oil discharge buoys 665 ft. max. draft 36 ft.

HEALTH: Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request Free Pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master".

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters' radio for Free Pratique or pratique granted by Doctor visiting in bay.

RADIO: Maderia Radio Station call sign "CUB" 500 kHz. Same station normally used by Agent when communicating with vessel.

TUGS: Two tugs each of 1,000 h.p. – 1,100 h.p. (bollard pull 18 tons) are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use one tug.

Vessels over 15,000 gross tons are obliged to use two tugs.

BERTHING:

Quay No. 1 Length 139 m., depth 6 m.
Length 41 m., depth 7 m.
Length 19 m., depth 8.5 m.
Quay No. 2 Length 425 m., depth 11 m.
Quay No. 3 Length 347 m., depth 11 m.

CONTAINER FACILITIES: Container Terminal: Length 190 m. Depth 7.0 m.

Equipment: 1 Crane, 25 tons at 20 m.
1 Crane, 30 tons at 30 m.
1 Mobile Crane, 22 tons at 20 m.
1 "Travelift" of 45 tons capacity.
4 Container Handling Cranes with extendable spreaders for 20 ft., 30 ft. and 40 ft. containers.

STEVEDORES: When ships require labour, Agents must be notified before 1600 hrs. on working days and on Sundays and holidays before 1100 hrs., after these hours labour not available for last minute engagement. On Christmas Eve work stops at noon even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2000 hrs. daily including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilizers need to be bagged on board. Receivers supplying the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

MEDICAL: Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

TANKERS: Diameter of connection of discharge lines 8 in. into pipelines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with max. draft of 36 ft.

DENSITY: Salt water.

FRESH WATER: Available ex-quay.

FUEL: Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours' minimum notice required.

FIRE PRECAUTIONS: At discharging buoys usual non-smoking precautions.

GANGWAY/DECK WATCHMEN: Gangway watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

CARGO GEAR: No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over five tons must be effected by ship's gear.

10 mobile cranes are available.
1 crane – 6 tons at 12 m., 3 tons at 24 m.
3 cranes – 5 tons at 20 m.
3 cranes – 3 tons at 12 m.
1 crane – 15 tons at 13 m.
1 crane – 45 tons at 3 m.
1 crane – 20 tons at 3 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

IDENTIFICATION CARDS: Required.

CONSULS:

Austria	21057	Monaco	20041
Belgium	20255	Netherlands	20317
Brazil	20355	Norway	20541

Italy	23890	Venezuela	24050

REPAIRS: Repair yard available which can carry out most engine repairs on board except removing or replacing main engines. Hull work limited to removing riveting or replacing hull plates above water line, electric and oxy-acetylene welding. Most electrical work can be effected but notice required in regard to materials necessary. Foundry where castings can be made up to one ton weight.

DRY DOCKS: None.

REPATRIATION: Limited facilities for crew changes. Necessary repatriations can be made.

AIRPORT: At Santa Cruz, 20 km. East of Funchal. Service between Funchal and Lisbon operated by national airline TAP, 19 flights weekly Funchal/Lisbon/Funchal.

TIME: GMT maintained throughout year.

HOLIDAYS: New Year's Day (totally unworkable); Easter Sunday (totally unworkable); Municipal Holiday (local) (workable, 50% overtime); Camoes Day (workable, 50% overtime); Corpus Christi (workable, 50% overtime); Assumption (workable, 50% overtime); Proclamation of the Republic (workable, 50% overtime); All Saints (workable, 50% overtime); Independence of Portugal (workable, 50% overtime); The Immaculate Conception (workable, 50% overtime); Christmas (totally unworkable).

Workers' Day, Portugal Day and Good Friday are also totally unworkable.

Saturday is an ordinary working day. December 24 (workable up to 1500 hrs. only).

POLICE/AMBULANCE/FIRE: Police 22022; Ambulance 22122; Fire 21163.

SHORE LEAVE: All crew visiting shore must be in possession of special Landing Card, plus Identity Cards, Discharge Books or Passports, which must be shown to Immigration Officer at gangway. Crew Landing Cards must be stamped by Immigration Officer before crew can proceed ashore.

GENERAL: There is a Marina for 200 craft with depths between 3 m. and 6 m.

AUTHORITY: Capitania do Porto do Funchal, 9000 Funchal, Madeira.

- Safety Equipment Certificate.
- Derat Certificate.

For a Cargo Ship:
- Load Line Certificate.
- Safety Construction Certificate.
- Safety Equipment Certificate.
- Safety Radio Equipment.
- Derat Certificate.
- Ship's Register (held by the Agent).

After checking all these an Outward Clearance Certificate will be presented. One is then free to leave the Port, the Agent having given an undertaking that all Port dues have been paid.

APPROACHES/PILOTAGE: Tides run fast in the Orangea Pass, but seem to follow the pattern as per the Admiralty Pilot. Until experience is gained it should only be taken in the hours of daylight. There are numerous natural transit marks available to the navigator, all very clearly described in the 'Pilot'. For this reason it would be essential to take this in fine visibility. Pilot can be taken at Cape Mine but this can be difficult and dangerous in the S.E. Trade season and ships are advised that they can proceed on into the Bay right up to Port Antsiranana Point.

Harbour is large and commodious but subject to very strong N.E. winds from May to October, width of entrance 300 m. Tidal current in Roads, which may attain 3 knots. HWST 2.36 m., LWST 3.56 m., HWNT 1.63 m., LWNT 0.99 m. Pilotage compulsory for vessels of 150 n.r.t. and more. For obtaining Pilot, ETA must be sent 24 hours in advance including ship's characteristics. Course to steer: From Lat. 12° 13′ 09″ S., Long. 49° 26′ 00″ E. Entrance 275° thence beacons in line heading 230°.

ANCHORAGE: There are many splendid anchorages available in this vast Bay. Vessels can anchor 2 cables off the N.W. corner of the wharf at Antsiranana (Diego Suarez).

RESTRICTIONS: No entry for vessels or crews from: Formosa, South Africa and South Korea.

MAX. SIZE: No restriction except max. draft alongside 11 m.

HEALTH: Yellow fever/cholera certificates required for vessels coming from African/Indian countries. Pratique is automatic for vessels entering after calling at another port in the same country.

RADIO: Radio station is "Diego Radio".

VHF: Harbour Master's Office does not have VHF. Navy have VHF Channel 16.

TUGS: Three small tugs available (belonging to Navy and require 24 hours' notice).

BERTHING: Ocean Vessel Wharf: Length 300 m., max. depth 11 m. HW.

Coaster Quay Wharf: Length 60 m., max. depth 4.20 m.

With Pilot, vessel can come alongside day or night.

CRANES: Two port cranes, only used for small coasters. 1×5 tons and 1×2 tons.

STEVEDORES: Advise before 0700 hrs. in order to commence the same day and before 1700 hrs. in order to commence next day at 0600 hrs. with maximum gangs.

Working Hours: 0700 – 1100 hrs., 1300 – 1700 hrs. Overtime Working: 0600 – 0700 hrs., 1100 – 1300 hrs., 1700 – 0600 hrs. No half shifts.

MEDICAL: Difficult to find medicines. In case of serious illness hospital facilities available.

TANKERS: See "Berthing". Discharging rate 200 cu.m.p.h. with flexible hose. Loading rate 30 – 50 t.p.h., depending on ship.

FRESH WATER: Available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Trade Union on the spot can supply.

OPENING/CLOSING HATCHES: Usually by ship's crew.

SPECIAL PORT REGULATIONS: See "Restrictions".

CONSULS: French Consul.

REPAIRS: All types of deck and engine repairs can be carried out.

DRYDOCK: *Shipmaster's Report:* 1975.

Length overall	199.05 m.	653.00 ft.
Subdivided into sections	128.96 m. 70.09 m.	424.00 ft. 229.00 ft.
Breadth at Bottom	28.40 m.	93.00 ft.
Breadth at Coping	36.60 m.	120.00 ft.
Depth at sill and blocks at MHWS	10.42 m.	34.40 ft.

Yard Services: Nothing was too much trouble for any of their staff attending this ship. Power was a bit of a problem but they did everything to help. Fire mains, fresh water, cranes were all good. Toilets and shower-rooms were more than adequate especially after we were given our keys and had them cleaned.

Workshops: A modern well equipped yard with every conceivable service from an iron foundry to upholstery shops. A clean, well kept set of shops including the building of small craft. The Engineers of this ship were very favourably impressed with the shops and technical services.

From time to time, the yard meet with certain material supply difficulties to satisfy full needs for ship repairs. It is recommended that Owners interested in docking their vessels at this yard study this matter before contracting.

Firms Address: Societe d'Exploitation pour la Construction et la Raparation Navale, B.P. 135, Antsiranana, Madagascar. Tel: General Manager (Home) 221-70, (Office) 226-84, Central 212-65 and 222-98. Telex: 93 103. Cables: Secren, Diego Suarez.

SURVEYORS: There is no Lloyd's Surveyor in the country. Often when required Lloyd's Representative flies up from Durban. Sometimes it is agreed that the resident Bureau Veritas Surveyor will subsititute. M. Ralibera Henri in Tananarive is the principal B.V. Surveyor in Madagascar. M. Ralibera received agreement from his head office in Paris to act as non-exclusive surveyor of N.K., N.V. and local insurance company.

CUSTOMS ALLOWANCES: (Tobacco/wine, spirits) Quantity permitted to be held out of bond is only for the personal consummation of each crew member.

CARGO GEAR: Load/discharge effected by ship's gear, no heavy lift cranes available.

REPATRIATION: For crew changes Entry-Visa is required and repatriation can be carried out according to Harbour Master's Certificate and Immigration permission.

AIRPORT: AirMad Services are available each day to connect with the international Air France flights to Orly from the local airfield about 8 miles from the town.

TIME: Local time is GMT plus 3 hours.

HOLIDAYS: Sunday, but can be worked on overtime from 0600 hrs. to 1400 hrs.

New Year's Day, Commemoration of 29th March 1947, Easter Sunday and Monday, May 1st, Ascension Day, Whit Monday, Independence Day (June 26th), Assumption BV Mary (August 15th), All Saints' Day (November 1st), Christmas Day, Anniversary of the Democratic Republic of Madagascar (December 30th). No work possible on these holidays. Overtime rates for all other holidays.

TELEPHONES: No telephones placed on board.

SERVICES: Facilities for compass adjusting, radar and radio repair by Secren (see "Drydock").

BANKS:

Bankin'Ny Indostria (BNI), Angle Rue de France et Rue Colbert, B.P. 4., Antsiranana, Madagascar. Tel: 221-46, 221-52.

Banky Fampandrosoana Ny Varotra (BFV), (Banque Nationale Pour Le Commerce), Rue Richelieu, B.P. 18. Tel: 211-89.

Bankin'Ny Tantsaha Mpamokatra (BTM), (Banque Nationale Pour Le Developpement Rural), Rue Richelieu, Antsiranana, Madagascar.

STORING: Local stores can be delivered directly on board even during loading/discharging, by the ship chandler. Agent will arrange Customs formalities.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

REGULATIONS: Any repair work involving even small temporary repairs only with Harbour Master's permission. Using vessel's lifeboat subject to Harbour Master's and Customs permission. Landing of foreign currency is strictly prohibited. Possession of local currency must be justified.

DELAYS: None.

AUTHORITY: Service Provincial de la Marine Marchande, au Port, Antsiranana, Madagascar. *Tel:* 211-33.

AGENT: S.C.A.C. Transport International, Box Poste 384, Diego Suarez, Madagascar, Malagasy Republic. Tel: Diego Suarez 21327 and 21347. Telex: 93102. Cables: Freight Antsiranana.

FORT DAUPHIN: 25.02 S. 47.02 E.

DOCUMENTS:
- Manifest of Cargo for discharge.
- Manifest of Cargo in transit.
- Ship's Stores List.
- List of Passengers Landing.
- Crew List.
- Franchise Certificate (for mail-carrying vessels).

PILOTAGE: The port is an open roadstead and pilotage not required.

ANCHORAGE: In depths of 8 m. Vessels anchoring are charged with port dues.

RESTRICTIONS: Port is normally used by coastal trading vessels. In case of liners handling cargo exceeding 150 tons, special permission required which is obtained by Agent.

HEALTH: Pratique should be requested from the Health Department, Tel: 36.

RADIO: Fort Dauphin Radio, call sign 5RD, between 0400 and 1630 hrs. GMT on following frequencies: 458, 500, 2182 and 2712 kHz.

TUGS: None available.

BERTHING: There are no berths alongside. Vessels work cargo at anchorage.

STEVEDORES: Arranged by the Fort Dauphin Lighterage Company. Advance notice of ETA required to arrange gangs. Average loading/discharging rate is 10 tons per hold per hour.

MEDICAL: 2 hospitals available in the town.

TANKERS: 1 buoy berth for tankers.

FRESH WATER: No water barge. Only small quantities can be supplied in emergency.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches carried out by stevedores.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per man. No alcohol.
CONSULS: No local representatives.
REPAIRS: Only facilities available for repairing lighters.
REPATRIATION: No facilities for effecting crew changes.
AIRPORT: Situated 5 km. from the port, 4 regular flights per week.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Days on which work is normally carried out with overtime payment: Easter; Ascension Day; Whitsun; Assumption; Christmas.

Official holidays on which work can be arranged by special permission: 1st January; 1st May; 26th June (Independence Day); 14th October; Festival of the Republic.

FIRE/POLICE/AMBULANCE: Police Tel: 49; Fire 19; Ambulance 36.
SHORE LEAVE: Not permitted.
AUTHORITY: Service des Ports' Phares et Balises, Tananarive.

AGENT: SCAC Transport International, BP 425, Tananarive. Tel. 228–64. Cables: "Freight Tananarive". Telex 22251.

MAHAJUNGA (Majunga): 15.44 S. 46.20 E.

DOCUMENTS:
List of Crew Members.
List of Passengers.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels requiring Pilot must apply by cable to Mahajunga Harbour Master's office at least 24 hours before arrival. Pilot embarks at Narcissus buoy.
ANCHORAGES: Indicated to Ship's Master by cable from Mahajunga Harbour Master's office.
RESTRICTIONS: Ships can enter day and night. Max. draft allowed 10 m.
MAX. SIZE: No restriction except for max. 10 m. draft.
HEALTH: Pratique automatic when vessel comes from a Madagascar port. Pilot is health agent.
RADIO: Radio Mahajunga.
STEVEDORES: Vessel informs Agent by telegraph 24 hours in advance of number of gangs needed.
MEDICAL: Hospital available.
TANKERS: 1 berth, max. draft 10 m.
FRESH WATER: Unlimited drinking water.
CERTIFICATES: See "Toamasina".
CUSTOMS ALLOWANCES: See "Toamasina".
CONSULS: French and Greek Consulates.
REPAIRS: Minor repairs only.
REPATRIATION: All facilities available.
AIRPORT: Served by regular airlines; 7 km. from town.
TIME: GMT plus 3 hours.
HOLIDAYS: Catholic and official holidays. Commercial transactions possible on public holidays.
POLICE/FIRE/AMBULANCE: Police 24–85; Fireman 13; Hospital 29–15.
AUTHORITY: Harbour Master.

AGENT: S.C.A.C. Transport International, B.P. 256, Mahajunga. Tel. 23.87 and 20.08. Telex: 62710. Cables: Freight Mahajunga.

TOAMASINA (Tamatave): 18.08 S. 49.22 E.

5 Full Sets Cargo Manifests.
3 Lists Passengers Disembarking and Transitting if any.
Port:
4 Full Sets Cargo Manifests.
4 Dangerous Cargo Lists.
Agents:
2 Full Sets Cargo Manifests.

PILOTAGE: Compulsory. Telegraphic address: Porttave Toamasina. Telex: 55619 Port Mg. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the extension of breakwater, the South Pass is closed to deep-sea ships, except small coastal vessels. For large vessels, the pilot boat waits on the East Pass on line 277° True or range approximately 3.3 miles S.S.E. of Prunes Island Lighthouse.

The pilot boat is fitted with a small portable VHF set (Channels 16, 12, 9 and 6) but its effective range is only about 5 miles.

ANCHORAGES: No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.
RESTRICTIONS: Ships enter and sail day and night any time. Max. tide only 3 ft. However, tankers berth in daytime only between 0500 hrs. and 1500 hrs.
MAX. SIZE: For Roads, max. length about 200 m. (concerns only passenger ships). For cargo vessels max. length 180 m.; max. draft 31 ft. 2 in. (9.5 m.).

For tankers, max. LOA 230 m., max. beam 31 m., max. draft 12.20 m. in salt water. Distance from stern to manifold 110 m.

HEALTH: Quarantine message sent to Agents who inform Health Service. "Q" flag must be hoisted during daytime or red over white light at night time if health satisfactory. Master presents Maritime Declaration of Health. Health Officer and Immigration board at Quarantine Anchorage.
RADIO: Toamasina Radio, call sign 5RS.
VHF: Toamasina Radio – Channels 16, 26 and 27.
TUGS: 1 tug of 1,750 h.p. available to assist berthing. One tug 200 h.p. for towing fresh water barge.
BERTHING: 4 berths for deep-sea ships and 2 berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when S.E. trade winds are strong, or if cyclone in vicinity. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.
CRANES: 3 ton and 6 ton cranes available for hire. Floating crane 80 ton capacity and mobile crane 45 tons also available.
TANKERS: 1 refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 inches. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

Shipmaster's Report: A brief description of the berthing manoeuvre is as follows:

About 350 m. from the berth, let go starboard anchor and swing around to starboard with the assistance of a tug, slacking the cable all the time. As vessel completes swing, let go Port anchor, then slack down both anchors. Vessel usually finishes up with about 9 shackles on each anchor. Aft, vessel secures with 4 lines from the starboard quarter to the buoy and 4 lines from the port quarter to the quay. The mooring operation takes about 2.5 hours and unmooring about 1.5 hour.

Facilities:

1. One 12 in. rubber hose, connected always from the starboard side. You can expect 4-5 hours for connecting up the hose and about 2-3 hours for disconnecting.
2. The shore tanks are situated about 5 km. from the vessel, and have a total storage capacity of about 100,000 cu.m. The tanks are located about 4 m. above sea level, the heights of the tanks being approximately 13 m.
3. The main pipe-line is 20 in. diameter by 5 km. long.
4. Maximum back pressure permitted is 6-7 kg. However, in view of the length and size of the line it is very difficult to obtain such a pressure, even with all 3 pumps going all out. Understand from the refinery Superintendent that maximum back pressure so far attained was 4 kg. The back pressures are monitored by gauges fixed on the manifold and on the quay.
5. The maximum draft permitted at the Tanker mooring is 40 ft. Fully laden tankers arriving can berth only in daylight hours. However, 24 hour sailing is possible.
6. The cargo discharging operations are as follows: The main pipe-line is kept constantly filled with bunker fuel and has a capacity of approximately 1,000 cu.m. After connecting up vessels commence discharge of their crude. The bunker fuel in the line is thus pushed back and stored in a separate tank ashore. The vessel then continues to discharge her full cargo. After completing discharge, all tanks are inspected and a dry certificate obtained. The refinery then pushes back the pipe-line crude (1,000 cu.m.) and about 1,200 cu.m. of bunker fuel, which must be stored on the ship in separate tanks. Thereafter, the vessel must discharge all crude, and finally the bunker fuel.
   Thus the pipe-line is constantly kept filled with bunker fuel.
   The drawbacks to the vessel are obvious. 3 individual stripping operations are involved viz. stripping the crude during completion of discharge, stripping of pipe-line crude stored in the ship and stripping of the bunker fuel.
   Note: Capacity of shore pumps (when transferring oil back to ship) is 800 t.p.h.
7. Communications: A telephone is installed aboard for communication between ship and shore. This however, never seems to be at its best when you need it most. Other difficulties are the language barrier (French being spoken). Notwithstanding, the slow rate of discharge obtainable, helps to offset in part the lack of communications.
8. Out-turn quantities: It is understood that these are checked by sounding shore tanks.
9. Bunkers are available on 24 hours notice. Range Redwood 1,000–1,500 seconds.
10. Diesel oil is available, however, as the supply barge has been out of commission for sometime now, supply cannot be depended upon.
11. Fresh Water available.
12. Connection and disconnection of the cargo pipe-line is undertaken by the refinery personnel.

STEVEDORES: ETA to Agents must give hatches, tonnages, and all information about cargo.

Working hours: 1st shift 0700 – 1400 hrs., 2nd shift 1400 – 2100 hrs. On Sundays there is one shift 0700 – 1400 hrs. at overtime rates.

MEDICAL: Preferable to inform Agents in advance. All hospital facilities available.

DENSITY: 1023.5.

FRESH WATER: Delivered by water-boats at rate of about 100 t.p.h.

FUEL: Available alongside. Gas oil and diesel oil at 70 t.p.h. Fuel oil at 110 t.p.h.

FIRE PRECAUTIONS: 1 fire-boat stationed near tankers.

GANGWAY/DECK WATCHMEN: Recommended. Very low cost.

OPENING/CLOSING HATCHES: Booms always operated by crew. If hatches are Macgregor type, by crew; otherwise by stevedores.

CERTIFICATES: Safety Certificates (3), Derat or Exemption Certificate, Register, Load Line Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes. Wine/Spirits, 1 opened bottle.

IDENTIFICATION CARDS: Only seaman's papers required.

CONSULS:

Denmark	2615	Great Britain	2680
Netherlands	2632	Norway	2549
France	2721	Sweden	2136

REPAIRS: Only small repairs possible.

REPATRIATION: Possible, arranged by Agents.

AIRPORT: Served by regular airlines. 1 flight a day by Air Madagascar to Tananarive and 4 to 6 flights a week from Tananarive to Africa and Europe.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: 13 holidays per year. Cargo work cannot be arranged on holidays but can be on about every second Sunday.

TELEPHONES: 2 connections at 2 berths used for passenger ships, but may be requested by other ships.

SHORE LEAVE: Permitted.

DELAYS: Not fixed. When all berths occupied, ships wait at anchorage.

GENERAL: 2 cranes of 3 tons each. 1 floating crane for max. 80 tons weight. Small tugs and lighters for ships operating on roads. 1 port launch for crews of ships at anchor.

DEVELOPMENTS: New quay recently constructed.

AUTHORITY: Societe d'Exploitation du Port de Toamasina, B.P. 492, Republic of Malagasy. *Tel:* 321-55/56, 327-60/68/69/71. *Telex:* 55.619 Port Mg.

AGENT: SCAC Transport International, Rue du Capitaine-Shoel, BP 411, Telex: 55610. Tel. 320-48; 320-49; 326-80; 326-81. Cables: "Freight Toamasina".

NOTES

Please also advise Shipping Guides Ltd.

BINTULU: 03.16 N. 113.04 E.

LOCATION: The single buoy mooring is positioned at Lat. 3° 20′ N., Long. 113° 01′ E. and can accommodate tankers with max. SDWT of 320,000 tonnes.

DOCUMENTS:

Last Port Clearance.
9 Crew Lists
3 Malaysia Crew Lists (Provided on arrival).
2 Copies General Stores Lists.
1 Shipping Arrival Report (Provided on arrival).
1 Application for Clearance (Provided on arrival).
5 Passenger Lists.
3 Narcotics Lists.
3 Arms and Ammunitions Lists.
2 Crew Personal Declaration Lists.
2 Vaccination Lists.
3 Copies Inward Manifest ("Nil" Manifest required).
International Maritime Health Form, provided by Agent.

Note: If vessel from an infected port of which the state of health is suspect, the Medical Officer may board in order to inspect crew and relevant international medical certificates.

PILOTAGE: Bintulu Port Authority Pilot, Loading Master, assistant and surveyors board at pilot boarding and disembarking position Lat. 03° 22.0′ N., Long. 112° 58′ E. Derrick to be rigged on starboard side prior to arrival. The regulation pilot ladder should be rigged well aft on the lee side. Prior to moving to berth mooring equipment is loaded onto vessel's forecastle.

Loading Master and about 4 shore personnel including Agent remain on board during loading operations.

ANCHORAGES: A petroleum anchorage bounded by the following co-ordinates has been established:

Lat. 03° 24.4′ N., Long. 112° 57.3′ E. Thence to position
Lat. 03° 21.3′ N., Long. 112° 59.6′ E. Thence to position
Lat. 03° 22.0′ N., Long. 113° 02.4′ E. Thence to position
Lat. 03° 26.0′ N., Long. 113° 01.2′ E. Thence along the limits of the port to position Lat. 03° 24.4′ N., Long. 112° 57.3′ E.

Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

RESTRICTIONS: None. Berthing and unberthing is carried out night and day.

MAX. SIZE: The minimum water depth in the manoeuvring area is 62 ft. and the max. permissible draft 52 ft. Max. distance bow to centre manifold 590 ft.

TUGS: Tugs available. The Port Authorities make it compulsory for tankers to use a tug for berthing/unberthing.

BERTHING:

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. × 150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.

(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes of 2 ft. on each side. Length 45 ft.

(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connection and remains at the vessel until the completion of loading.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least 1 hour early to check and make sure that the hoses are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range the vessel's bow is approximately 115 m. from the SBM i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

LOADING:

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Hoses: 2×16 in. diameter floating hose strings of 810 ft., in length are connected to the turntable. The strings terminate in a 16 in. diameter rail hose for direct connection to the tankers starboard manifold. The last 3 units of the 16 in. diameter tail hoses are electrically discontinuous, such that stray currents from the crude carriers are not carried on to the buoy.

Connecting Hoses: Hose connection is carried out by ship's crew. The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker' manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Bintulu Crude is loaded at Bintulu Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m./hr. and a maximum back presssure at 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the terminal's representative he will attend to all cargo formalities (SSB forms, safety check list, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and terminal representative to ensure all requirements on the safety check list have been complied with.
(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactory.
(c) Ship and shore to confirm readiness to start cargo loading operations.
(d) Commencement of loading to be at slow rate.
(e) Lines and hoses are checked and faults rectified. Launch to patrol around vessel to check for oil leakages into the sea.
(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
(g) Lines, hoses and the water around the vessel are again checked.
(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.
(i) At least 15 minutes notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

DEPARTURE ROUTE: For deep draft vessels the following departure routes (approaching – opposite course) are recommended:

North-West Route:

From SBM steer 304° to position: Lat. 3° 51′ N., Long. 112° 14′ E.

Along this route 2 navigational light buoys have been laid both SOUTH CARDINAL:

1. PARSONS SHOAL (Beting Tugau) position: Lat. 3° 52′ 22″ N., Long. 112° 16′ 06″ E.

2. SOUTH ACIS SHOAL (Beting Likau) position: Lat. 3° 35′ 50″ N., Long. 112° 39′ 36″ E.

North-East Route:

From SBM steer 015° to position: Lat. 3° 35′ 25″ N., Long. 113° 05′ 25″ E., which is marked by EAST CARDINAL light buoy (Beting Nabau).

Onward course 042° to position: Lat. 3° 52′ N., Long. 113° 20′ E.

The N.N.E.'ly tip of the COCHRANE BANK is marked by an EAST CARDINAL light buoy (Permating Payong) in position: Lat. 3° 51′ 38″ N., Long. 113° 18′ 06″ E.

A 36 in. gas trunk line has been laid to the North and East of the SBM.

HEALTH: See "Documents".

RADIO: Vessels are required to advise SSB/Respective Agents of their ETAs 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Bintulu Terminal on VHF Channel 18.

W/T traffic should be passed through Singapore Radio, Kuching or Miri Radio.

Information required prior to arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA ETA and draft at Bintulu SBM.
BBB Customs and Health requirements.
CCC Is vessel equipped with bow chain stopper, Smit Brackets and large central Panama Chock. (This information required from unknown vessels only.)
DDD Are manifold connections as per OCIMF specifications.
EEE Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF Have 2×16 in. diameter manifold connections ready on starboard side.
GGG Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA Based on your ETA . . . present intention is to berth you on arrival.
BBB Pilot will board at the boarding area of 2 miles diameter in the following position:
Lat. 03° 22′ N., Long. 112° 58′ E.
CCC Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival at Bintulu Terminal on VHF Channel 18 or 16.
DDD Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE After having established radio contact on VHF you will receive further instructions.

VHF: Bintulu Port Control operates on VHF Channels 12, 14 and 16 and Bintulu Terminal on Channel 18, ships should inform Bintulu Port Control on Channel 12 and Bintulu Terminal on Channel 18 of their ETA at least 3 hours before arrival at pilot boarding point or as soon as VHF contact can be established. Bintulu Port Authority requires every vessel whilst underway within port limits and in the approaches thereto to maintain continuous watch on Channel 12.

BALLAST: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

DENSITY: Varies between 1020 and 1025.
FRESH WATER: Can be supplied by water boat.
FUEL: Not available.
REPAIRS: No facilities available.
TIME: GMT plus 8 hours.
GENERAL:

Weather: All the SBM's concerned are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into 3 and the terminology used is consistant with that of South East Asia. These 3 types are:

(1) S.W. Monsoon (June-October).
(2) N.E. Monsoon (December-March).
(3) Transitions between the Monsoons.

Persistant bad weather occurs during the N.E. Monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. Monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

DUNGUN, Malaya: 04.47 N. 103.27 E.

DOCUMENTS:

Register.
Last Port Clearance.
10 copies Crew List.
6 copies Passenger List (if any).
6 copies Stowaway List (if any).
2 copies Stores List (including Firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crew Declaration List (cameras, radios, etc.).
2 copies Cargo Manifests.

PILOTAGE: Extra charge for pilotage outside normal office hours and holidays. Ocean vessels should anchor about 0.8 miles S.E. of Tg. Dungun Lighthouse.

ANCHORAGE: On arrival vessels required anchor about one mile outside berthed ships to obtain Pratique. Accommodation ladder must be rigged on lee side to allow Port Authorities to board.

RESTRICTIONS: None.
RADIO: Only via Kuala Lumpur.
VHF: Not available.
RADAR: Not installed.
BERTHING: Open sea discharge at anchorage (Mringkit Anchorage $500.00) on to barges.
CRANES: Maximum capacity 10 tons.
STEVEDORES: 4 days' notice required.
MEDICAL: No facilities.
FRESH WATER: Not available.
FUEL: By barge, 7 days' notice required.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Available, rate $30.00 per hour.
AIRPORT: 60 miles.
HOLIDAYS: Work can be arranged on Fridays and other public holidays.
DELAYS: None.
CUSTOMS: Customs Office hours 0830 to 1630 hrs. (Thursday afternoons, Fridays and holidays excepted).
IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.
SHORE LEAVE: No seaman may proceed more than 3 miles from Dungun Customs House. The Immigration Officer has authority to limit or prohibit Shore Leave in all cases.
SURVEYORS: Cargo inspectors available at 24 hours notice. Surveyors available from Kuala Lumpur, provided sufficient notice given.
BANKS: United Malayan Banking Corp. and Bank Bumi Putra.
STORING: See "Prelims" page viii.

1. No.
2. —
3. No. 2 miles.
4. Yes, at private jetty.
5. Bonded cargo should be transported from the private jetty to the customs warehouse.
6. Yes.

AUTHORITY: The Port Officer, Dungun, Malaysia. *Tel:* 096-413689.

KERTEH TERMINAL: 04.34 N. 103.28 E.

(See Plan Book)

PORT LIMITS: The port area is enclosed between Latitudes 4° 30′ N. and 4° 37′ N. and between Longitudes 103° 26′ E. and 103° 34′ E.

LOCATION: The Kerteh Port Marine Terminal is situated in position Lat. 4° 34′ 1.22″ N., Long. 103° 28′ 1.75″ E. off the East Coast of Peninsular Malaysia in the South China Sea approximately 13 miles South of Kuala Dungun.

The 3 Single Point Moorings are positioned in a 20 sq. mile Restricted Area which extends approximately 5 miles from the coast.

DOCUMENTS: Masters are required to prepare documents prior to arrival in port such as:

Last Port Clearance.
Ship's Certificate.
Manifests (List of Cargo onboard).
12 Crew Lists.
2 Store Lists.
2 Personal Effects Lists.
2 Lists of Narcotics.
1 Vaccination List.
1 List of Arms/Ammunition.

PILOTAGE: A Mooring Master will board the vessel to assist with berthing.

Masters should ensure that the Malaysian Flag together with the appropriate International signals are displayed for a vessel approaching port.

NAVIGATION: *Charts:* Charts for the area are as follows:

1. U.S. Naval Oceanographic Office, New Chart No. 71024.
2. British Admiralty, Chart No. 4704.
3. British Admiralty, Chart No. 3543.
4. British Admiralty, Chart No. 1355.
5. British Admiralty, Chart No. 2414.
6. British Admiralty, Chart No. 2600.
7. British Admiralty, Chart No. 1374.
8. British Admiralty, Chart No. 770.

Sailing Directions: Sailing Directions are in the following: China Sea Pilot, Volume 1.

When approaching the Kerteh Port Marine Terminal from seaward, several conspicuous peaks are clearly visible. (Refer to Views A and B on British Admiralty, Chart No. 770). Good radar echoes are obtained from Tg. Labuhan, Tg. Pelor and Pulau Tenggol, an island approximately 14 miles East of Tg. Dungun.

NAVIGATION AIDS: In addition to the navigational aids noted on the Navigation Charts, the following Navigational Lights and buoys are placed:

1. Kerteh Port Marine Control Tower Light:

Position	Lat. 4° 34′ 1.22″ N., Long. 103° 28′ 1.78″ E.
Description of Structure	Steel lattice tower – Height 35 m.
Characteristic	Isophase 2 secs. White Red White
Visibility	12 nautical Miles
Sector	W – 360° to 045° vis. 12 miles R – 045° to 125° vis. 9 miles W – 125° to 360° vis. 12 miles

2. Kerteh Port Sea Buoy:

Position	Lat. 4° 32′ 41″ N., Long. 103° 31′ 27″ E.
Shape	Pillar
Colour	Red and white vertical stripe
Light Characteristic	Fl (W) every 10 secs.
Visibility	8 miles

3. Paton Bank Buoy:

Position	Lat. 4° 32.5′ N., Long. 103° 31.5″ E.
Shape	CAN
Colour	Red
Light Characteristic	Fl (R) 5 secs.
Visibility	8 miles

4. Flares:

Position	Lat. 4° 34.2′ N., Long. 103° 27.83′ E.
Flare stack ht	90 m.
Tank ht	15 m.

5. Tg. Labohan Light:

Position	Lat. 4° 31′ 18″ N., Long. 103° 28′ 18″ E.
Characteristic	Fl (W) 4 secs.
Visibility	15 nautical miles

6. Danger Line Buoys:
These buoys are 1,000 m. apart and indicate the 15 m. (50 ft.) Admiralty Chart Datum line.

Shape	Pillar
Colour	Yellow
Light Characteristic	N1 – Fl Y 4 sec.
	N2 – Gp. fl. y(3) – 5 secs.
	N3 – Gp. fl. y(4) – 10 secs.
	N4 – Gp. fl. y(5) – 15 secs.
Visibility	2 nautical miles

Positions as follows:

B-4 Danger Buoy N 1	Lat. 4° 33′ 33.7″ N., Long. 103° 28′ 46.7″ E.
B-3 Danger Buoy N 2	Lat. 4° 34′ 06.5″ N., Long. 103° 28′ 38.3″ E.
B-2 Danger Buoy N 3	Lat. 4° 34′ 35.9″ N., Long. 103° 28′ 29.1″ E.
B-1 Danger Buoy N 4	Lat. 4° 35′ 07.9″ N., Long. 103° 28′ 21.6″ E.

7. Refinery SBM:

Position	Lat. 4° 34′ 32.2″ N., Long. 103° 29′ 02.1″ E.
Colour	Orange
Light Characteristic	White, Flashing Letter U (· · –)
Visibility	2 nautical miles
Fog Horn	Nil
Hose Strings Lts	Flashing red in unison

8. SALM No. 1:

Position (proposed)	Lat. 4° 34′ 21.9″ N., Long. 103° 30′ 18.1″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Flashing Letter U (· · –)
Visibility	2 nautical miles
Fog Horn	Nil

9. SALM No. 2:

Position (proposed)	Lat. 4° 33′ 26.5″ N., Long. 103° 30′ 45.4″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Flashing Letter U (· · –)
Visibility	2 nautical miles
Fog Horn	Nil
Hose Strings Lts	Flashing white in unison

The above buoys with the exception of the SBM and SALM's are subject to shift position and should not be relied upon for navigational purposes.

When approaching the Terminal, Kerteh Port Marine Control will advise if the above buoys are in position.

ANCHORAGE: Vessels bound for Kerteh Port Marine Terminal should approach the anchorage area located S.E. of the Terminal (See "Plan Book"). In doing so they should avoid the Restricted Area.

The Anchorage area is 4 miles square bounded by Lat. 4° 30.0′ N. and Lat. 4° 32′ N., and Long. 103° 32.0′ E. and Long. 103° 34.0′ E.

Vessels are strictly prohibited to anchor in any position, whether inside or outside the Restricted Area other than in the area designated above for this purpose. Severe action will be taken against any such vessel that ignores this directive.

During severe weather conditions it is not advisable to anchor and vessel should slowly steam to seaward, maintaining a safe distance off the Restricted Zone and remain within VHF radio range during this procedure.

Rules for Vessels at Anchor: All vessels at anchor awaiting berth or for any other reason at Kerteh Port Marine Terminal must comply with the following requirments:

1. Engine to be kept on standby.
2. Officer of the watch to remain on the bridge.
3. Helmsman/Standby man to remain on the bridge.
4. Visual anchor bearings (checked by radar) to be taken at intervals not exceeding 15 minutes.
5. Listening watch to be maintained on VHF Channel 16.
6. Engineer Officer of the watch to be on standby in the engine room.
7. Gangway to be hoved clear of the water to reduce the incidence of unauthorised boarding.
8. No unauthorised personnel to be allowed on board.
9. No shore leave allowed.
10. As the holding ground is poor off the coast of Trengganu at least 5 shackles of anchor chain should be used, even in calm weather.
11. The second anchor should be ready for instant use, i.e. clear of the hawse pipe and secured by the brake only.
12. Wire/Nylon towing springs should be ready fore and aft to facilitate emergency towing if required. Wires should be flaked out on deck to allow a clear run of 350 ft.

Restricted Area: The restricted area is bounded by imaginary lines connecting the following points as shown on the Kerteh Port Chartlet.

1. Lat. 4° 34′ 27.5″ N., Long. 103° 27′ 53.3″ E.
2. Lat. 4° 37′ 00.0″ N., Long. 103° 31′ 00.0″ E.
3. Lat. 4° 32′ 00.0″ N., Long. 103° 33′ 00.0″ E.
4. Lat. 4° 33′ 00.0″ N., Long. 103° 31′ 00.0″ E.
5. Lat. 4° 33′ 00.0″ N., Long. 103° 28′ 25.0″ E.

Vessels should not enter the Restricted Area without the services of a Mooring Master.

HEALTH: Radio Pratique should be requested through a local shipping Agent.

MAX. SIZE: *SBM:* Depth 60 ft., max. draft 36 ft., max. size 85,000 d.w.t. with part load. At present product tanker only of 35,000 d.w.t. operating.

SALM No. 1: Depth 90 ft., max. draft 67 ft., max. size 250,000 d.w.t.
SALM No. 2: Depth 80 ft., max. draft 65 ft., max. size 250,000 d.w.t.

RADIO: All radio traffic to be channelled through Singapore Radio. Vessels to maintain radio watch on the same station.

Cables for EPMI to be addressed to OFPROD Kuala Lumpur, Telex: MA 30511 "Urgent for TCOT manager please get him". Cables for Petronas to be addressed to International Marketing, Petronas, Telex: Petron MA 30032, 30696.

Singapore Radio works on the following frequencies:–

Call Sign	*Transmit (kHz)*	*Receives (kHz)*	*Watch (GMT)*	*Remarks*
9VG4	2182	2182	0000–2400	Call, replay and safety
9VG87	4125	4125	0000–2400	
9VG88	6215.5	6215.5	0000–2400	
9VG89	8780	8257	0000–2400	Common calling frequencies
9VG90	13162.9	12392	0000–2400	
9VG91	17294.9	16522	0000–2400	
9VG5	2760	2527	0000–2400	Working frequencies for passing of radio telegrams
9VG60	4369.8	4075.4	0000–2400	
9VG63	8728.2	8204.3	0000–2400	
9VG67	13156.6	12385.8	0000–2400	
9VG52	2780	2685	On demand	Connection to telephone system
9VG61	4376	4081.6	On demand	
9VG62	6509.5	6203.1	On demand	
9VG64	8762.3	8238.1	On demand	
9VG65	8790.2	8266.3	On demand	
9VG66	13147.3	12376.5	On demand	
9VG68	17270.1	16497.2	On demand	
9VG69	17356.9	16584	On demand	
9VG70	22630.1	22934.1	On demand	

Traffic lists will be transmitted on the following listed frequencies, except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively.

Transmit (kHz)	*Receives (kHz)*	*Time (GMT)*
2760	2527	0005, 0405, 0805 and 1205
8728.2	8204.3	
2760	2527	1605
4369.8	4075.4	

Approximate geographical location of Singapore Radio Station is Lat. 01° 20′ N., Long. 103° 40′ E.

Notice of Arrival:

Upon departure from last port of discharge or immediately after having received instructions to proceed to Kerteh Port Marine Terminal, Master is requested to cable to either EPMI (if scheduled to moor at SALM I or SALM 2) or to PPSB (if scheduled to moor at the Refinery SBM) the following:

AAA	Vessel name, previous name (if any), call sign and flag
BBB	ETA, date and local time (GMT + 8 hours)
CCC	Master's name
DDD	G.r.t., n.r.t., d.w.t., s.d.w.t. and Light Displacement Tonnages
EEE	Last discharge port and intermediate ports
FFF	Next discharge port and intermediate ports
GGG	Number of crew
HHH	Number of passengers
III	Grade and Quantity of cargo on arrival and cargo to be loaded at Kerteh Marine Terminal
JJJ	Malaysian light dues receipt number and date
KKK	Arms on board
LLL	Deballast time and if able to load and deballast simultaneously
MMM	Arrival drafts
NNN	Any leaks which could cause pollution or affect loading
OOO	Pratique Granted: Place/Date. If any sickness on board or of clean bill of health
PPP	Inert gas system

All vessels loading at Kerteh Port Marine Terminal for the first time are to include the following *additional* information:

QQQ	Length overall and bow to centre of manifold distance
RRR	Size of *Port* manifold *flange* and piping
	Size of various reducers on board and *confirm* that 2 × 12 in. ASA *are available* for Product Tankers on Port side manifold or *confirm* that 1 × 16 in. ASA flange *is available* for Crude Tankers on Port side.
TTT	Confirm that combination of gangway and pilot ladder ready on arrival. Only pilot ladder is required if freeboard is less than 15 ft.
UUU	If loading products, is vessel fitted with 2-valve seperation for parcels?
VVV	Is vessel fitted with segregated ballast tanks?
WWW	Is Product Tanker fitted with slop tanks?
XXX	Is vessel diesel or turbine powered?
YYY	Confirm that vessel can moor to an SPM or SALM and indicate what bow connection equipment is available. (See "Berthing".)
ZZZ	What is SWL of portside derricks for hose hoisting.

Updated ETA to be reconfirmed 72,48,24 and 12 hours prior arrival.

VHF: When within range, vessels equipped with VHF radio telephone should contact Kerteh Port Marine Control initially on Channel 16.

The language of the Terminal is *English*.

Arrival Procedures: Masters should endeavour to establish contact with Kerteh Marine Control as soon as they are within VHF radio range. Instructions thereafter will be given for further approach procedures. In the event VHF radio contact cannot be established Masters are advised not to anchor but keep to seaward of the Seaward Buoy and the Restricted Zone.

Contact will then be made by the Terminal's Support Craft.

RADAR: Marine control tower has radar.

TUGS: A tug and mooring launch will be in attendance during mooring operation.

SBM: One tug of 2,600 h.p. and 2 launches.

SALMs: Two tugs, 3,500 h.p. and 800 h.p.

Note: Tugs are time chartered to suit size of tankers.

BERTHING: Masters are advised to expect a Petronas ship Inspector to board at any time in order to inspect his vessel in all respects. He is also requested to complete the Inspector's proforma in any case when the vessel arrives and hand same duly completed prior to the vessel sailing to the Loading/Mooring Master for onward transmission to Petronas.

All vessels will be boarded by a Mooring Master and Loading Master for Product vessels as directed by Kerteh Marine Control and, providing that the vessel is in all respects ready to commence loading, except for the necessary deballasting, the Notice of Readiness will be accepted at the time after Pratique is granted and Mooring Master boarding for crude carriers and when the Loading Master is satisfied for product carriers.

Vessels are requested to have safely and securely rigged, a combination of pilot ladder and ship's accommodation gangway, so arranged that personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder. Vessels with less than 15 ft. freeboard need only rig the pilot ladder.

Air operated pilot gangways are not acceptable. A light heaving line should be ready to take aboard the Mooring and Loading Masters' equipment. Vessel to provide a lee for the Pilot boat when boarding and leaving. In addition, a derrick should be rigged on the lee side to lift ancillary equipment used for mooring operations.

Prior to berthing, the Mooring Master will inspect and ascertain that the main engines are fully operational. He will also inspect the vessel's ballast to ensure that only clean ballast is carried.

After ensuring that the manoeuvring area is clear of other traffic and weather and sea conditions are suitable, the vessel will be manoeuvred for the approach to the mooring buoy. The heading of the vessel will normally be such that she will have the wind ahead but tidal effects may have to be taken into account. A tug of suitable power and a mooring launch will be in attendance. During the final approach, the mooring launch will pick up a messenger line from the vessel's bow and maintain station approximately 300 ft. ahead of the vessel. When the mooring launch reaches the end of the mooring system pick-up line, the vessel's messenger line will be made fast and the vessel's crew will heave in the slack as the vessel moves closer to the mooring buoy.

When the pick-up line is on board the crew will commence heaving on this line until the chaffing chain is on board and secured.

It should be noted that the Refinery *SBM is fitted with 2 × 2 in. diameter chaffing chains* which require *panama leads with a minimum diameter of 8.5 in.*. It is the vessel's responsibility to absolutely ensure that the 2 chaffing chains on the Refinery SBM are brought on board in equal lengths in order to share the load of the vessel equally between the 2 mooring hawsers which are seperate and not mated or secured together in any way. The crude oil *SALMs are fitted 1 × 3 in. diameter chaffing chain,* which requires a Panama Lead with a minimum diameter of 12 in. Vessels greater than 150,000 d.w.t. to a maximum of 250,000 d.w.t. will be berthed at SALM No. 2 and two mooring systems will be connected to the vessel's bow.

Chaffing chains will be connected to Smits Brackets or bow stoppers whenever possible. An alternative connecting system will be used when vessels are not fitted with the connection mentioned above. Bollard strops and bow shackles can be used as an alternative to secure the chaffing chain.

The refinery SPM is only a distance of 1 nautical mile from the beach in 60 ft. A.C.D. of water. The bottom shelves from the SPM for a distance of approxiately 900 m. to a Danger Line of 4 buoys in 50 ft. A.C.D. of water.

When SBM is at maximum excursion, i.e. 2 mooring chains tight on the weather side, no vessels, such as tugs or standby boats, can approach this SPM closer than 50 ft. Otherwise, they will foul the anchor chain. This rule of course does not apply to vessels with 1 m. draft or inflatables.

Therefore the Terminal insists that engines and crew are at all times on standby whilst moored to this SPM.

HOSES: *Connection Hoses:* Once the vessel is moored, the floating hose(s) will be towed alongside and connected to the vessel's port manifold ensuring that the inner most hose is connected first.

When disconnecting the hose(s) it should be noted that the outer most hose is disconnected first.

Connecting and disconnecting of hose(s) will be the responsibility of the vessel's crew.

While vessels are moored, it is imperative that a careful watch is maintained on the hose mooring systems.

Main engines should be kept on standby and should be ready for immediate use in the event the vessel starts to ride up on the mooring buoys.

Two floating hose strings on the Refinery SBM are 12 in. ASA on the rail and have a total length each of 230 m. Camlock couplings are fitted (also See "Radio" – RRR).

LOADING: *Loading Rate:* Prior to the commencement of loading operations, an agreed upon oil transfer plan must be established. This will include commencement, maximum and topping off loading rates. Overboard discharges will be closed and sealed before loading commences.

Maximum loading rate at the Refinery SBM will be approximately 18,000 U.S. bbls./p.h. and at the crude SALM, approximately 45,000 U.S. bbls./p.h. It is recommended that vessels take maximum flow, with due regard to safety, in order to expedite turn around time. Care should be taken not to overload. Topping up rate for products is 700 U.S. bbls./p.h. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time and keeps the windage area down to acceptable levels.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution. Refinery will automatically stop pumping when back pressure reaches 220 p.s.i. TCOT will automatically stop pumping when back pressure reaches 220 p.s.i.

Electrical Storms: Loading will be suspended when severe Electrical Storms are in the near vicinity to prevent the possibility of cargo gases igniting.

Radio Contact: During loading operations the vessel will contact Terminal Control Room every half hour by portable VHF to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the vessel has been lost.

It is stressed that, during loading operations, the Crude Terminal and Refinery Shift Supervisors will immediately slow down the loading rate on receipt of a request for same from the vessel. Pumping, in an emergency, can be stopped almost instantaneously. A radio watch must be kept on VHF Channel 16 or the appropriate prearranged UHF channel *at all times*.

All radio communications will be in English.

Weather Limitations: No hard and fast rules can be established to ascertain when a vessel should stop loading and vacate the berth. The directions of the wind, height of the swell and the freeboard of the tanker are factors which need to be taken into account. However, it is recommended that when the wind speed reaches 25 knots and for the swell height exceeds 10 ft., the Master should arrange for responsible crew members to standby on the bow and at the cargo manifold. Should conditions worsen it may be necessary to stop loading, disconnect the hoses and vacate the berth.

During periods of adverse weather the Master and Mooring Master should be in constant communication with each other and be ready to act quickly if an emergency occurs. Consideration should be given to utilise the standby tug.

BALLAST: *Adequate Ballast:* Due to the exposed location of the loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring or Loading Master to be not adequately ballasted, will be rejected. As a general guideline, vessels should arrive with a minimum draft which ensures that the propeller is completely submersed and the vessel is trimmed no more than 8 ft. by the stern.

Clean Ballast: As there are no ballast discharging facilities at the crude SALMs, crude vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arrival.

It is expected that all vessels will comply with the MARPOL 1973 requirements regarding clean or segregated ballast tanks. Vessels which are unable to limit freeboard by loading and deballasting simultaneously, vessels which have inadequate segregated ballast or vessels which have excessive deballast time may incur long delays and their Owners/Charterers will be notified that the vessel cannot be safely accommodated during the N.E. monsoon season, November-March.

On crude carriers the Mooring Master or on product carriers Loading Master will inspect vessel's ballast on boarding and has the power to reject any vessel that he deems could cause pollution of the sea area. During discharge of ballast similar inspections will continue. Any vessel rejected because of dirty ballast will automatically *nullify its Notice of Readiness* and will lose its priority in position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master or Loading Master.

Bilges: Bilges must not be discharged while at the Terminal or in adjacent sea area.

Inspection While Moored: At night the sea area around the vessel shall be adequately lighted, as frequent inspections by the Mooring or Loading Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip pans should be placed under the manifold, all unused cargo connections should be blanked off, sea valves should be closed and sealed upon completion of deballasting and all scuppers must be securely plugged. In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the Mooring or Loading Master respectively.

Crude carrier slops should be consolidated in slop tanks. Load-on-top procedure for crude carriers is only acceptable with the written permission of the consignee.

POLLUTION: Owners and Masters are responsible for observing International Conventions, Laws and Malaysian Government Regulations Environmental Quality Act 1974 concerning pollution of the sea, having particular regard for the area where the Kerteh Port Marine Terminal is located. It is the responsibility of the vessel's Master to see that no oil of any kind is pumped or spilled overboard from his ship and he is also fully responsible to ensure that no other rubbish, regardless of type, be dumped overboard in this area.

If oil pollution occurs during loading operations, loading should be immediately stopped and cleaned-up or oil recovery procedures should be put into effect. Loading will not recommence until clean-up is complete and an inquiry has been held into the cause of the spill.

Masters are warned that inspection of ballast is strict.

The categories of pollution include oil water from bilges, hydrocarbon residue from previous voyages, or any other matter that may result in pollution of the sea.

All spillages of oil must be reported immediately to the Mooring or Loading Master and, subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

Fines and Claims: Any fines imposed by Government Authorities for pollution caused by the vessel shall be for the account of the Owners of the vessel.

In the event that Petronas, PPSB or EPMI has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

Likewise, all labour and equipment costs for cleaning operations will be for the vessel's account.

MEDICAL: No doctor or clinic, however in emergencies, exceptions to the foregoing may be permitted for humanitarian reasons.

DENSITY: 1025.

FRESH WATER: No available.

FUEL: Not available.

CONSULS: None.

REPAIRS: Not possible.

SURVEYORS: Trident Malaysia Sdn. Bhd., Straits Trading Building, Lebuh Pasar Besar, Kuala Lumpur. Tel: 03-926410. Telex: MA 39551.

Caleb Brett Malaysia Sdn. Bhd., Room 301, 3rd Floor, Bangunan Yayasan Selangor, Jln. Bukit Bintang, Kuala Lumpur. Telex: MA 30579.

CUSTOMS ALLOWANCES: Usual allowance for ports in Malaysia.

REPATRIATION: Not possible.

TIME: GMT plus 8 hours.

WEATHER: The seasonal weather patterns are broadly divided into three types and the terminology used is consistent with that of S.E. Asia. These three types are:

1. S.W. Monsoon (May to September): Winds are generally from the South or S.W. during this period and can reach gale force in local squalls. Occasionally, these squally conditions can last from 36 hours to 48 hours.

2. N.E. Monsoon (November to March): Persistent bad weather occurs during this monsoon and high sea and swell conditions can persist for periods of 3 to 4 days and, in extreme conditions, for up to a week.

3. Transition Periods (April and October): Winds are generally high and variable during the monsoon transition periods but may freshen in the late afternoon and early evening with the sea breeze effect. Occasionally, local gale force squalls may occur but these are generally of short duration.

Squalls: Severe squalls are generally associated with cumulonimbus clouds and thunderstorms. The basic pattern of these squalls are vigorous thunderstorm activity, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly and increases violently to peak gusts.

Refer to China Sea Pilot – Volume 1 for further meteorological information.

TIDES AND CURRENTS: *Tides:* The maximum rise and fall of the tide is approximately 3 m.

Currents: It should be noted that currents in excess of 2 knots, usually running in a N.E./S.E. direction, can be experienced during the N.E. monsoon period and in a S.E./N.W. direction during the S.W. monsoon period.

EMERGENCY CO-ORDINATING CENTRE: Contact Marine Control Tower on VHF Channel 16. Tel: 09-871 277 Control Room. Telex: MA 51397.

SHORE LEAVE: No shore leave.

GENERAL: *Language:* The language of the Terminal is English.

Mail: For convenience, mail for personnel on incoming crude tankers loading an Esso cargo may be sent to EPMI's Kuala Lumpur Office marked for the attention of "The TCOT Manager" for transmission to the vessel when it arrives at Kerteh Marine Terminal.

Personnel: Only authorised personnel are permitted to board vessels while berthed.

Provisions: Not available.

Ballast: No dirty ballast or slop disposal.

Terminal: The Kerteh Port Marine Terminal is located off-shore and the only means of transportation available to the shore is by marine support craft to Kemaman Port situated 24 miles to the S.E. As such, the terminal can offer no logistical support to the vessels calling at the Kerteh Port.

AUTHORITY: *Operators:* Petronas Penapisan Sdn Bhd (PPSB) are operators of the refinery and one SBM for the export of products.

Esso Production Malaysia Inc. (EPMI) are operators of the Trengganu Crude Oil Terminal (TCOT) and 2 SALMS for the export of crude oil.

Refinery Headquarters: Petronas Penapisan Sdn Bhd (PPSB), 14th Floor, Plaza Pekeliling, P.O.Box 2444, Kuala Lumpur 02-15, Malaysia. Tel: 03-912033. Telex: Petron MA 30032, 30696. Cables: Petronas.

Site: Petronas Penapisan Sdn Bhd (PPSB), Kerteh, Kemaman, Trengganu, Malaysia. Tel: 096-71244 or 71234. Telex: Petref MA 51326.

Esso Headquarters: Esso Production Malaysia Incorporated (EPMI), Kompleks Antarabangsa, P.O.Box 857, Kuala Lumpur 04-03, Malaysia. Tel: 03-485022, 484077, 416066. Telex: MA 30293 A/B Ofprod MA 30511. Cable: Essoprod Kuala Lumpur.

Marketing: Petroliam Nasional Berhad (Petronas), International Marketing Department, 8th Floor, Plaza Pekeliling, P.O.Box 2444, Kuala Lumpur 02-15, Malaysia. Tel: 03-912033, 913468. Telex: Petron MA 30032, 30696.

KOTA KINABALU (Jesselton), Sabah:

05.59 N. 116.00 E. **(See Plan Book)**

PORT LIMITS: Gaya Bay and waters to the S.W. bounded by a line joining Tanjong Aru and the Northern point of Pulau Gaya thence a line to Gaya Head including rivers entering same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS:

Documents to be produced on arrival:

Port Clearance from Last port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or*
1 copy Stowage Plan.
9 copies Crew Lists.
9 copies Passenger Lists.
2 copies Bonded Store Lists (incl. Arms and Ammunition Lists).

In addition, the Master has to complete a Shipping Arrival Report Form and a Maritime Declaration of Health Form.

Notes: (a) If vessel arrives from any port outside those declared infected.

(b) These 2 copies (Inward Cargo Manifests) must be certified by the Master as follows: "I hereby certify that to the best of my knowledge and belief this manifest is complete and correct. . . . .Master".

To be Supplied to Ship before Departure:

1 set Agents Outward Manifests.
2 copies Passenger Lists for Immigration.*
1 copy Passenger Lists for Customs.*
1 set Manifests for Customs.*

*To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Not compulsory. Pilot normally available between 0600 hrs. and 1800 hrs. only. Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit. Marine Department Tel. 52213.

ANCHORAGES (also see "Health"):

Special Anchorages and Prohibited Areas

(1) *Prohibited Anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. Light on the N.N.E. end of the Authority Wharf in approx. position Lat. 05° 59′ 51″ N., Long. 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this area, East of a line joining the F.R.G. Light and Gueritz Shoal Light Beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Lat. 06° 01′ 21″ N., Long. 116° 05′ 45″ E. thence in a 360° direction for 6.5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6.5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Lat. 06° 00′ 42″ N., Long. 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6.5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6.5 cables to the starting point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a Quarantine Anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Lat. 06° 01′ 34″ N., Long. 116° 03′ 46″ E.

RESTRICTIONS:

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 1800 hrs. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration Officers.

4. Currency. No restriction on amount of currency which can be brought into this State but max. amount allowed to be taken out is MAL$100. Foreign exchange must be conducted through recognised banks.

HEALTH: (Also see "Regulations"). *(a)* Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled out and handed to Boarding Officer of Health Department who will require 1 copy of crew list and 1 copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(b) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

RADIO: Singapore Radio recommended. (Also see "Health"). Local radio call sign "Control K.K.".

Berthing Application: Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, amount of water, Pilot requirements. Vessels given berth on first come, first served basis.

Tankers: As much notice of arrival as possible is essential.

(a) If first port in Sabah and communication is difficult send message through Singapore Radio.

(b) If to be second or subsequent port in Sabah ensure that Agent/Installation Representative in the previous port gets an accurate ETA before vessel's departure so that this can be passed on by telephone.

VHF: Port Control on VHF Channels 12 and 16 (office hours only).

To reach the Agents directly during office hours contact 9WH26 on VHF Channel 26. The call charges will be reversed by 9WH26 which is an unofficial telecommunications VHF station.

TUGS: Tug 280 h.p. available to assist vessels berthing and unberthing without a Pilot at inner berth. Ship's lines used.

BERTHING: Wharf T-shaped; outer berth 647 ft. long with min. depth of 25 ft. Inner berth 475 ft. long with min. depth of 21 ft.; 2 Go-downs 28,000 and 30,000 sq. ft. floor area respectively. Sabah Ports Authority operates one 10 ton crane, 73 forklift trucks ranging from 2 tons to 6 tons capacity, 25 towing tractors, 75×5 ton trailers.

One 20 ton container forklift truck and 6×20 ton container trailers available. Heavy Lifts up to 6 tons received into Sabah Ports Authority trailers, up to 17 tons could be received into railway wagons, beyond 17 tons overside discharge into landing craft. Sabah Ports Authority landing ramp capable of accepting loads of up to 30 tons. Bulk handling limited to petroleum and bitumen into private installation by pipe-line.

New Wharf: Rectangular island wharf 700 ft.×400 ft.

The particulars of the berths are as follows:

Berth No.	*Length (ft.)*	*Depth (ft.)*
1	700	30
2	400	25
3	400	25
4	215	19

Covered storage: one transit shed 72,000 sq.ft.

New Jetty: Located to the East of the New Port. Berthing length 300 ft. on each side. Depth alongside 21 ft., width of jetty 15.20 m.

STEVEDORES: Stevedores provided by SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides wharf labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 tons per gang hour for conventional traffic (excluding vehicles) and 40 tons per gang hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3×4 hour periods namely:

1st Period	0730 – 1130 hrs.
2nd Period	1300 – 1700 hrs.
3rd Period	1800 – 2200 hrs.

CARGO: (Also see "Berthing".)

1. Tally: The Agent can provide tally clerks at ship's expense.

2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.

3. Transhipment cargo: Transhipment cargo handles via Port Authority Godown.

4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.

5. Special cargo regulations:

(a) Dangerous Cargo: Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the foremast.

No vessel having explosives on board shall, without the permission in writing of the Harbour Master, come or remain within 500 yards of the shore or any other vessel:

Provided that such a vessel may, with the written permission of the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V (Fulminate) or Class VI (Ammunition) or both such classes in the second schedule; and

(ii) the total quantity of such explosives does not exceed two thousand pounds; and

(iii) such explosives are carried in a properly constructed magazine duly certified as such by a British Board of Trade Surveyor or by an officer fulfilling similar functions appointed by a Government of any British possession or the vessel has a certificate from one of Her Majesty's Inspectors of Explosives or from an Officer fulfilling similar functions appointed by the Governments of Singapore, the Federation of Malaysia or Hong Kong and approved by the Governor that all the explosives on board such vessel have been properly stored and the Master of such vessel further certifies in writing that no other dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of one or any of Class III (Nitro-compound), Class IV (Chlorate mixture) or Class VII (Firework); and

(v) the total quantity of such explosives does not exceed three thousand pounds.

No such explosive shall be landed, shipped or transhipped between sunset and sunrise without the previous permission in writing of the Harbour Master. Any Master of a vessel offending against the provisions of this section shall be liable to a fine of MAL$1,000.

(b) Livestock: Pigs or cattle may not be loaded or discharged on any wharf without permission of the S.P.A.

MEDICAL: Medical Officer of Health: Medical Services Department, Tel. 54303. Vaccination and inoculation (incl. Yellow Fever) can be arranged via Agent at any time during working days. In case of death on board, Agent and Harbour Master as well as the Police to be informed.

TANKERS: The port operates on a "first come-first served" basis in allocating the jetty but palletised vessels will get priority. Port Rules state that no other vessel allowed alongside when tanker discharging A-class products. As cargo vessels stop discharging at 2200 hrs., tankers are normally allowed to discharge A-class cargo until the following morning 0600 hrs.

Berth is timber piled with concrete deck jetty, continuous 650 ft. by 40 ft. wide. Maximum displacement allowed – 13,000 tons. Maximum draft allowed – 22 ft.

Vessels berth either port or starboard side alongside according to the weather and tidal conditions prevailing at the time of berthing. Tankers berth on the outer side of the jetty only.

Fresh water available from wharf only. Vessels to provide hoses. Advance notice of requirements advisable. Rate 25 t.p.h.

Shore Line System:

(a) For Mogas, 1440 ft.×8 in.

(b) For Jet A.1/Kerosene 1450 ft.×8 in.

(c) For Gasoil/Light Fuel Oil, 1380 ft.×8 in. hoses used to connect ship and shore.

(d) For Bitumen, 1260 ft.×8 in.

DENSITY: Average 1020.

FRESH WATER: Can be supplied from wharf. Supply rate is 20 tons per hose per hour.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex. feeder ships and heavy lifts in major ports.

IDENTIFICATION CARDS: Not required.

CONSULS: Denmark, Indonesia, Japan and United Kingdom.

REPAIRS: Some private firms and workshops undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: See "Labuan" and "Sandakan".

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays but not for Hari Raya Puasa, Chinese New Year and Christmas Day.

REGULATIONS: *(a)* Arrival and Departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal"2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

(c) Priority. First come first served.

POLICE/AMBULANCE/FIRE: Police/Fire, Tel: 088-54111. Hospital, Tel: 088-54911.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

DELAYS: Due to weather conditions only.

TELEPHONES: Available.

SHORE LEAVE: Crew members allowed ashore after inspection by Immigration Officer.

GENERAL: Ship Chandlers: All kinds of stores and provisions available.

Recreation facilities. Two cinemas in town which show English films frequently. Three tennis courts available and football matches may be arranged. Sports Club is next to town Padang, about half a mile from wharf and golf and yacht clubs situated on beach at Tanjong Aru, 4 miles from town.

Surveyor: Harrisons & Crosfield (S) Ltd. are Lloyd's Sub-Agents and can arrange a surveyor provided prior warning is given.

Fumigation: No facilities.

DEVELOPMENTS:

(a) Future Expansion Plans: Based on a 20-year development Master Plan drawn up during 1976, the Authority had identified several priority port developments programmes called for in answer to the need of the economic development in the State. One such programme calls for the re-siting of oil pumping activities currently being undertaken at the old port, utilising the same general cargo jetty. This project serves to establish a separate terminal facility for bulk oil and other bulk cargo in a site independent of the general cargo port, some 14 km. from Kota Kinabalu port known as Sapangar Bay Industrial Project. The M$60 million project is due for completion in 1985. The jetty to service the new terminal will be capable of receiving vessels of up to 30,000 d.w.t.

On completion jetty will handle minerals, bulk cement and palm oil.

In the areas of dry cargo facilities, plans have been drawn up for phased construction of new facilities up to the late nineties.

(b) Container Development for Kota Kinabalu: Sabah Ports Authority has just been servicing only feeder route container traffic relying on ship-based cranes. Container facilities are limited to forklift, tractor/trailer system. Plans for up-grading container capability will be determined by potentials of the trade.

(c) Kota Kinabalu Port Development Plan: Major expansion work is being planned to provide additional berthing and storage facilities. Programme intended for implementation during 1983-1986 and estimated to cost more than M$70 million. When fully completed, additional facilities will include 4 ocean berths and a sizeable godown.

AUTHORITY: Sabah Ports Authority, Head Office, P.O.Box 1430, SPA Headquarters Building, Kota Kinabalu, Sabah, Malaysia. *Tel:* Kota Kinabalu 56155, 55233, 52140. *Telex:* Saport MA 80074. *Contact:* General Manager.

KUANTAN: 03.50 N. 103.19 E. (See Plan Book)

PORT LIMITS: The seaward limits of Port of Kuantan are contained between Lat. 4° 03′ N. and Lat. 3° 45′ N. and Long. 103° 34′ E. Reporting station for Pilots is situated in position: Lat. 3° 56′ 18″ N., Long. 103° 28′ 39″ E. It is an open sea port (density 1025).

DOCUMENTS: Following documents should be kept ready for submission:

	Number of Copies					
Document	*Port*	*Customs*	*Immigration*	*SD Police*	*Harbour Master*	*Port Health*

Ship's Articles	–	–	Orig.	–	Orig.	–

Note: Numerals indicate number of copies.
'Orig.' indicates original
'R' indicates on request
'P.C.' indicates photocopy

Identification documents should be arranged in the same sequence as Crew List.

APPROACH CHANNEL: A straight 220 m. wide channel aligned on 311°(T) leads from Pilot Boarding Station (Fairway Buoy) to Harbour Entrance. Length of this channel is 3 miles. The dredged length (6.5 cables) is marked by 3 pairs of light buoys. Leading lights mark the centre line of the channel with minimum depth of 12.6 m. During N.E. monsoons underkeel allowance of 3.5 m. is required.

ANCHORAGES: Reserved anchorages are available for ships carrying general cargo, explosives and petroleum products, suspect or unhealthy ships and men-of-war. Pilotage is compulsory except for men-of-war. Drafts of up to 13 m. can be accommodated safely.

RESTRICTIONS: The port is open 24 hours but is subject to occasional restrictions due to weather or other similar constraints. Passage of ships drawing more than 10 m. is subject to tide. Max. permissible draft 12 m.

MAX. SIZE:

		Restriction	
Berth	*LOA* (m.)	*Draft* (m.)	*Displacement* (tons)
Nos. 1 to 4	200	11.2	45,500
Palm Oil Berth (Outer)	200	11.2	28,000
Palm Oil Berth (Inner)	120	8	8,000
Mineral Oil Berth	120	8	8,000

PILOTAGE: Pilotage is compulsory. Ships should advise their ETA at least 24 hours in advance by telegram or telex (MA 50234) marked for the attention of Marine Manager. ETA Fairway Buoy to be reported to Port Control by VHF at least 2 hours in advance. Pilot on VHF Channel 12.

Pilot boats are painted international orange with white superstructure and the word "Pilot" written in black letters. Ships awaiting Pilot should display international code flag "G" and sound or flash "G", if specifically requested by the port. Adequate anchorage is available near the Fairway Buoy (Lat. 3° 56′ 18″ N., Long. 103° 28′ 39″ E.) painted red and white vertical stripes, flashing every 10 secs., and supporting a Racon Beacon (Letter "O").

Ships are expected to come up to the Fairway Buoy for Pilot, provide a good lee for the pilot boat and rig the pilot ladder, manrope and, at night, a light.

During very bad sea conditions small vessels may be requested to follow the pilot boat and to pick up the Pilot inside the enclosed harbour.

HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.

RADIO: All communication must be routed through Radio Penang, which provides telegram, telex and telephone facilities.

VHF: 24 hour watch is maintained on VHF Channel 16 in the Port Control, other operational channels are 20 and 12.

At least 2 hours before arrival at Fairway Buoy, following particulars are to be conveyed by VHF: Name, official number, nationality, g.r.t., n.r.t., LOA, deepest arrival draft and arrival displacement, quantity and commodity of cargo onboard and dangerous cargo, if any. Last port of call, last port clearance number and date, ETA Fairway Buoy and special berthing requirements, if any.

Pilotage for next 24 hours is planned at 1100 hrs. and announced over VHF Channel 20 between 1130 hrs. and 1200 hrs. All vessels awaiting Pilot are expected to keep a listening watch.

Ships working at anchorage are required to convey following information to Port Control at 0900 hrs. every day by VHF: Total cargo to load/unload. Cargo loaded/unloaded (last 24 hours). Balance cargo to load/unload. Draft at 0800 hrs.

Sailing ships are required to confirm their readiness by displaying "Pilot Required" signals and VHF report to Port Control at least 2 hours in advance.

Tugs and pilot boats work on Channel 12 but can switch over to other channels, if requested.

TUGS: The port operates 3 tugs of 2,600 b.h.p. Ropes are used from the ship or the tug as demanded by situation. Tugs on VHF Channel 12.

BERTHING: Total quay wall length is 725 m. divided into 4 berths numbered from seaward. Berth Nos. 1, 2 and 3 handle general cargoes of all types and are provided with transit sheds and apron width of 28 m.

Cranes are not provided at the berths. See "Equipment".

EQUIPMENT: The port has adequate numbers of forklifts, tractor heads, trailers for handling general cargo and a limited number of containers. 5 mobile cranes, 1×35 tons, 1×20 tons and 3×5 tons are available.

BULK CARGO FACILITIES: Bulk cargoes can be handled for direct delivery at any of the berths and conveyor system is likely to be provided in future.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 4 is designed for container handling and other cargoes requiring open storage with priority berthing for container carriers. A container handling crane is proposed in future.

Ro-Ro cargo can be handled by vessels fitted with side ramps.

TANKERS: Palm Oil Berth and Mineral Oil Berths handle bulk edible oils (300 t.p.h.) and petroleum products (200 t.p.h.) respectively. Loading hose diameters are 10 in. for crude palm oil, 8 in. for refined palm oil and 6 in. for petroleum products.

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: Vessels up to 120 m. length can bunker at Mineral Oil Berth. A bunkering barge is proposed.

HATCHES: Mechanical hatch covers must be operated by ship's crew. Stevedores handle 'lift and place' type covers including beams, if any.

CUSTOMS ALLOWANCES: Cigarettes, tobacco, wine and liquor allowed by Customs per day as follows:

i) Spirits/Liquor – 0.125 qt. per person per day or;
Wine – 1 qt. per person per day or;
Beer/Stout – 1 qt. per person per day.
ii) 25 cigarettes per person per day or;
8 cigars per person per day or;
1 oz. tobacco per person per day or;
1 oz. snuff per person per day.

CARGO GEAR: Normal cargo handling gear is provided by stevedores but ships have to provide heavy lift and special cargo gear.

HOLIDAYS: Port is closed for Chinese New Year, Aid il Fitri, National Day (31st August), Deepavali and Christmas Day (25th December) – total 5 days. Overtime is payable for work on Sundays and public holidays.

REPATRIATION: Facilities are available.

AIRPORT: Airport handling domestic flights is 25 miles (41 km.) from the port and international connections are available at Subang Airport, Kuala Lumpur. It is also possible to drive to Subang Airport (5 hours) and Singapore Airport (7 hours). Taxis and buses operate at frequent intervals.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Fire and ambulance assistance is provided by the Port Fire Department, telephone 33201 ext. 333, or 33282. Nearest Police Station is at Beserah, telephone number 22222.

TELEPHONES: Not available.

SHORE LEAVE: Ship's crew are permitted to land and are required to carry their passports.

REGULATIONS: No special regulations.

DELAYS: Average time from Fairway Buoy to berth is 1.5 hours. Minimal delay may be experienced in commencement of cargo loading due to Customs and Immigration formalities.

STORING: Ships' stores can be taken over the wharf. Lorries can go alongside except at dolphin berths where they park about 100 m. away. Forklifts are available. Shore gangs may be used with prior arrangement.

BANKS: Bank Bumiputra Malaysia Sdn. Bhd. operates a branch in Kuantan Port providing full banking facilities.

SURVEYORS: Caleb Brett maintain an office in Kuantan. Other surveyors may be contacted in Kuala Lumpur, Port Kelang or Singapore.

GENERAL: *Signals:*

Significance	*By Day*	*By Night*
1. Immigration and Customs (for ships not carrying passengers)	International Code Signal "25"	Two all-round green lights, in vertical, 2 m. apart seen all round the horizon at a distance of at least 3 km.
2. Immigration and Customs (for ships carrying passengers)	International Code Signal "34"	Two all-round green lights, in vertical, 2 m. apart seen all round the horizon at a distance of at least 3 km.
3. Quarantine (vessel is healthy requests Pratique)	International Code Signal "Q"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
4. Quarantine (vessel requires health clearance)	International Code Signal "QQ"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
5. Quarantine (vessel is infected)	International Code Signal "QL"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
6. Request Police Assistance	CB 3	Three all-round lights in a vertical line, the centre light being red, and the higher and lower lights white, all 2 metres apart seen all round the horizon at a distance of at least 3 km.
7. Port is closed and vessel not allowed to enter the breakwater mouth	Answering Pennant	Two all-round lights in a vertical line 2 m. apart, the top of which is green and the bottom red, seen all round the horizon at a distance of 5 km.

Supplies: Small quantities of provisions are available in Kuantan Town. Bonded stores are not available.

DEVELOPMENTS: Construction of 4 additional berths under phase II development is expected to commence in 1985/86 with completion 1988. A bulk cargo handling berth is expected to be built in 1984/85.

AUTHORITY: Kuantan Port Authority, P.O. Box 161, Kuantan, Pahang, Malaysia. *Tel:* 433200/433209. *Telex:* 50234. *Contact:* General Manager: Haji Fadzil B. Mohd Yusof, Marine Manager: Kapt. Vinode K. Mohindra, Traffic Manager: Abdul Aziz Bin Yaakub.

KUCHING, Sarawak: 01.34 N. 110.21 E.

(See Plan Book)

DOCUMENTS:

Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 3 copies for Customs, 1 copy for Port Health Officer.

List of Ship's Stores (2 copies for Customs).

List of Ammunition (3 copies for Customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

Manifests (3 sets for Customs, 5 sets for Kuching Port Authority, 1 set for Health Inspector).

Ship Stowage Plan (2 copies for port).

Customs: Permit to go alongside a legal landing place or an ocean-going vessel within the port limits is required by Customs 24 hours prior to berthing.

PILOTAGE: Pilot can be applied for through Agents or by direct cable to Marine Dept. giving at least 24 hours' notice of ship's arrival time at Tanjong Po. Telegraphic address, "Shipping Kuching". Pilots are embarked either at the position, marked on B.A. Chart 1822, off Tg. Po or at Sejingkat by vessels proceeding further up river to the wharves operated by Kuching Port Authority.

In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

APPROACHES: The seaward approach to Kuching port is restricted by the presence of 2 bars; Outer Bar at a depth of 16 ft. below datum, and the Inner Bar at 15 ft. below datum. The max. depth of HW over the Bar, which occurs at springs is about 31 ft., whilst at Neap HW this decreases to approximately 28 ft. The tidal range is 5 ft. to 17 ft. There are also numerous rocks and shoals in the river and, although these are well known and accurately charted, a vessel without local knowledge should arrange with the Director of Marine for pilotage.

ANCHORAGES: *(a)* Tanjong Po Anchorage: 045°, 1 mile from Tanjong Po. Area of safe anchorage is 0.25 mile radius. Depth 6 fathoms.

(b) Sejingkat Anchorage: For vessel up to 580 ft. long with max. draft 25 ft. 3 miles from Pending Point. Mainly used by vessels loading logs.

Examination Anchorage: The examination anchorage is re-established off Sejingkat in an area bounded by:

(a) A line, marking the outer limit, drawn 345° from the Channel Beacon in position Lat. 01° 34′ 51″ N., Long. 110° 26′ 41″ E.

(b) A line, marking the inner limit, drawn 343° 30′ from the Inner Measured Mile Beacon in position 01° 34′ 50″ N., 110° 26′ 13″ E.

Vessels are recommended to anchor in the Northern half of the area and shallow draft vessels should berth as close to the Northern bank of the river as is practicable.

Vessels should advise the Marine Signal Station of their arrival using VHF Channel 20. Movement of vessels up river will be controlled from the Marine Signal Station or Marine Office. In order to receive information, vessels should keep watch on VHF Channel 20.

Vessels carrying dangerous cargo will be examined in the existing explosives anchorage.

RESTRICTIONS: Tide restriction and max. draft 5.18 m. at high tide. Not advisable to enter port at Tanah Puteh at night.

MAX. SIZE: Max. permissible length overall for vessel entering port at Tanah Puteh is 131 m. and max. draft 5.18 m. Max. overall length for oil carriers proceeding to oil installation at Baiwak Wharf, Pending Point is 122 m., and max. draft 6.4 m. At Pelabuhan Datuk Sim Kheng Hong (Pending), the LOA of ship permissible is 177 m. with a max. draft of 7.62 m.

RADIO: ETA cable to ship's Agent can be sent to Department of Telecommunications, Kuching. Code words, Kuching Radio.

Channel No. 16 – Calling and Safety. A continuous loudspeaker listening watch is maintained on this channel by a telephone operator of the Telecommunications Department in Kuching.

Channel No. 26 – Public Correspondence. All conversations between ships and telephone subscribers take place on this channel, after contact has been established on Channel 16.

Channel No. 20 – Port Operations. Direct communication can be established by ships with:

1. The Kuching Port Authority, Kuching (Radio Room, Security Division).
2. The pilot launch "Alor".
3. The Marine Department, Kuching.

All ships equipped with the Hague Plan Radio Equipment and approaching Kuching Port within 25 miles to 30 miles will be able to communicate direct with the Authority and with the Marine Department Headquarters on Channel 20.

TUGS: 3 tugs, 2 of 1,000 h.p. and 1 of 164 h.p. 3 mooring boats also available.

BERTHING: Application for berth must be made by Agents at least 24 hours before berthing.

Tanah Puteh 244 m. wharf of the deck on piles with shore-bridge type with 13,600 sq.m. of covered storage space and 14,864 sq.m. of open storage space, depth at lowest water 5.18 m.; at *Pelabuhan Datuk Sim Kheng Hong (Pending)* 262 m. marginal wharves, depth at lowest water 8.53 m. with 13,816 sq.m. covered storage space and 17,000 sq.m. of open storage. Feeder Container Services are available but ship must provide lift-on/lift-off gear for ship/shore and vice versa operations.

Shore based container handling equipment: 1×42 tonne front loader with telescopic spreader. 2×35 tonne front loaders with 20 ft. and 40 ft. spreaders. 4 prime movers. 6×20 ft. trailers. 6×40 ft. semi-trailers.

STEVEDORES: Normal port operating hours are as follows:

(a) Discharging and loading of cargoes, First shift, weekdays including Saturdays and Sundays 0730 – 1200 hrs.; 1300 – 1530 hrs.; Second Shift, 1530 – 1700 hrs., 1730 – 2300 hrs., Fridays, First Shift, 0730 – 1130 hrs.; 1430 – 1530 hrs.

(b) Delivery of Cargoes/Receiving of export cargoes, Monday to Thursday 0730 – 1200 hrs., 1300 – 1645 hrs., Fridays 0730 – 1130 hrs. – 1430 – 1645 hrs. Saturdays 0730 – 1145 hrs.

Arrangements can be made for delivery of perishable cargo during the weekends and public holidays provided prior approval of the Customs Department is obtained.

Tractor/trailer trains are used for transfer of cargoes within the port area while forklift trucks are used for stacking palletised/unitised cargoes and storage pallets.

Cargo handlers who are stevedores as well as longshoremen working under a fully integrated gang system are employees of the Authority. The Authority receives gang orders daily between 1400 and 1500 hours on normal working days and between 1000 and 1030 hours on the days preceding Sundays and public holidays. Gang orders are placed on a shift basis.

CRANES: *Cargo Handling Equipment:* 21 units towing tractors; 58 units forklift trucks (4,000 – 18,000 lbs.); 135 units trailers (3 – 20 tons); 2 units 35 ton mobile cranes; 2 units 5 ton mobile cranes.

MEDICAL: Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.

TANKERS: Tankers berth at Biawak Wharf, Pending Point, for discharge of their oil. Diameter of pipe-line 6 in. Only one tanker can berth at a time and max. draft is 6.4 m.

Berthing carried out near to the time of High Water. Starboard side alongside using port anchor. No berthing during darkness. Unberthing on flood tide. Mooring boat required, supplied by Kuching Port Authority's tug boat MV "Rakawi".

Shorelines

Mogas and Avgas:	Single 8 in. discharging line.
Gasoil	Single 8 in. discharging line.
Jet A1	Single 8 in. discharging line.
Bitumen 80/100	Single 8 in. discharging line.
LPG	Single 4 in. discharging line. 3 in. vapour line.
Light F.O.	Single 6 in. discharging line.

DENSITY: 1008.

FRESH WATER: Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 t.p.h.

FUEL: High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil Installation at Biawak.

GANGWAY/DECK WATCHMEN: Usually available. Ship should also provide own watchmen.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's should possess all relevant certificates on board in case required for reference.

CUSTOMS ALLOWANCES: Tobacco: 1 oz. tobacco or 25 cigarettes or 8 cigars permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, 0.125 qt. bottle of spirits or 0.25 qt. of beer or 1 qt. of wines is permitted for each crew member daily. Up to 3 days' ration in port.

CARGO GEAR: Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority.

IDENTIFICATION CARDS: Required.

CONSULS: Indonesia.

REPAIRS: Minor repairs to vessels only.

DRY DOCKS: Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.

REPATRIATION: Facilities available.

AIRPORT: Airport about 10 km. from port at Tanah Puteh. It is served by MAS which operate daily flights to Kuala Lumpur, Singapore and Kota Kinabalu.

TIME: Local time GMT plus 7.5 hours.

HOLIDAYS: Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day (1st May), Dayak Festival Day (1st June), and Christmas Day, during which the port at Tanah Puteh and Pending will be closed.

POLICE/AMBULANCE/FIRE: For emergency call, Tel: 999 is applicable to all these three services. Individual call: Central Police Station Tel: (082) 22181; General Hospital Tel: (082) 57555; Fire Station Tel: (082) 21033.

SHORE LEAVE: Crew members are allowed ashore provided permission is granted by Immigration Department.

REGULATIONS: Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.

DELAYS: At present ships can normally secure a berth within 24 hours of arrival if tide is right.

DEVELOPMENTS: Rural jetty under construction at Pending. Completion expected mid-1985.

AUTHORITY: Kuching Port Authority, P.O.Box 530, Kuching, Sarawak, Malaysia. *Tel:* Headquarters and Tanah Puteh – 082-33122 (5 lines). Pelabuhan Datuk Sim Kheng Hong – 082-32144 (4 lines). *Telex:* MA-70420 Kuport. *Cable:* Kuport, Kuching. *Contact:* The General Manager.

KUNAK, Sabah: 04.41 N. 118.15 E. (See Plan Book)

Sabah Government Requirements

(a) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs Officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.

(b) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.

(c) Medical will grant Pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".

(d) Marine Dept. In the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.

(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The Pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account. There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

BERTHING: 1. Wharf consists of,

(a) A raised cement platform 30 ft.×30 ft. on wooden piling.

(b) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.

(c) Two cement mooring dolphins 20 ft.×20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.

(d) A metal jetty approach 10 ft. wide×350 ft. long.

(e) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.

(f) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 t.p.h. Palm oil pipe is of 6 in. diameter.

AUTHORITY: Port Manager, Tawau.

LABUAN, Sabah: 05.17 N. 115.15 E. (See Plan Book)

Island of Labuan is 12 miles long and 7 miles wide lying off N.W. coast of Borneo at entrance at Brunei Bay. It is part of State of Sabah and is only 4.5 miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.

DOCUMENTS:

(a) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(b) Health Officer will require Maritime Declaration of Health duly completed together with 1 copy of Passenger List and 1 copy of Crew List whenever vessel's last port of call has been outside State of Sabah.

(c) Boarding Officer will require 1 copy of Shipping Arrival Report, 1 copy of passenger list and 1 copy of crew list. He will also inspect various Certificates such as Load Line, Life Saving Equipment etc.

(d) Following is summary of documents required:

	Customs	*Immigration*	*Boarding Officer*	*Agent*	*M.O.*
Passenger List	2	2	1	1	1
Crew List	2	2	1	1	1
Store List	2	—	—	1	—
Maritime Declaration of Health	2	—	—	—	1

(e) To be supplied before Departure:

Manifests as necessary.
Master's copies of Bills of Lading.
Port Clearance.
Customs Clearance.
Certificate of *(a)* Buoys and Lights Dues and *(b)* Port and Harbour Dues.

PILOTAGE: Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 hrs. and 1800 hrs., unberthing at any hour, day or night, provided that notice of such movements received between 0800 hrs. and 1600 hrs.

ANCHORAGES: Good anchorage for large vessels in a least depth of 5.75 fathoms South and S.E. of No. 6 Beacon.

Quarantine: Vessels arriving from an unhealthy port should proceed to Quarantine Anchorage for Pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; South by a line drawn between S.W. point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

Explosives: No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180° direction until it joins line between S.W. point of Papan Island and Enoe Beacon.

Dangerous Petroleum: A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light Beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern Boundary Limit of Explosives Anchorage.

Prohibited Anchorage: No vessel shall anchor within 2,000 ft. from the light of Southernmost dolphin of Liberty Pier.

RESTRICTIONS: Tides. Subject to diurnal inequalities but usually one HW and one LW a day. Average HW is 6.5 ft. and LW 3 ft. above datum of soundings.

Clearance: Port is open from 0600 hrs to 1800 hrs. although vessels can be cleared later than 1800 hrs. on application provided they are sighted from Papan Lighthouse at 1800 hrs.

HEALTH: See "Regulations" and "Anchorages".

RADIO: Information required before ship's arrival. ETA Labuan, with as much prior notice as possible. Number of gangs required. Quantity of fresh water required. Whether Pilot required for berthing.

Labuan has no radio facilities and messages are received via Kota Kinabalu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 0530 and 2400 hrs.

Also see "Tankers" – Communications.

TUGS: One tug, 750 b.h.p., twin screw, available to assist with berthing and unberthing.

BERTHING: 1. Wharves.

(*a*) Liberty Wharf: A permanent concrete wharf, measuring 800 ft. with dolphins 100 ft. off each end – least depth of water is 28.5 ft.

(*b*) Victoria or Small Ships' Wharf (marked on Chart as H. & C.'s Wharf): A wooden structure – length 270 ft. with min. depth of 12 ft. No longer useable except by kumpits. No vehicles allowed on wharf.

(*c*) New Shell Installation Wharf: Concrete jetty 170 ft. long with 2 dolphins at each end with a total length between of 700 ft., least depth of water 31 ft.

Shore Lines:

1. For Mogas 8 in. × 1,200 ft.
2. For D.P. Kero 8 in. × 1,250 ft.
3. For Gasoil 8 in. × 1,350 ft.
4. For Fuel Oil 8 in. × 1,350 ft.

8 in. hoses used to connect ship and shore.

(*d*) Brown & Root Jetty: A timber decked jetty with following dimensions:

Length of main jetty – 160 ft., width 40 ft.
Length of causeway – 476 ft., width 22 ft.
Least depth alongside approximate 28 ft.
Max. load (proven) – 800 lb./sq.ft.
Max. single approximate 100 short tons.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons: N.E. monsoon prevails from December to April and S.W. monsoon from middle of May to middle of October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(*a*) When entering port vessel should fly Signal Letters, Mail Flag if applicable, and "G" flag if requiring Pilot, and also Quarantine Flag.

(*b*) Berthing Signals: Following berthing signals will be used at Labuan and will be displayed from Flagstaff in Harbour Office in vicinity of Liberty Wharf, Victoria Harbour. A red and white chequered flag and International Code numbered pendant will indicate berth number allocated. Berth numbers have been allocated as follows:

(*c*) Berth and Pendant No.

1. Esso Wharf.
2. LCT. Landing Ramp.
3. Victoria Wharf (small ships) S.E. Section.
4. Old Liberty Wharf (inner section).
5. Old Liberty Wharf (outer section).
6. New Liberty Wharf (inner section).
7. New Liberty Wharf (outer section).
8. Brown & Root Jetty.
9. Shell Installation Jetty.
10. Anchor.

On receipt of berthing signal, vessel should acknowledge in the usual manner with the answering pendant and proceed to berth.

(*d*) Tidal Signal: A tidal signal consisting of a cone and ball is hoisted in conjunction with berthing signal showing state of tide at berth indicated. A cone point down signifies flood tide (West-going), a cone point up ebb tide (East-going), a ball slack water.

(*e*) Facilities: Max. single load without special precautions on Old Liberty Wharf is 25 tons and New Liberty Wharf is 650 lbs./sq.ft. i.e. 180 tons four axle vehicles. Any load over this figure will require to be distributed over two or more panels of 10 ft. by 10 ft. each according to weight. However, special arrangements must be made prior to discharge, and Agent should be consulted in advance.

BULK HANDLING FACILITIES: Rancha Rancha Industrial Estate: One jetty for iron ore carriers up to 150,000 d.w.t. nearing completion. Unloading rate 2,000 t.p.h.

STEVEDORES: Supplied by contractors as arranged by Agent. Working hours 0800 – 1200 hrs., 1300 – 1700 hrs. Working outside these hours on Sundays and Public holidays is overtime.

CARGO: 1. Inward: Inward cargo is tallied out of ship on to wharf or into lighter. Damaged cargo is surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge is carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of shortlanded cargo, reasonable proof must be given to Customs that the cargo has not been landed. A shortlanded Memo certified by the Chief Officer is usually accepted as proof.

2. Transhipment: After discharge of cargo from the 1st carrier, transhipment cargo is placed under supervision of Customs, unless it is possible to arrange direct transhipment into small coastal vessel. Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated: Only small quantities of refrigerator cargo loaded or discharged.

4. Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from the police prior to arrival of cargo, and harbour and police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

MEDICAL: Hospitals. Not possible for Government Medical Officer to visit ships but patients can be sent to Cottage Hospital. Four 1st class beds, 10 2nd class beds, 46 3rd class beds. Two private clinics, Dr. Chan Clinic and Dr. Wong Clinic, are located in town.

Dentist. A Government Dental Clinic, located in Cottage Hospital area. In addition, a dentist is available in town.

TANKERS: *Labuan Terminal (Shell):* The single buoy mooring is positioned at Lat. 5° 15′ 59″ N., Long. 115° 07′ 08″ E. designed for tankers with max. s.d.w.t. 320,000, but presently fitted for a max. B/CM of 520 ft.

The minimum water depth in the manoeuvring area is 84 ft. and the max. permissible draft 74 ft.

Pipe-lines and Cargo Hoses: A 48 in. submarine/land pipe-line connects the SBM with the storage tanks on shore. Beneath the SBM, the pipeline terminates in a manifold (PLEM) for connecting the underwater hoses of the buoy. The PLEM is fitted with 2 non-return, non-slam "mockveld" valves to eliminate potential leakage and surge pressure being built up from shore to the SBM.

Two underwater hoses, each 120 ft. in length, connect the SBM to the PLEM with a lazy 'S' configuration. Each string consists of 4×30 ft. lengths of hose.

One 20 in. diameter floating hose string of 700 ft. length is connected to the turntable. The string terminates in 1×16 in. and 1×12 in. diameter rail hose for direct connection to the tanker's starboard manifold. The 12 in. hose is connected to the forward and the 16 in. hose to the aft manifold line. The last 3 units of the tail hoses are electrically discontinuous, in order that stray currents from the crude carriers are not carried on to the buoy. Max. B/CM 520 ft.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA	ETA and draft at Labuan SBM.
BBB	Customs and Health requirements.
CCC	Is vessel equipped with bow chain stopper, Smit brackets and a large central Panama Chock? (This information required from unknown vessels only.)
DDD	Are manifold connections per OCIMF specifications?
EEE	Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF	Have 16 in. and 1×12 in. manifold connections ready on starboard side.
GGG	Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA	Based on your ETA............present intention is to berth you on arrival.
BBB	Pilot will board at the boarding area 2 miles W.S.W. of SBM in the following position: Latitude: 05° 15′ 00″ N. Longitude: 115° 04′ 00″ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Labuan Terminal on VHF Channel 16 with Channel 14 as a working channel.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Vessels are programmed for day and night berthing. Use of the ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. circumference×150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotation Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 450 ft.

(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes 2 ft. on each side. Length 45 ft.

(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connecton and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the boarding area 2 miles W.S.W. of the SBM for both arriving vessels and the vessels which have be anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Cargo Loading Operations: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into a enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker's side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessel's side.

Loading Procedure: Labuan Crude is loaded at Labuan Terminal. The quantities loaded are checked by the terminal at frequent intervals (3 hours) and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m./hr. and a maximum back pressure of 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the Terminal's Representative he will attend to all cargo formalities (SSPC forms, safety checklist, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and Terminal Representative to ensure that all requirements on the safety check list have been complied with.

(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.

(c) Ship and shore to confirm readiness to start cargo loading operations.

(d) Commencement of loading to be at a slow rate.

(e) Lines and hoses are checked and faults rectified. Launch to patrol around the vessel to check for oil leakages into the sea.

(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.

(g) Lines, hoses and the water around the vessels are again checked.

(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.

(i) At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

Suspension of Loading Operations: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Communications: Vessels are required to advise SSPC/Respective Agents of their ETA's 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco, Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Labuan Terminal on VHF Channel 14.

Weather: All the SBM's concerned are positioned in the open sea. The weather in the region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of S.E. Asia. These three types are:

(1) S.W. Monsoon (June-October)
(2) N.E. Monsoon (December-March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome times of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: Only available in small quantities (usually 30 tons maximum) and at restricted hours.

FUEL: Bulk furnace oil and high speed diesel usually available but 48 hours' notice of requirements must be given.

FIRE PRECAUTIONS: In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

CONSULS: None.

REPAIRS: Marine Department operates engineering workshops at Labuan.

DRY DOCKS: Marine Department has 3 Slipways in Labuan which are capable of slipping vessels of 60 tons, 200 tons and 500 tons displacements.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

POLICE/AMBULANCE/FIRE: Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

GENERAL: *Surveyors.* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

Ship Chandlers. Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

Recreation Facilities. If owners pay a monthly subscription to the Labuan Recreation Club, ship's crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese Crew members.

REGULATIONS: *(a)* Arrival and departure.

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *Recreational Facilities:*

(i) A newly constructed 12 storey Labuan Hotel is situated in the town. All rooms air-conditioned with bathroom attached.

(ii) A nine-hole golf course situated about 1 mile away from town.

DEVELOPMENTS: See "Bulk Handling Facilities".

AUTHORITY: Harbour Master.

LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated 8 miles above the entrance of the Limbang River. There is an anchorage for ocean-going steamers 5 miles below the Limbang Bar Buoy with a least depth of 26 ft.

Depth on Bar. The least depth reported on the bar is about 2 ft. with a highest rise of 12 ft. The channel is marked by stakes with red/white and black/white top markers and a flashing light buoy Fl.1 sec. at the entrance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

BANKS: Malayan Banking Berhad.

STORING: See "Prelims", page viii.

3. Yes.
4. Yes.
5. —
6. Yes.

SURVEYORS: Cargo inspectors available. Local marine surveyor available.

AUTHORITY: Marine Department, Limbang, Sarawak, Malaysia. *Tel:* 21130, 21167. *Cables:* Shipping. *Contact:* Port Officer.

LUMUT, Malaya: 04.14 N. 100.38 E.

SHIPMASTER'S REPORT:

DOCUMENTS:

Customs:

3 Crew lists.
2 Report of arrival – Appendix "A".
1 Passenger list.
2 Dutiable stores statements.
5 Inward manifests (prepared by Agent)
2 Personal effects lists.
2 Lists cargo in transit.
1 Lists arms & ammunition ("NIL" certificate required).
Last port clearance.
3 Copies loading manifests.
3 Outward manifests (prepared by Agent).
1 List narcotics ("NIL" certificate required).

Immigration:

2 Crew lists.
2 Passenger lists.
All passports and seaman's books.

Boarding Office (Port Authority):

1 Report of arrival.
1 Crew list.
1 Passenger list ("NIL" return required).
1 Arms & ammunition list ("NIL" return required).
Register, load line, derat certificate.
Radio and Safety equipment certificates.
1 Narcotics list.

Port Health:

2 Vaccination lists (Cholera).
2 Health Forms.
Derat certificate

Police:

1 Crew list.
1 Passenger list.
1 Arms & ammunition list.
1 Narcotics list.

Clearance of vessel carried out on arrival at anchorage or berth before loading or discharging is allowed. Usually Customs', Immigration, Police, Health will come together on board and free pratique issued by Health Officer.

PILOTAGE: Pilot boarding position Lat: 4° 10′ 30″ N., Long. 100° 35′ E., which is one mile South of Pangkor Island S.E. Point light. Berthing and unberthing will only be carried out during daylight hours and at slack water or beginning of flood tide. Pilot comes from Penang for berthing and unberthing. Pilot leaves vessel at Hospital Rock on departure. Pilot launch painted blue with white superstructure and named "King Miller". Pilot rates: Launch fee M$400 in and out minimum M$750 – maximum M$3,000, depending on d.w.t. of vessel.

ANCHORAGE: Just inside harbour limits, 7 cables South of S.E. Point light in about 12 fathoms. Bottom said to be sand and shells and reputed good holding ground.

MAX. SIZE: Max. length on grain berth 575 ft.

Max. draft into port 30 ft. 6 in. salt water on Spring tides. This is due to a bar at the entrance of Dindings River and a rather sharp turn around buoy of 125° to miss rocks marked by unlit buoy. (Lloyd Rocks B. A. Chart 792 vicinity of River Passage).

HEALTH: See "Documents".

RADIO: *ETAs:* Sent through Penang or Singapore Radio to Flourmill Kuala Lumpur and ship's Agents. 72, 24 and 12 hours notice required. Agents will keep Flourmill Lumut and Pilots informed. Authorities like 5 days notice of a vessel's impending visit.

VHF: There are no VHF communications in the port or with pilot boat.

TUGS: There are no tugs at Lumut — nearest Penang (small) and Singapore (large).

BERTHING: Port side to at Malayan Flour Mill Private Wharf in position Lat: 4° 16′ N., Long: 100° 39.5′ E., ship's head in. Depth of water at wharf is 32 ft. 06 in. A modern wharf supporting one movable discharging elevator. Conveyor belt runs under wharf.

South side of dock is used by coastal tankers and has 20 ft. of water. Dock is of concrete construction with heavy wood and steel girder fendering which is rubber mounted. End of wharf has a separately fendered concrete construction which is fitted with rubber shock absorber.

STEVEDORES: Mill employs own stevedores and work continues throughout 24 hours. No cargo work on Sundays and Public Holidays unless requested by either party when the overtime charges will be borne by the said party. Discharge rate is about 118 m.t.p.h. with 2 suckers (wheat). Reported to be about 100 m.t.p.h. with corn.

MEDICAL: Doctor in Lumut and Sitiawan (7 miles from Lumut). Local hospital usually has large queue, therefore better to attend private doctor. Private doctor may be called onboard if necessary.

DENSITY: Water is brackish both at anchorage and berth. About 1022 ozs/cu. ft. at berth.

FRESH WATER: Available on berth, arranged through Flour Mill at $5.00 per ton during working hours and at $6.50 per ton after office hours.

FUEL: By arrangement and brought to ship in road tankers. Cargo cannot be discharged while bunkering as the trucks are not able to pass under or by the grain discharger (Agent informs that one weeks' notice required for bunkers). Fuel and diesel supplies come from Mobil Oil Depot. Batu Undan about 1.5 miles from mill.

REPAIRS: Minor repairs only at mills workshop, firms can be called in from Kuala Lumpur or Singapore or Ipoh.

SURVEYORS: Trident Malaysia Sdn. Bnd. in Penang.

GANGWAY/DECK WATCHMAN: Private wharf and protected area - no shore watchman required on board - only ship's watchman for ropes and safety. Shore mill patrol is armed with shotgun.

REPATRIATION: No problems but make sure travel documents i.e. passports, are valid.
AIRPORT: Nearest local airport is Ipoh and then fly or by road to Kuala Lumpur International Airport. Ipoh is about 1 hour's drive and Kuala Lumpur 4 hours drive.
TELEPHONE: On berth and in Flour Mill entrance hall.
SHORE LEAVE: Local leave only, except with special permission and pass. Boats to be laid on by ship for crew shore leave to Lumut and this is about a 20 minute boat ride to shore. Charges – $20 per trip. A boat from the anchorage may be laid on and this costs $75. Boat service is run by Mr. Loo Chong Lin/Mr. Loo Yean Lai – Titi Panjang Road, Lumut – They can usually be found on waterfront by Customs office. Also to Sitiawan about 7 miles from Lumut. To Ipoh 52 miles by taxi $6.00 per person one way. Special Immigration pass is required and can be arranged through Agent.
BANKS: The Chartered Bank, Jalan Lumut, Sitiawan, Perak; Malayan Banking Berhad, Lumut, Perak; Bank Bumiputra Malaysia, Lumut, Perak.
EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Penang or Port Kelang.
STORING: See "Prelims", page viii.

1. Yes, both.
2. Yes.
3. Yes.
4. Yes.
5. Prior approval must be obtained.
6. No.

GENERAL: The Flourmill is situated on the N.E. side of Lumut about 40 miles by road and 20 minutes by launch from Lumut town. There is a good canteen at the Flourmill which serves European, Chinese and Muslim foods, soft drinks and beer. Ship's personnel are allowed and welcome to use these facilities.

There are only two reasonable hotels in Lumut, Dinding Hotel which has only three rooms air conditioned, and The Rest House which is not air-conditioned. If possible book in advance especially on Saturdays, Sundays and Holidays.

At Pangkor Island there are good hotels; Sea View Hotel, Beach Hut Hotel and Pangkor Bay Village. At Teluk Batik 10 chalets available, about 5 miles from Lumut town.

Football matches can be arranged and Customs, Flourmill etc. are all very keen to play ships visiting the port. Hire of the football pitch which is in the centre of town and very good is only $5.

A soya bean mill has been completed and is in production and using the same wharf for discharge of their cargoes.

Customs: Allowances very small – 75 cigarettes per man for 3 days and one bottle of spirits for 8 men every 3 days. Customs office is on shore near to ferry berth. One and sometimes two, Customs men remain on vessel throughout and accommodation is to be provided for them.
Immigration: No immigration if from Malaysian ports but clearance required when from foreign.
Tide: Ebbs for 5.25 hours on berth. Tides times are based on Port Kelang – difference is minus 1 hr. 40 min. Rise and fall about 2 m. – see Admiralty Tide Tables and Admiralty N.P. 214, Malacca Strait and Southern Approaches to Malacca Strait. Atlas of Tides and Tidal Streams.
Provisions/Stores: Fresh provisions available but advisable to give 24 hours notice as some of the items come from outside Lumut. Fruit and vegetables are available in season from local supply and are reputed to be reasonably priced. Some fruit and vegetables imported and may be expensive. Chandlers can be arranged by Agent.
Laundry; Arranged by Chandler (see above), takes about three days as is done by hand.
Charts: BA 1009 Perak River & Approaches when approaching from South and BA 792 Dinding River & Approaches with inset covering flour mill wharf.
AUTHORITY: Malayan Flour Mills Berhad, Jalan David Sung, Batu Undan, Lumut, Perak, Malaysia. *Contact:* Raja Toran Shahriman, Chief Administration Officer.

Mr. Yaacob Bin Abd. Rahman, Port Officer, Marine Department, Lumut, Perak. *Tel:* 05-935477.

MALACCA, Malaya: 02.15 N. 102.15 E.

DOCUMENTS:
1. *Malacca Port Authority*
(a) Ship's arrival advice on prescribed form.
(b) Ship's Manifests (2 copies).
(c) Dangerous Goods Declaration.
(d) Passenger List (if any).
2. *Harbour Master's Office*
(a) "Report of Arrival of Vessel" on prescribed form obtainable from Harbour Master's Office on arrival.
(b) One copy Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
(c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.
(d) List of all arms and explosives on board.
(e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.
(f) All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load Line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derat Certificate and all Certificates of Competency of all Officers on board.
(g) Crew List.
3. *Immigration Authorities*
(a) Crew List (3 copies).
(b) Passenger List (3 copies).
(c) Produce all passengers passports/visas.
(d) Produce all seamen's cards/books.
(e) Fill embarkation/disembarkation card obtainable from Immigration Department on arrival.
4. *Port Health*
(a) Crew List showing last date of vaccination.
(b) Passenger List, showing the last date of vaccination.
(c) Produce all seamen's and passengers' vaccination cards.
5. *Customs Department*
(a) Crew List (2 copies).
(b) Passenger List (2 copies).
(c) Personnel Effects List (2 copies).
(d) Cargo Manifests (4 copies).
(e) Last Port Clearance.
(f) Bonded Stores List (2 copies).
(g) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
(h) Customs Form CD 15 obtainable from Customs Department on arrival.

APPROACHES: No difficulty from North or South. No sand bar at river mouth. Harbour open all year round.
PILOTAGE: Pilotage service is compulsory for vessels entering or leaving port limits. Vessels to give Malacca Port Authority 4 hours notice. Vessels from West take Pilot 2.75 miles W.S.W. of Tanjong Keling and vessels from East take Pilot 5 miles S.S.W. of Tanjong Keling.
ANCHORAGES: For ocean-going and coastal vessels anchorage between 1–1.5 miles off Malacca Harbour. Between 3–6 fathoms depth. No specific prohibited anchorage. Discharging into lighters at anchorage.
TUGS: None.
BERTHING: A deepwater berth – least depth alongside 36 ft. Jetty "T" head connected to shore at Tanjung Bruas (approximate position Lat. 02° 13′ N., Long. 102° 09′ E.) by approach bridge. Length of berth 368 ft.
Storage Areas: A modern covered godown of 2,005 sq.m. and open storage yard of 3,135 sq.m.
STEVEDORES: Discharging cargo capacity per day – 1,000 tons. Working on 2 shifts.
MEDICAL: Modern Government hospital and private clinics.
FRESH WATER: Available from elevated water tank of 50,000 gallons capacity.
FUEL: None.
CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.

Wine and/or Spirit: Spirit, 0.125 quart per man per day, or wines, 1 quart per man per day, or beer or stout, 1 quart per man per day.
REPAIRS/DRY DOCKS: None.
HOLIDAYS: *Port Closed Days:* Chinese New Year, Aid il fitri (1 Syawal), Deepavali, National Day and Christmas Day.
AIRPORT: Batu Berendam, 6 miles from port.
AUTHORITY: Malacca Port Authority, Jeti Tanjung Bruas, Port Kelang, Melaka, Malaysia.

MIRI, Sarawak (incl. Lutong, Kl. Baram, Kl. Niah & Kl. Suai): 04.26 N. 113.55 E. (See Plan Book)

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.
PORT LIMITS: All navigable waters up to the high water mark and all land from the high water mark to the land boundary within the following limits:
Inner Limit:
Batang Baram within the high water lines, from the line delineating the Coastal High Water Line at the river mouth, upstream to the geographical parallel across the river at Lat. 3° 45′ 00″ N.
Outer Limit:
(i) From a point on the Coastal High Water line on the Sarawak/Brunei International Boundary, Lat. 4° 00′ 18″ N., Long. 114° 36′ 27″ E. (approx.)
(ii) Thence along the Coastal High Water Line in a generally Southwesterly direction to a point on the Miri/Bintulu District Boundary, on the N.E. bank of Sungai Selungun, Lat. 3° 35′ 19″ N., Long. 113° 20′ 18″ E. (approx.)
(iii) Thence along a line drawn in a 324° direction to its intersection with the limit of the Sarawak Territorial Sea, Lat. 4° 48′ 30″ N., Long. 113° 20′ 18″ E. (approx.)
(iv) Thence Northeasterly along the boundary of Sarawak Territorial Sea to its intersection with the International Boundary between Sarawak and Brunei on the Continental Shelf, Lat. 4° 48′ 36″ N., Long. 113° 57′ 12″ E. (approx.)
(v) Thence along the same International Boundary to the initial point defined in Clause (i) above.
DOCUMENTS: (a) Health. Vessels exempted from inspection (see "Health") should deliver to Berthing Master on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.

(b) Inward Clearance (also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.

Inward clearance effected only between 0600 and 1800 hrs. and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if free pratique requested, flag "Q".

Following papers will be required on arrival for inward clearance:

Port Health:

Declaration of Health.

1 Crew List.

1 Passenger List, inward and through.

Customs Boarding Officer:

As above, if not boarded by Health Officer, and 2 Inward Cargo Manifests.

(c) Outward Clearance. All vessels will be issued a Port Clearance by Customs Officer after the application has been verified by Port Officer at their respective office. Papers required are 2 Outward Manifests, 2 Crew Lists and, if any embarked, 2 Outward Passenger Lists.

APPROACHES: The loom of gas flares on Seria Oilfields 30 miles N.E. of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

(a) *Tanjong Baram* Lat. 04° 35′ 47″ N., Long. 113° 58′ 25″ E., white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash 3 every 20 secs.

(b) *Lutong* Lat. 04° 28′ 30″ N., Long. 113° 59′ 46″ E., white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash 2 every 10 secs.

(c) *Tanjong Lobang* Lat. 04° 21′ 48″ N., Long. 113° 57′ 36″ E., white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash 1 every 10 secs.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:

(a) Lutong radio mast F.R 210 ft., position Lat. 04° 26′ 25″ N., Long. 113° 59′ 54″ E.

(b) Tanjong Lobang radio masts as marked on chart.

PILOTAGE: No official Pilot stationed at Miri but Shell Company provide Berthing Masters to moor vessels at their Lutong Moorings (see "Tankers").

ANCHORAGE: For tankers, please refer to "Tankers". For cargo, passengers or clearance, the outer area within an area to Northward of Lat. 04° 25′ 42″ N., Eastward of Long. 113° 55′ E. and Southward of Lat. 04° 23′ 42″ N. It is recommended that vessels of less than 5 m. draft may anchor close inshore directly opposite Miri River Mouth, but caution must be exercised as sudden squalls and swell up to 1.5 m. can occur, for which allowance should be made. For logs at Kl. Baram it is recommended that vessels anchor close inshore S.W. of Baram River Mouth, but caution must be exercised as sudden squalls and swells up to 2 m. can occur, for which allowance should be made. Extra caution must be exercised not to intrude the prohibited anchorage area at the further end of S.W. of Baram River Mouth and the numerous submarine gas lines around the area. For logs at Kuala Niah and Kuala Suai it is recommended that vessels anchor close inshore directly opposite Niah River Mouth and Suai River Mouth, but caution must be exercised as sudden squalls and swell up to 1 m. can occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters or steel dumb barges ranging from 30 tons – 300 tons capacity. Swell often restricts work to landward side only and swell or wind often make it difficult to work Hatch No. 1 in some vessels. Accommodation ladder should be lowered on landward side to enable shore personnel to board.

Prohibited Anchorage and Berthing Area. From *(a)* Lat. 4° 30′ 54″ N., Long. 113° 56′ 19″ E. in a 090° direction to the shore; and from *(a)* to *(b)* in Lat. 4° 27′ 30″ N., Long. 113° 47′ 01″ E., thence in a 090° direction to the shore.

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

Free pratique granted without health inspection to vessels calling to lift bunkers only at Lutong Moorings, provided ship healthy. Vessels with unclean bill of health or vessels which have not declared themselves healthy in their arrival notice telegram are subject to normal Port Health inspection procedure. Therefore of utmost importance that arrival notice is sent not less than 24 hours before arrival and contains all information requested (see "Radio") in order to prevent unnecessary delay.

RADIO: Miri Radio call sign 9 WW21, frequency 500 kHz, operates at following hours local time: 0800 – 0830, 0900 – 0930, 1200 – 1230, 1600 – 1630. Present station has a limited range and if difficulty is experienced making contact or contact outside the above hours, vessels should pass messages through other stations, such as Kuching Radio or Singapore Radio, or through other ships in close vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival and should contain following information:

All vessels

(a) expected time of arrival (local time GMT plus 8 hours);

(b) name of last port of call and next port of call, if not previously advised;

(c) whether or not ship is healthy.

For bunkers

(d) quantity of bunkers required, in long tons at least 48 hours notice is required;

(e) provisions or medical attention required, if any.

For cargo

(f) tonnage to discharge, if any;

(g) number of gangs required to load;

(h) number of winchmen required to load.

Passengers

(i) number of passengers to disembark.

Also see "Tankers" – Communications.

VHF: Vessels arrived at the anchorages and wishing to contact their local/abroad Agents should contact "Miri Control" by Channel 16 which will be subsequently transferred to either Channel 25 or 27 for through calls. "Miri Control" operates 24 hours daily.

BERTHING: Cargo vessels – see "Anchorage", oil carriers – see "Tankers".

MEDICAL: Treatment of urgent cases available on shore subject weather conditions. Early notice should be telegraphed of medical requirements.

TANKERS: There are 3 Single Buoy Moorings at Miri Terminal which are in the following positions:

SBM	Lat. 04° 28′ 21.9″ N.	Max. SDWT: 30,000 tonnes
No. 1 –	Long. 113° 56′ 20.8″ E.	Max. draft: 37 ft.
		Min. water depth in manoeuvring area 40 ft.
SBM	Lat. 04° 28′ 48.9″ N.	Max. SDWT: 75,000 tonnes
No. 2 –	Long. 113° 56′ 33.0″ E.	Max. draft: 37 ft.
		Min. water depth in manoeuvring area 40 ft.
SBM	Lat. 04° 30′ 15.5″ N.	Max. SDWT: 100,000 tonnes
No. 4 –	Long. 113° 56′ 26.3″ E.	Max. draft: 39 ft.
		Min. water depth in manoeuvring area 42 ft.

The riser platform acts as a distributing point where all the valves to the 3 SBMs are located and is positioned at Lat. 04° 29′ 33″ N., Long. 113° 56′ 37″ E.

Pipe-lines and Cargo Hoses:

SBM No. 1: Operational for the export of refined products only.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 2 × 8 in. and 1 × 6 in. diameter hose strings of 5 lengths each for direct connection to the tanker's starboard manifold. An additional 6 in. diameter self-floating hose string of 17 lengths is connected to the turntable.

The total length of the hose strings is 544 ft. allowing a maximum distance from ship's bow to manifold of 330 ft.

The maximum permissible draft is 37 ft.

SBM No. 2: Operational for the export of Crude Oil and Fuel Oil.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 8 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 634 ft. allowing a maximum distance from ship's bow to manifold of 400 ft.

The maximum permissible draft is 37 ft.

SBM No. 4: Operational for the export of Crude Oil and Fuel Oil.

The connection between the distribution platform and SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 5 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 648 ft. allowing a maximum distance from ship's bow to manifold of 450 ft.

The maximum permissible draft is 39 ft.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM.

Please advise.

AAA	ETA and draft at Miri SBM
BBB	Customs and Health requirements
CCC	Is vessel equipped with bow chain stopper, Smit brackets and a large central Panama Chock? (this information required from unknown vessels only)
DDD	Are manifold connections as per OCIMF specifications?
EEE	Rig starboard derrick to maximum (minimum acceptable 7 tons)
FFF	Have 2 × 12 in. manifolds ready on starboard side.
GGG	Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA	Based on your ETA...........present intention is to berth you on arrival.
BBB	Pilot will board at Pilot anchorage area at the following coordinates: Lat. 04° 25′ N., Long. 113° 54′ E. Lat. 04° 27′ N., Long. 113° 56′ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Miri Terminal on VHF Channel 18 with Lutong Radio.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises of 2×15 in. circumference×150 ft. single braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with 50 ft.×1.5 in. diameter chafing wires.

The pick-up assembly consists of:

(i) 8 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.

(ii) 8 in. circumference polypropylene pick-up rope with tail-end spliced directly to chafing wire.

(iii) Pick-up support buoy.

(iv) 50 ft.×1.5 in. diameter chafing wire.

Mooring Operation: Vessels are programmed for day and night berthing. Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connecton and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the Pilot anchorage area for both arriving vessels and the vessels which have been anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft then proceeds to the vessel to disembark the Berthing Master.

During the vessel's approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger, pick-up rope and chafing wire are hove on board until the chafing wire is in position in the fairlead (marker buoy just outboard of fairlead). The chain stopper is secured to the chafing wire, while the eye is put on the ship's bollard to make fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle, and mooring is carried out by ship's crew.

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered on to the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafing and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Miri Light Crude and refinery products are exported from the Miri Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The shore maximum back pressure is 180 p.s.i. The Berthing Master also acts as Loading Master and as the Terminal's Representative. He will attend to all cargo formalities (SSB forms, safety check list, etc.).

Prior to and during loading operations the following procedure will apply.

a. A joint inspection is carried out by ship and terminal representative to ensure all requirements on the safety check list have been compiled with.
b. The methods of communication between ship and shore is clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.
c. Ship and shore to confirm readiness to start cargo loading operations.
d. Commencement of loading to be at slow rate.
e. Lines and hoses are checked and faults rectified. Launch to patrol around the vessel to check for oil leakages into the sea.
f. When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
g. Lines, hoses and the water around the vessel are again checked.
h. Ship and shore figures are to be compared every 2 hours and discrepancies investigated.
i. At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings.

Communications: Vessels are required to advise Sarawak Shell Berhad/Respective Agents of their ETA's 48 hours and again 24 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Miri Lutong Terminal on VHF Channel 18.

During office hours "Shell Marine" can be contacted on Channel 18, but this radio has a limited range.

Weather: The SBM's are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of South East Asia. These three types are:

(1) S.W. Monsoon (June–October)
(2) N.E. Monsoon (December–March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome features of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: No fresh or boiler water available.

FUEL: No ex-barge facilities but bunkers obtained from Lutong Terminal.

Nos. 2 and 4 Sealines. Available for bunkering dry-cargo vessels. Ship's spring wire will be used to haul ends of mooring wires on board and mooring winches should be double gear and in all respects ready for use. All other gear for mooring and connecting pipes is brought on board with Berthing Master at Pilot Station. Bunkers will be supplied through 8 in. flexible hose brought up on starboard side amidships and appropriate flange on ship's connection should be removed in advance. Berthing Master will remain on board throughout bunkering operation and will leave after vessel has unberthed. Mooring and unmooring operations each require about 1.5 hours and bunkering rate usually 45 t.p.h. – 75 t.p.h.

CUSTOMS ALLOWANCES: Bonded Store on vessels other than those berthing at Lutong Moorings for bunkers only and exempted from formal clearance, sealed by Customs after allowing a daily ration for duration of stay in port.

1 Customs Officer will remain on board all vessels anchored in Miri Roads and accommodation, if necessary, should be arranged for them. The Agents' staff will remain on board throughout all cargo operations and it would be highly appreciated if meals could be supplied to them and to the Customs Officer in view of the long time occupied travelling by launch between ship and shore.

REPATRIATION: Crew changes and repatriation can be carried out at Marine Office, Kubu Road, Miri with little difficulty.

AIRPORT: Distant 10 km., daily, day and night flights.

TIME: GMT plus 8 hours. Permanent.

HOLIDAYS: New Year's Day; Chinese New Year; Good Friday; Labour Day; Wesak Day; Dayak Festival Day (Gawai); Yang Dipertuan Agong's Birthday; Hari Raya Puasa; T.Y.T. Yang Dipertua's Birthday; National Day; Hari Raya Haji; Awal Muharram; Prophet Mohammad's Birthday; Christmas Day.

Chinese New Year; Dayak Festival Day (Gawai); Hari Raya Puasa normally has 2 days holiday.

SHORE LEAVE: It is regretted that both passengers and crew must be dissuaded from coming ashore other than for medical attention, owing to weather and tidal restrictions.

IDENTIFICATION CARDS: Seaman's Record Book is sufficient.

REPAIRS: No facilities for repairs.

LUBRICANTS: Generally, lubricants not available but in emergency certain grades sometimes obtainable in very limited quantities.

PROVISIONS: Limited fresh provisions and ex-bond stores available for which vessels should give 72 hours notice of requirements so that arrangements can be made to secure the required supplies.

POLICE/AMBULANCE/FIRE: Tel: 999.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than east 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Marine Officer, Marine Department, Kubu Road, Miri, Sarawak, Malaysia. *Tel:* 085-34624; 085-32352; 085-33338, 085-33301. *Cables:* "Shipping Miri".

Deputy General Manager, Miri Port Authority, River Road, P.O.Box 1179, Miri, Sarawak, Malaysia. *Tel:* 085-38481; 085-38529. *Cables:* "Mirport".

PASIR GUDANG, Malaya: 01.26 N. 103.54 E.

(See Plan Book)

LOCATION: The port is situated on the Malaysian Coast of the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The approximate position is Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

DOCUMENTS:

Customs:

2 Personal Effects List,
2 Narcotics Lists,
2 Arms and Ammunition Lists,

2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ship's stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held:–

(a) in the ship's stores, bars and shops;
(b) in the possession of Officer and Crew.

Immigration: 3 Crew Lists, all Crew Seaman's books for entry visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List.

PILOTAGE: Pilotage is compulsory for vessels exceeding 45 m. (150 ft.) entering or leaving the Port Water Limits. Pilotage is provided by the Authority. The pilot boarding point is within the vicinity of Johore Shoal Buoy in position Lat. 01° 18′ 51″ N. Long. 104° 06′ 30″ E.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 12.8 m. (42 ft.) ACD up to the Port Waterfront and 11.6 m. (38 ft.) ACD for areas beyond up to the Causeway.

ANCHORAGE: Anchorage areas have been designated within the port water limits and as indicated in all navigational charts for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RESTRICTIONS: A 24 hour Pilotage service for all vessels entering or leaving Johore Port is provided. However, the following restrictions are imposed.

1. *Recommended Speed:*

(a) The maximum recommended speed should not exceed 8 knots and when passing Fairy Point, the speed should not exceed 6 knots.

(b) Vessels are required to slow down when passing Johore Port area, Malaysia Shipyard Engineering (MSE) and Sembawang Shipyard areas.

2. *Reporting:*

When entering, transitting or leaving the East Johore Strait, all ships of 2,000 g.r.t. and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceed 30 m. are requested to comply to the contents of the Port of Singapore Circular No. 23 of 1981 (see "Traffic Information") in providing the following data:–

(a) Name and Call Sign of vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres;
(d) Destination (Sembawang port, name of shipyard, etc.);
(e) Point of origin (Sembawang port, Johore Port, Johore Shoal Buoy, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

on VHF Channels 11, 21 and 63.

3. *Tugs:*

Tug services are available for towage, berthing and unberthing operations within the port's water limits. This service is provided by the Authority's tugs and supplemented by privately operated tug companies. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

(a) VLCCs or vessels of more than 280 m. in length are to be provided with at least 2 escort tugs when transitting the East Johore Strait.

(b) Vessels of more than 240 m. in length are required to be provided with 1 escort tug when transitting the East Johore Strait.

4. *General:*

(a) When a nuclear powered ship is underway in the East Johore Strait no vessel should be underway forward of her.

(b) Vessels above 180 m. in length will not be programmed to pass any vessel exceeding 280 m. in length transitting the East Johore Strait between Changi and Sembawang Shipyard.

(c) VLCCs or vessels of more than 280 m. in length will be programmed to transit the Fairy Point/Changi area during slack water or stemming the tidal current.

(d) Vessels of more than 240 m. in length will be permitted to transit the East Johore Strait only during daylight hours.

(e) Vessels of between 210 m. and 240 m. in length are permitted to transit East Johore Strait during non-daylight hours provided they have full use of engines and are programmed to transit during slack tide or stemming the tidal current.

(f) Anchoring is prohibited in the main channel. Any unauthorised anchoring must be reported immediately to Johore Port Authority and Sembawang Control.

(g) During the hours of darkness, tows are generally not permitted to transit East Johore Strait.

For the purposes of the above guidelines:–

(a) A VLCC (very large crude carrier) is deemed to be a tanker of 150,000 d.w.t. and above.
(b) Length of vessel refers to her overall length.
(c) Daylight hours means from 0700 hrs. to 1900 hrs.

VHF: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:–

Channel	*Ship Stations*	*Shore Stations*
11	156.550 MHz	156.550 MHz
21 (Listening Frequency only)	157.050 MHz	161.650 MHz
63	156.175 MHz	160.775 MHz

VHF network links the tugs, launches and the Authority's personnel working on board vessels at the anchorages.

TUGS: See "Restrictions" and "Facilities".

FACILITIES: *Oil Jetty:* Depth of water 11 m. (36 ft.), L-shaped with 2 berths.

Ocean Wharves: Depth of water 11 m. (36 ft.), length 732 m. (1,200 ft.).

Coastal Wharf: Depth of water 5.5 m. (18 ft.), length 107 m. (350 ft.).

Transit Shed: 10,950 sq.m. (118,800 sq.ft.).

Godown: 5,400 sq.m. (59,400 sq.ft.).

Open Sided Shed: 10,950 sq.m. (118,800 sq.ft.).

Open Storage Yard: 3.24 hectares (8 acres).

Palm Oil Tank Installation: Present capacity for crude 38,600 tonnes. Refined 70,600 tonnes.

Liquid Chemical Installation: Present capacity 8,000 tonnes.

Petroleum and Petroleum Products: Storage capacity 47,000 tonnes.

Grain Silos: 50,000 tonnes.

Fertiliser Storage: 80,000 tonnes.

Timber Terminal: 6.87 hectares (15 acres).

Proposed Warehousing and Distribution Area: 3.24 hectares (8 acres).

Other facilities such as bauxite, ore and woodchip jetties as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

		Capacity	*Unit*
(a)	Sideloaders	25 tonnes	1
		4 tonnes	5
(b)	Mobile Cranes	28 tonnes	2
		10 tonnes	2
(c)	Forklift Trucks	8 tonnes	6
		6 tonnes	3
		2 tonnes	9
		3 tonnes	23
		6,000 lbs. LPG	3
		4,000 lbs. LPG	6
(d)	Towing Tractors	1,814 kg. Drawbar pull	1
		907 kg. Drawbar pull	5
(e)	Trailers	15 tonnes	5
		6 tonnes	12

Floating Equipment:

(a)	Tugs	2 – 1,800 b.h.p.
		2 – 350 b.h.p.
(b)	Launches	2 – pilot launches
		2 – security launches
(c)	Lighters	8 – 80 tonnes capacity steel barges
		2 – 200 tonnes capacity steel flat-top water barges

STEVEDORES: Stevedore and shore labour undertaken by the Port Authority and shift times are as follows:–

0700 – 1500 hrs.
1500 – 2300 hrs.
2300 – 0700 hrs.

Stevedores may undertake work of opening/closing of hatches but rigging of gear must be done by the crew.

FRESH WATER: Fresh water connections are on the berth. The rate of supply being 20 t.p.h.

FUEL: All grades of Bunkers are available at short notice.

SURVEYORS: Classification Surveyors are available from Singapore and Kuala Lumpur. Cargo Surveyors are represented locally by Caleb Brett, General Superintendents and Trident Malaysia.

GANGWAY/DECK WATCHMEN: The Port Authority has a Security Division responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

REPAIRS/DRY DOCKS: Situated in Pasir Gudang Industrial area is Malaysia Shipyard & Engineering Sdn, Bhd. MSE is a fully equipped up-to-date engineering establishment. With facilities for ship repairing, newbuilding up to 12,000 d.w.t. and general engineering works.

(1) Drydock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 drydock, length 270 m., width 46 m., depth 12.5 m. capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 130 m., width 24 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage: No. 1 quay, 390 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 2 quay, 168 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 3 quay, 168 m. long × 7 m. draft. 1 × 15 ton luffing crane.

CUSTOMS ALLOWANCES: Spirits: 0.125 of a quart per man per day or wine 1 quart per man per day; beer 1 quart per man per day, cigarettes: 25 in number per man per day or cigars 8 in number per man per day or tobacco 1 oz. per man per day.

Customs will issue allowance for total of 3 days, and on request to a Proper Customs Officer the seal may be broken for further issues.

CARGO GEAR: When possible all loading and discharging are carried out with ship's gear. Shore equipment comprises – 1 side loader capacity 52,000 lbs., 5 side loaders of capacity 9,000 lbs., each 2×28 tonne mobile cranes, and 2×10 tonne mobile cranes. For bulk cargoes, grains, fertilisers, sulphurs, etc., shore grabs of 2 tonne capacity connected to ship's gear.

REPATRIATION: Ship's crew with valid or recognised International Passport are permitted to enter and sign-off through Malaysia/Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysia Authorities through the ship's Agents. Ship's crew without International Passport, and only Seamen's Books must join/leave ships via Kuala Lumpur.

TIME: GMT plus 8 hours.

HOLIDAYS: *Port closed Holidays:* The port is operationally closed during the following festival days:–

1. Hari Raya Puasa (Muslim Aidil Fitri);
2. Chinese New Year;
3. Malaysia National Day;
4. Deepavali;
5. Hari Raya Haji (Muslim Aidil Adha).

SHORE LEAVE: Shore leave for crew members is permissible. The nearest town is Masai approx. 5 miles from the port. Johore Bahru is approx. 23.5 miles from the port by road. Crew members are allowed to cross the Causeway into Singapore, providing they obtain the necessary permit from the Immigration Authorities through the ship's Agent.

TRAFFIC INFORMATION:

Port of Singapore Authority – Port Circular No. 23, dated 20th March, 1981.

To: Shipping Community

Traffic Information System for Ships Transitting Serangoon Harbour: 1. In exercise of the powers conferred by section 65 of the Port of Singapore Authority Act (Cap 173) 1970, I hereby direct that Masters of vessels entering, transitting or leaving the traffic information area shall, in the case of vessels having a gross registered tonnage of 2,000 and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceeds 30 m., comply with the new VHF reporting system which is given in this circular with effect from 1st June, 1981.

2. *Method of Communication:*

2.1 The VHF traffic is conducted on VHF Channel 21 and Masters of vessels are required to listen to this Channel continuously while their vessels are entering, transitting or leaving the traffic information area.

2.2 In the event that Channel 21 is inoperative, Channel 13 will be used. Masters of vessels are required to contact Port Operations on Channel 12 for confirmation of breakdown of Channel 21 prior to using Channel 13 for communication with the PSA Control Station.

3. *Notification:*

3.1 Master of vessels mentioned in paragraph 1 intending to enter or transit the traffic information area shall give at least 24 hours notice to the PSA Control Station. The information required together with this notice are:

(a) Name and Call Sign of Vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres;
(d) Destination (Sembawang Port, name of shipyard, etc.);
(e) Point of Origin (Sembawang Port, Johore Port, JSB, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

3.2 This notification may be given to the PSA Control Station by telephone, VHF, telex, public telegram or W/T.

3.3 Between 2 and 3 hours before arrival at Johore Shoal Buoy (approx. positon Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.) or 3 hours before departure from a berth within East Johore Strait, Masters of vessels mentioned in paragraph 1 shall notify and seek permission from the PSA Control Station on Channel 21. In seeking permission from the Control Station, the following information is required.

(a) Eastbound:
    ETD from berth
    ETA at Perimbi Buoy (approx. position Lat. 01° 25′ 50″ N., Long. 103° 53′ 21″ E.).
    ETA at Malang Papan Beacon (approx. position Lat. 01° 24′ 07″ N., Long. 103° 59′ 27″ E.).
    ETA at Malang Tiga Buoy (approx. position Lat. 01° 23′ 09″ N., Long. 104° 01′ 33″ E.).
(b) Westbound:
    ETA at Johore Shoal Buoy (approx. position Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.).
    ETA at Malang Tiga Buoy.
    ETA at Malang Papan Beacon.
    ETA at Perimbi Buoy (if applicable).

Following approval from the PSA Control Station, Masters of Westbound vessels when passing Johore Shoal Buoy and Angler Buoy (approx. position Lat. 01° 21′ 06″ N., Long. 104° 03′ 07″ E) shall confirm or update their ETAs at Malang Tiga Buoy and Malang Papan Beacon.

3.4 Masters of Eastbound vessels shall confirm or update their vessels' ETAs at Malang Papan Beacon and Malang Tiga Buoy when passing Punggol Beacon (position Lat. 01° 25′ 19″ N., Long. 103° 54′ 48″ E.) and Squance Buoy (approx. position 01° 23′ 43″ N., 103° 58′ 00″ E.).

3.5 Masters of vessels should check their vessels declared ETAs at Malang Tiga Buoy and Malang Papan Beacon when their vessels are between Angler Buoy and Squance Buoy. Should the new ETAs at Malang Tiga Buoy and Malang Papan Beacon differ by 5 minutes or more from the last declared ETAs, they should update their vessels' ETAs with the PSA Control Station.

4. Masters of vessels failing to comply with these directions shall be guilty of an offence punishable under section 66 of the Port of Singapore Authority Act.

Signed: Port Master, Port of Singapore Authority.

TELEPHONES: Telephones may be placed on board at a connection charge of $/M25.00 per day.

SERVICES: *Provisions:* 2 licensed ship chandlers are able to provide and attend to all requirements.

DEVELOPMENTS: Johore Port has plans for the construction of 5 more wharves. The proposed berths are for dry bulk materials, general cargo and containers. The berths will serve the needs of specialised industries such as fertilizers, feedmeal, and grains. The construction of silos, storage area, and other processing plants is to be undertaken by the companies concerned.

SHIPMASTER'S REPORT: February 1979.

Port Limits: All the area of water enclosed on the West by a line drawn due South from Tanjung Bin (Lat. 01° 20′ 00″ N., Long. 103° 32′ 48″ E.) on the North by the Southern shores of the State of Johore, on the East by a line drawn 229° from Tanjung Stapa (Lat. 01° 20′ 36″ N., Long. 104° 08′ 12″ E.) and on the South by the limits of territorial waters of Johore, including the Johore River up to the bridge where the Johore Bahru to Kota Tinggi road crosses.

Documents: Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

Pilotage: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11, 21 and 63.

Pilot launch is a fast motor cruiser.

Pilotage is compulsory for all vessels over 45 m. in length.

Anchorage: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding ground. Vessels may also anchor approx. 0.6 miles E.S.E. off Pasir Gudang wharf, for large vessels there is a mooring buoy to restrict swinging into the channel.

Max. Size: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 11.6 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

Health: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid Derat Exemption Certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

Radio: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11, 21 and 63.

Tugs: 2 tugboats of 1,800 h.p., 2 tugboats of 350 h.p. Tugs normally meet vessels off the wharf, or at anchorage when mooring to buoy. Tugs lines used.

Berthing: Oil Jetty: Depth alongside 11.0 m.; "L" shaped jetty, with 2 berths.

Ocean Wharves: Depth alongside 11.0 m.; length of wharf 732 m.

Coastal Wharf: Depth alongside 5.5 m.; length of wharf 107 m.

The Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 25,000 – 30,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

Specialised Cargo Handling Facilities: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation of 8,000 tonnes capacity. Grain silos, 50,000 tonnes capacity. Fertiliser storage 80,000 tonnes. Timber terminal 15 acres.

Medical: Medical service is available from the nearby town of Pasir Gudang, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

Fresh Water: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required by water barge.

Fuel: Bunkers are available by pipe-line installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

Fire Precautions: The Port Authority maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

Consuls: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

Hatches: Preferably all opening/closing to be carried out by ship's crew, as the stevedoring labour is inexperienced.

Services: The Malaysia Shipyard & Engineering Co. has an agreement with the Port of Singapore Authority for the use of a slop barge which may be sent to the Johore Anchorage to receive slops from tankers which are proceeding to MSE for repairs. Numerous other services, and local representation for engineering and marine equipment available from Singapore.

SHIPMASTER'S REPORT: April 1979.

Position: The port is situated at the Southern tip of the Malaysian peninsula on the East of Johore Straits, about 10 miles East of Johore Bahru town. The straits separating Malaysia and Singapore provides good shelter and safe anchorage.

The exact position is Lat: 1° 26′ 06″ N., Long: 103° 54′ 25″ E.

Approaches: Pilot is picked up at Johore Shoal buoy. Pilots can be contacted on VHF Channels 11, 21 and 63. The access route for vessels proceeding to the port branches via the buoy off Johore Shoal, passes through Kuala Johore and the bend off Serargoon North of Pulare Ubin. From Serargoon the route leads straight N.W. of the port. The East Johore channel has a depth of 38 ft.

Berths: There are at present 5 berths in the port. They are as follows:

Berth	Length (ft.)	Water Depth (ft.)	Max. draft allowed (ft.)
1. Outer oil jetty	700	36	34
2. Inner oil jetty	450	32	29
3. Ocean berth 1	350	18	17
4. Ocean berth 2	600	33	31
5. Ocean berth 3	600	32	30

Boarding Officials: Since this vessel came from Singapore, all clearances were arranged by the Agent there. The Customs boarded to check the seal on the bond. The Immigration, Port Health, etc. also boarded for a cursory check.

Discharging: Discharging was carried out using grabs which were attached to the ship's cranes. There are no facilities ashore for any type of discharging, except a small conveyor which is used for grain only. The grabs had no weight marked on them, hence it was insisted that the grab along with one full lift of cargo be weighed. This was done and the average weight of the grab was found to be 2 tons and the maximum cargo possible that could be lifted was 2.5 tons.

This port apparently handles a lot of fertiliser, but never in large parcels. This parcel of 6,000 tons was the second largest discharged. 4 cranes were used throughout and the discharge rate worked out to nearly 2,000 tons/day. The stevedores were initially warned against mishandling the cranes, and it was found that the operators handled the cranes very slowly and carefully.

Provisions: Available, but slightly more expensive than Singapore. No bonded stores available at this port.

Density: Varied from 1018 to 1021.

Shore Leave: There is no restriction on shore leave. No special permits/passes are issued, but the Agents suggested that persons going ashore should preferably carry their passports/discharge books. The nearest city is Johore Bahru which is 20 miles away. Ample transport is available at moderate rates. About 4 miles away from the port there is also a village called Masai.

Medical: All types of normal medical attention available.

AUTHORITY: Johore Port Authority, Peti Surat 66, Pasir Gudang, Johore, Malaysia. *Tel:* 07-512601. *Telex:* MA 60717. *Cables:* Johan Pasirgudang. *Contact:* Captain Zainol Abidin Bin Mohamed, Marine Manager.

PENANG, Malaya: 05.25 N. 100.21 E. (See Plan Book)

DOCUMENTS:

The report of arrival (provided in Marine Shipping Ordinance, 1952).

A copy of Passenger Statistics on prescribed forms.

A List of Crew Members.

A List of Passengers.

Evidence of last Port Clearance.

All Ship's Documents (safety equipment, derat, radio, load line and register).

Maritime Declaration of Health.

International Health Certificate for passengers and crew.

Vaccination List, for Cholera, for passengers and crew.

Departures: Port Clearance Certificate signed by the Port Health Officer, to be shown to the Port Officer issuing clearance.

Clearance also required from Immigration.

For oil tankers, a copy of Ship's Manifest to be submitted. Ship carrying explosives, Master required to fill prescribed form "D" stating quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

ANCHORAGES: The Man of War, Petroleum, Quarantine, Explosive and local vessel anchorages are marked on Charts of the Penang Harbour (A.C. No. 3732).

There is no specific anchorage area in the harbour for foreign going vessels other than mentioned above. These vessels are normally anchored South of Lat. 5° 26′ N. and North of Lat. 5° 22.80′ N. between the mainland and the island, clear of the berths, fairways and shallow areas.

RESTRICTIONS: No entry restrictions imposed other than those dictated by state of tide and draft of vessel.

Also see "Pilotage".

MAX. SIZE: No limitations of size of vessel except for draft. North Channel chart datum 11.8 m. South Channel chart datum 5.79 m.

PILOTAGE: Vessel approaching port has to send telegram to Pilot Office direct (cable address "Pilots Penang") or to ship's Agent stating "ETA North Channel Light Float" or in case of South Channel "ETA Pulau Rimau". Draft of vessel to be given. Pilot Office may be contacted through Penang Telephone Exchange on VHF Channel 16 to local telephone No. 63313. At least 3 hours' advance notice should be given before arrival at Pilot point.

Pilot boats have a blue hull, white upperworks with "Pilot" written in bold letters on both sides of boat.

Pilot is usually taken on board, for North Channel, in vicinity of North Channel Light Float in position Lat. 5° 35′ 09″ N., Long. 100° 12′ 45″ E. and for South Channel, in vicinity of Rimau Wreck Buoy 1 mile South of Pulau Rimau Lighthouse.

Vessels awaiting Pilot can anchor, in case of North Channel, in the Pilot waiting area within the following co-ordinates:

1.	Lat. 05° 35.8′ N.	Long. 100° 10.9′ E.
2.	Lat. 05° 34.3′ N.	Long. 100° 10.9′ E.
3.	Lat. 05° 32.7′ N.	Long. 100° 13.0′ E.
4.	Lat. 05° 34.2′ N.	Long. 100° 13.0′ E.

An approach channel of 10 nautical miles × 183 m. wide for 1 line of traffic has been dredged at the North Channel and presently entry to the port is governed by a shallow patch of –10.2 m. A.C.D. This patch will be dredged to –11.9 m. A.C.D. sometime in the future in readiness to cater for large container vessels calling at the new Container Terminal currently being planned.

Approach through the South Channel is presently closed due to the construction of a bridge linking Penang Island to the Mainland. The bridge is scheduled to be completed in the middle of 1985. When completed the bridge will have an access channel of 156 m. wide and an overhead clearance of 30 m.

The pilot station and all pilot boats are equipped with VHF which operates on Channel 12. A minimum of 3 hours' advance notice is required to order Pilots.

Pilotage is compulsory for all vessels navigating in pilot district of Penang with the exception of fishing vessels and vessels of below 600 g.r.t.

Shipmaster's Report: The KRA lightvessel, on the Outer Kra Bank to the South of the South Channel, is non-existent.

The pilot station is now equipped with VHF but operates on Channel 12 only. The pilot launch is also equipped likewise, as is a car that transports the Pilots from their homes to Batu Maung Point where they board the launch. It takes them exactly 1 hour from their homes until they are aboard a vessel at Rimau Buoy, therefore a minimum 3 hour notice is adequate.

One Pilot advised me not to approach the South Channel at any time if the vessel's draft is over 7.3 m. He stated that the bar to the S.W. of Rimau Buoy has not been surveyed for many years and that possible silting may leave it on a lesser depth than the chart suggests. The approach to the North Channel is safe.

RADIO: Penang Radio, call sign 9–MG.

VHF: The Penang Port has various working Channels as follows:

Channel 16 – Watching Channel and Port Police.
Channel 7 – Port Police.
Channel 12 – Pilotage.
Channel 20 – Port Operations.
Channel 13 – Working Channel between tugs/Pilot.

TUGS: May be required to berth vessel at Butterworth Wharves in Port Penang. Tug joins vessel when at close proximity to wharves. Usual for tug's lines to be used.

3 tugs available, 2,000 b.h.p., 1,320 b.h.p. and 1,200 b.h.p. Also 2 tow-boats of 470 b.h.p. available to tow lighters to and from vessels.

BERTHING: There are 2 wharves, viz. Swettenham Pier on the island of Penang and Butterworth Wharves on the Mainland.

Swettenham Pier: 2 ocean berths of 365 m. length with 9.7 m. of water alongside. There is 4,366 sq.m. of covered storage accommodation.

Butterworth Wharves; 6 ocean berths of 1,051 m. length with 9.7 m. of water alongside.

There are 4 transit sheds of 10,823 sq.m. and 13,006 sq.m. of open storage area. 9 godowns of 35,674 sq.m. near the port area are leased to private companies. Berth Nos. 5 and 6 are container berths.

SPECIALISED CARGO HANDLING FACILITIES: A bulk cargo terminal has been constructed to service dry and liquid bulk carriers. Length of wharf is 140.2 m., but is aided by 2 side dolphins connected by a 1,219 m. access bridge, depth alongside is 10 m.

There is another vegetable oil tanker pier with depth alongside of 9.7 m. Pipe-lines connect the tanks to the berth providing speedy and efficient loading and discharge of vegetable oil direct to and from the vessels.

CONTAINER HANDLING FACILITIES: Th port is equipped with modern container handling facilities to handle both 20 ft. and 40 ft. containers. These container facilities are available at the Butterworth Wharves and they include a 6.7 hectare marshalling yard with storage space for 5,000 containers, 2 container freight station units (8,639 sq.m.), units of transfer cranes for stacking, receiving and delivery of containers, 60 units of power points for refrigerated containers and prime movers with 20 ft. and 40 ft. trailers. Additional container handling equipment includes 2 container gantry cranes, 14 prime movers with 12 units of 40 ft. trailers, 18 units of 20 ft. trailers and 4 units of 43 ft. trailers, forklifts and forklift trucks for container freight station operations.

Haulage of containers inland and between the Island and Butterworth Wharves is catered for by 2 private haulage companies i.e. Kontena Nasional, and Konsortium Perkapalan.

Container-Roll-on/Roll-off Berth:

The Port has 2 container berths with lengths of 161 m. and 160 m. respectively. The first container berth is equipped with a Ro/Ro ramp of 8 m. wide and 28 m. long to service container and Ro/Ro vessels.

The berths are serviced by 2 rail-mounted 35 ton container gantry cranes.

CARGO HANDLING EQUIPMENT: At Butterworth Wharves: 8 mobile cranes of 1.5 tons to 3 tons capacity, 55 forklift trucks, 8 units of prime movers and 12 units of trailers.

At Swettenham Pier 3 mobile cranes of 2 ton capacity, 6 electric cranes of 1.5 ton to 3 ton capacity.

In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 169 operated by private companies and two 150 ton lighters by the Commission for essential lighterage work.

LIGHTERAGE: In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 182 lighters operated by private companies and 5×150-ton lighters by the Commission for lightering of cargo in the Port. In the case of the Commission's lighters, lighterage is only undertaken for export cargo.

BRIDGES: *Shipmaster's Report:* November 1984.

A bridge is nearing completion across the Southern end of Penang Harbour. It consists of a low level pile structure and runs roughly E./W., North of Pulau Jerejak, an elevated section is being built into the structure but according to the Pilot the Southern entrance to the harbour will probably be limited to small coastal vessels.

Also see "Pilotage".

STEVEDORES: Stevedores can only be provided by stevedore contractors at short notices but normally a minimum of 12 hours will be required. Shipping Agents normally make these arrangements with stevedoring contractors.

Working Hours:

The Port operates round the clock. The working hours are as follows:
1st shift 0730 – 1530 hrs. (meal break 1130 – 1230 hrs.)
2nd shift 1530 – 2300 hrs. (meal break 1930 – 2030 hrs.)
3rd shift 2330 – 0730 hrs. (meal break 0330 – 0430 hrs.)

MEDICAL: Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.

TANKERS: 2 tanker berths. Esso Wharf, 27 ft. at LW. Caltex Wharf, 35 ft. at low water. Mud bar approach to Caltex Wharf is 29 ft. at LW. Tankers also occasionally call at Swettenham Pier to deliver oil to L.L.N. Power Station.

FRESH WATER: Available at all times. Delivery can be by means of hydrants at berths or by water-boats (1×180 ton and 1×200 tons capacity) to vessels anchored in Roads. Rate of delivery is approximately 40 t.p.h.

FUEL: Fuel available from private oil companies at 24 hours' notice. Limited quantities of fuel can be supplied by barges to vessels in the Roads.

GANGWAY/DECK WATCHMEN: Services of a watchman recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

IDENTIFICATION CARDS: Needed only when a crew member is discharged after hospitalisation or when he is repatriated.

REPAIRS: Minor repairs can be undertaken.

DRY DOCKS: Dry docks not available for ocean carriers. Slipways available for vessels of 700 n.r.t. with dimensions of 57.9 m.×12.2 m.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.

AIRPORT: Distance from port to airport approximately 18.3 km. Served by both international and local airlines.

TIME: 7.5 hours ahead of GMT. No alteration to clocks during year.

HOLIDAYS: 3 port holidays a year: Hari Raya Puasa, Hari Raya Haji and National Day.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: A telephone is placed on every ship that berths alongside. This is one of services provided under a common charge known as the wharf service charge.

SERVICES: All types of minor marine servicing is available. Provided by private firms. Some of the services are draft survey, general conditioning of ship, valuation of ship, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank-cleaning facilities.

SHORE LEAVE: Allowed.

REGULATIONS: When a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.

DELAYS: Rain is only factor that may delay a ship's discharging or loading operations.

DEVELOPMENTS: Dredging of the North Channel to 11.8 m. depth has been completed and it can now cater for deep draft vessels.

A second berth, at the Bulk Cargo Terminal in Prai, is in the process of being constructed to cater for the anticipated increases in the volume of bulk cargo.

A new container terminal is to be built at North Butterworth in the port of Penang. The project will involve the reclamation of 41.6 ha. for a container marshalling yard, container freight stations and ancillary areas; construction of a 530 m. long × 60 m. wide container wharf, including a mooring dolphin and a 520 m. long × 19 m. wide access bridge to the wharf.

Other works will include paving of port areas; construction of buildings, container freight station, workshops and other ancillary facilities; provision of container handling equipment; acquisition of a 3,000 h.p. tugboat, including fire-fighting equipment.

Also see "Pilotage".

AUTHORITY: The Penang Port Commission, Peti Pos 143, Pulau Pinang, Malaysia. *Tel:* 372211. *Telex:* Pelpin Ma 40157. *Cables:* "Wharves Penang".

AGENT: Antah Jardine Shipping Agencies Sdn. Bhd., 91 Farquhar Street, Penang. Tel: 04-61543 and 04-61544. Telex: MA40073. Cables: "Jarship" Penang.

PORT DICKSON, Malaya: 02.31 N. 101.47 E.

DOCUMENTS:

1. *Harbour Master's Office or Marine Department*
   - *(a)* "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.
   - *(b)* One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
   - *(c)* Port Clearance from last port and copy of Manifest of Cargo to be discharged.
   - *(d)* List of all arms and explosives on board.
   - *(e)* In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.
   - *(f)* All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derat Certificate and all Certificates of Competency of all Officers on board.
   - *(g)* Crew List.
2. *Immigration Authorities*
   - *(a)* Crew List (3 copies).
   - *(b)* Passenger List (3 copies).
   - *(c)* Produce all passengers passports/visas.
   - *(d)* Produce all seamen's cards.
   - *(e)* Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.
3. *Port Health*
   - *(a)* Crew List showing last date of vaccination.
   - *(b)* Passenger List showing the last date of vaccination.
   - *(c)* Produce all seamen and passengers' vaccination cards.
4. *Customs Department*
   - *(a)* Crew List (2 copies).
   - *(b)* Passenger List (2 copies).
   - *(c)* Personnel Effects List (2 copies).
   - *(d)* Cargo Manifests (2 copies).
   - *(e)* Last Port Clearance.
   - *(f)* Bonded Stores List (2 copies).
   - *(g)* Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   - *(h)* Customs Form C.D.15 obtainable from Customs Department on arrival.

APPROACHES: Deep water approach channel from N.W., marked by 5 light buoys, presents no difficulties and is clear.

PILOTAGE: The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy. Pilots on VHF Channel 19.

Ship's Officer's Report: Pilot boards one mile off Fairway Buoy. However, vessels of less than 30,000 d.w.t. holding Admiralty Chart No. 1140 may be requested to proceed inwards, Pilot boarding at No. 1 Buoy. Coasters proceeding to Headlands Jetties may be required to do own pilotage.

ANCHORAGES: *(a)* Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-Westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-Eastward of Pulau Arang Arang, but holding ground is poor.

(b) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker SBM, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipe-line. Passage between the buoy and the shore is also prohibited.

RADIO: *Ship's Officer's Report:* Send ETA 96 hours and 24 hours in advance. Two hours before arrival keep listening watch on Channel 16. Shell Oil Terminal on VHF Channel 16 and 19. Cargo operations are carried out on Channel 9.

TUGS: No tug-boats available.

MAX. SIZE: Up to 49 ft. draft at S.B.M. terminal.

BERTHING: Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private). Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal.

Stone ramp on foreshore usable by lighters at high water.

MEDICAL: District hospital with 150 beds.

TANKERS: Shell/Esso Single Buoy Mooring for crude discharge into submarine pipe-line. Refineries produce petroleum products for export. Deballasting facilities up to 35,000 barrels capacity.

Esso Product Jetty: Berth is constructed of reinforced concrete. The island jetty is 200 ft.×24 ft. with 4 off-lying mooring buoys inshore for mooring purposes. Accommodation for one vessel on outer face only.

Max. LOA 575 ft.; max. draft 34 ft.; max. size 19,500 d.w.t.

Shore connections:
- 1×20 in. black oil/ballasting
- 1×16 in. white oil line
- 1×10 in. LPG line
- 1× 4 in. inert gas line

1 crane to handle hose

FRESH WATER: Available at Shell and Railway jetties.

FUEL: Bunker fuel oil available. No diesel.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars 8 in number per man per day, or tobacco 1 oz. per man per day, or snuff 1 oz. per man per day. Wine and/or spirits, spirit 0.175 qt. per man per day, or wines 1 qt. per man per day, or beer or stout 1 qt. per man per day.

REPAIRS/DRY DOCKS: None.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammed's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

AIRPORT: None.

DEVELOPMENTS: Proposal to enlarge facilities and to provide deep-water berths.

AUTHORITY: See "Malacca".

PORT KELANG, Malaya: 03.00 N. 101.24 E.

(See Plan Book)

PORT LIMITS: *Northern Limits:* A line from Beacon B running N.W. towards Pulau Angsa Lighthouse until it intersects Lat. 3° 07′ 24″ N., thence extending due East along this latitude till it meets the mainland; *Southern Limits:* A line from Tanjung Ru running West along Lat. 2° 50′ 21″ N. till it intersects Long. 101° 14′ 00″ E., thence extending due North along this longitude till it meets Pulau Pintu Gedong;

There shall be included within the limits all waters in the Klang Straits, Selat Lumut, Sungai Puluh, Sungai Aur, Sungai Langat and other waterways contained within the Lat. 3° 07′ 24″ N. and 2° 50′ 21″ N., and Westwards towards the coast from Long. 101° 28′ 30″ E. (which passes through Connaught Bridge): including all piers, jetties, landing places, wharves, quays, docks and other similar works whether within or without the line of high-water mark and any position on the shore or bank within 45.72 m. of the high-water mark, subject to any rights of private property therein.

APPROACHES: Ships from and to Penang enter and leave the port by the North Klang Straits, and ships from and to Singapore enter and leave by the South Klang Straits. The entrance channel at the North Klang Straits is dredged to 11.3 m. below datum. A very large deep water anchorage for ships is available at the North Klang Straits. Ships can also navigate in and out of Port Kelang through a secondary channel at the South Kelang Straits. At all times the channel is dredged to 9.1 m. below datum.

DOCUMENTS: *(a) For Agent.* Vessels required to fill in arrival report which may be obtained from Agent at Singapore or Penang or Boarding Agent on arrival. This should be completed and handed to Boarding Agent together with last Port Clearance and one copy each of Crew List and Passenger Lists for submission to Marine Department.

Vessels should have ready and hand to Boarding Agent on arrival the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lists (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Agent on arrival and will be returned to vessel after perusal by Marine Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Derat Certificate.

Port Health Officer now requires all vessels arriving from foreign ports to submit an "Entry Declaration" on form Health 43, on the International "Maritime Declaration of Health" form or on a similar copy, and this "Maritime Declaration of Health" form or on a similar copy, and this should be handed to Boarding Agent, together with copy of crew list, in cases where vessels are not in Quarantine, in which case doctor does not attend on board.

Note: Endorsement of Port Clearance must be obtained from Port Office at Marine Office before a fresh Port Clearance can be issued by local Customs Authorities and handed to vessel before sailing.

(b) Immigration
2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).

(c) Customs
2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

FLAGS: The Malaysian flag. Flag "Q" meaning Health Clearance required. *Flag 2/5 meaning no passengers on board, or *flag 3/4 meaning passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag "H" meaning Pilot on board. (*Applies only to vessels arriving from foreign ports, which includes Singapore.)

Note: Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

Shipmaster's Report: June 1983: Flags 2/5 must be flown by day, or green/green lights shown by night until Immigration clearance has been obtained, otherwise the ship is liable to be fined.

PILOTAGE: Available 24 hours a day. Pilotage compulsory.

(a) Application. Piloting carried out by Kelang Port Authority. Masters to cable "Pilots Port Kelang" giving ETA and point of arrival, i.e. Pintu Gedong or Pulau Angsa and draft at least 4 hours before arrival, as Pilots will not leave shore until confirmation received from vessel or Agent. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong, Pulau Angsa or Deep Water Point, together with draft and port of departure.

(b) VHF. If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(c) Recognition. Pilot boats painted orange and have white superstructure.

(d) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong South of the Seaward Bar Buoy.

Pilot ladders should be of approved Standard pattern internationally used.

(e) Waiting for Pilot. Location for a vessel awaiting Pilot is at Pintu Gedong 5 cables South of Seaward Bar Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

ANCHORAGES: Per latest Admiralty charts. Vessels may load timber and ore from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.
Special Anchorages: The Port Authority provides an explosives anchorage and a LASH anchorage situated North of Tanjong Bakau in the North Kelang Straits. The quarantine anchorage is located North-West of the North Port wharves.

RESTRICTIONS: (See "Max. Size"). At Pintu Gedong, the Southern Channel Pilot Station, there is a restriction which vessels will be advised of when giving their ETA.

MAX. SIZE: Maximum length of vessels using South Port is: dry cargo vessels, 600 ft. LOA and draft of 32 ft., tankers, up to 560 ft. LOA and draft 32 ft. Tidal conditions govern movements of all vessels over 300 ft. LOA in the South Port but not at the North Port. At the North extension wharves container ships of 950 ft. can be berthed.

HEALTH: Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point at any time of the day.

All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include Derat, or Derat Exemption Certificate. Also it is necessary to furnish information on the last 5 ports called within 14 days and the expiry date of Derat Certificate.

RADIO: ETA cables normally routed via Singapore or Penang as no radio station in Port Kelang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Kelang.

VHF: (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore (Channels 24, 26 and 27). For local calls the cost is $1.92 for three minutes (approx.).

TUGS: Supplied by Port Authority and normally "stand by" vessels berthing at wharves as and when required. Tugs towing use ship's lines, tugs pushing use their own lines. 8 tugs available (400 h.p. – 2,700 h.p.) to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs are also used to swing vessels in stream which are stemming ebb tide on departure.

BERTHING: There are 2 ports viz: the South Port and the North Port. Vessels berthing in the South Port are governed by tidal conditions which vary considerably. Vessels over 525 ft. LOA are usually berthed port side to on the ebb and then only when tides are favourable. There is usually no objection to vessels unberthing from the wharf at night although generally speaking vessels will not be berthed at night.

(a) South Port. 4 ocean wharves of 2,190 ft. in length out of which 3 wharves are with 33 ft. of water alongside, and 1 wharf with 30 ft. of water alongside. 4 coastal shipping wharves of 1,320 ft. length. Of these, 1 wharf with 20 ft. of water alongside and 3 wharves with 18 ft. of water alongside and 2 anchorage. 3 to 4 vessels of not more than 250 ft. in length and with drafts of up to 18 ft. can be accommodated at the North shore anchorage.

Berth Nos. 1 – 4 are for ocean-going vessels while Berth Nos. 5, 6, 7 and 7A are used principally by coastal vessels with a maximum size of about 6,000 deadweight tonnes. The wharf apron is 15.2 m. (50 ft.) wide and carries 3 rail tracks.

(b) North Port Wharves: There are 17 ocean wharves with a total length of 12,120 ft. Of these, 2 are container berths with 44 ft. of water alongside, 1 Ro/Ro berth with a depth of 36 ft., 4 general cargo berths with 30 ft. of water alongside, 6 general cargo berths with 38 ft. of water alongside, 2 dry bulk berths with 36 ft. of water alongside for bulk carriers of 36,000 d.w.t., and 2 dolphins for tankers up to 60,000 displacement tonnes.

There are 5 container cranes on the container wharves.

Depth of water alongside is 44 ft. 62 acres of stacking area, capacity 10,800 TEU's (excluding 100 reefer points). Freight station measures 600 ft. × 120 ft.

Container Handling Equipment: 5 container cranes of 35 tons capacity each.

21 straddle carriers of which 11 have a lifting capacity of 30 tons and 10 with 35 tons capacity.

36 tractors.

40×20 ft. and 31×40 ft. trailers.

54 forklifts.

(c) General:

Facility		*Depth Below New A.D.C.* (ft.)

No. 23 Wharf } Dolphin Berth	700 ft. length	38
No. 24 Wharf	700 ft. length	36
No. 25 Wharf	700 ft. length	36

(d) Berth No. 8, is for Ro/Ro as well as container traffic. The Ro/Ro ramp at the Southern end of the berth is 45 m. (147 ft.) long and 8 m. (27 ft.) wide. The maximum gradient is 1:10 at tides between +0.3 m. (1 ft.) and +5 m. (17 ft.). There are 3 forklifts of 22.5 tonnes capacity specially for Ro/Ro operations, as well as 3 tractors and 3 trailers. The berth can cope with ships of up to 40,000 tonnes and is capable of accommodating vessels with 20 m.to 32 m. beams and 1.0 m. to 4.5 m. freeboards.

BULK HANDLING FACILITIES:

South Port: Berths Nos. 1 – 3 are equipped with pipe-lines to handle bulk liquid cargoes such as palm oil, latex, petroleum and other petroleum products, coconut oil and tallow.

Bulk liquid installations and pipe-lines are owned by the operators.

Other facilities for the discharge of liquid cargoes are provided at the coastal palm oil jetty and private Shell oil jetty. The coastal palm oil jetty in Sungei Aur is used by tankers of up to 76.2 m. (250 ft.) in length which load at plantation jetties and discharge their cargoes to the storage installations at the South Port. The Shell oil jetty is used for the discharge of petroleum products principally for the BP storage and distribution depot nearby.

Storage capacity for the various bulk liquid cargoes are as below:

Palm oil and kernel oil	159,512 tonnes
Latex	42,418 tonnes
Vegetable oil	3,048 tonnes
Coconut oil	2,062 tonnes
Tallow	2,032 tonnes
Alkane	1,282 tonnes

Berth No. 4 has special equipment for the discharge of wheat grains in bulk by means of suction units. The wheat is then delivered by an overhead conveyor to a flour mill situated to the rear of Berths 3 and 4. Estimated discharging rate is 1,016 tonnes per day.

North Port: Berth No. 12 is provided with portable hoppers and conveyors to handle sugar from bulk carriers using their own cranes. The sugar is transported by conveyors to a sugar storage godown onshore. The discharging rate for 24 working hours is about 1,000 tons.

Dry bulk cargoes are handled at Berth Nos. 24 and 25. Bulk handling system recently installed to handle fertilisers, wheat, sugar, maize and salt. 2 grab cranes each with a capacity of 420 t.p.h.; 2 feed hoppers and conveyor system of 840 t.p.h. capacity make up the system.

Bulk Facilities in the North Port: Several specialised facilities have been set up at the North Port Second Extension. They include specialised terminals for timber, liquid bulk cargo, dry bulk cargo and bunkering facilities.

The handling of liquid bulk cargo is now carried out only in South Port. However, the latter has no space for expansion and insufficient wharves to cater for the increasing size of tankers calling at the port. An area of 31.3 hectares (77 acres) in the North Port is being developed to handle liquid cargo such as chemicals and refined palm oil.

The dry bulk cargo terminal on a 13.2 hectare (34 acre) site to cater for the handling of dry cargo such as artificial fertilisers, salt and sugar has been developed.

Timber which is at present largely shipped through private jetties is another cargo being given attention to by the Authority. The Malaysian Timber Industries Board will operate the terminal through its subsidiary company. The terminal is on a 18.5 hectare (45.6 acre) site at the Second Extension.

Petronas, the national petroleum company, on the other hand, is considering the setting up of bunkering facilities at the Second Extension. The Authority has reserved 5 hectares (20 acres) for this purpose.

LIGHTERAGE: Wharf facilities are supplemented by lighterage. Two anchorage points are provided in the Anchorage Reach through which vessels pass on their way to and from the South Port.

Four vessels with length not exceeding 76 m. (250 ft.) and with draft not exceeding 5.5 m. (18 ft.) can anchor along the North Shore. As the size of the vessels which can use these moorings is limited, large bulk carriers have to anchor in the Deep Water Point opposite the North Port. Shore facilities for lightering cargoes at the North Port and South Port are provided by the Port Authority.

70 lighters, max. capacity 60.96 tonnes – 121.9 tonnes available.

Stream Berths for Lighterage Working:

	Swing	Permissible LOA	Depth Available
Anchorage	183 m.	167.6 m.	9.1 m. (30 ft.)
No. 6	152.4 m.	137 m.	12.2 m. (40 ft.)

CRANES: *South Port:* 2×10.6 tonne mobile cranes and 5×5 tonne mobile cranes.

North Port: Mobile cranes – 7×5.08 tonne, 3×7.1 tonne, 2×10.1 tonne, 3×17.2 tonne, 1×25.4 tonne and 1×30.4 tonne.

STEVEDORES: Almost all timber loaded from private junks for which no lighter gangs needed. Average working rate, subject to stow, for timber in loose pieces is 4 – 6 t.p.h., and in bundles 6 – 8 t.p.h. Not more than 2 lighters or "tongkangs" may lie alongside any vessel abreast of each other and not more than 2 lighters shall be moored astern of a vessel.

Rubber, latex in drums, etc., loaded by Port Authority and lighter/wharf gangs are required. Average working rate for these commodities is 14 t.p.h.

The average rate of discharge at North Port (North Klang Straits) wharves is 14 – 16 t.p.h.

On-board stevedores provided by the Port Authority. Requirements for the 1st shift should be made known by 1930 hrs. the previous day and for 2nd shift by 1130 hrs. same day and the 3rd shift not later than 1930 hrs. the same day.

Working hours throughout the port: 1st shift 0700 to 1500 hrs. (meal break 1100 – 1200 hrs.). 2nd shift 1500 to 2300 hrs. (meal break 1900 – 2000 hrs.). 3rd shift 2300 to 0700 hrs. (meal break 0300 – 0400 hrs.).

MEDICAL: A number of private doctors in Port Kelang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. At present 2nd class medical facilities available in Kelang and 1st class facilities only available in Kuala Lumpur. As vessels arriving at Port Kelang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

TANKERS: Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at wharves 1, 2, or 3. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 320 ft. in length with drafts not exceeding 20 ft. can be berthed.

Also see "Bulk Handling Facilities".

DENSITY: Varies considerably with state of tide and heavy monsoon rains.

FRESH WATER: 3 waterboats of total capacity 750 tons, available to supply vessels in South Port and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20 – 25 t.p.h.

FUEL: Bunkers are available.

FIRE PRECAUTIONS: In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs, 1 elevated tank in South Port (capacity 200,000 gallons), 2 elevated tanks in North Port (capacity 200,000 gallons), 3 vans at the fire brigade station, 4 ambulances, fresh water hydrants at various points in the Ports.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS/IMMIGRATION: Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue 3 days supply – a further issue may be made on request after 3 days.

Immigration Officer will clear vessels arriving from foreign ports on a 24 hour basis. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).

IDENTIFICATION CARDS: Advisable that members of crew carry identification cards when leaving ship.

REPAIRS/DRY DOCKS: There are no major ship repair facilities at the port. The Authority operates 3 slipways for its own crafts.

Slipway No. 1 can accommodate vessels up to 27.4 m. long with a 3.10 m. draft and a displacement of 150 tonnes.

Slipway No. 2 designed for flat bottomed vessels, can cater only for craft up to 23.1 m. length, 2.1 m. draft and with a displacement of 100 tonnes.

Slipway No. 3 can accommodate vessels up to 45.7 m. in length, 4.4 m. draft and with a displacement of 450 tonnes.

CONSULS: Consulates/Embassies/High Commissions in Kuala Lumpur (28 miles from Port Kelang).

REPATRIATION: Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.

AIRPORT: Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.

HOLIDAYS: Port Closing Days. *Hari Raya Puasa; *Chinese New Year; Malaysia Day (31st August); *Deepavali; Christmas Day (25th December). *Dates subject to changes as festivals coincide with Mohammedan, Chinese and Hindu calendars.

TELEPHONES: At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port there is always a telephone within easy reach at Wharf Office.

VHF radio sets available to vessels at anchor or moored to buoys.

GENERAL: *(a)* Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(b) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool, bar, restaurant and accommodation.

(c) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 120 ft.

DEVELOPMENTS: Construction of 2,800 ft. of wharves at an island called Pulau Lumut, opposite the South Port is planned. 1st phase of the project scheduled for completion in 1987.

Bulk cement terminal under construction, completion expected mid-1985. Discharge rate 250 t.p.h. bagging facilities at the silo.

Also see "Berthing – North Port" and "Bulk Handling Facilities"

AUTHORITY: Kelang Port Authority, Jalan Pelabuhan, Port Kelang, Malaysia. *Tel:* 388211 (10 lines), 388221 (10 lines). *Telex:* MA 39524. *Contact:* Mohd. Hashir H. Abdullah, General Manager. Kwek Chee Wah, Chief Commercial Officer, Commercial Department.

AGENT: Antah Jardine Shipping Agencies Sdn. Bhd., Ground Floor, NTS Building, 2A, Persiaran Raja Muda, Musa, Port Kelang. Tel: 03-387200 and 03-388871. Telex: MA 39701, Cables: "Jarship" Port Kelang.

ROMPIN (Kuala Rompin) inc. Pahang, Malaya: 02.43 N. 103.30 E.

DOCUMENTS:

Register.
Last Port Clearance.
7 copies Crew List and 4 for Agent.
5 copies Passenger List (if any).
5 copies Stowaway List (if any).
2 copies Stores List (including firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crews Declaration List (cameras, radios, etc.).
1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival as required under Section 448 of the Merchant Shipping Ordinance and Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; "4" Flags if there are passengers on board (Immigration).

PILOTAGE: Compulsory to the loading berths. Extra charge for pilotage outside normal office hours and holidays.

ANCHORAGE: On arrival, vessels required to anchor about 1 mile outside berthed ships to obtain pratique. An accommodation ladder must be rigged on lee side to allow Port Authorities to board.

READINESS: Notice of Readiness cannot be accepted until vessel is in Free Pratique, Customs Inward Examination completed, and in all respects ready to load.

LOADING. *(a)* Ladders. Masters particularly advised to see that a sound and adequate ladder provided at each lighter to allow labourers engaged in loading to pass to and from ship with no undue risk. Regulations are provided in the Merchant Shipping Ordinance, Section 445, Sub-Section (O) which takes care of this requirement and failure to take adequate precaution in seeing regulation is observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders for labourers, an extra ladder, preferably a clean pilot ladder, be made available at all times for the Agent for boarding. This ladder should be made fast on lee side, just forward of any scuppers in vicinity, and a heaving line from ship's rail made fast to bottom rung. When ladder not in use, bottom of ladder can be pulled up a few feet with heaving line to prevent labourers from using it or damage from lighters.

(b) Winches. All winches must be in single gear at all times.

(c) Derricks. Practice to work 2 sets of derricks to 1 lighter where practicable.

(d) Trimming. No manual trimming undertaken.

(e) Damages. In the event of your vessel sustaining damage by stevedores during loading, you are requested to inform the clerk and foreman on board immediately and as soon as practicable confirm same in writing to the Eastern Stevedoring Co. Ltd., Kuala Rompin, with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kong, and Malay States Shipping Ltd., Kuala Rompin. It is important that full details of damage are given, together with measurements whenever possible.

Minor damage has occurred on vessels due to hatch beams not being bolted or lashed. Masters therefore requested ensure all beams adjoining working parts of hatches either bolted or lashed, otherwise stevedores will repudiate liability for any damage incurred.

OPENING/CLOSING HATCHES: Removal and replacement of hatch beams and covers must be done by ship's crew. Ship's Officers should see that any tween-deck beam removed is replaced before ore reaches that height.

CUSTOMS: Customs office hours 0830 to 1630 Monday to Friday, 0830 to 1300 hrs. Saturday.

IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.

HOLIDAYS: New Year's Day; Hari Raya Puasa, 2nd day; Chinese New Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharram; Vesak Day; Birthday of Sultan of Pahang; Birthday of H.M. The Yang Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Day; Deepavali; Christmas Day.

Note: Where a holiday falls on a Sunday, the following day will be observed as a holiday, and if such latter day is already a holiday, then the day following shall be a public holiday.

GENERAL: *(a) Scrap Iron.* Steel mills in Japan complain from time to time of finding pieces of scrap iron in the iron ore cargoes. If this scrap is not found it will cause serious damage to the plant and occasion considerable delay to production: furthermore, should scrap iron enter the machinery there is always the possibility of it endangering life, and several fatal accidents have been attributed to this cause.

The assistance of officers and crew is requested in reporting any scrap iron they see being loaded, advising shippers into which hold it went and number of the lighter it came from to enable us to take appropriate action.

(b) Whistle, Radio. Wireless Transmitters, Whistles and Sirens etc., must not be used by vessels at anchor off Kuala Rompin.

(c) Stores. Bonded stores can be obtained from Kuala Lumpur and Kuantan at prices roughly same as Singapore. Essential, view Customs formalities, that Masters give Malay States Shipping Ltd., Kuala Rompin 6 days prior notice of requirements.

SHORE LEAVE: No seaman may proceed more than 3 miles from Kuala Rompin Customs House. The Officer in Charge Customs, as acting Immigration Officer, has authority to limit or prohibit shore leave in all cases.

SABAH (Minor Ports): (See Plan Book)

KUDAT: 06.53 N. 116.51 E.
LAHAD DATU: 05.02 N. 118.20 E.
SEMPORNA: 04.29 N. 118.37 E.

DOCUMENTS: 8 copies all usual documents, i.e. Crew List, Passenger List, Manifest. Others include Store List, Stowage Plan, Sea Worthiness Certificate and Last Port Clearance Certificate. Where possible, Cargo Manifests and Stowage Plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot services required. Pilot boats between 30 ft. – 40 ft. length and equipped with VHF/AM Sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit.

ANCHORAGE: All ports within bays and they provide good safe anchorages.

RESTRICTIONS: No restrictions for vessels entering port at night.

MAX. SIZE: There is no limit on cargo vessels worked at anchorage.

Also see "Berthing".

HEALTH: To obtain Pratique, arrange with Shipping Agent. Pratique for vessel entering, after calling at another port in same state, is not required. Anchor in quarantine anchorage if vessel is suspect and display following signals: *By Day:* International Code Signal "QQ". *By Night:* A Red light over a White light and a separate hoist of Red light over a Green light. Hoisted vertically 6 ft. apart where best seen.

RADIO: Singapore Radio recommended.

BERTHING: Application for berthing has to be made within 24 hours prior to actual time that berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft), ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded. No priority for berthing ships and the turn is, first come first served.

Kudat: L-shaped wharf with 2 berths. Western berth – length 370 ft. min. depth 21 ft. Eastern berth – length 300 ft., min. depth 21 ft.

Lahad Datu: L-shaped wharf with 2 berths. Outer berth, length 200 ft. min. depth 32 ft. Inner berth, length 130 ft., min. depth 30 ft.

Semporna: T-shaped wooden wharf with 2 berths. Outer berth, length 150 ft. min. depth 26 ft. Inner berth, length 127 ft., min. depth 20 ft.

STEVEDORES: Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 ton-per-gang-hour for conventional traffic (excluding vehicles) and 40 ton-per-gang-hour for pre-palletised cargo (excluding vehicles). cargo work is carried out in 3 × 4-hour periods namely:–

1st period 0730 hrs. to 1130 hrs.
2nd period 1300 hrs. to 1700 hrs.
3rd period 1800 hrs. to 2200 hrs.

MEDICAL: Arranged on arrival by Shipping Agent.

DENSITY: Average density in the ports 1020.

FRESH WATER: Available at General Cargo Wharves at a rate of 20 t.p.h.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may advise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No control and up to discretion of Officers of Customs and Excise.

CARGO GEAR: Ship's gear used also for containers ex-feeder ships and heavy lifts in major ports.

IDENTIFICATION CARDS: Not needed.

CONSULS: Consulates in Kota Kinabalu exist for the following countries:–

United Kingdom
Japan
Indonesia
Denmark

REPAIRS: Marine Department operates engineering workshops at Labuan and Sandakan. Some private firms and workshops also undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: Marine Department has 3 slipways in Labuan which are capable of shipping vessels of 60 tons, 200 tons and 500 tons displacements. One in Sandakan for vessel up to 120 tons.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Most airports in State between 4 km. to 10 km. from the town.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day.

POLICE/AMBULANCE/FIRE:

	Fire/Police	*Hospital*
Kudat	333	335
Lahad Datu	81999	81522
Semporna	SPA 599	SPA 522

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

SHORE LEAVE: Allowed.

DELAYS: Due to weather conditions only.

DEVELOPMENTS: Lahad Datu, having new port installation and wharves facilities.

AUTHORITY: Sabah Ports Authority, Kota Kinabalu, Sabah. *Tel:* 088-56155/088-52140. *Telex:* Saport MA80074. *Contact:* The General Manager.

SANDAKAN, Sabah: 05.50 N. 118.07 E.

(See Plan Book)

FLAGS: Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly Immigration Signal Nos. 3 and 4; if no passengers Nos. 2 and 5.

PORT LIMITS: The limits of the port of Sandakan shall be Sandakan Bay bounded by a line drawn in a West-South-West direction from the Northern point of Pulau Berhala to the mainland, and by another from the same point on Pulau Berhala to the most Eastern extremity of Tanjong Aru and thence to the opposite bank at the entrance of Trusan Duyong, including all passages and rivers entering the same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS: 5 sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.

(a) To be Produced on Arrival:

1 Sabah Lights and Harbour Dues form
2 Manifest in the prescribed form
3 Crew List
1 Last Port Clearance
3 Stores List
3 Passenger List
2 Arms List
3 Narcotics List
2 Parcels List

(b) Required by Agent:

2 sets of Inward Manifests for all inward cargo
5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.
2 copies of Hatch List.
1 copy of Passenger List.
1 copy of Crew List.
1 copy of List of Arms and Ammunitions.
1 copy Narcotics List.
1 copy Stores List.

(c) To be Supplied to Ship before Departure:

Manifests, as required by vessels.
Master's copy of Bills of Lading.
Port Clearance and Customs Clearance.
Sabah Lights and Harbour Dues form.

(d) Immigration: Immigration Officer will board vessel on arrival and clear her inward. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of crew list and 2 copies of passenger list. Vessels cleared inward until 1800 hrs. only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

(e) Marine Department: Shipping Arrival Report to be signed by Master of Vessel.

PILOTAGE: Pilotage not compulsory but if required the Harbour Master acts as Pilot. At least 24 hours' notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message. Marine Department, Tel. 213126 and 213120.

ANCHORAGES: For loading timber: A black and white conical buoy situated 1.2 miles S.W. from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.

RESTRICTIONS: *(a)* Shifting: Vessels may not berth alongside after dark without special permission but they may leave the wharf, having given prior notice.

(b) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.

MAX. SIZE: Draft restriction is 24 ft. on the Bar plus the height of tide, mean high water being about 6 ft.

HEALTH: (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not coming from an infected port Pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.

RADIO: Singapore Radio recommended.

(Information required before ship's arrival.) ETA, number of passengers, health situation, Manifest, amount of water required. Vessels not allowed to use their radio in port.

VHF: Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hrs.

TUGS: A tug of 636 h.p. stationed at Sandakan.

BERTHING: (Also see "Anchorages").

(a) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Old Government Wharf, least depth 19 ft.

(b) Buoys: No mooring buoys.

(c) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

Rectangular Island Wharf: The particulars of the berths are as follows:

Berth No.	*Length (ft.)*	*Depth (ft.)*
1	700	30
2	400	21-30
3	250	20
4	520	15-30

Covered Storage:

(a) One transit shed 90,000 sq.ft. at new port site.

(b) One 8,100 sq.ft. and two 20,000 sq.ft. godowns at the old port site in town.

Equipment: New equipment only listed below:

(a) 5 towing tractors.

(b) 32×6,000 lb. forklifts.

(c) 20×5-ton trailers.

(d) 1×7-ton forklift truck.

STEVEDORES: Stevedoring in hands of Port Authority who supply gangs as required.

(a) Working hours, 0730 – 1130, 1300 – 1700 and 1800 – 2200. Gangs ordered at least 12 hours before a vessel arrives.

(b) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200 hrs. Application for permission to work overtime must be made to Customs not later than 1500 hrs. on the afternoon that overtime is to be worked or 1100 hrs. on Saturday for weekend overtime.

(c) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays, principal exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(d) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 20 tons per gang hour. Palletised cargoes about 40 tons per gang hour.

CARGO: (a) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(b) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necesary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-handed Memo certified by Chief Officer is usually accepted as proof.

(c) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(d) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision to Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(e) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by 2 raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, 2 snatch blocks available at each hatch where log timber is being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(f) Refrigerated cargo: Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with Customs and Agriculture Department Regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns.

(g) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(h) Damaged Cargo: Direct delivery/cargo surveyed at shipside. Cargo discharged into godowns surveyed jointly between Port Authority and ship's representative in damaged cargo lockers.

TANKERS: Two bulk oil installations at Karimunting (Pavitt Point). Esso, with storage capacity of 2,080 tons and Shell, with storage capacity 15,730 tons.

Jetty extends 550 ft. from shore, is 128 ft. long with mooring dolphins 125 ft. from each end. Min. depth alongside 24 ft.

New oil berth, 1,000 ft. length between dolphins, with central discharging pier. Least depth alongside 30 ft. This berth also used for loading palm oil in bulk.

MEDICAL: *(a)* Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wing. Hospital equipped to carry out normal surgery.

(b) Inoculation: PHO will vaccinate or inoculate crew members at Duchess of Kent Hospital.

(c) Death on Board: PHO and Police to be informed immediately. They will then make an investigation into cause of death. If satisfied that death was due to natural causes, a certificate will be issued, and arrangements may then be made for interning the body. Harbour Master must also be informed in the case of seamen.

FRESH WATER: Can normally be supplied from wharf at rate of 20 t.p.h. No water boat. Occasionally water is not available and, at such times, Agent warns Principals in advance.

FUEL: No facilities for supply of fuel oil bunkers. Limited quantities of lubricants can be obtained in drums and bulk diesoline available at Shell jetty.

FIRE PRECAUTIONS: No fire-floats and in case of a vessel alongside, fire brigade should be summoned by dialling 999. The OCPD should be informed also.

WATCHMEN: No regulations regarding use of watchmen, who, however, can be supplied if required. There have been only very isolated reports of pilferage in Sandakan.

OPENING/CLOSING HATCHES: Normally by stevedores.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bhd. are Lloyd's Agents, neither Bureau Veritas nor the American Bureau of Shipping are represented.

(b) Fumigation: No facilities.

(c) Ship Chandlers: All kinds of stores and provisions can be supplied at reasonable prices.

(d) Call Signals and Call Flags: (i) Continuous watch kept by signal station during day-light hours. In emergency such as serious injury or fire a ship should hoist appropriate International Code signal and blow whistle or siren to attract attention. Apart from these circumstances and for purposes of navigation vessels are prohibited from using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: International Code Pendant No. 8. By night: three red lights vertical. Owing distance of anchorage from jetty these signals often indistinguishable by hire launches unless they are cruising in the harbour. Regular launch services can be arranged if required by Master. No restrictions against a vessel using its own launch or motor lifeboat but it must not land anywhere other than at Customs wharf.

(e) Recreation Facilities: Three cinemas in town which show English-language films. Cricket, football, and hockey matches can be arranged with local teams and several tennis courts available. Only suitable swimming beaches at Berhala Island at mouth of harbour. Yacht Club and Golf Club for members only, but several Shipping Companies pay Corporate Membership fee which enables all officers and first-class passengers to use club. Recreation Club offers facilities for large variety of sports and entertainment; visitors must be accompanied by a member. Churches in town for Anglican, Catholic and Lutheran worship.

REGULATIONS: 1. Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

9. Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Pot ne bexss stenne	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

CONSULS: At Kota Kinabalu. Contact using Kota Kinabalu numbers.
CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.
CARGO GEAR: Ship's gear used, also for containers ex. feeder ships and heavy lifts in major ports.
IDENTIFICATION CARDS: Not required.
REPAIRS: Marine Department operates engineering workshops at Sandakan.
DRY DOCKS: One in Sandakan for vessels up to 120 tons.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.
REPATRIATION: Normally arranged by Agents.
AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.
TIME: Local time is 8 hours ahead of GMT. No alterations to clocks.
POLICE/AMBULANCE/FIRE: Ambulance: Duchess of Kent Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.
TELEPHONES: Available.
SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.
DELAYS: Due to weather conditions only.
DEVELOPMENTS:
(A) *Container Development for Sandakan:* Sabah Ports Authority has just been servicing only feeder route container traffic relying on ship-based crane. Container facilities are limited to forklift, tractor/trailer system. Plans for up-grading container capability will be determined by potentials of the trade.
(B) *Sandakan Port Development Plan:* Existing facilities were completed during 1977. Future extension work had been identified and will be undertaken in phases. The initial phase in the programme will include land reclamation and construction of additional berths and storage facilities.

SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export of round logs, good holding ground is to be found approximately 3.5 miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.
AUTHORITY: Kuching Port Authority, P.O.Box 530, Kuching, Sarawak. *Tel:* 33122. *Cables:* Kuport Kuching. *Contact:* General Manager.

SEJINGKAT (Sungei Sarawak), Sarawak:
01.35 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 14 miles from mouth of river and 3 miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 580 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel. Fresh water obtainable through Marine Department.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Sejingkat. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.
AUTHORITY: Kuching Port Authority, P.O. Box 530, Kuching, Sarawak, Malaysia. *Tel:* 082-33122. *Telex:* MA-70420 Kuport. *Cables:* Kuport Kuching. *Contact:* General Manager.

SIBU, Sarawak (incl. Binatang and Sarikei):
02.24 N. 111.56 E. **(See Plan Book)**

Sibu is the capital of the Third Division of Sarawak. There are 2 navigable routes *(a)* via Paloh River and *(b)* via Rajang River and a third entrance from the North i.e. via Igan River, is uncharted. Sibu is 61 miles from the sea via Paloh, and 70 miles via Rajang.
APPROACHES:
(a) Paloh Channel: The bar was resurveyed in 1975 and shoaling was reported in 1981 to depths of 2.7 m. below chart datum at the middle of the Fairway and Inner buoys. Masters of ships are advised to consult their tide tables before entering. The buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. A conspicious wreck in position Lat. 2° 28′ N., Long. 111° 14.6′ E. has 2 posts above chart datum, serves as a good approach to the Kuala Paloh entrance, and Tanjong Sedi which is on the North bank of the river is marked by a light beacon.

Vessels using this entrance are restricted to a maximum length of 130 m. and drafts of 5.5 m. during the S.W. Monsoon and 4.5 m. during the N.E. Monsoon. During the N.E. Monsoon periods, vessels of 5.5 m. have entered the Paloh Channel but entrance depends on the state of the sea.

When crossing the Kuala Paloh Channel, strong currents and swell (especially during the N.E. Monsoon period) are liable to be encountered thus necessitating caution.

An Inner Bar with at least depth of 3.7 m. exists where the Paloh joins the Seredang at Tanjong Gelang. This crossing is marked by unlit transits and is sheltered.

(b) Rajang Entrances: Vessels intending to use the Rajang River to Sibu are restricted to 60 m. in length and 4 m. in draft as after Tg. Mani deepwater anchorage, the river is winding, narrow and shallow. The depth of the bar is 5.8 m. below chart datum. 2 wrecks in position Lat. 2° 07.6′ N., Long. 111° 7.25′ E. and another in position Lat. 2° 8.7′ N., Long. 111° 14.2′ E. are marked by starboard hand buoys. There is a bar situated about 3 miles below Sarikei with at least depth of 3.9 m. below chart datum.

From Sarikei to Bintangor the river is winding with some shallow patches. Lebaan Corner which is 15 miles below Sibu has a charted depth of 2.2 m.

There is an obstruction off Tanjong Ensurai approximately 6.25 miles upriver from Lebaan with a depth of 4.6 m. Caution should also be exercised when rounding Tanjong Binjei due to 3 shoals across the river, one of which has at least depth of 3 m.

Vessels using this route to Sibu are advised to navigate with caution as tugs towing barges and logs of 100 m. or more are often encountered.
DOCUMENTS: Port Clearance to be surrendered to Customs when boarding.

Crew lists and passenger lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, 2 copies for Customs, 1 copy for Port Health Officer and 1 copy for Port Officer.
List of ship's stores (2 copies for Customs).
List of ammunition (2 copies for Customs).
Health Documents (Vaccination certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

PILOTAGE: Pilots are provided by the Marine Department for Sibu and Sarikei for the Paloh and Rajang entrances respectively. Movements of vessels are restricted to daylight hours only. The Pilots use 5 m. fibreglass speedboats which are fitted with VHF.
(a) Kuala Paloh. The Pilots embarked off Tanjong Sedi, at position Lat. 2° 25.5′ N., Long. 111° 18′ E. and application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sibu.
(b) Pilots for Sarikei, Bintangor and Sibu via this river normally embarked in buoyed channel West of Jerijeh Lighthouse but it may be necessary for a ship to follow the pilot speedboat to sheltered waters inside turning buoy. Application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sarikei.

ANCHORAGES: *(a)* Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage.

(b) Restricted Anchorages.

(i) The Anchorage defined by a line running 045° 2.6 cables from position: Lat. 02° 16.89′ N., Long. 111° 49.28′ E. on Pulau Kerto, thence 135° 8 cables to position; Lat. 02° 16.5′ N., Long. 111° 50.4′ E. thence 225° 1.9 cables to shore on Pulau Kerto. For loading and discharging dangerous goods other than petroleum.

(ii) The berth alongside the Sungei Merah Wharf in position approximately 2 miles downstream from the junction of the Rajang/Igan River on the true right bank. For loading and discharging petroleum.

MAX. SIZE: Largest vessel to berth Sibu was 7,372 gross tons and overall length 137 m.

Deepest drafted vessel to berth Sibu was 7.1 m.

Also see "Approaches".

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

BERTHING:

(a) Principal wharves at Sibu.

1. Rajang Port Authority Wharf 450 m. long with minimum depth of 6.1 m.
2. Sungei Merah Oil Wharf is an old wooden wharf of 22.5 m. with at least depth of 4.9 m.

(b) Sarikei Wharf.

Rajang Port Authority Wharf 60.4 m. with at least depth of 7.6 m.

(c) Bintagor Wharf.

Rajang Port Authority Wharf 48.8 m. with at least depth of 4.6 m.

STEVEDORES: The Rajang Port Authority provide all labour necessary for loading and discharging at Sibu, Sarikei and Bintangor.

REPAIRS: Sibu is one of the major shipbuilding and repair ports in Sarawak and there are 8 shipyards with slipways of which one of them can accommodate vessels up to 2,000 gross tons.

GENERAL: Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago.

REGULATIONS: The Merchant Shipping (Ports and Rivers) Regulations, 1961:—

8. The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

9. (i) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(ii) The Port Clearance shall be in the form as prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

10. A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

50. No oil, oily bilge water or substance containing oil of any description shall be discharged or allowed to escape from any vessel or allowed to run off any wharf, into any river or port.

AUTHORITY: Rajang Port Authority, Sibu, Sarawak. *Tel:* 332088, 332685, 332014. *Cables:* Raport. *Contact:* General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754, 332752. *Cables:* "Shipping" Sibu.

TANJONG MANI, Sarawak: 02.09 N. 111.21 E.

PILOTAGE: Pilots embarked, weather permitting in the buoyed channel West of Jerijeh Lighthouse but occasionally the Pilot will request ships to proceed into sheltered waters as they use 5 m. fibre-glass speedboats, fitted with VHF.

Application for Pilot should be made giving 24 hours notice of arrival to "Shipping Sarikei" and Masters can call "Rajang Pilot" before arrival.

APPROACHES: Rajang River entrance has at least depth of 5.8 m. below chart datum. The entrance is well lit by two lighthouses and one light beacon and the bar is marked by two light buoys.

There is a wreck situated at Lat. 2° 7.6′ N., Long. 111° 7.25′ E. which is approximately 8 cables S.E.×E. of the inner Fairway Buoy marked by a starboard hand buoy and about 7 miles further inwards South-West of Kampong Rajang another wreck at Lat. 2° 8.7′ N., Long. 111° 14.12′ E. which is also marked by a starboard hand buoy.

ANCHORAGE: *Tanjong Mani Anchorage:* This is a deepwater anchorage 20 miles from the Fairway Buoy, used by vessels loading timber. The anchorage can accommodate approximately 3 vessels of 183 m. and 12 vessels of 120 m. – 150 m. in length.

Restricted Anchorage: Abeam of Loba Selemit on the North bank of the Rajang river in position Lat. 2° 08′ N., Long. 111° 16′ 35″ E. is restricted to loading and discharging any dangerous goods.

MAX. SIZE: The maximum length of a vessel permitted is 183 m. and max. draft 8.4 m.

AUTHORITY: Rajang Port Authority, Sibu, Sarawak. *Tel:* 332088, 332685; 332014. *Cables:* Raport. *Contact:* General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754/332752. *Cables:* "Shipping" Sibu.

TAWAU, Sabah: 04.14 N. 117.52 E. (See Plan Book)

PORT LIMITS: The Port of Tawau shall comprise the waters of Cowie Bay and Wallace Bay and rivers entering same contained within the following limits:

A line from Lat. 4° 13.3′ N., Long. 118° 00.0′ E. to the National boundary mark on the Eastern shore of Sebatik Island, thence to the National boundary mark on the Western shore of the said island, thence in a 270°(T) direction to the shores at Burs Point, thence in a 311°(T) direction to Lat. 4° 20.0′ N., Long. 117° 25.9′ E. thence in a 070°(T) direction to Lat. 4° 25.0′ N., Long. 117° 40.0′ E., thence in a 120°(T) direction to the point of commencement.

DOCUMENTS:

(a) To be Produced on Arrival:

Customs

2 Manifests in prescribed form.
2 Crew Lists.
1 Last Customs Clearance.
2 Stores Lists.
2 Passenger Lists.
2 Arms Lists.

Marine

1 Marine Dept. Boarding Report, required to be completed.
1 Last Port Clearance.
1 Crew List.
1 Passenger List.

Agent

4 (2 for SPA) Manifests in the prescribed form.
1 Crew List.
1 Passenger List.

Immigration

2 Crew Lists.
2 Passenger Lists.

Travel Control Office

2 each, Crew Lists and Passenger Lists.

(b) To be Supplied to Ship before Departure:

Manifests, as required by vessel.
1 Port Clearance and 1 Customs Clearance.
3 copies of Passenger List.

(c) To be supplied by ship prior to arrival:

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Not compulsory. A Pilot is available from 0600 to 1800 hrs. for berthing vessels given reasonable notice (48 hours). Marine Department Tel: 73510.

Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 Mc/s. frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within Port Limits.

ANCHORAGES: Good anchorage in 8 fathoms 1,000 yd. to 1,300 yd. W.N.W. of wharf; and 350 yd. South there is an anchorage in 8.5 fathoms.

Petroleum Anchorage. An area bounded by parallels of Lat. 04° 15′ N. and Lat. 04° 16′ N. and meridians of Long. 117° 51′ E. and Long. 117° 52′ E. This area is to be marked "Petroleum Anchorage".

Explosives Anchorage. An area bounded by parallels of Lat. 04° 12′ N. and Lat. 04° 13′ N. and meridians of Long. 117° 52′ E. and Long. 117° 53′ E. This area is to be marked "Explosives Anchorage".

Quarantine Anchorage. An area bounded by parallels of Lat. 04° 12.5′ N. and Lat. 04° 13.5′ N. and meridians of Long. 117° 54′ E. and Long. 117° 55′ E. This area is to be marked "Quarantine Anchorage".

RESTRICTIONS: *(a)* Communication ship/shore when lying on Roads: Regular launch services difficult to arrange if required by Master. No recognised signals for summoning a launch, as distance between small boat jetty and anchorage is too great for flag signals to be recognised. No restrictions against a vessel using its own launch or motor life-boat apart from fact that it must not land anywhere other than at Ports Authority Wharf.

(b) Explosives: No vessel carrying explosives shall come within 500 yards of shore or any other vessel except with written permission of Port Manager which will be given provided that:

(i) quantity does not exceed 2,000 lb. of explosives of Class V and VI and are carried in a certified magazine, and there is no other dangerous cargo on board as certified in writing by the Master.
(ii) quantity does not exceed 3,000 lb. and are exclusively of one of the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

HEALTH: *(a)* Quarantine. The Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of crew list and one copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(b) Immigration. Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of crew list and 2 copies of passenger list. Vessels are cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

RADIO: Singapore Radio recommended.

Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and requirements:

Name of vessel, gross and nett tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, quantity of fresh water required. Vessels given berth on first come, first served basis.

VHF: A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan Channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements etc. Berth availability will be notified on vessel's call.

TUGS: No tugs available.

BERTHING: *(a)* Wharf Light at Tawau in position on N.W. end of wharf, Lat. 04° 14′ 32″ N., Long. 117° 52′ 56″ E.

(b) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(c) New Wharf. Consists of a 220 ft. long approach causeway extending from a reclamation area and a 650 ft. long wharf, 40 ft. wide with a dolphin in line +100 ft. off each end. Least depth 20 ft.

(d) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(e) Buoys: No mooring buoys in Tawau.

(f) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

Also see "Developments".

CARGO HANDLING FACILITIES: 19 Fork-lift trucks of 6,000 lbs. each; 1 Fork-lift truck of 7 tons; 10 Towing tractors; 45 Trailers.

STEVEDORES: *(a)* Stevedoring in the hands of Sabah Ports Authority who will supply gangs as required.

(b) Working hours 0730 – 1130 hours, 1300 – 1700 hours, 1800 – 2200 hours.

(c) Overtime: Overtime working hours are from 1800 to 2200 hours. Application must be made to Customs one day in advance; double rate charged.

(d) Sundays and holidays: Work normally carried out on Sundays and holidays, the only exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(e) Rates: General cargo about 17 t.p.h./gang (loading/ discharging). 28 t.p.h./gang for palletised cargoes.

CARGO: *(a)* Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually landed overside on to flat-top scows. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: Subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(b) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(c) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(d) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(e) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(f) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(g) Refrigerator. Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs Regulations. Inward refrigerated cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(h) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

TANKERS: Shell jetty, least depth 14 ft.

S.P.A. Oil Jetty: Length 240 ft. Depth alongside 32 ft.

Also see "Shipmaster's Report".

MEDICAL: *(a)* Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. 3 classes of wards, but first class ward can only accommodate 2 persons. Hospital is equipped to carry out normal surgery.

(b) Inoculation. Port Health Officer will vaccinate or inoculate Crew members at General hospital.

(c) Port Health Officer. General Hospital, General Office 73533, 72191. Medical Officer-in-Charge 71206. M.O.'s Residence 72239.

DENSITY: 1020 (approx.).

FRESH WATER: Can only be supplied at wharf. 24 hours' notice should be given of a vessel's water requirements. Usual rate of supply is about 15 t.p.h. A water barge is available but no guarantee of availability.

FUEL: Not available except diesoline in drums.

FIRE PRECAUTIONS: No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

CONSULS: At Kota Kinabalu.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by Stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ships gear used, also for containers ex-feeder ships and heavy lifts in major ports.

IDENTIFICATION CARDS: Not required.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

DELAYS: Due to weather conditions only.

POLICE/AMBULANCE/FIRE: *(a)* Police/Fire, Tel. 089-73111; Ambulance/Hospital, Tel. 089-73533.

(b) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

TELEPHONES: Available.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(b) Fumigation: No facilities.

(c) Ship Chandlers: Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(d) Priority: Vessels are berthed on a "First come first served" basis. Vessels with palletised cargo get priority.

(e) Watchmen: These can be supplied if required.

REGULATIONS: *(a)* Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International code Signal "2 5"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green light over a white light. 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light. 6 ft. apart, hoisted vertically where best seen.

DEVELOPMENTS: Larger and more modern facilities are being installed under a multi-million dollar project now being implemented. The new facilities are sited upstream of the present wharf to provide 3 additional berths each about 500 ft. long and with a depth of 32 ft. at the outer face. A large portal-frame godown is provided on the wharf deck while ample open storage has been constructed on the foreshore area.

Container Development for Tawau Port: Sabah Ports Authority has just been servicing only feeder route container traffic relying on ship-based cranes. Container facilities are limited to forklift, tractor/trailer system. Plans for up-grading container capability will be determined by potentials of the trade.

SHIPMASTER'S REPORT: 1976.
Government Oil Wharf:
Position: Lat. 04° 15.5′ N., Long. 117° 50′ E. 2 miles N.W. of Main Cargo Pier.

Least depth in channel from sea to berth — 30 ft. Vessels to be ballasted to 1/3rd deadweight. Density, 1025. Vessel docks daylight only, undocks anytime at any stage of tide. Anchorage 0.5 mile S.W. of jetty. 5 lengths of ship's hose required. Manifold, 10 in. Length of shoreline 3,000 ft. All products handled. Shore booster pump cannot be used. No steam.

Pilot boards at Quarantine Anchorage. 48 hours notice required. No tugs available. Accommodation ladder required for Quarantine but not at berth.

Fresh water available ex-barge. Other services available: Fresh provisions, repairs, Machine Shop, Airport, Lloyd's Surveyor, Telex, Doctor, Hospital, Laundry, Groceries and Meats. No slop tanks.

AUTHORITY: Port Manager, Sabah Ports Authority.

NOTES

Please also advise Shipping Guides Ltd.

Maldives

MALE: 04.10 N. 73.31 E.

SHIPMASTER'S REPORT: May 1982.

APPROACHES: As visibility was good landfall was made easily, as T.V. tower South of Male Island in position: 04° 10.2′ N., 73° 30.9′ E., was visible at a distance of 30 miles on radar and also the Islands of Huras and Hembudu were visible. Entrance was made as per "Sailing Directions – West Coast of India Pilot" via East Male Passage. As many small fishing/pleasure vessels are crossing the passage, slow speed is necessary. Also signals on the ship's whistle were given. After rounding the Island of Funadu at a distance of 2 cables, course of 275°(T) was set, to anchor in position West by South from Dunidu at a distance of 6.5 cables, as Roads were occupied by 5 other small vessels. Used port anchor with 7 shackles of chain. No dragging was observed during our stay, not even during squalls. During our stay the ship was heading between North and S.S.W.

We left Male Roads on 24th May at daybreak as no navigational aids/lights are available.

The Northern route via Kaduoigiri Passage as described in the Sailing Directions was taken. Apart from a very strong Westerly set near the reef N.W. of Kaduoigiri Island no particulars were observed.

Beacons in the following positions non-existent:

A. Lat. 04° 11.75′ N., Long. 73° 31.05′ E. (West of Dunidu Island).

B. Lat. 04° 12.37′ N., Long. 73° 30.43′ E. (Reef between Dunidu & Ferdo).

C. Lat. 04° 13.45′ N., Long. 73° 31.54′ E. (Vehamanafushi).

Mooring Buoy (private) in position: 04° 11.45′ N., 73° 30.97′ E. non-existent.

Navigation Warning: Unmanned/unlighted fishing vessel (approximately 60 tons gross) anchored in position: 04° 11.2′ N., 73° 30.55′ E.

DOCUMENTS: *Arrival/Clearance Procedures:* Finished with engines at 0954 hrs. on 20th May. Security onboard at 1000 hrs. Doctor, Immigration, Customs boarded at 1038 hrs. Ship cleared and Agent/Stevedores onboard at 1100 hrs.

Papers Required: Security: 1 Crew List (search party, search all cabins for weapons/pornographic material).

Doctor: Port Health Form (Male Issue), Vaccination List (Cholera Vaccinations).

Immigration: 2 Crew Lists (all passports checked).

Customs: Last Port Clearance, 1 Crew List, Cargo Manifests, Store List from Head of Catering. (Bonded stores were not sealed). Customs also gave the ship a "Notice to Ships Calling at the Port of Male". See "Notice".

Agents: 1 Crew List. All passports taken ashore to be returned upon departure with Customs Clearance.

CARGO HANDLING: (Chief Officer's Report):

Arrived 20th May, 1982. Sailed 24th May, 1982. Port hours: 94 hours 11 minutes.

Three gangs are available in Male to work on board ships, of which 2 were supplied on 20th, 21st and 22nd May. One gang on 23rd May. The gangs arrived diligently between 0750 hrs. and 0800 hrs. in the morning and worked till about 2220 hrs. except on the Thursday, when they worked till 1730 hrs. and on the 21st when work was interrupted from 1000 hrs. till 1415 hrs. being a Muslim religious festival.

No forklift trucks are available for work on board ships in Male and cargo stacked on pallets had to be dragged from the sides of the holds under the hook. This was the cause of damaged bags of flour and cartons of provisions.

There are 6 lighters available. Empty lighters were regularly supplied, except after rainy periods, when discharging of lighters alongside the wharf is interrupted.

Shore tally staff seemed to be very dedicated in their duties and were accompanied by a Customs Officer/Clerk.

Nett tonnages per hour:

Hatch No. 1: 12.1 t.p.h. (182 tons discharged).

Hatch No. 2: 12.2 t.p.h. (216 tons discharged).

Hatch No. 6: 16.8 t.p.h. (411 tons discharged).

A boat schedule was arranged upon arrival but a regular boat service was never carried out. The Agency appeared not to be in possession of any documentation (manifests, stowage plans, etc.) of the cargo to be discharged.

NOTICE: Issued by Maldive Customs.

Notice to Ships Calling at the Port of Male

1. All ships are required to submit a Port Clearance, Cargo Manifest, Passenger and Crew List and where available any other relevant documents.
2. Departure time should be notified and a Port Clearance obtained.
3. All visitors, officers and crew and passengers of ships are requested to use the Customs Jetty when arriving or leaving Male.
4. All articles are subject to inspection by the Customs.
5. All ships anchored at Male Harbour should exhibit on board the under mentioned lights between sunset and sunrise.
   a. White anchor light of all round visibility.
   b. White stern light with 135° illuminated sector.
   c. Mast light with all round visibility.

The Law On Prohibited Imports into Maldives

1. *Prohibited Items of Import Except for the Use of the State:*
   a. Any type of gun powder.
   b. Weapons of war.
   c. Opium, ganja, cocaine, and any other item which could be used as an intoxicant.

Articles carried by foreign distinguished personnel signifying their ranks, titles or honours and articles carried in connection with such ranks, titles or honours by those who accompany such distinguished guests shall be exception to this Article.

2. *Prohibited Items of Import Without a Permit from the Ministry o Home Affairs Except for the Use of the State:*
   a. All forms of poisons and sulphuric acid.
   b. Nitrates.
   c. Dangerous animals.
3. *Totally Prohibited Items of Imports Into Maldives:*
   a. Pornographic literature and posters.
4. *Prohibited Items of Import Without a Permit from the Ministry o External Affairs Except for the Use of the State:*
   a. Alcoholic drinks.
   b. Dogs.
   c. Pigs or pork.
   d. Statues (used for worship).

In addition to items stipulated in this Bill, the Principal Collector o Customs shall withhold such items, the import of which is in his opinio shall be prohibited and bring the matter to the notice of the Department of Finance. The final settlement will be in accordance with the decisio of that Department.

AUTHORITY: Ministry of Transport, Male, Republic of Maldives.

NOTES

Please also advise Shipping Guides Ltd.

Malta

VALLETTA: 35.54 N. 14.31 E.

DOCUMENTS: On arrival the Master has to fill the pratique deposition, the stores list, the crew declaration, and the crew list (two copies). The forms for the pratique deposition and for the store list are supplied by the Customs Boarding Officer.

Arrival Notice: In accordance with the Port's Regulations Master or Agent of a vessel should give the ETA to the Port Department on a form prescribed by the regulations as early as possible prior to arrival and 48 hours in the case of vessels carrying petroleum or other hazardous cargoes.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilots board vessels at Fairway Buoy, weather permitting. Pilots available round the clock all the year round. In bad weather Pilots board vessels inside entrance, subject to size of vessels, Master's knowledge of the port and Master's willingness to bring vessel up to Bighi Bay.

Pilot boat is equipped with VHF on Channels 12, 14 and 16.

ANCHORAGES: Anchorage in territorial waters and in other harbours is prohibited unless expressly authorised by the Port Department.

RESTRICTIONS: Maximum depth at entrance is 16 m. Dredging works are in hand for channel and berth at Menqa Basin to provide 13.7 m. of water. Nature of bottom in entrance channel, rock and mud. Harbour channels – mud.

Harbour entrance and approaches affected by current. With North-Westerly winds there is a set of up to 0.5 knots from N.W. to N.E.

Port is subject to closure in gregale (N.E. gale) conditions – Winter months occasionally, not more than 4 times a year.

MAX. SIZE: Discharging Berths:

Deep Water Quay – 500 m. long, depth 10.0 m.

Berths No. 1, 2 and 3 have maximum depth of water alongside of 9.75 m. Maximum displacement tonnage of 15,000 tons.

Berth No. 4 has the same depth of water and can take maximum displacement of 25,000 tons.

Laboratory Wharf has a length of 220 m. with a depth of 12 m. Two other small berths adjacent to the main wharf are used for Ro/Ro and direct deliveries.

There are other berths at Coal Wharf (length 275 m., depth 7.0 m.) for cargoes intended for discharging direct to trucks. There are various berths for various sizes of ships at Bighi Bay, Fish Market, Fuel Wharf and Bridge Wharf.

Also see "Developments".

HEALTH: Port Medical Officer grants pratique after boarding vessels on arrival. Accelerated pratique may be granted through Agent provided crew are all in good health and ship has not called at any infected port during previous 15 days and is coming from a European port.

RADIO: Call sign 9HD. Radio telephone working frequency 2625 kHz. Listening watch 2182 kHz.

RADAR/VHF: No radar service available. VHF available at Port Signal Station. Operating on VHF Channels 11, 12, 14 and 16.

Also see "Pilotage".

TUGS: Meet vessels just inside harbour entrance. Lines given at discretion of ship's Master under advice from Pilot.

BERTHING: Berthing conference held at the Port Department daily at 1100 hrs. between Monday and Saturday when berths are allocated for expected ships. No specific requirements necessary. Once berth has been allocated by Port Department vessels can berth at any time at the allocated berth (container and Ro/Ro berths are available).

EQUIPMENT: One gantry crane maximum lifting capacity 35 tons. One mobile crane maximum lifting capacity 250 tons. Two mobile cranes with maximum lifting capacity of 75 tons (for container handling). Various other mobile cranes. Fork lift trucks 2×40 tons. Various other smaller fork lift trucks and other cargo handling equipment.

STEVEDORES: Ship Agents of liner vessels normally act as stevedores. Port workers for stevedoring are ordered by Shipping Agents and labour is allocated from a pool operated by the Manager of port workers.

Working Hours: 0800 – 1200 hrs., 1300 – 1700 hrs. Vessels may work till 2100 – 2200 hrs. to complete. Nightwork: 1900 – 0400 hrs. (mainly containers).

Work may be arranged on Saturdays, Sundays and Holidays at special rates.

MEDICAL: Notice must be given to Agents as early as possible. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates.

TANKERS: Vessels must be gas-free except for the tank cleaning berth. Facilities for discharging slop or residue are available.

N.B. Vessels not gas-free are not allowed to enter port between sunset and sunrise.

FRESH WATER: Limited amount ex-barge subject to permission from Water Authority. Notice, as long as possible required.

FUEL: Sea Malta Co. Ltd. Grades handled include gas oil, fuel oil, thin fuel oil 30 CST up to 380 CST.

FIRE PRECAUTIONS: Precautions as laid down in Ports Regulations for cargo ships and as in Petroleum Ships Regulations for tankers. Civil tugs partly equipped with fire fighting equipment.

GANGWAY/DECK WATCHMEN: Gangway recommended. Deck compulsory.

OPENING/CLOSING HATCHES: By ship's crew or shore labour.

CERTIFICATES: Ship's Register; Load Line Certificate; Derat Certificate; Factory Act Book.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, plus one bottle spirits (officers only).

CARGO GEAR: Certificates of cargo handling gear have to be valid before cargo work can commence. Factory Act Book to be endorsed quadrienially and annually.

IDENTIFICATION CARDS: A personal identification card not required. Passports or seamen's books will suffice.

REPAIRS: Malta Drydocks has the capability to carry out normal and specialised engine, hull and machinery repairs such as:

Engine, (diesel, steam, turbine)
Auxiliaries (turbine and diesel)
Turbine re-blading
Propeller servicing, repairs including re-tipping (tips cast in yard) and balancing
Dynamic balancing of rotors
Boiler and heat exchanger chemical cleaning
Rudder and tailshaft alignment and repairs
Gritblasting (internal/external) to all standards
Hull cleaning by high pressure water jet
Refrigeration system repairs
Replacement of lignum vitae stern tube bearings
Installation of Deutsche Werft Simplex stern tube sealings
Internal/external cathodic protection
Combustion control system repairs
Re-tubing of boilers, brickwork and lagging
Renewal of heating coils, cargo and stripping lines
Hull repairs (welded and rivetted)
Jumboizing.

Travelling Repair Parties:

Malta Drydocks Travelling Repair Parties are available to carry out repairs at sea both as an emergency repair, or as a means of reducing lay-up time during normal voyage repairs or classification surveys.

It is possible to shorten the time of refits by employing a travelling repair party to commence work before entering or complete after leaving the Drydocks, non-critical items being completed on passage.

Malta allows the maximum use to be made of Travelling Repair Parties, situated as it is in the centre of the Mediterranean, midway between Gibraltar and Port Said. It is ideally placed on the shipping lanes between the East and West and connected by daily air services to Europe and North Africa.

Malta Drydocks Travelling Repair Parties are equipped to carry out the following work:

1. Repairs to main and auxiliary boilers, including re-tubing, renewal of brickwork and insulation and fitting of new furnaces in Scotch type boilers.
2. Overhauling and repairing deck and engine room auxiliary steam and diesel plant, cargo systems and valves.
3. Repairs or replacement of cargo tank heating and stripping line systems, in cast iron, steel or aluminium/brass.
4. "Metalock" cold repairs to castings by trained specialists.
5. Gas or electric welding to Classification Society requirements for steelwork repairs and reinforcements.
6. Repair or renewal of electrical wires and cables.
7. Overhaul or installation of any electrical machinery.
8. Repair or installation of all navigational aids, i.e., radar, radio, auto-pilots, gyros by qualified personnel.

Any enquiry will receive immediate attention by radio, telex or telephone.

Capacity of No. 6 Dock 300,000 d.w.t.

SERVICES: Tank cleaning and underwater hull cleaning undertaken by Malta Drydocks.

Ricasoli Tanker Cleaning Installation:

The tanker cleaning installation at Ricasoli accepts cleaning for drydocking, repairs and survey for upgrading tankers.

The jetty area consists of a 100 m. jetty, situated immediately inside the Grand Harbour, and capable of berthing tankers up to 100,000 d.w.t. at a maximum draft of 8.5 m. in 10 m. of water.

Tankers are assured of immediate attention on arrival from a trained crew of tank-cleaning personnel. Work is continuous 24 hours per day from the time of arrival of the vessel, together with a 24-hour security watch.

1. Washing: The installation supplies hot wash water at a temperature of 60°C and a pressure of 14kg. per sq.cm. to operate four washing machines simultaneously, with a delivery rate of 30–34 t.p.h. The discharge of slops and/or ballast is at a maximum of 1,200 t.p.h. Chemical cleaning is also undertaken and Malta Drydocks holds stocks of well-known chemicals.
2. Gas-freeing: The installation operates 3 compressors and 6 Meco ventilators, together with trunking, are available for gas-freeing.
3. Steam Supply: This is available at the jetty when required. All associated tank-cleaning equipment is available for ship's use.

Full fire-fighting facilities are available at the jetty.

The installation also makes distilled water for sale to ships and a separate line is available at the jetty for the discharge of this product.

The reception and treatment area incorporates reception tanks, treatment tanks and an observation tank with separating baffles and oil sump. In addition there is an oil storage tank and a distilled water storage tank.

The boiler house accommodates 3 Scotch boilers with all associated auxiliary equipment. The steam supply is extensively used in the plant area for heating and treatment purposes. An evaporator-distiller is incorporated in the Boiler House for the production of distilled water.

The whole area has been designed to be perfectly safe and is to the standards laid down by the Institute of Petroleum Safety Codes for Installations storing Class A Petroleum. Strict safety regulations are applicable to the whole plant and the tank-cleaning crew has been thoroughly trained in these matters.

POLICE/AMBULANCE/FIRE: Police 28135; Ambulance 961; Shore Fire Brigade 99.

TELEPHONES: Can be arranged at the Drydock berths, and on buoys.

GENERAL: Important that tankers are gas-free before entering, and that vessels do not carry explosives.

DEVELOPMENTS: *Marsaxlokk:* To be developed as a transhipment port. In the first stage (completed) the following is available.

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
A-B	50	3.0	Service Berth
B-C	128	9.5	General Cargo and Containers
C-D	167	9.5	
D-E-F	620	13.5	
F-G	200	13.5	

In the second stage a breakwater berth, length 1,030 m., and depth alongside 15 m. – 20 m., will be constructed. Completion late 1985.

Stage three will consist of a Container and Ro-Ro Terminal 1,400 m. length and 12.0 m. – 17.0 m. depth.

Valletta: Grain Terminal under construction. Length of quay 440 m. Capacity of silos 86,000 tons. Completion early 1985. Max. size 60,000 d.w.t. and later after dredging 80,000 d.w.t.

AUTHORITY: Director of Ports, Port Department, Marina Pinto, Valletta. *Tel:* 22679. *Telex:* 226 MW. *Contact:* Director of Ports.

AGENT: Kirton & Co. Ltd., 18/19 Floor 3, Europa Centre, Floriana, Malta. Cable address: 'Kirton Malta'. Tel. 624360. After hours 820599. Telex. MW 1241. Sole and exclusive Agents for Lambert Brothers Ship Agencies Ltd.

Mauritania

NOUADHIBOU: (Port Etienne): (See Plan Book)

POINT CENTRAL: 20.49 N. 17.03 W.

DOCUMENTS:

3 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
2 Passenger Lists (even if "NIL").
2 Ports of Call Lists of the last 30 days.
1 Health Declaration.
1 Vaccination List.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag (must be flown day and night) is hoisted and check very closely the concordance between the Ship's Articles, the Seamen Books and the Crew List.

If any difference is found between these three documents a fine may be given to the ship.

Immigration/Police: Crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to Agent on arrival.

Money: On principle, foreign money is not allowed in Mauritania, but Agent may change money into local currency.

No Mauritanian money (Ouguiya) may be kept on board and if the crew have not spent their local money they have to give it back to the Agency (10 Ouguiya about 1 French Franc).

PILOTAGE: Compulsory for vessels calling at Point Central.

An outer pilot station is situated in the vicinity of No. 2 Buoy, bearing 037° distance 4.4 miles from Fairway Buoy No. 0 (Lat. 20° 40′ N., Long. 17° 04′ 30″ W.). Also see "Shipmaster's Report (1977)".

The inner pilot station is 1 mile from the mineral wharf bearing East.

ANCHORAGES: Ships waiting can anchor N.E. of No. 2 Buoy, distance 1 mile in 20 m. of water, good holding ground. Another anchorage on the roadstead, the wharf bearing N.W./N.N.W. distance 1 mile can be used by ships prior to berthing.

RESTRICTIONS: Minimum depth of water below chart datum is 17 m. in the buoyed channels and swinging area. Outer channel width is 400 m. but it varies from 250 m. to 400 m. for the inner channel; the radius of the swinging circle being 500 m.

MAX. SIZE: Not to exceed 310 m. in length and 47 m. in breadth, the extreme reach of the shiploader arm being 28.5 m. from ship's side. At the limit an extreme breadth of 48 m. could be accepted after advice from the DCFP. If possible drawing should be sent prior to acceptance for vessels of more than 100,000 d.w.t.

The recommended draft for large vessels in ballast, or partially loaded is 12 m. on arrival. Smaller ships should have on board a quantity of ballast equal to half their cargo capacity.

Maximum freeboard under shiploader arm is 14 m. With hatch covers opening crosswise (abreast) the maximum freeboard must be understood as the height from sea level to the upper part of hatch covers.

On departure a draft of 16.15 m. is usually admitted.

Essential: All vessels greater than 100,000 d.w.t., which have never visited the port before must have prior approval of the DCFP.

HEALTH: Free Pratique is usually granted after vessel has berthed. Yellow fever vaccination certificates required.

TUGS: None available.

BERTHING:

Mineral Wharf: The ore loading terminal of "Societe Nationale Industrielle & Miniere de Mauritanie" (SNIM) is located at mid distance between Cap Blanc and Nouadhibou, geographical position: Lat. 20° 49′ N., Long. 17° 02′ W. It consists of a platform, 20 m. wide oriented North and South, resting on 8 dolphins, 13 m. in diameter each and 32 m. distant one from the other. The platform supports a conveyor belt and one single shiploader. The maximum travel of the shiploader from one end of the rails (railway) to the other is 165 m.; the virtual loading capacity would be 5,000 t.p.h. while the actual output varies from 2,000 to 4,000 t.p.h. according to ship's size and on condition there is only one quality and grade of ore to load.

To maintain a depth below LLWT (lowest low water astronomical tides) of 16 m. at the berth, ships are laid against 2 big outrigger pontoons leaning on the dolphins and protected on the ship's side by heavy but efficient rubber rollers acting as shock-absorbers.

Ships are generally made fast port side to the quay, coming alongside with the help of the anchors which should be kept at the ready.

Shipmaster's Report: March 1983.

Heavy lifts up to 24 tonnes were discharged alongside the berth with vessel's gear.

TANKERS: *Oil Wharf:* It consists of a light platform placed on top of 3 dolphins of the same diameter as above but 64 m. apart, adjoining the mineral wharf to the Southward. A wooden decking supports the oil pipes which are connected abreast of dolphin No. 10 to the tanker lying portside to the quay, the stern is made fast to a mooring buoy.

CUSTOMS: Regulations are very strict, and a careful declaration of all bonded stores must be made before berthing. Ships have been fined for quantities in excess or missing even when small.

GENERAL: (a) Radiotelegrams stating the date and ETA at pilot station and addressed to SNIM Nouadhibou should be transmitted 72 and 24 hours beforehand via Nouadhibou coast radio station (5 TA) working hours 0800 – 1800 or Dakar (6 VA) hours: continuous.

Shipmaster's Report 1977: Telegrams to Agents through Dakar Radio 6 VA only.

(b) It is of interest to Pilots when coming on board, to know whether the ship is powered by a steam-turbine or diesel engine whether the propeller is left or righthand and if it is a variable pitch propeller, how she behaves when the engine is running astern.

DENSITY: Point Central 1026–1027.

FRESH WATER: *Shipmaster's Report:* March 1983. Fresh water available in limited quantities (approx. 100 tonnes) at a cost of US$1.50 per tonne.

FUEL: Not available at the moment. An oil refinery has been built which will eventually supply fuel.

MEDICAL: There are hospital and medical facilities at the port.

GANGWAY/DECK WATCHMEN: Recommended as stowaways try to board at night.

SURVEYORS: Bureau Veritas, Lloyd's, Salvage Association.

DEVELOPMENTS: Extensions to the Mineral Port are being studied.

SHIPMASTER'S REPORT: (1975), Vessel 169,000 d.w.t.

Iron Ore Marine Loading Terminal:—

Approach to Cap Blanc and Baie du Levrier: Approach was from the Southward. From Dakar the course was laid to cross the 100 fathom line at 20° 04′ N. 17° 41′ W., this being a precipitous shelf, when crossed with D.F. bearings from the Radio Beacon at Port Etienne gave a reasonable fix. Vessel then steamed across the main flow of North/South traffic at quite a broad angle heading for the landfall buoy 6 miles West by South of Cap Blanc. A dense concentration of fishing vessels extending Westwards from Banc Vilmorin offered little hindrance to our landfall. The light of Cap Blanc lighthouse was visually observed in the pre-dawn darkness at 26 miles and radar contact of Cap Blanc was established at 23 miles. The landfall buoy fitted with a radar reflector, gave radar contact at 15 miles.

Pilotage: A Pilot boards in the vicinity of No. 2 Fairway Buoy from a black-hulled, white superstructure, 40 ft. high-speed motor launch with "Pilote" written on the side. VHF contact is made on Channel 16, working frequency Channel 14. Call "Nouadhibou Pilot". The Pilot, a Frenchman, had a good understanding of English and proved to be very competent. The transit inwards and through the Passe du Levrier was at half speed but the last mile towards the berth only an occasional Dead Slow ahead movement was made to maintain steerage way.

Tide/Currents: Berthing for large vessels is on the ebb tide with a Southerly set of about 1 knot. South of the headland the set is to the Eastwards again about 1 knot i.e. directly across the channel. Unberthing is made on the flood tide setting Northerly along the jetty again about 1 knot. Rise and fall is in the region of 1.6 m.

Wind: Ranges from North by West to North by East (May). During darkness it abated to about Force 3 but from early morning through to sunset gusted up to Force 6 causing a short steep sea to run. The Pilot stated that in August and September Easterly winds often occurred hence the placing of 2 mooring buoys about 1 cable off the berth to assist vessels warping clear when leaving.

Tugs: None available.

Quay: Stout cylindrical rubber fenders are chained to the sides of 2 floating pontoons laying to the quay face. An adequate number of bollards are placed along the length of the quay. 3 dolphins, connected by a catwalk, extend the Southern length of the quayside for ship mooring purposes.

Moorings: When approaching and lying off the jetty 2 motorised mooring boats will run ashore 1 synthetic fibre rope (no wire ropes at this stage) from forward and 1 similar rope from the Poop. Vessel is then to warp alongside with these 2 lines aided by helm and small engine movements. Once alongside a spring from the after extremity of the Poop is to be sent away and a forward spring. Vessel secured to the berth with 1 headline to a mooring buoy North of the jetty, 3 forward breast lines, 1 forward spring, 2 stern lines, 2 after breast lines 1 spring from the Poop, and 1 spring from the normal position on the after deck.

Gangway: The accommodation ladder could not be used because of the space between the pontoons lying between ship's side and the quay. A pilot ladder was the means of access to the after pontoon from which access could be obtained to the quay.

Depths alongside: At the first low water soundings were taken around the ship and when reduced to chart datum — obtained from a monthly tide table loaned by the Pilot – a least depth of 16.2 m. was found on the inboard side with depths generally about 18/19 m. elsewhere.

Draft: Maximum permitted for berthing 12 m. Maximum permitted draft for sailing is 16.16 m. (53 ft.) at any state of the tide.

Airdraft: Maximum 14.5 m. In our case several thousand tonnes of hold ballast had to be taken once secure alongside, this delayed loading for 5 hours.

Shiploader: This is a single conveyor belt fed gantry having a range of travel of 165 m. along the quay but the loading arm has no facility to slew horizontally. It can only be luffed in the vertical plane. The maximum outreach was stated to be 23 m. which combined with the airdraft limitation of 14.5 m. made it extremely difficult to plumb the centre of the holds. For the majority of our loading period the ship had a port list (this was exaggerated by the free surface effect of the 4 ballasted holds). To keep the loading arm from fouling the ship's structure and assisting the arm to plumb centre all the port side side-rolling hatch lids were only partially opened.

Shifting: This had to be done on 2 occasions but was successfully achieved by hauling on the 2 spring wires aft and 1 headline to warp a distance of 6 m. forward and heaving on the forward spring and stern lines to warp 26 m. aft. The shifting was necessitated by the fact that the distance centre to centre of our extreme loading hatches was 191 m.

Agency: This was conducted by SNIM, Societe Nationale Industrielle & Miniers, their telegraphic address is "Snimport – Nouadhibou".

Port Capacity: The Pilot stated previous largest ships had been:
(i) *"Atland"* Obo Swedish 84,229 g.r.t.
(ii) *"Thor"* Bulk German 79,270 g.r.t.
(iii) *"Lilyprima"* Obo Italian 72,68 g.r.t.

However, our claim to be the largest vessel to call being 169,080 d.w.t. is unsubstantiated. The Agent claims a shipment of 139,000 metric tonnes is the largest cargo exported from the port.

Loading Rate: The installation foreman claimed a rate of 4,000 t.p.h. Our rate, allowing for the frequent short stoppages, was 2,813 t.p.h.

Documents: Required are:

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Manifests.
2 Vaccination Lists.
3 Passenger Lists.
3 Ports of Call of the Last Month Lists.
2 Ballast Manifests.

The latter 3 lists can be made on 1 sheet of paper (in triplicate). No Maritime Health Declaration was asked for. All these documents were passed to the Agent, no Customs, Port Health, Immigration or Police visited the ship. Although some crew members were without Yellow Fever vaccination certificates this posed no problem with the Agent, he declared no vaccinations can be done here. Nor can the Derat Exemption Certificate be renewed.

Port Restrictions: The Agent warned that crew members could not use pounds sterling, U.S. dollars, Dutch guilders or other foreign currency ashore for fear of confiscation by the "authorities". The local currency is the Ouguiya, 100 of which are on par with £1 (approx.).

Ore: The grade "Siliceous Iron Ore Fines XBF" was extremely dusty. About 10 grades of ore are available from 3 different mines.

Water Density: From our observations at low water 1024 ozs. cu. ft. and at high water 1025 ozs. cu. ft.

Cargo Figures: All tonnages quoted this port are metric tonnes. Ship's figure was about 1,300 tonnes less than the shore quantity, however, the ship's figure was accepted and the foreman stated the shore installations were usually 1% high of the ship figure. Ship was loaded to the maximum draft of 53 ft. but a great deal of difficulty was experienced reading the draft due to the seaway.

Unberthing: This was carried out on the flood tide. Single up to the 2 spring wires aft, using small astern movements and helm movements which aided by the anchor will cant the head from the quay. When the anchor is aweigh, slip the springs and steam ahead of the jetty then using full ahead power and starboard rudder followed by full astern power the vessel is swung well within the turning area to head seawards.

Depths in Channel: Except for the area of the channel abreast Cap Blanc lighthouse where less than 1 m. beneath the keel the remaining parts of the channel showed 3 m. – 4 m. underkeel clearance.

Conclusion: It would appear impractical to enter ships of a larger physical size than ourselves at this port because of airdraft/outreach limitations, draft restriction and manoeuvrability problems. Although we were fortunate in having a trouble–free berthing and unberthing procedure serious problems could be foreseen if a vessel had a main engine failure or a sudden deterioration of the weather occurred during these manoeuvres.

SHIPMASTER'S REPORT: (1977). The landfall buoy 6 miles West-by-South from Cape Blanco does not exist. Buoy No. 0 approx. position 20° 40′ N., 17° 04.7′ W. has been removed.

SHIPMASTER'S REPORT: (June 1978). The following is a brief account of the port which is in addition to the information supplied in the "Guide", which may be read as being correct. The port, formerly Port Etienne, is in Mauritania, I found travellers are afforded every courtesy. There are two flights per week from Paris via Air Africa who are very good. The flights arriving here on Tuesday and Thursday. The plane returning from Dakar Wednesday and Friday. Spare parts can be landed here and taken out to the ship with minimum of Customs formalities though it would prove to be an expensive exercise. It must also be pointed out that it is not always possible for the plane to land here due to high cross winds and resultant sand storms at the runway, in which case the plane then proceeds to Dakar direct.

Custom Authorities are most interested in the amount of foreign currency brought in as there is a strict levy on this, care must be exercised in this respect. They are also most interested in the stores on board the ship and these must be strictly accounted for precisely.

The town itself of which I did not visit is a separate community from the mining town itself. The mining town itself is self-sufficient and both French and Mauritanians live here. There is a hotel, which is practical and clean with reasonable food. There is also a club with tennis courts, a post office, power station and cinema and a hospital where major surgery can be carried out. There is also an oil refinery which is uncompleted. Refined products are imported via a modern berth. Bunkers and fresh water are available here but in limited quantities and I would imagine costly.

There are no tugs. According to the Agent wireless telegraphy may be used alongside the berth although there is a Telex ashore. I found the Agent to be most helpful.

I was assured that seamen joining or leaving here do not require a visa only a passport and discharge book are required, of which I personally was never asked to produce.

The iron ore mine is approximately 650 miles from the loading berth, all the ore coming by rail and attacks are frequent by bandits and guerillas. This can cause lengthy delays to the ship as very little ore is stockpiled.

Loading is carried out by one loading arm which pours approximately 4,000 tonnes per hour. Weights loaded can be measured ashore and have proved to be quite accurate, however it is normally the practice to accept the ship's figures.

AUTHORITY: Societe Nationale Industrielle et Miniere (SNIM), B.P. 42, Nouadhibou, Mauritania. *Tel:* 114. *Telex:* 459 Snim Ndb. *Contact:* Port Department.

NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

LOCATION: Position of Trading Port 20° 53′ 48″ N., 17° 03′ 10″ W.

DOCUMENTS:

3 Crew Lists.
2 Stores Lists.
2 List of Personal Effects.
2 Lists of Ports of Call.
Cargo Manifest, even if nil.
Manifest of Passengers Disembarking or in Transit, even if nil.
1 List of Foreign Currency held by ship and crew.

PILOTAGE: Not compulsory but recommended, effected by SNIM/Cominor. Pilotage not available at night.

RESTRICTIONS: Depth of buoyed Channel 24 ft. Anchorage strictly prohibited in the Channel.

RADIO: Nouadhibou Radio – Call sign 5TA. Hours 0800 – 1800 daily.

It is recommended that vessels advise their Agent of ETA 72 hours prior to arrival.

VHF: Request Pilot through Port Captain on VHF Channel 16.

TUGS: One tug, 150 h.p.

BERTHING: Pier of 125 m. length connected to shore by a 150 m. long bridge.

Outside general berth for ships with a 24 ft. draft and a 160 m. max. length. According to certain vessel's accommodations, the extreme hatches cannot be discharged through quayside.

Inside berth for ships with a 15 ft. max. draft and a 80 m. max. length.

The maximum payload authorised on the bridge connecting the pier to the warehouses and the storage areas being limited to 10 tons, all heavy lifts over 10 tons are to be compulsorily discharged on lighters.

Lighterage Piers: Southern quay = length 80 m; depth 10 ft. Western quay = 180 m.; depth 10 ft.

The Southern quay is connected to SNIM/Cominor railroad network, allowing the loading of heavy lifts on railcars.

2 covered sheds: total 3,500 sq.m.

1 area with macadamised roads offering 30,000 sq.m. of storage connected to SNIM/Cominor railroad system.

Lighterage: Compulsory for any ship whose characteristics do not allow a safe berth. Compulsory for any loading or unloading of heavy lift over 10 tons.

Not compulsory in case berths are occupied and if manpower and equipment are still available.

CARGO HANDLING EQUIPMENT: 1 lighter × 150 tons, 2 flat top lighters × 200 tons.

14 cranes × 4 tonnes.
2 cranes × 15 tonnes.
4 stacker trucks × 3 tonnes.
1 stacker truck × 8 tonnes.
6 tractors.
16 trailers.
1 rail mounted crane × 70 tonnes (SNIM Property).
1 mobile crane × 50 tonnes, available on request for heavy lifts.
2 cranes on rails for containers.

STEVEDORES:

Working Hours. Normal hours: from 0800 to 1200 and 1400 to 1800 from Saturday to Wednesday.

Overtime: Saturday to Wednesday: 1200 – 1400 hrs. 1800 – 2000 hrs. Thursday: 0800 – 2000 hrs. Fridays and holidays: 0800 – 2000 hrs.

Nightwork possible after 2000 hrs. in order to finish.

During the time of Ramadan work finishes at 1800 hrs.

There is no work on the following holidays: New Year's Day (Jan. 1); Tabaski (El Aid) (variable date); Day of Reunification, (Feb. 26); El Mouloud (variable date); Labour Day (May 1); Africa Liberation Day (May 25); Korite (El Fatar) (variable date); Independence Day (Nov. 28); Christmas (Dec. 25); 1st Moharam (variable date).

The holidays corresponding to the Islamic Religious holidays are calculated from Arabic calendar.

FRESH WATER: Available in small quantities.

FUEL: Available in small quantities.

CARGO GEAR: Ship's gear used.

GENERAL: *Winds* mainly N./N.E. in the morning, N./N.W. in the evening. Wind force: variable from August to January, rather strong from February to July. Tidal current running North during Flood, and South during Ebb (1.5 to 2.5 knots).

Swell 0.80 m. max. Strong surge alongside all berths.

Rise and Fall HW 2.35 m. LW 0.35 m. difference = 2 m.

SURVEYORS: Bureau Veritas, Lloyd's and Salvage Association.

AUTHORITY: Port Autonome de Nouadhibou, B.P. 236, Nouadhibou. *Tel:* 21-34, 22-35, 22-76. *Telex:* 441 Mtn.

NOUAKCHOTT: 18.02 N. 16.02 W. (See Plan Book)

LOCATION: Nouakchott Wharf is situated in position Lat. 18° 02′ 08″ N., Long. 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

All vessels anchor off the port and movement of cargo is undertaken by barges and lighters.

WIND: The direction of the wind varies from N.N.W. to N.E. The predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When conditions are bad vessels should weigh anchor and proceed seaward as the coast offers no natural shelter.

CURRENTS: There is an almost permanent N.-S. current running at about 0.5 knots; it reverses S.-N. on a few days during the year.

SWELL: 2 kinds of swell have been observed: Local swell due to the coastal winds, varying from N. to N.W. in dry weather, and turning between N.W. and S.W. during the wet season.

ANCHORING ROADS CONDITIONS: The periods during which climatic conditions are liable to upset work are as follows: Strong swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the year.

WORKING CONDITIONS: Vessels must locate themselves as closely as possible, where they can anchor without risk, to the wharf, within the limits of their drafts (generally between 0.5 and 0.25 miles), in line. At the lighterage quay there is a depth of water of 7 m. – 8.5 m. It is preferable for a ring of lines to be placed in advance around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the wharf is 400 to 500 t.p.d. where goods in sacks are concerned. It is possible to work 2 vessels at once, but each will only work half of this tonnage.

Work is currently carried out on board by private companies, and on land, in the launches and lighters by the Wharf Organisation personnel.

As far as wharf personnel are concerned, during working days, the normal working hours are from 0800 to 1600 hrs.

Overtime day hours are from 1600 to 1900 hrs.

Night time working is considered to apply between the hours of 1900 and 0600 hrs. (currently impossible).

It should be noted that there is an overtime hour at the beginning and end of work, which is the time required to launch or bring barges on to the landing-stage.

RECOMMENDATIONS TO MASTERS OF VESSELS: Vessels must be at all times capable of gaining the open sea rapidly, since bad weather comes up very quickly, and the coast affords no natural protection.

WHARF: The working platform is 86 m.×21 m. and lies in a N.W.-S.E. direction; it is connected to the shore by a gangway 246.5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 axles of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq. m.

The wharf manager's office together with Police, Customs and radio office are located on the shore.

WHARF EQUIPMENT: 3 cranes with capacities of 20, 8 and 5 tons respectively.

FLOATING EQUIPMENT: 1 launch of 50 h.p., 2 launches of 100 h.p., 10 steel barges, internal dimensions 10 m.×3 m.×1.25 m. with capacity for 20 tons cargo. 1 steel barge, internal dimensions 13 m.×4 m.×1.35 m. with capacity for 30 tons cargo.

LAND EQUIPMENT: Goods are transported from the wharf to the storage area by 18 trailers each with a capacity of 8 tons. The port is also equipped with 2 tractors of 80 h.p. and 5 fork-lift trucks with capacity of 3.5 tons.

TANKERS: Dakar oil companies are presently building a hydrocarbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lines of 900 m. length.

SHIPMASTER'S REPORT: August 1978.
The following is to be read in conjunction with the information above.
Currents: Reversal of current is unpredictable and may last for several days on each occasion.
Anchoring Roads Conditions: While in the main the holding ground is good, there appears to be patches of hard sand where the anchor cannot take hold.
Working conditions: It is practical to work 4 vessels at once plus one of up to 5,000 tons d.w.t. at the new extension to the pier.

Present (August 1978) hours for ships at anchor are 0800 to 1600 hrs. (Ramadan) but Sunday overtime can be worked if vessel gives authority. It seems that this is very expensive as so many are involved.

At the pier extension work has been observed from 0800 to 2400 hrs. and a mobile crane is available there to assist ship's gear.
Wharf Equipment: There are 7 cranes with various capacities, two being used for lifting out barges for repairs and to house the tug launches at night. The mobile crane is backed up by some 8 small fixed jib carriers.
Tankers: The sea berth North of the pier is in operation.
Documentation: See "Nouadhibou".
Customs Control: The officer will not board until the Agent has entered the vessel with the necessary documents, hence there will always be a time interval between arrival and being boarded for inspection. So financial loss must be expected accordingly.
General Observations: Due to the lack of any VHF or similar communication system, it is difficult to assess the true performance of this port. It is most uncomfortable for any vessel of more than 7,500 tons d.w.t. unless the barges are prepared to come out to 7 or more cables from the pier. In the recommended anchorage the effect of swell and surf is such that the vessel frequently swings through a wide arc and the chances of breaking out the anchor are very real. The erratic current direction may also swing the ship towards the pier hence the above opinion. Other vessels may also anchor so as to swing across one's own cable and anchor.

SHIPMASTER'S REPORT: October 1979.
Anchorage: Vessel anchored in position Lat. 18° 02.2′ N., Long. 16° 02.7′ W. (with the lighthouse tower on the jetty bearing 101° distance 3.3 cables).
General: City of Nouakchott (the capital) is in position Lat. 18° 05′ N., Long. 15° 58′ W. The port jetty is in position Lat. 18° 02.1′ N., Long. 16° 01.55′ W. being about 7 km. S.S.W. of the city. The official languages are Arabic and French. There are asphalt roads, one which leads to Dakar. There is an airport (close South of the city) with connections to Dakar and Casablanca. Scheduled flights being published in the daily newspapers.
Time: GMT.
Authorities: No authorities come on board on arrival, however, after a few days an agent's clerk comes on board and takes all port forms and documents ashore. No store rooms are sealed but stores list is to be filled in properly.
Fresh Water: There is no possibility of supplying fresh water to vessels, therefore rationing of water is recommended on arrival due to the fact that turn of 30–40 days is normal for general cargo, bulk cargoes and bagged cargoes. Priority being given to vessels with cement cargo as construction of a new port is taking place 1.5 miles to the South. At most times there are 15-20 vessels at the anchorage.
Documents: Two copies of each of the following are required:
a. Crew List.
b. Health Declaration.
c. Vaccination List.
d. List of Ports of Call.
e. List of Arms and Ammunition.
f. Ship's Register and Tonnage Certificate.
g. Ship's Stores List.
h. Crew's Personal Effects Declaration.
i. Notice of Readiness/Manifest & Stowage Plans.

With regard to notice of readiness it is advisable to send cable via Dakar Radio. It is also advisable to ask the clerk for his identification card and ask him to sign a receipt for the above.
Shore Leave: Passports are needed for going ashore, only method of going ashore is by ship's own lifeboat or during working hours by the motor launches used for transporting barges.
Consuls: West Germany, China and U.K.
Medical: All services can be arranged by Agent.
Stores: Limited amounts of vegetables, cereals, coffee (instant) and milk (condensed) can be arranged by agent (all items are imported). There is no ship chandler.
Repairs: No facilities.
Repatriation: Can be arranged by Agent via Dakar.
Weather: See "African Pilot", Volume 1 and supplements. During the time the vessel was at the port (mid-September to mid-October) there was hardly any rain. Temperatures ranged from 20° C to 42° C depending on the direction of the wind. The barometric pressure was 1008 mb. (min.) to 1012 mb. (max.). Winds normally from the North to Northwest, being influenced by anticyclones in the Dakar and Casablanca areas. Occasionally winds were from the West, S.W., South, S.E. and East. The wind was from Force 3-5/6 for short periods which quickly caused deep swell and surf.

Easterly winds caused sand storms and visibility becomes poor.

The swell is reported to reach high levels in the first and last quarter of the year and vessels are advised to leave the anchorage when the rapid increase in wind appears. These winds come from two directions, namely, Northerly and Northwesterly.
Approaching/Pilotage: No Pilot available. Charts BA 3247 and BA 2078 Plan (1976/correction 1978). Vessels should approach the coast heading 090° from the 20 fathom line 9 miles to the West of the charted lighthouse (Chart BA 3247). The jetty is a good radar target at 37-40 miles and the radio beacon at Nouakchott "KC" on 297 kHz in position Lat. 18° 04.3′ N., Long. 15° 58′ W., is an excellent aid. The depths on this track are between 20 fathoms and a minimum of 30 ft., close to the shore line (0.25 miles offshore). There are no dangers or difficulties encountered approaching.
Navigational Aids: BA Chart 2078 Plan (1976/correction 1978) most charted buoys are not in correct position. The unlit wreck buoy in position Lat. 18° 01′ 32.2″ N., Long. 16° 02′ 48.8″ W., marks a wreck to the S.E., the wreck is not visible and the position is doubtful. For further information see the plan of the port made by the ship's officers.
Anchoring/Berthing: Anchorage is recommended in the area to the North of the green wreck buoy and between 0.25 and 0.5 nautical miles from the shore. A close anchorage is required during discharge to avoid long distances for the lighters and tugs. The jetty berth (N.W. end) could be used by vessels during calm weather and low swell. The berth is 52 m. in length and the jetty which runs in a N.W./S.E. direction is 86 m. long with a width of 21.17 m. If berthed alongside, good fenders must be available at all times and crew must stand by the mooring ropes.

Remarks: Receivers sometimes require a vessel to berth at the jetty but care should be taken, as if vessel causes any damage during the difficult approach or by swell, the authorities may sue the Master/Owners with high penalties and detain the vessel until payment is made. There has been an instance where a Master has been placed under "hotel arrest" and all papers and documents for the vessel kept ashore, resulting in a delay to the vessel of 40 days.
Stevedoring/Port Equipment: The stevedore company is So Ge Co Nouakchott, Societe Generale de Consignation.

The jetty wharf is connected to the shore by a 246.5 m. long bridge with two lanes each of 7 m. width. There is an old pipe-line in the centre of the bridge between the two lanes. The bridge runs in a 104° direction to the shore. At the Southern side of the jetty-platform there are 7 cranes (one damaged) with lifting capacities of 12.5 to 25 tonnes.

There are 5 motor launches (50-100 h.p.) for towing lighters to and from the vessels. There are also 10 steel barges (lighters) with a capacity from 20–70 tonnes. At night the launches are lifted onto the jetty and the lighters are either moored alongside the jetty or at buoys.

In addition to the 7 cranes there are available on the jetty and wharf area 10 mobile cranes and 5 forklift trucks (3.5 tonnes) and 2 tractors for transporting goods on trailers (total 18). Capacity of the trailers being from 8-20 tonnes.

Cargo is discharged into the barges and transported to the shore. Net slings mostly being used for bagged cargo and general cargo. There are stacking areas of 70,000 sq.m. and 45,000 sq.m. near the wharf. So Ge Co have 2 cold rooms (6 m.×3 m.). There are 4 sheds, storage area 2,000–4,000 sq.m. capacity.

Signals: When loaded barges alongside the vessel are to be collected by the launches, vessel is to sound 2 long blasts on the ship's whistle.

Average discharge rate: Bulk cargo 7.5 tonnes per gang hour and bagged cargoes 15 tonnes per gang hour, however, this is dependent upon barges and launches. The average tonnage discharged per day/gang is for general cargo 15–35 tonnes and bagged cargoes 35–86 tonnes.

Working hours: Monday to Friday 0800–1600 hrs. Saturday 0800–1200 hrs. Sundays and local holidays are on overtime.
Note: It is compulsory that 1 hour prior to and 1 hour after working hours is counted as overtime for shore gear preparation.
AUTHORITY: Monsieur Le Directeur Du Port De Nouakchott, Ministere De L'Equipement, Nouakchott, Mauritania.

Societe Nationale Industrielle et Miniere, P.O.Box 1260, Nouakchott. *Tel:* 22-74. *Telex:* 551 Snim Nkc.

Mauritius

PORT LOUIS: 20.09 S. 57.30 E. (See Plan Book)

PORT LIMITS: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the Outside Anchorage lie within the limits of the port defined by an imaginary line joining Pointe Aux Sables and Pointe aux Pimentes. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers or personnel.

PILOTAGE: Compulsory for vessels over 100 tons register. Vessels are piloted inwards and outwards at any time of the day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys though they may, in some circumstances have to be boarded at a greater distance offshore.

ANCHORAGES: Open roadstead with anchorages for vessels of any draft. Admiralty Chart No. 713 refers.

MAX. SIZE: Harbour Entrance depths from 12.8 m. to 36.3 m. Channel dredged to 12.1 m. Also see "Berthing".

RADIO: The Port Master requires to be notified of the date of the vessel's arrival, the length and draft and purpose of call, by radio as soon as it is possible for Master to communicate with Harbour either:

1. By CW transmission through the Government Radio Station (3 BA) at Vacoas on 500 kHz.
2. By R/T transmission through Port Louis Harbour Radio Station (3 BB 3) on 2182 kHz.

VHF: Port Louis Harbour Radio Station is equipped with VHF and maintains 24 hour watch on Channel 16.

TUGS: 2×830 h.p. diesel-engine tugs, *Betty Des Mascareignes* and *Winnie Des Mascareignes.* These tugs are available for deep-sea towage and salvage and are fitted with fire-fighting equipment, R/T and VHF. 3 smaller tugs of 320 h.p. are also available for harbour work and fitted with VHF.

BERTHING:

Quay No.1: Length 122 m.; maximum draft 11 m. at any state of tide, vessels up to 183 m. overall length can be accommodated. This berth is designed mainly for discharging petroleum products and bulk fertiliser. General cargo vessels and passenger ships are occasionally berthed at the Quay.

Quay Nos. 2-3: Marginal quays having a total length of 366 m.; maximum draft 10.2 m.; vessels up to 195 m. overall length can be accommodated. These berths are mainly used for general cargo operations.

Quay No. 4: (Container Terminal): Length 183 m., maximum draft 10.2 m. This berth is for container operations. A Container Park of 3.2 hectares is available for storage of containers. 2 heavy duty Hyster forklifts of 26 tons are available for handling laden containers.

Vessels must use their own gear to discharge/load containers. The movement from the hook to the Container Park and vice versa is carried out by tractor/trailer system.

1 × Ferranti Type 2 K90 gantry crane, max. payload 30 tons.

Quay D: Length 149 m., maximum draft 9.3 m. can take a vessel up to 183 m. overall length. This berth is used for discharging of petroleum products and loading of bulk molasses. Passenger vessels are also berthed alongside the quay.

Quay C: Length 121 m., maximum draft 5 m. Berth can take a vessel of up to 92 m. length berthed port side to. This berth is used mainly for the inter-island trade and discharge of cattle.

Sugar Terminal: A Bulk Sugar Terminal constructed on the South side of the harbour came into operation in 1980. Sugar is now loaded in bulk at a maximum rate of 1,400 t.p.h. Vessels up to 198 m. overall length can be accommodated at the terminal. Maximum draft for vessels loading sugar is 11 m. Two sheds capable of storing 175,000 tons of sugar each have been constructed. The Bulk Sugar Terminal is operated by the Mauritius Sugar Corporation.

Bulk Cement Berth: A bulk cement discharge point lies between Quay Nos. 1 and 2. Cement vessels up to 135 m. are regularly accommodated at this berth. Vessels up to 183 m. may be occasionally accommodated subject to adjacent berths being vacant.

Buoy Berths: 4 berths capable of taking ships up to 10.7 m. draft.

Length of ships berthed at the mooring buoys varies between 137 m. to 183 m.

Vessels are berthed/unberthed at any state of tide. Tidal range is about 0.8 m. maximum.

SPECIALISED CARGO HANDLING FACILITIES: LPG carriers berthed at Quay D. The Port offers full containerisation facilities. Quay No. 4 which became operational in 1979, is specially designed to receive container vessels. Cement discharging facilities also available. Rate of discharge 500 t.p.h.

STEVEDORES: Undertaken by the Cargo Handling Corporation Ltd.

Working hours: Monday to Fridays from 0700 to 1500 hrs., Saturdays from 0700 to 1300 hrs. Sundays and public holidays from 0700 – 1100 hrs. Overtime work is carried out during weekdays as well as on Sundays and public holidays if necessary.

MEDICAL: Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

FRESH WATER: Fresh water supplied by barges at any berth between 0700 and 1600 hrs. Arrangements can be made for supply before 0700 and after 1600 hrs. on payment of overtime. The loading rate is about 25 – 30 t.p.h. 4 barges of 50, 75, 85 and 110 tons respectively are available.

FUEL: Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and Shell Co.). The pumping capacity of the installations at Port Louis for furnace oil is between 150 and 200 t.p.h., and for marine diesel oil and gas oil 50 t.p.h. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay D. Furnace oil 1,000 secs. only is supplied on No. 5 West Berth.

A 400 ton bunkering barge available to supply vessels in harbour and outside anchorage.

REPAIRS: Almost any type of repair can be undertaken in Port Louis.

DRY DOCK: Stevenson Dry Dock. Largest vessel that can be docked 100 m. × 15 m., with a max. draft of 9.0 m.; vessels of up to 109 m. × 15.3 m. can also be docked, but at least 15 days' notice should be given.

CONSULS: *Consulates:* Australian, Austrian, Belgian, Canadian, Danish, Dutch, Finnish, German (Federal Republic), Norwegian, Portuguese, Spanish and Swedish. *Embassies:* American, Egyptian, French, Malagasy, Pakistan, Peoples' Republic of China and Russian. *High Commissions:* British and Indian.

HOLIDAYS: 1st and 2nd January (New Year's Days), 19th January (Cavadee); 2nd February (Chinese Spring Festival); 29th February (Maha Shivaratree); 12th March (Independence Day); 2nd April (Ougadi); 1st May (Labour Day); 30th June (Id-El-Fitr); 30th August (Ganesh Chaturti), 24th October (Divali); 1st November (All Saints' Day); and 25th December (Christmas Day).

POLICE/FIRE: Police Tel: 999. Fire Tel: 999.

TIME: Local time GMT plus 4 hours.

DEVELOPMENTS:

(i) Construction of a Grain Complex.
(ii) Construction of fishing harbour.

SHIPMASTER'S REPORT: June 1982.

Off Limits Call for Stores, Mail and Crew Changes:

Documents: (All local foms). 1 Parcels List, 1 Shipmaster's Report Inwards, 1 Ship's Record, 1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration, 1 Maritime Declaration of Health, 1 Crew Declaration, 4 Crew Lists.

Anchorage: Possible but not necessary for the 2 hour stop.

Max. Size: No limit.

Health: Vessel is boarded by 2 Quarantine Officials who grant Free Pratique.

Radio: An amended ETA had not been received 6.5 hours after transmission.

VHF: Port Louis Harbour Radio very helpful and will pass messages. We were not able to contact them until about 30 nautical miles to the West.

General: Vessel is also boarded by, 1 Customs Official, 1 Immigration Official and the Agent. After entry formalities are completed the ship-chandler boards together with any new crew. Despite cabled request our stores were not pre-slung and had to use ship's net slings. Require derrick amidships for stores and good lee, usually port side. Stores' boat is separate from Officials' boat.

SHIPMASTER'S REPORT: July 1982.

Port Limits: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the outside anchorage also lie within the limits of the port defined by a line joining Pte. Aux Sables and Pte. Aux Pimentes. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers and personnel.

Documents: Immigration: 2 Crew Lists, 2 Passenger Lists, 1 Certificate under Act No. 20 of 1973 (Form PF102).

Health: 1 Declaration of Health, 1 Vaccination List.

Customs: 1 Customs Form (Form F24), 1 Parcel List (Form F17), 1 Ship's Report – Inward, 1 Narcotics List, 1 Arms and Ammunition List.

Agent: 2 Crew Lists, 2 Passenger Lists, 1 Ship's Record – Port of Port Louis.

Note: Declare ship's cameras, VHF's TV's, etc. in bonded section of F17. If space allocated on F17 for crew "other items" is insufficient, use of a supplementary list is acceptable.

Clearance: Health, Customs and Immigration board on entrance. Clearance may be obtained at the Outer Anchorage but is subject to availability of personnel and may be limited to the purposes of anchoring listed in "Port Limits" above.

Approaches: Approach directions are well covered in the Sailing Directions and Chart No. 61592. The Citadel is easily recognised from considerable distance during the day. Closer in, the middle and upper ranges are visible, but the separation is not sufficient for good accuracy. The lower range is an orange daymark, located on the red roof of the Port Office, both faded to a rust colour. It is very difficult to locate and can be confused with the daymark on the light located on "B" Berth. The Northern red can buoy is large and makes a good radar target. The Southern BW is of skeletal construction and is subsequently harder to pick up visually or with radar. There is a tidal current that sets across the channel and at right angles to it.

Pilotage: Compulsory for vessels over 100 g.r.t. Vessels are piloted inwards and outwards at any time of day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys. The pilot boat is a white launch with a deck height of approximately 4 ft. There are only 2 Pilots, so movements may be delayed by congestion and night entrance curtailed.

Anchorage: Open roadstead with anchorages for vessels of any draft. Consult Chart No. 61592.

Tugs: 2 tugs of 830 h.p. and 3 smaller units of 320 h.p. for inner harbour work. Although fitted with radio and VHF, berthing is handled with whistle and arm signals.

Berthing: There are numerous speciality docks and berths for smaller vessels. The main deep-draft berth has 2 sheds for unitised and general cargo with one open container section. This new dock has excellent fenders but the older docks have virtually nothing. Bag goods are generally worked into lighters at mooring buoys.

When berthing to buoys, the vessel is berthed head-out on 2 anchors with additional headlines to a buoy. The stern is secured to the buoy by 4 ship's lines and a heavy shore wire. A messenger is necessary for taking the wire, and lashing straps to tie the eyes to the mooring rings must be supplied by the ship. The wire is taken through the centre stern chock, and one set of bitts must be kept free for it. Chafing gear on stern lines is advisable. Vessels berthed at the container berth may be required to send 4 lines to a buoy about 100 ft. off the corner of the dock.

Stevedores: One private company with monopoly. Expected to be nationalised in the near future. Hours are 0700 – 1500 with 1500 – 1800 overtime shift and overtime on Saturday 0700 – 1300 and 1300 – 1600. Sunday 0700 – 1100. In practice, they start 1 hour late and finish 1 – 2 hours early, with 3 additional breaks during the day. Maximum work day is about 7 hours, but piece work contracts can elicit up to 140 tons per gang/day shift. They refuse to work bag goods without heavy hooks, with resultant bag damage and leakage. The crew is expected to open hatches and perform initial spotting of booms.

Radio: Government Radio Station 3BA at Vacoas is on 500 kHz. and also has high frequency Channels. Port Louis Harbour Radio Station has 2182 kHz. and VHF Channel 16. They do not have regular traffic lists but are easily reached, particularly around weather reporting times.

The Port Master requires to be notified of the date of vessel's arrival, length, draft and purpose of call, by radio, as soon as practical with the above stations.

Medical: Medical and dental facilities are available with arrangements to be made through the Agent. Repatriation can be arranged. Radio Pratique is not available. Cholera and yellow fever vaccinations are required for arrivals from infected areas.

Consuls: The U.S. Embassy is located about 200 yards outside the main harbour gates and is easily recognised. The office is on the 4th floor, hours are 0900 – 1200 Monday – Friday.

Watchmen: 3 shifts: 0700 – 1500 hrs., 1500 – 2000 hrs. and 2000 – 0700 hrs. Number is at discretion of ship, but heavy pressure is applied to the Chief Officer to employ extra, claiming these are "normal" or "routine". If cargo is *free out*, watchmen are hired and paid by receivers, with vessel only providing meals. Quality is poor to fair. If vessel is at Outer Anchorage, no watchmen are available. There have been frequent incidents of thefts by bum-boats, so an adequate crew watch is recommended.

Customs Allowance: On arrival, officers and crew may have in their possession, an 8 day allowance of tobacco products and 4 day allowance of spirits per daily schedule of: Master: 1 oz. tobacco, 0.25 pint of spirits, 1 quart of wine, 1 quart of beer: Other Officers: 0.75 oz. tobacco, spirits same; Crew: 0.5 oz. tobacco, spirits same. (200 cigarettes for the 8 days is accepted as within amounts listed). 2 Customs Officers will be assigned to vessel, usually just during working hours, with vessel expected to provide a suitable room and meals.

Supplies: General supplies are available through Agents and private ship chandlers, though prices can be expected to be high for consumable stores and equipment. Repairs can be performed, but the shipyard dry dock is too small for larger vessels. Foodstuffs are not recommended. Fresh water is about $2/ton via barge. Fuel is expensive, about $45/bbl. for Bunker C. Numerous ship chandlers will solicit the vessel, many falsely claiming to be sent or approved by the agency. At time of writing, only Tropicana Co. is authorised by the agency.

Time: GMT plus 4 hours.

Holidays: There are 11 official holidays, and numerous others are observed in various degrees due to the mixed Chinese, French and Indian heritages.

Agency: Ireland Frasier, part of the Ireland Blyth group. Hours are 0830 – 1615 and the office is equipped with VHF Channel 10.

SHIPMASTER'S REPORT: October 1983.

Off Limits Call for Mail, Stores and Crew changes:

Documents: Documents required may be:

1 Shipmaster's Report Inwards – for Customs.
1 Parcels List Customs F.17.
1 Customs F.16 – Crew Declaration although they *may* accept ship's own form.
2 Copies Master's Report for Mercantile Marine Office also an addendum in duplicate and these forms are taken ashore by the Agent.
1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration.
3 Crew Lists on arrival.
2 Crew Lists on departure – to show newly joined personnel.

Immigration require international embarkation and disembarkation cards for all joining and departing personnel.

Port Health require Marine Declaration of Health.

All these papers are required even though the vessel is only there between 1 and 2 hours.

Ship's Spares: Any package for the vessel arriving from abroad should preferably be at the airport at least 2 days prior to the vessel's arrival as it takes time to clear such packages through Customs.

General: The Mauritius Sailors Home Society will exchange paperbacks – arranged through Agents.

AUTHORITY: Mauritius Marine Authority, P.O.Box 379, Port Louis, Mauritius. *Tel:* 08-0415. *Telex:* 4238. *Contact:* Director General.

NOTES

Please also advise Shipping Guides Ltd.

Mexico

ACAPULCO: 16.50 N. 99.54 W.

DOCUMENTS:
Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*
*One copy to be visaed by Mexican consul.

PILOTAGE: Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hours before arrival. Pilot boards at the port limits, approx. 1 mile from the entrance. Pilot station on VHF Channel 16 when vessel expected.

ANCHORAGES: Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

RESTRICTIONS: The Bay of Acapulco is a natural harbour surrounded by mountains, approx. 4 miles across at its widest part and 2.5 miles across at its narrowest. There are 2 entrances, 1 called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica Channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

MAX. SIZE: For berthing alongside max. draft 28 ft. 6 in.

HEALTH: When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

RADIO: Coastal station of Acapulco receiving on 8374 kHz in daytime and on 4180 kHz at night. Transmitting on 8514 kHz in daytime and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000 – 0600 hrs. local time.

VHF: Service available from 0630 to 2300 hrs.

TUGS: *Shipmaster's Report:* December 1984.
There are no tugs at Acapulco. Berthing and unberthing are unproblematic because of the use of anchor and aft buoy line and furthermore the help of mostly weak prevailing winds which blow parallel to the pier.

BERTHING:

	Length (m.)	*Depth (m.)*
Fiscal Quay	198	8.0
Coastal Quay	150	4.0
Passenger Quay	206	10.0
Fishing Quay	173	4.0
Yacht Quay	340	3.0

MEDICAL: Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

TANKERS: Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

FRESH WATER: Can be supplied from the quays using ship's hoses, rate about 15 t.p.h.

FUEL: Available.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

IDENTIFICATION CARDS: Not required.

CONSULS:

Denmark	Tel: 2.11.11	Italy	Tel: 2.25.10
France	„ 2.43.83	Norway	„ 2.19.56
Great Britain	„ 2.29.21		

REPAIRS: Minor engine repairs can be effected. No dry docks, only a slipway for vessels up to 100 tons.

Vessels may carry out own repairs only after permission obtained.

REPATRIATION: Can be arranged.

AIRPORT: International Airport situated 22 km. from the port, daily flights to all parts of the world.

TIME: GMT minus 6 hours all through the year.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police Tel: 2.00.40; Fire Tel: 2.00.42; Ambulance (Red Cross) Tel: 2.02.41. and/or 2.00.88.

TELEPHONES: Cannot be connected on board the ship but Master may make calls from the quay.

SHORE LEAVE: Allowed. Crew List to be left with gate.

AUTHORITY: Delegacion Coordinadora, Costera Miguel Aleman No. 320, 4th Floor, Office No. 2, Fiscal Quay Warehouse No. 2. *Tel:* 2-54-95.

Empresa de Servicios Portuarios, Costera Miguel Aleman, Free Zone Area. *Tel:* 3-56-58 and 3-56-59.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5. Mexico, II D.F. *Tel:* 553 87 11.

CAYO ARCAS: 20.11 N. 91.59 W. (See Plan Book)

SHIPMASTER'S REPORT: January 1982.

DOCUMENTS: *Agents, Customs and Immigration:* The Charterers Agents dealing with the paperwork when loading at Cayo Arcas are Benjamin Negroe Pawling, Consignatario de Buques, Calle 31 No. 1, Ciudad del Carmen, Campeche, Mexico. They only deal with the entry and clearance of the ship and preparation of the cargo papers. They also prepare and obtain a visaed Crew List irrespective of the fact that one might have been prepared and visaed at the previous discharge port.

The Customs and Immigration come by helicopter to the storage tanker and clear the ship when alongside. However, they will also clear the ship in the anchorage coming out on one of the tugs.

Papers Required: 6 Visaed Crew Lists (or plain Crew Lists with a letter from the Agent at the previous port stating that there was no Consul available).
2 Visaed Manifests for cargo on board.
2 Vaccination Lists.
4 Crew Declarations of Personal Effects.
2 Copies of Stores Lists.

During the 3 loadings at Cayo Arcas and the time spent at anchor off Coatzacoalcos no mention was ever made to the Work Permits which it was understood had to be obtained when working on the Pemex Charter. Perhaps these will be issued when the vessel loads at a port on the coast.

ANCHORAGES: 4 to 8 miles to the East of the flare in 25 fathoms, bottom sand, mud and shell. Good holding ground using 9 shackles of cable.

RESTRICTIONS: See "Loading".

RADIO: Radio communication via XFF2 . . . . Pemex Pajaritos, traffic list even hour GMT plus 30 minutes . . . . sometimes 5 to 10 minutes delay. No charges are made for any cables to Pemex.

Transmits:	Receives:
4346	4191
6442.5	6286.5
8690 (8690.5 Off Tune)	8382
12790 (12790.5 Off Tune)	12573
17075.5	16764

Always on 8 MHz, transmits on 12 MHz, receives 16 MHz.

During the course of the voyage, in addition to the arrival and departure cables, Pemex require the vessel's noon position each day, the ETA at the next port and any requirements such as bunkers and water. No acknowledgement is ever received and very few cables are sent to the ship by Pemex. Telex orders and instructions are routed via the Agent in the discharging port.

On approaching Cayo Arcas and the storage tanker, due to language problems (the Pemex operatives only speaking Spanish) all VHF calls are made through the English speaking officers on the tugs 'Eliska Theriot' and 'Martha Theriot' whose calling and working frequency is Channel 9. One of these English speaking officers also accompanies the Mexican Pilot-Berthing Loading Master and Pemex Representative to act as an interpreter when required and also when communication problems arise during cargo operations.

When at anchor off Cayo Arcas, information is usually obtainable via the 'Theriot' tugs.

BERTHING: Vessel moors port side to, alongside the storage tanker. This requires 8 parts of rope both forward and aft, 6 ship's lines and 2 from the storage tanker. All wires have to be fitted with rope pennants. Great care must be taken when going alongside to ensure that the ship's lines do not foul underneath the Yokohama fenders. Two tugs are in attendance, one forward and one aft using the tugs' lines. These are very heavy and require a messenger to heave them on board.

LOADING: Three lines are connected; these being 16 in. flexible rubber hoses with 12 in. reducers to the ship's manifold. They are connected by Pemex personnel but it is essential to have ship's staff operating the winch and the derrick gear. The API of the Maya Crude Oil is about 22.6 and the average loading temperature about 108°F. The maximum loading rate is 30,000 bbls./hr., however if the ship is receiving direct from the field, the rate drops to 15,000 bbls./hr.

It is advisable to leave the loading plan flexible as Pemex are likely to cease loading without prior warning and sail the vessel with deadfreight. The reasons for this can be due to the onset of bad weather or to ensure the ship leaves the storage tanker in sufficient time to enable the next ship to berth before dark. Unberthing is possible during the hours of darkness but the Pilots do not berth ships alongside the storage tanker between the hours of sunset and sunrise. The terminal requires 2 hours' notice prior to completion of loading and 10 minutes to stop operations. Communications between the ship and storage tanker is by a manifold watchman with a radio. These persons have a casual approach to their responsibilities and must be watched closely to make sure they are at the manifold when required.

Charles Martin Surveyors attend the vessel before and after cargo operations and insist on a visual inspection and manual dipping of the tanks. But they do not require water dips of the ship's tanks, a percentage allowance being noted on the Bills of Lading for these impurities.

Hydrogen Sulphide Content of Mexican Crude Oils: The H_2S content of the Maya Crude Oil is extremely high and all necessary safety precautions must be followed and adhered to.

FRESH WATER/FUEL: Fresh water, fuel oil and diesel oil are all available and are delivered to the ship by small coastal tanker or oil-rig supply tenders. They have to be ordered via Pemex preferably on the departure cable after leaving the discharge port. Whilst Pemex prefer to deliver bunkers when the ship is at the loading port, these commodities can be obtained in Curacao where Pemex have rented bunker storage facilities. Ships can avail themselves of this service when bunkers were not delivered in Mexico due to bad weather or some other cause.

DEVELOPMENTS: At the moment the only buoy in operation is No. 1 to which the storage tanker is moored. 'Boya Fija No. 3' and 'Boya No. 2' are in position as is the base for the hotel block 'HB CA1' and the degassing plant 'PBE-CA1'. It is understood the present completion date for these new installations is late March 1982 and production commencing some time after.

SHIPMASTER'S REPORT: May 1982.

DOCUMENTS:

Last Port Clearance.
5 Copies Crew List.
2 Copies Stores List.

PILOTAGE: Compulsory. Pemex Pilot boards 2 miles East of the berth.
ANCHORAGES: Depth 45 m. – 50 m. Bottom is sand.
RESTRICTIONS: Berthing daylight hours only. Unberthing at anytime.
MAX. SIZE: 350,000 d.w.t.
HEALTH: Pratique available day and night.
RADIO: Lantana Radio (WOE).
VHF: Terminal on Channel 11 only.
TUGS: 2 × 8,500 h.p. Both tugs required for docking and undocking.
BERTHING: Vessel berthed at No. 1 berth. Max. size permissible 110,000 d.w.t. Depth of water 42 m. Bottom is sand. Hoses connected on port side. No. 1 berth is alongside the storage tanker. However, after June 1st, 1982 the vessel will berth direct to the SBM.

Loading is through 3×12 in. hoses. Cargo is Maya Crude (API 22) which comes directly from oil production wells, through a gas separator. H_2S content is very high and dangerous.

The storage vessel is equipped with Yokohama fenders and also passes over 3 ropes forward and 1 rope aft.

Berth No. 2 (SBM): Max. size 250,000 d.w.t., hoses connected on port side.

Berth No. 3 (SBM): Max. size 350,000 d.w.t., hoses connected on port side.

No facilities for dirty ballast.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not possible.
MEDICAL: Services available.

SHIPMASTER'S REPORT: May 1984.

LOCATION: Lat. 20° 12.5′ N., Long. 91° 57.5′ W.

The port of Cayo Arcas Terminal is an open sea terminal located in the Campeche Bank, some 85 miles almost West of Campeche and 90 miles North of Puerto del Carmen. The Middle Cay is the biggest with a lighthouse (round concrete tower) elevation 75 ft., Fl. (2) 14 s. 14 M.

The terminal is formed by:

1. One platform gas stabiliser (called "Cabezal de Valvulas" on Chart 28260) located in position 20° 09.6′ N., 91° 57.8′ W., with a gas burning flare (conspicuous) visible at 30 miles equipped with Racon "C" (– · – ·).
2. One old gas burning structure located 1 mile S.W. of the above platform.
3. SBM No. 1 in position 20° 10.0′ N., 91° 59.0′ W.
4. SBM No. 2 in position 20° 08.8′ N., 91° 59.0′ W.
5. One fixed structure in 20° 11.4′ N., 91° 59.5′ W. to which is permanently moored the storage tanker "Venture Europe", capacity over 2 million barrels.
6. One anchored storage tanker "Seawise Giant" (capacity 4 million barrels) in position 20° 09.0′ N., 92° 01.5′ W.

The platform and both storage tankers are very good radar targets at 24 miles.

DOCUMENTS: 6 Crew Lists visaed by the Mexican Consul of the last foreign port or 6 Crew Lists and a statement from the Agent at the last foreign port that no Consul in the area. 3 Ship's Stores Declarations and 4 Crew Declarations.

CLEARANCE/OUTWARD DOCUMENTS: The Agent will prepare on board after loading, all required documents already signed and stamped by the due Authority. The Agent will also prepare the Bill of Lading and Cargo Manifest with the quantities given by cargo and Pemex Inspectors.

PILOTAGE: Compulsory for berthing/unberthing. Pilot boards 2 miles S.W. of the platform and he remains on board during all operations. Accommodation and meals must be provided.

ANCHORAGES: Outside Prohibited Zone about 8 miles East of the platform or 4.5 miles S.S.E. of the platform in approximately 50 m. of water. Good holding with 9 shackles in winds up to 35 knots.

BERTHING: When mooring at any of the SBMs have ready the port crane or boom to pick up gear. In the forecastle 1 mooring rope (not wire) with a tail of 3 fathoms length and 2.5 in. circumference to lash the shore rope. One gang of 10 men board the vessel with the Pilot to assist in mooring/unmooring and connection/disconnection of hoses. These 10 men remain on board throughout during vessel's stay and accommodation and meals must be provided.

2 Cargo Inspectors and 1 Pemex Inspector, and sometimes the Agent board the vessel with the Pilot. Accommodation and meals must be provided.

When mooring alongside the storage tankers, only 3 or 4 people remain aboard.

Mooring to Storage Tankers: Both storage tankers have Yokohama fenders on starboard side. Mooring port side alongside using 3 head ropes, 2 breast and 2 spring ropes fore and aft plus 2 breast ropes from the storage tanker forward. 2×12 in. hoses used.

Mooring to SBM Nos. 1 and 2: One tug is used (tug's wire) on starboard bow to assist in the mooring. One shore polypropylene rope 9 in. circumference to which a chain is attached must be heaved on deck. Minimum opening of the bracket or stopper 15 in. × 7 in., otherwise 2 shackles with a thick wire must be attached to the chain and passed around the bitt. 2×16 in. hoses used.

COMMUNICATIONS: ETA for Cayos Arcas Terminal: Send ETA to Pemex (Petroleos Maxicanos) Pajaritos via Pajaritos Radio Station, XFF2, working frequencies:

Transmits	*Receives*
4346	4191
6442	6286.5
8690	8382
12790	12573
17075	16764

Of the above frequencies only checked on 8 MHz.

Traffic list on even hours plus 30 minutes although some 5 to 10 minutes delay can be expected. Only listening to this station when South of Florida.

ETA to Pemex Pajaritos can also be sent via Lantana Radio Station, WOE when far from Cayo Arcas.

When close to Cayos Arcas communication with Port Control (stationed aboard "Venture Europe") via VHF on Channel 9.

ETA to Agent can first be sent via telex to Tampa Office relay Ciudad del Carmen and then by cable via Veracruz Radio Station, XFU.

FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not possible.
REPATRIATION: Embarking crew have to get permission from Immigration at Ciudad del Carmen before joining the vessel.

Disembarking crew cannot disembark, even if the Agent makes a request, until Immigration has cleared the vessel.

GENERAL:

Authorities: By helicopter from Ciudad del Carmen to "Venture Europe" and then by tug. Accommodation ladder requested.

Agent: Consignaciones de Buques, Canega Inc., with offices in Tampa, Florida. Telex: 803757 Canega B and Ciudad del Carmen, Campeche. Cable Address: Negroe, Ciudad del Carmen.

Charts: U.S.N.O. 28031, 28260.

COATZACOALCOS: 18.08 N. 94.25 W.

PORT LIMITS: From the centre of the channel at the bar with a radius of 0.5 miles to seaward.

DOCUMENTS:

Customs:

Cargo manifest, original and 4 copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.
Stores List, original and 1 copy.
Personal Effects List, original and 1 copy if vessel is arriving from another Mexican port. Customs release from that port must be produced.

Port Captain:

Clearance from last port.
2 copies Crew List.
3 copies Manifest of cargo for this port.

Immigration:

Crew List, original and 1 copy, bearing consular visa.
Passenger List, original and copy, visaed by consul.
All Crew Passports or I.D. Cards.

Health:

2 copies Crew List.
2 copies Passenger List.
Crew Vaccination Certificates.
Derat Certificate.
When vessels are anchored beyond the breakwater authorities board from the pilot launch.

The following must be made available for inspection.

Registration Certificate of Vessel.
Certificate of Inspection of Deck Machinery.
Certificate of Inspection of Machinery.
Freeboard Certificate.
Tonnage Certificate.
Radio Certificate.
Radio-telephony Certificate.
Emergency Procedure in the Case of Abandoning Ship.
Emergency Procedure in the Event of Fire.
Vessel Insurance Policy.
Copy of the Charter Party (where applicable).

PILOTAGE: Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessel's name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. 2 launches *Alcion* and *Vencedora.* The sound signal for calling the Pilot is 2 long blasts and 1 short blast. The light signal is a blue Bengal light.

There is a new cutter *Siriux.* The pilots' office has a VHF radio station, listening out on Channel 16.

ANCHORAGES: Ample anchorage grounds available outside the Bar of the Coatzacoalcos River.

Two anchorage areas have been established and are bounded by lines joining the following positions:

West Area:	A.	Lat. 18° 12′ 30″ N.,	Long. 94° 26′ 57″ W.
	B.	Lat. 18° 12′ 30″ N.,	Long. 94° 25′ 54″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 26′ 57″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 25′ 15″ W.
East Area:	A.	Lat. 18° 12′ 32″ N.,	Long. 94° 25′ 22″ W.
	B.	Lat. 18° 12′ 32″ N.,	Long. 94° 23′ 46″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 24′ 51″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 23′ 22″ W.

Anchorage exposed during Northerly winds when it is advisable to weigh anchor and proceed to sea.

RESTRICTIONS: Access Channel: 5,200 m. in length, depth 12.0 m. Secondary Channel: 2,200 m. length, depth 14.0 m.

MAX. SIZE: Max. draft crossing the bar is 37 ft. The Pajaritos Channel to the bar reaches 42 ft. (will shortly be 45 ft.)

Free Zone: Max. length during the day 200 m., at night 125 m. Max. draft. 31 ft.

Pajaritos: Max. length 225 m. Max. draft 37 ft.

HEALTH: Pratique never given by radio. Vessels granted Free Pratique when berthed alongside if no contagious illnesses aboard.

RADIO/VHF: Telegraphic transmitter type TH 600-M with an open sea range of 500 miles radius, frequencies of 512, 500, 432, and 419.5 kHz. Telephonic transmitter type TSB-500-Be with approx. range of 500 km., frequencies of 2182, 2270, 2542 and 2665 kHz. RDF transmitter type TT-1017-B with approx. range of 300 miles, frequency 312 kHz. Transmitter/Receiver for radiotelephony VHF type VFD-50PT/PR, with approx. range of 50 miles, frequencies in Simplex operation: Channel 12-156.6 MHz and Channel 16 International call-up 156.8 MHz. Duplex operation: Channel 26: Transmission 161.9 MHz, reception 157.30 MHz. Channel 27: Transmission 161.95 MHz and receiving channel 157.35 MHz. At the moment, there is a point to point link-up with national and coastal telegraphs, as well as teleprinters for national and international service No. 078-835 (the latter is said already to be installed and will shortly be operating normally).

Tankers: In addition local requirements are that ETA messages should be sent to Pajaritos PEMEX Terminal, Call Sign XFF2 as soon as possible after departure from the previous port and updated at least 72, 48 and 24 hours prior arrival, using following frequencies: 4191 kHz, 6286.5 kHz, 8382 kHz, 12573 kHz, 16764 kHz, 22253 kHz or 25094 kHz.

TUGS: The Free Zone has the "Servicios Portuarios del Istmo de Tehuantepec S.A de C.V.", who own the tugs *Quetzalcoatl* 2,400 h.p., *Olmeca* 1,600 h.p. and *P.L.M.8* with 600 h.p. for operations in the Free Zone and the Pajaritos Terminal, the first being able to undertake salvaging work due to extensive range of action.

A tug is obligatory for mooring, unmooring or changing position in the port. 1 tug for vessels of 2,500 g.r.t. and 2 tugs for vessels larger than 4,000 g.r.t. The signal for calling up tugs is 2 long and 2 short blasts on the vessel's siren. The signal for the tug to withdraw is 1 short, 1 long and 3 short. The tug will repeat the signal to indicate that it has been heard. Tugs are fitted with VHF radio listening out on Channel 16 and during working, on the channel which the tug captain is ordered to use.

BERTHING: *Free Zone:* This has a quay length of 1,900 m. (1, 2, 3, 4, 5, 6, 7, 8) with varying depths of water from 29 ft. to 31 ft. All necessary services for vessels are available. During the day, vessels up to 200 m. overall length can manoeuvre, and at night only vessels up to a max. length of 125 m.

Restrictions: Night service is suspended during times of strong currents in the Coatzacoalcos river.

Pajaritos Terminal: In this terminal PEMEX has 3 quays operating and 1 being constructed, those operating being PX1E and PX1W with operational depth of 33 ft. and 30,000 tons gross with lengths of 200 m. PX2E and PX2W with operational depths on the Eastern side of 33 ft. and with 37 ft. on the Western side, admits vessels of 225 m. overall length and 35,000 g.r.t. The Provisional Quay admits vessels with 37 ft. draft and 35,000 g.r.t. At this terminal, Pemex exports crude oils, fuel oils, and at the PX1E quay ethylene is loaded specifically. In the Western part of the lagoon, there is a manoeuvring basin with a radius of 300 m.

F.F.M. Quay: In the Eastern part of the Lagoon of Pajaritos, the Empresa Fertilizantes Fosfatados Mexicanos S.A. have their plants and a quay of 425 m., running E. — W., this quay being used for discharge of phosphoric rock in 4 mobile hoppers. Also, liquid sulphur is discharged, phosphoric acid is loaded, as are sulphuric acid and superphosphates. It has an operational draft of 33 ft., and takes vessels of 35,000 g.r.t.

STEVEDORES: No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hrs. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 t.p.h., working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 t.p.h. Rate of discharging 1,100 tons per day with ship's gear.

CRANES: 300 ton crane for handling containers.

MEDICAL: Hospital facilities available. Inform Agent in advance if treatment required.

TANKERS: Also see "Berthing" and "Rabon Grande". Tankers regularly moor in the Pajaritos Roads. There are 4 large quays for mooring 7 vessels up to 233 m., with max. depth at the quay of 33 ft.

The Provisional Quay has 2 lines of operation of 24 in. with 3×8 in. for crude oil.

Bunkers and Lubricants: Not available.

Fresh Water: Available at jetties but should *not* be used for drinking water.

Stores and Laundry Facilities: Available, but no bonded stores.

Limited dirty ballast facilities available. Vessels should arrive with clean ballast. Failing to do so can result in excessive delays.

All tanks lids must be closed when entering or leaving the port.

It is strictly prohibited to emit excessive amounts of smoke from the funnel.

Shore leave is normally permitted by the local Immigration Authorities, however the shore passes are only valid inside the city limit. Severe penalties will be imposed for crew members found outside City Limits. Pajaritos crude oil contains hydrogen sulphide – H_2S.

During rainy season (May/June and November/December) currents of up to 6 knots can be experienced in the river.

DENSITY: Average 1012.

FRESH WATER: Available at berths in Free Port area, delivered by 1.5 in. hose. Loading rate about 8 t.p.h.

FUEL: Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has, at Nanchital, a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17.5 miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least 1 day delay and heavy extra expenses.

Gas freeing equipment for Gas tanker at Nanchital.

CUSTOMS ALLOWANCES: No restriction for free use on board.

CONSULS: Norway and Netherlands.

REPAIRS: Minor repairs may be effected. Electronic repairs possible.

DRY DOCK: No dry dock available.

AIRPORT: At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.

TIME: GMT minus 6 hours.

HOLIDAYS: No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.

TELEPHONES: No facilities for placing telephones on ships.

POLICE/AMBULANCE/HOSPITAL: Police Tel: 2 01 22, Red Cross Tel: 2 02 85; Hospital Tel: 2 00 30.

SHORE LEAVE: Possible. Crew must have I.D. cards or passports. Passengers must have passports.

DEVELOPMENTS: The entrance channel up to Pajaritos roads has been dredged up to 42 ft. The quays in the Free Zone have been completely reinforced, vessels up to 31 ft. draft being able to come alongside. The warehouses for general cargo at quays 2 and 3 have been completed, with a covered area of 4,000 m. and normal loading capacity of 10,000 cu. m. There are sufficient open areas for positioning heavy loads or machinery. Apart from the lighthouse on the Gavilan Hill, in the Allende area (left bank), the port has light towers indicating the main entrance channel, another 2 to indicate the channel leading to Pajaritos roads. All 4 have flashing lights. The branch leading onwards to the Free Zone is indicated by a small tower with flashing white light. The lights of the promontories of the 2 headlands;— the East light is green, and the West light is red. The channel is marked with black coloured buoys with odd numbers, on the port side entering, and red with even numbers on the starboard side. Both sets of lights are of the flashing type. When continuing upstream towards Nanchital or Minatitlan, the bridge has to be passed under. Its characteristics are: Length 1,375 m. vertical clearance with the bridge up 35 m., with the bridge down 8.84 m. Horizontal clearance which can be used: 60 m. To have the bridge raised, vessels must give 3 long and 2 short blasts on the siren.

AUTHORITY: Delegacion Coordinadora, Edificio Zona Franca, Antiguo Puertos Libres. *Tel:* 2-19-46 and 2-10-00.

Empresa de Servicios Portuarios, Edificio Zona Franca. *Tel:* 2-30-89 and 2-03-46.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 8711.

DOS BOCAS: 18.37 N. 93.10 W.

PILOTAGE: Compulsory. Pilot boards 2 miles N.W. or North of the SBMs (Lat. 18° 37.5′ N., Long. 93° 10.3′ W.).

ANCHORAGES: North of SBMs in 20 fathoms.

MAX. SIZE: 250,000 d.w.t.

VHF: Pemex on Channels 9 and 16.

BERTHING: 2 SBMs in 14 fathoms and 20 km. offshore.

Tanks: 10 tanks for crude oil, each 500,000 barrels capacity.

DEVELOPMENTS: Project included supply port to service drilling rigs, petroleum port with 3 piers which will be able to load 12 vessels up to 60,000 d.w.t. simultaneously with liquid gas and petroleum products, 3 piers for loading crude carriers up to 100,000 d.w.t. and a container terminal.

SHIPMASTER'S REPORT: December 1984.

Shore Location: Lat. 18° 26.5′ N., Long. 93° 11′ W.

Sea Terminal: There are 2 SBMs 11 miles to the North.

SBM 1: Lat.18° 37.5′ N., Long. 93° 09.5′ W., 2 lines on port side of the ship, diameter 16 in.

SBM 2: Lat. 18° 37.5′ N. 93° 11′ W., 3 lines on port side, 16 in. diameter.

Documents: Customs Officer comes onboard with the Agent before mooring. Documents required:

Last Port Clearance.
6 Crew Lists with vaccination dates.
2 Passenger Lists.
2 Arms Lists.
3 Store Lists.
3 Crew Personnel Effects Declarations.

Anchorage: See British Admiralty chart No. 2626. Located between 5 miles and 10 miles to the North of the SBM. As it is not very good holding ground, pilots usually recommend a position to the N.W. 4 miles or 5 miles from the SBM, as less threatening in case of ship dragging (in Winter there may be Northerly gales).

Pilotage/Berthing: Before arrival call on VHF Channel 16 or 9 for Pemex Operations. Pilot boards at 1.5 miles West or N.W. of SBM with a tug bringing out mooring equipment and shore crew. The tug assists with mooring, then goes aft and passes a line to the poop. No berthing at night time.

Crude oil: Same as Rabon Grande. Loading rate 15,000 – 45,000 bbls./p.h.

Persons on board: During vessel's stay:

1 Pilot.
1 Loading Master.
1-2 Pemex representatives.
1 Inspector (Redwood, etc.).
9 or 10 crew required for mooring, connecting and loading watches (One man permanently on the forecastle deck and one on the bridge).

Repatriation: Crew changes may be arranged.

Shore Leave: It is not possible to have regular connection with the shore.

Shipchandler: Available via pilot boat, but food very expensive.

ENSENADA: 31.51 N. 116.38 W.

RESTRICTIONS: *Access Channel:* Length 1,000 m. Depth 10.0 m.

VHF: Port Authority on VHF Channel 16.

BERTHING:

	Length (m.)	*Depth (m.)*
Coastal vessel quay	483.0	4.0 – 9.5
Deep sea quay	725.0	10.5

Storage: Warehouses 15,024 sq.m. Open areas 40,000 sq.m. Covered areas 30,789 sq.m.

BULK HANDLING FACILITIES: Conveyor belt for handling limestone. Suction units for handling bulk cargoes at high capacity. Mechanical means for discharging Tuna and Anchovies.

MEDICAL: Hospital services available.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Mechanical, electrical and electronic repairs possible.

DRY DOCK: Floating dock for vessels up to 1,400 tons displacement.

AIRPORT: International airport at Tijuana.

AUTHORITY: Delegacion Coordinadora, Boulevard Teniente Azueta No. 101. *Tel:* 8.35.80 and 8.13.20.

Empresa de Servicios Portuarios, Teniente Azueta No. 224. *Tel:* 8.23.68 and 8.28.60.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, II D.F. *Tel:* 553.87.11.

GUAYMAS: 27.54 N. 110.52 W. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
6 Passenger Lists.
5 Stowaway Lists.
1 Personal Effects Lists.
2 Stores Lists.
2 Provisions Lists.
2 Arms and Ammunition Lists (1 copy visaed).
4 Cargo in Transit Lists.
Ship's Official Documents.
Ballast Certificate.
Clearance from last port.
International Health Declaration.
Derat Certificate.
Manifest of Cargo for Discharge visaed by Mexican Consul (original and 5 copies).

PILOTAGE: Compulsory. Pilot available throughout 24 hours. Pilot meets vessel at Fairway Buoy.

ANCHORAGES: Good anchorage in the vicinity of the Fairway Buoy. Depth 14.5 m. Bottom mud.

RESTRICTIONS: *Entry Channel:* Length 3,500 m., width 75 m., depth 10.5 m.

HEALTH: Free Pratique available by radio on arrival.

RADIO: Guaymas Coast Radio, "XFY". Receives on 425, 454, 468 and 480 kHz. Transmits on 429 and 489 kHz.

VHF: Pilot and Port Authority on VHF, but communications not reliable.

TUGS: 1×2,250 h.p.

BERTHING:

	Length (m.)	*Depth* (m.)
East Quay	323	10.0
South Quay	350	11.0

Storage: Warehouses 4,800 sq.m., open areas 141,000 sq.m., covered areas 6,772 sq.m.

BULK HANDLING FACILITIES: The port has a specialised installation for the handling of dry bulk cargo, provided and operated by Almacenes Nacionales de Deposito S.A.

Characteristics: Warehousing capacity 68,000 tonnes. 36 silos arranged in 2 batteries. Conveyor belts permitting simultaneous filling of 4 holds of the vessel, with an absolute maximum rate of loading of 900 tonnes/p.h. Truck tipper. Hydraulic ramp for discharging road transport.

CARGO HANDLING FACILITIES: Loading and discharge of vessels is at the following rates:

General cargo – 22 t./hr./hook (average).
Dry bulk cargo – 32 t./hr./hook (average).
Bales of cotton: average handling rate 100 hr./hook.
Railroad and road transport up to alongside ship.

Vehicle ferries of Caminos y Puentes Federales de Ingresos, connect this port with La Paz and Santa Rosalia.

The port has equipment for handling all types of goods.

The Free Zone permits a more rapid transit of goods through the port, and a very great saving in Customs procedures.

Fumigation is provided for cargo, vessels, road and rail transport vehicles.

Lighting for night work permits work throughout 24 hours.

STEVEDORES: Working hours: 0800 – 1200 hrs. and 1400 – 1800 hrs.

MEDICAL: Doctors and hospital available.

TANKERS: Pemex Jetty – depth 10.0 m.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Mechanical, electrical and electronic repairs possible.

DRY DOCK: Slipway for vessels of less than 800 tons displacement (1,250 d.w.t.). Also see "General".

AIRPORT: International Airport in Guaymas, 10 km. from town.

GENERAL: *Shipyards:* This is an important industry in the port with five shipyards handling the construction of fishing vessels for tuna, sardines and shrimps, with technology of international prestige. There is a slipway for repair of vessels drawing up to 15 ft., with a 135 m. long underwater ramp.

The Rodolfo Sanchez Taboada industrial zone managed by the National Fund for Port Development was created to activate industrial development in the port, and started with promoting industries allied to fishing, there being currently two fishmeal processing plants, a fishing vessel shipyard, and it is planned to install 25 more industries and a shipyard for construction of deep draft vessels covering an area of 173 ha. This complex has asphalted roads, electricity and drinking water supplies.

AUTHORITY: Delegacion Coordinadora, Muelle Patio, Edificio Zona Franca. *Tel:* 2-22-50, 2-34-35 and 2-33-70.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553-87-11.

LAZARO CARDENAS: 17.55 N. 102.10 W. (See Plan Book)

PORT LIMITS: Area within limits of anchoring described below. For "Arrived Ship", pilotage limits 1 mile to seaward from breakwaters.

DOCUMENTS:

7 Crew Lists.
2 Vaccination Lists.
1 Sanitary Health Declaration.
3 Stores Lists.
2 Personal Effects Lists.
Clearance From Last Port.
Voyage Memorandum, showing also Ship's Registry.
Derat Certificate and Cargo Gear Certificate regarding cargo.
5 Cargo Manifests.
5 Bills of Lading.

PILOTAGE: 24 hours advance notice through coastal station, addressed to "Puerto" Lazaro Cardenas, Mich. A VHF watch on Channel 16 is maintained Monday to Friday, 0800 to 1900 hrs. and at any time previously requested by ship's Agent. VHF range 45 miles. Pilot will board normally either at Sea Buoy (17° 53.1′ N., 102° 09.6′ W.) or at the anchorage, and at Master's request further out if required. In the event of heavy sea, vessel will be instructed accordingly via VHF.

ANCHORAGES: One mile West of Sea Buoy. Very good holding ground, care should be taken not to anchor on, or near leading line (304°) due to a submarine canyon with over 100 fathoms depths at 1 mile off the breakwater.

RESTRICTIONS: Vessels up to 200 m. LOA and up to 35 ft. salt water draft may enter or leave the port 24 hours a day, larger vessels or those with deeper draft only with daylight. Vessels with over 42 ft. salt water draft must wait for tide.

Access Channel: Length 1,400 m., depth 14.5 m.

Secondary Channel: Length 500 m., depth 14 m.

Turning Basin: 600 m. diameter and 14 m. depth.

HEALTH: Pratique can be granted by VHF radio. Automatic Pratique is granted when coming from another Mexican port.

RADIO: Radio Maritima Manzanillo "XFM" and Radio Maritima Mazatlan "XMA" are recommended coastal stations through which to route ETAs. Initial contact on 2182 kHz.

VHF: At port, 25 watt 45 mile range. Channels 6, 16, 26, 11, 12, 13 and 69. Initial contact to be made on Channel 16, manoeuvring on Channel 6, port operations on Channels 11, 12 and 13.

RADAR: No radar service available.

TUGS: 1 tug stationed permanently at port 1,900 h.p. twin-screw. Tug's lines used, no charge for lines. Vessels over 50,000 tons displacement should apply to Manzanillo for another tug through Agent.

BERTHING:

	Length (m.)	*Depth* (m.)
Metal and Mineral Quay	650	14
Container Quay	284	12
General Cargo Quay	504	9.7 – 9.4

Shore cranes and sometimes ship's gear used for steel products. Significant cargoes are steel structure, coke-breeze, pig iron and finished steel products, also grain and sugar.

BULK CARGO FACILITIES: There is a shore crane clam-bucket type 250 t.p.h. capacity capable of loading and unloading. Clearance from boom to MLLW 35 m. Conveyor belt system in operation.

CRANES: One container crane 40 tons lifting capacity is available. Clearance from boom to MLLW 31.2 m. Also 3×75 ton movable cranes (self-powered) can work anywhere on quay, 4 additional mobile cranes of 20 ton capacity are available.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 can handle containers and heavy lifts up to 40 tons. Berth No. 2 can handle bulk and ores.

BRIDGES: No bridges.

STEVEDORES: Agents will arrange for stevedores with Lazaro Cardenas Port Services Co.
MEDICAL: Advance notice required by Agents when medical assistance required, emergencies can be routed via VHF at pilot station (Channel 16). 2 hospitals and 2 clinics with a total of 40 beds available plus a new hospital with 50 bed capacity will accept seamen. Yellow fever and cholera vaccination desirable.
TANKERS: Mineral Wharf has 10 in. diameter lines to discharge fuel oil.
DENSITY: Highly variable, can range from 1024 in dry season to 1012 in rainy season.
FRESH WATER: Available. 3 in. pipe on Mineral Wharf (American standard thread), but is recommended to boil it for drinking purposes.
FUEL: No fuel available for vessels, only diesel of specific gravity 0.85 available in trucks.
FIRE PRECAUTIONS: Tankers should fit a good ground connection to quay and have 2 lines hanging fore and aft ready for emergency towing.
CONSULS: No consuls available at present.
REPAIRS: Small and medium size repairs can be done at the workshop of the steel works if previous advice sent to Agent and Port Services Company.
DRY DOCKS: No dry docks available.
SURVEYORS: Two independent surveyors available for draft surveys, on/off hire and damage, can be contacted through Agents.
GANGWAY/DECK WATCHMEN: Not necessary or recommended.
HATCHES: Normally done by crew members, or by stevedores at ship's request.
CUSTOMS ALLOWANCES: There are no regulations. It is according to the Master's judgement for his needs for the stay in the port.
CARGO GEAR: Normally done with ship's gear but shore cranes are available upon request. Heavy lift cranes up to 40 tons.
REPATRIATION: All facilities for crew changes.
AIRPORT: Zihuatanejo Airport, nearest 135 km. 5 daily flights to Mexico City with connections to all parts of the world.
TIME: GMT minus 6 hours.
HOLIDAYS: 1st January, 1st February, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when there is change of President
POLICE/AMBULANCE/FIRE: Police Tel: 2-0154. Ambulance Tel: 2-05-75. Fire Tel: 2-03-33 ext. 1020 and 1000
TELEPHONE: No shore connection available.
SERVICES: Only ship chandler and laundry.
SHORE LEAVE: Crew members allowed shore leave without any special permit.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: No special regulations.
DELAYS: No delays expected.
GENERAL: Salinity in basin and docks always changing and subject to tides and river flow, recommend taking at least 5 samples from keel to surface to get an adequate average of salinity.
DEVELOPMENTS: Fertimex Berth: Phosphate rock, length 509 m., depth from 12 m. to 14 m. Grain Berth: 250 m., depth from 12 m. to 15 m.; "L" shaped berth, outside 250 m., inside 210 m. with depth 11 m.
AUTHORITY: Oficina de Operacion y Desarrollo Portuario. Unidad Administrativa S.C.T. *Tel:* 2-01-97, 2-17-79 and 2-01-24.

Port Services Company: Empresa de Servicios Portuarios, Rio Tepalcatepel No. 29, Lazaro Cardenas, Mich. Mexico. *Tel:* (Operations) 2-00-37, (Administration/Management) 2-17-22, 2-17-23, 2-20-64 and 2-20-65. *Telex:* 01772873 Cplcme.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico 11, D.F. *Tel:* 553-87-11.

MANZANILLO: 19.03 N. 104.20 W. (See Late Plans)

DOCUMENTS:
14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo manifest.
PILOTAGE: Pilot station on VHF Channel 16, only keeps watch when vessel expected. Pilots are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is painted letter "H". International Code signals used. Pilot normally boards vessel about 1 or 2 miles from breakwater but if requested in advance the pilot boat will come out to 5 or 6 miles. Pilot cannot board in rough weather. Vessels waiting for Pilot may anchor about 2 – 3 miles N.W. of breakwater in depths of 12-15 fathoms.
ANCHORAGES: Vessels may anchor in the whole North part of the Bay where depths are 12-15 fathoms at a distance of 1 – 2 miles from the coast.
RESTRICTIONS: Vessels may enter at any time day or night.
Access Channel: Length 450 m. Depth 12.0 m.
MAX. SIZE: No limitation for anchoring in the bay. For mooring alongside, max. length 200 m., max. draft 32 ft.

Also see "Tankers".
HEALTH: Port Health Officer and Immigration Officers board vessel at anchorage. Passengers and crew may be required for inspection.
RADIO: Coastal station Manzanillo Radio, call sign XFM, operating 0600 – 1800 hrs. local time.
VHF: See "Pilotage".
TUGS: 1 tug available, compulsory to use tug when mooring alongside. Tug will join vessel as ordered by the Pilot.
BERTHING: Old Port:

Name	*Length* (m.)	*Depth* (ft.)
Muelle Fiscal Quay		
East Side	230	36 (Outer End)
		16 (Inner End)
West Side	220	36 (Outer End)
		20 (Inner End)
Coastal Quay	305	13 – 20
Naval Quay	165	13 – 37

New Port:
1,092 m. of New Quays with depths 32 ft. – 36 ft. completed.
685 m. of new quay under construction, depth alongside 14 m.
Depth in channel and South End of Basin is 36 ft.
STEVEDORES: Advise Agent in advance number of gangs required. Discharge rate approximately 20 t.p.h. – 25 t.p.h. per gang.
MEDICAL: Agent should be advised in advance if medical attendance required on board. Hospital facilities available.
TANKERS: 2 berths available, max. length 650 ft. No restriction on beam. Max. draft: N.E. side 31 ft. (Forward) and 38 ft. (Aft). S.E. side 33 ft. (Forward) and 38 ft. (Aft).
FRESH WATER: Should be ordered in advance. Rate of 10 t.p.h. Vessels must furnish own hose for pumping, 2 in. coupling. No barges available for delivery at anchorage.
FUEL: Should be ordered in advance. All grades available. May be expensive due Customs fees.
GANGWAY/DECK WATCHMEN: No shore service available.
OPENING/CLOSING HATCHES: Normally performed by crew members.
CUSTOMS ALLOWANCES: Each crew member may retain 1 carton of cigarettes, and 1 bottle wine/spirits for his own use. No alcohol may be taken ashore.
IDENTIFICATION CARDS: Not required. A Crew List should be left at the gate for checking crew.
CONSULS: Nearest are at Colima and Guadalajara.
REPAIRS: Only repairs to auxiliary machinery can be effected with permission. At Guadalajara hull repairs may be effected provided dry dock not required.
REPATRIATION: Can be arranged.
AIRPORT: Local airport only for internal traffic.
TIME: GMT minus 6 hours all the year round.
HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.
POLICE/FIRE/AMBULANCE: Police Tel. 4; Fire Tel. 23; Ambulance Tel. 96.
TELEPHONES: Cannot be connected on board ships.
SHORE LEAVE: Permitted, except for crews of Russian, Cuban and Communist Chinese vessels.

Crew members left behind by vessel must be covered by 10,000 Pesos bond to guarantee repatriation expenses.
DEVELOPMENTS: Improvements are in progress to accommodate vessels up to 30,000 tons with a draft of 40 ft.
Shipmaster's Report: December 1984. A new port is under construction in Laguna de San Pedrito close East of the Old Port. There are already piers to accommodate 4 medium size vessels, and cement poles are being rammed all around the Lagoon, also dredgers are dredging the Lagoon to an expected depth of about 14 m. (See Late Plans).
AUTHORITY: Delegacion Coordinadora, Teniente Azueta – S/No., Port Operation Buidling. *Tel:* 2-07-89 and 2-00-04.

Empresa de Servicios Portuarios, Fraccionamiento Plaza Azul, Lote 9. *Tel:* 2-12-54 and 2-13-72.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico II D.F. *Tel:* 553 87 11.

MAZATLAN: 23.11 N. 106.26 W.

DOCUMENTS:
Port Clearance from previous port.
4 Store Lists.
12 Crew Lists.
2 Passenger Lists or Nil Passenger List.
(All to be stamped by Mexican Consul or a representative of a friendly country).

On arrival the following officials board:
Port Health Authority.
Customs.
Agricultural Department Authority for checking ship's provisions, mainly vegetables.
Doctor for checking 'meat' in the fridge room.
Immigration.
Ship's Agent.
Port Authority representative.

The (provisions) meat room is sealed after inspection by the doctor; every morning the seal is broken and resealed after the day's provisions are taken out.
PILOTAGE: Pilots can be contacted on VHF Channel 16. Pilots board in position Lat. 23° 10′ 24″ N., Long. 106° 26′ 24″ W. with Creston Island Light bearing 116° (T) × 0.4 miles.

APPROACHES: The approach is clear with no obstructions except Piedra Negra Rock which is just 7 ft. above the water. Vessel should head for Creston Island Light, keeping at least 2 cables clear of Piedra Negra Rock.

ANCHORAGES: *Shipmaster's Report:* Anchorage is not in the position marked on the British Admiralty Chart. I was told about this by the Pilot when he boarded. The anchorage is now shifted and a vessel should anchor East of a line drawn North/South through the Eastern tip of Island Chivas, East and clear of Piedra Negra Rock but outside the 10 fathom line. The holding ground is not good. Creston Island Light is a very powerful light, but its characteristic is now Fl. white every 8 sec. and not as marked on the chart.

RESTRICTIONS: *Access Channel:* Length 1,500 m. Depth 10 m. *Secondary Channel to Fishing Port:* Length 1,400 m. Depth 7 m.

RADIO: Mazatlan has a coastal radio station but only works on medium frequency.

VHF: See "Pilotage."

TUGS: Only 1 tug is available, if a second tug is required it has to be called from another port.

BERTHING:

	Length (m.)	*Depth (m.)*
Main Quays	981	10
Ro/Ro Berths	2 berths	10

TANKERS: Max. draft 29 ft. and LOA 590 ft., however tankers of 629 ft. LOA have discharged.

STEVEDORES: Gangs work from Mondays to Saturdays from 0800 to 1700 hrs. Any work after 1700 hrs. till 0700 hrs. next day and from 1700 hrs. on Saturday till 0700 hrs. Monday is overtime. Cotton bales are loaded at the rate of 85 to 90 bales per hour per gang. The bales stow at 29/30 cu.ft. per bale.

FUEL: Can be supplied, but has to be arranged in advance through PEMEX (Petroleos Mexicanos) office in New York. Diesel oil is normally supplied by trucks.

FRESH WATER: Can be obtained at any time and is supplied by hoses (ship's hoses) from the quay at about 9 Pesos per ton.

REPAIRS: Workshop for mechanical repairs. Electrical and electronic repairs possible.

DRY DOCK: Shipyard and slipway for small vessels.

STORES: Provisions are available, however it is difficult to get a variety and frozen vegetables are not available.

MEDICAL: Assistance available.

IDENTIFICATION CARDS: Not required, crew can go ashore, there are no restrictions, but all passports and seamen's books are kept in the custody of the Master.

REPATRIATION: Can be arranged via Mazatlan Airport or Mexico City.

TIME: GMT minus 7 hours throughout the year.

AIRPORT: International Airport.

SHIPMASTER'S REPORT: December 1978.

Pilotage: Pilot compulsory. Pilot boards 1.5 cables off the South breakwater. ETAs and amendments to be sent as soon as possible after leaving previous port.

Restrictions: Vessels can enter and leave day and night. However, they can only sail on the flood tide. Tidal range approximately 3ft.

Tugs: Tugs available but power not known.

VHF: Pilot, Port Authority and Agent on Channel 16.

Services Available: Fresh water (must be boiled for drinking). Fresh provisions. Airport (3 miles from city). Salvage Surveyor. Laundry service. Bunker fuel oil. Doctor and Hospital. Groceries and meats.

Density: 1020.

Charts: U.S. Chart 21301. B.A. Chart 3060.

Ship Anchored: 4 cables S.W. of Cerro del Creston Light in dense morning fog, depth 13 fathoms.

Pilot Boat: Low power, black hull with white superstructure, only came out to ship when the fog cleared. Requested first a gangway to board but afterwards changed his mind for a pilot ladder in view of a slight swell. Pilot boat also handled the ship's mooring lines at the berth.

Breakwater: Quite narrow to pass through.

Buoys: Mostly all covered in guano.

Berth No.3: As there was a bulk carrier on the next berth the ship had to overhang the berth by approximately 12 m. However there were bollards on shore away from the quay to provide suitable leads for stern lines. The quay was low, lying approximately 3 m. above the water with 1 m. maximum rise and fall of tide.

Note: Admiralty Tide Tables do not give any data for this port other than its range. U.S. tide tables give all required information.

Depth of Water: Average depth after sounding round hull was approximately 9.5 m., shallowest depth 8.5 m.

Officials: There is a Customs and Police gate on the quay.

Cargo Work: The ship loaded from refrigerated road trucks. The labour set their own derricks and took out the beams and plugs. However, it was over two hours before the first sling came onboard. Meal breaks were long necessitating the covering of open decks with plastic sheets to keep the cold air in. The cargo was not stowed very well, most of it was very crooked with large gaps between the deckhead and cargo. Gross hourly cargo rate is approximately 8 t.p.h.

Pilfering: There did not appear to be much pilfering. Keeping the offshore doors and the store rooms locked is a good precaution.

Early Morning Fog: On two mornings we had fog, clearing between 1030 and 1200 hrs.

Fresh Water: Available alongside the berth, appears to have no meter on it and we had to use our own hose and coupling. However pipe was left connected and we could top up whenever required.

Painting: No objection was made to painting the ship's side from a painting punt.

Lifeboat: Starboard lifeboat was used for a trip to the beach, boat however should not be landed because of the heavy swell.

SHIPMASTER'S REPORT: August 1979.

Navigation: Best chart is American. U.S. Chart No. 21301.

Anchorage: Recommended position with Cerro del Creston Lighthouse bearing 310° distant 2 miles in approximately 10 fathoms.

Approach: Straightforward but note that the small island off harbour entrance (Piedra Island) is often unlit.

Communications: Mazatlan Radio (XFL) has a range of 2,000 miles.

VHF: Pilots have Channel 16, also tugboats.

Pilots: Compulsory, board at anchorage or about 1 mile from breakwater entrance. Use a variety of craft. Board via pilot ladder.

No large ship movements permitted at night or during strong tidal streams.

Ro-Ro ferries, which also take Pilots in and out, have priority at all times.

Tugs: 1 only, low powered.

Draft: Presently restricted to 30 ft. salt water.

Cargo Facilities: Discharged 18,100 tons bulk soya bean in 10 working days. Discharge rate very dependent on transport and truck (rail) availability. 24 hour working with 6 gangs into hoppers. All grain type cargoes from South America must be fumigated if loaded onto road trucks, this takes approximately 2 days. Ship's gear usually used for cargo operations.

Authorities: Require the following in addition to ship's certificates:

12 Crew Lists
12 Passenger Lists
2 Crew Effects Lists
Crew Passports
6 Stores Lists.

The meat store of the vessel may be sealed if the Government Inspector considers that the meat is from an unsuitable country.

Repair Facilities: Minimal, mostly involved with the upkeep and repair of very large fishing fleet.

Surveyors: Nil – Nearest ABS Surveyor is in Mexico City 350 miles away, but will attend at two days' notice.

Medical: Good local facilities with English speaking staff.

Provisions: Excellent fruit, fish and vegetables. Meat of poor quality and expensive.

Hatches: Mechanical hatches operated by crew. Essential to have adequate crew available at night in rainy season (August to October) while working cargo at night.

Watchmen: Not required or compulsory. Little thieving experienced.

Laundry: Excellent quality and price.

Cash: Both Mexican pesos and US Dollars available.

Time: GMT minus 7 hours.

Repatriation: Several flights daily from local airport direct to Southern and Western U.S.A. airports. This avoids having the Agents post a 'bond' if travelling via Mexico City.

Agents: Most have telex, either via Mexico City or direct international. Telephoning overseas reasonably efficient. Mail services 7 days to Europe.

Fresh Water: Available at piers – should be chlorinated prior to use.

Bunkers: Only diesel oil available – sole supplier Government owned 'Petromex'.

Shore Labour: Not available as heavy port congestion at present.

General: Mazatlan is one of the largest ports in Mexico, 6 berths and is also a large resort with excellent hotels and large numbers of tourists. It is also the largest fishing port on the West coast of Mexico.

Port delays – Bulk carriers 4 days.
– General cargo ships 2 days.

(As at mid August) – this could change for the worse once the rainy season starts.

AUTHORITY: Delegacion Coordinadora, Av. Miguel Aleman 120-Oriente, Desp. 2. *Tel:* 1-69-45.

Empresa de Servicios Portuarios, Av. Emilio Barragan y Vicente Guerrero, Recinto Portuario. *Tel:* 2-02-78 and 2-38-11.

Comision Nacional Coordinadora de Puertos, Cuenavaca No. 5. Mexico, 11 D.F. *Tel:* 553 87 11.

MINATITLAN: 17.54 N. 94.35 W.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: See "Coatzacoalcos Pilotage". Port about 17.5 miles up-river from Coatzacoalcos. Vessels are piloted either up-river or down-river to and from Minatitlan.

ANCHORAGES: Only at Coatzacoalcos. At Minatitlan river is narrow and anchorage not permitted.

RESTRICTIONS: Vessels may enter harbour only in daylight. Latest time for entry and sailing to and from Minatitlan is 1500 hours.

Access Channel: Width 70 m. Depth 7 m.
Manoeuvring Basin: 850 m. × 190 m. Depth 7 m. – 11 m.

MAX. SIZE: Max. LOA at Pemex berths: 475 ft. Max. LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Max. draft permitted: 21 ft. in fresh water.

BRIDGES: See "Coatzacoalcos – Developments".

BERTHING: Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline, benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 73 m. depth alongside of 7.5 m. Actually only used to discharge harmless bulk fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.

TANKERS: No ballast to be discharged in the river. All ballast to be discharged to shore tanks through 2×6 in. pipe-lines.

PEMEX No. 1 Marginal Berth: Location 78 m. downstream from the South Face of the Lazaro Cardenas Refinery.
Arrangement: Marginal.
Length: 34 m.
Width: 12.4 m.
Useful Berthing Length: 34 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX No. 2 Marginal Berth: Location: Immediately after Berth No. 1.
Arrangement: Marginal.
Length: 103 m.
Width: 9 m.
Useful Berthing Length: 103 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX Quay No. 3: Location: 507 m. downstream from the South Face.
Arrangement: T Shaped.
Length: 12.5 m.
Width: 4.6 m.
Useful Berthing Length: 12.5 m.
Height Above Average Low Tide: 3.6 m.
Depth: 8.5 m. at Average Low Tide.
Services: Drinking water, 13 product loading and discharge lines.

PEMEX Quay No. 4: Location: 667 m. from the South Face.
Arrangement: Pier.
Length: 17.9 m.
Width: 14.8 m.
Useful Berthing Length: 37.8 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 4 m.
Depth: 9.4 m. at Average Low Tide.

PEMEX Quay No. 5: Location: 824 m. downstream from the South Face.
Arrangement: Pier.
Length: 21.5 m.
Width: 15.6 m.
Useful Berthing Length: 31.6 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 3.7 m.
Depth: 3.6 m. at Average Low Tide.

PEMEX Quay No. 8: Location: 1,063 m. downstream from the South Face.
Arrangement: Marginal.
Length: 91.7 m.
Width: 6.1 m.
Useful Berthing Length: 91.7 m.
Height Above Average Low Tide: 3.9 m.
Depth: 1.5 m. at Average Low Tide.

PEMEX Quay No. 9: Location: 1,178 m. downstream from the South Face.
Arrangement: Marginal.
Length: 240 m.
Width: 29.1 m.
Height Above Average Low Tide: 3.73 m.
Depth: 3.1 m. at Average Low Tide.
Services: Track for mobile crane, bitts, lighting and water (fresh), gas feed points.

Tanks: Tanks which PEMEX has within the General Lazaro Cardenas Refinery.

No. of Tanks	*Content*	*Capacity Millions of Litres*
10	Wax Crude	108.3
1	Non-wax Crude	5.3
10	Petrol	93.2
11	Diesel	94.7
7	Primary Paraffin	32.3
7	Turbosine	12.8
9	Fuel Oil	90.2
5	FR-3 Asphalt	20.3
11	Hexane Aromatics	8.8
2	Heptane Aromatics	0.9
1	Betolime	0.7
20	E. Benzine	13.1
7	Toluene	8.3
9	Xylene	6.8
2	Aromine	1.5
4	F.C.C. Catalytic	19.4
2	Heavy Aromatic	2.3
1	Reformed Naphtha	6.5
2	Formed Wood Spirit	11.6
1	Poli Gasoline	1.7
1	Refined	7.3
1	Primary G.	7.3
4	Absorption Liquid	7.6
3	Recuperated Oil	21.8
8	Neutral Lubricants	5.2
17	Finished Lubricants and those in preparation	2.2
9	Finished Lubricants and those in preparation.	1.5
11	Balance Tanks	81.0

STEVEDORES: No ETA advice necessary. Agent of Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hrs.

HEALTH: Pratique never given by radio. Vessels granted Pratique at anchor at Coatzacoalcos. Vessels must prepare accommodation ladder, to be boarded by port authorities.

TUGS: 1 tug required to accompany vessels past the Coatzacoalcos Bridge. Tugs rejoin vessels in the river on arrival at berth. Tug's lines used. For vessels over 2,000 g.r.t. 1 tug required; over 3,000 g.r.t. 2 tugs required.

DENSITY: Averages 1006.

MEDICAL: Hospital facilities available.

FRESH WATER: Available at all berths, but is not recommended.

FUEL: Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.

CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards remain on vessel while alongside.

REPAIRS: No dry docks available, but small repairs can be done in shore repair shops.

AIRPORT: About 15 minutes' car drive away. Regular flights to Mexico City.

TIME: GMT minus 6 hours.

TELEPHONES: No facilities for placing telephones on ships.

DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

MORRO REDONDO, Cedros Island: 28.03 N. 115.11 W.

(See Plan Book)

LOCATION: Morro Redondo: Bulk Salt Terminal Lat. 28° 10′ N., Long. 115° 11′ W.

DOCUMENTS:
3 Crew Lists in Spanish, visaed by Mexican Consulate in previous port.
12 Ordinary Crew Lists.
3 Stores and Provisions Lists.
3 Lists of Crew Effects.
1 List of Crew Vaccinations.
Clearance from Last Port.
Certificate of Registry.

The Authorities such as Port Health, Customs and Immigration together with the Agent will board after the vessel has berthed. Only in exceptional circumstances will the Authorities board at anchor or off the berth.

PILOTAGE: Pilotage available day and night. Pilot arranged by Agent on the basis of ship's ETA. Pilot boards when ship is within 1 to 3 miles of the berth, from a small MFV type pilot launch, painted black with white cabin and red deck. No radio.

ANCHORAGES: Good holding ground is found 1 – 3 miles North of the berth in 20 to 35 fathoms with the ship loading tower in line with the Morro Redondo Lighthouse.

RESTRICTIONS: None. Vessels enter and clear 24 hours a day on a first come first served basis. Height of chute above MLLW is 48 ft.

MAX. SIZE: Minimum depth alongside 17 m. Largest ship to date 160,000 d.w.t.

HEALTH: Pratique granted by Port Health Doctor who boards on arrival. Requires Crew Vaccination Certificates and Master's Declaration of Health.

RADIO: Vessels can transmit and receive through KFS San Francisco Radio or KOK Los Angeles Radio.

VHF: Loading installation calls VHF Channel 16 when ship is expected and gives any information at this time. VHF is normally manned on Channel 12 so further communication is available.

RADAR: None.

TUGS: 5 tugs are available ranging from 2,500 h.p. to 3,200 h.p. each. 2 tugs are normally used for berthing, 1 tug for unberthing. Tugs' lines at no extra charge.

BERTHING: 1 berth only, 710 ft. in length consisting of steel dolphins and wood facings, also large mooring buoys, 1 ahead and 1 astern, each about 600 ft. distance from berth. 2 mooring ropes must be bent together to reach buoys.

The large stockpile of salt at the root of the pier is conspicuous.

CRANES: None.

BULK CARGO FACILITIES: Port is solely for the purpose of loading solar salt in bulk. Loader is belt and spout type and is fixed in position. Vessel must be shifted from hatch to hatch by ship's crew.

STEVEDORES: No special requirements. Average loading rate 2,000 t.p.h.

MEDICAL: No advance notice required, doctor will attend on board at dock. Limited hospital facilities available.

DENSITY: 1026.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: No smoking allowed on dock. Usual requirements for oil receiving terminal.

CONSULS: None.

REPAIRS: No repairs possible.

GANGWAY/DECK WATCHMEN: Shore gangway only, electrically operated and tended by stevedores. Deck watchmen required.

HATCHES: Opened and closed by ship's crew.

CARGO GEAR: One fixed loader only, controlled by stevedores.

REPATRIATION: Possible, with advance notice to Agent.

AIRPORT: Close to berth. Average 3 flights per week to mainland.

TIME: Standard time GMT minus 8 hours. Daylight saving time GMT minus 7 hours from last Sunday in April to last Sunday in October.

HOLIDAYS: Cargo is worked every day of the week including Sundays and holidays (except Labour Day – 1st May).

TELEPHONES: No telephone contact with mainland.
TELEGRAPH: Government public telegraph services available in village about 11 km. from port.
SHORE LEAVE: Allowed. No special shore passes required.
AUTHORITY: Exportadora de Sal, S.A. de C.V., P.O.Box 150, San Diego, CA 92112, U.S.A. 530 "B" Street, No. 1230, San Diego, CA 92102, U.S.A. *Tel:* San Diego (619) 239 0131. *Telex:* San Diego 697829. *Cables:* Essa San Diego. *Contact:* Mr. M. Guzman, General Manager.

There is no telephone or telex on Cedros Island.

NANCHITAL: 18.00 N. 94.27 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos Pilotage". Port about 3 miles up-river from Coatzacoalcos.
ANCHORAGE: See "Coatzacoalcos Anchorage".
RESTRICTIONS: Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from 1630 to 0700 hrs.
MAX. SIZE: Max. LOA 580 ft. No breadth restrictions. Max. draft permitted 27 ft. 06 in.
HEALTH: See "Coatzacoalcos".
TUGS: When vessels proceed to Nanchital, 1 tug accompanies vessel to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 g.r.t. 2 tugs used.
BERTHING: Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard side to. There are 2 docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipe-line of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.

Old Pemex Quay:
Location: Right bank of Rio Coatzacoalcos 10.5 km. from the mouth of the port.
Built: 1950.
Arrangement: T-shaped.
Length: 88.3 m.
Width: 12.4 m.
Useful Berthing Length: 95 m. including Dukes of Alba.
Height Above Average Low Tide: 1.8 m.
Useful Depth: 8 m. at average low tide.
Services: Fresh water, lighting, bollards, fuel supply points.

New Pemex Quay:
Location: Facing the Pemex installations at Nanchital.
Built: 1969.
Arrangement: T-shaped.
Length of Platform: 32.4 m.
Width of Platform: 13 m.
Useful Berthing Length: 86.7 m. using 2 Dukes of Alba.
Height Above Average Low Tide: 2.71 m.
Depth: 9 m. at average low tide.
Services: Fresh water, lighting, fuel supply points, loading hoses.

Marginal Quay:
Location: On right bank of Rio Coatzacoalcos 11 km. upstream from port entrance.
Built: 1959.
Arrangement: Marginal.
Length: 239 m.
Width: 30 m.
Useful Berthing Length: 239 m.
Height Above Average Low Tide: 2.05 m.
Depth: 8 m. at average low tide.
Use: By Pemex.

Tanks: Used by Pemex:
3 for crude oil (8.2 million litres).
1 for fuel oil (15.2 million litres).
Located within inhabited area:
2 for diesel (1.59 and 8.7 million litres).
1 for fresh water (10.3 million litres).

MEDICAL: Hospital facilities available only at Coatzacoalcos.
TANKERS: See "Berthing".
BALLAST: Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by 2 pipe-lines of 6 in. diameter to shore tanks.
DENSITY: Average 1006.
FRESH WATER: Available at both berths but is not recommended for drinking.
FUEL: Available only at the Pemex Oil Terminal at any time.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards stay on board. Vessel to provide them boarding and lodging.
CONSULS: None.
REPAIRS/DRY DOCKS: No dry docks available, but small repairs can be done in shore repair shops.
AIRPORT: At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.
TIME: GMT minus 6 hours.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

PROGRESO: 21.17 N. 89.39 W.

DOCUMENTS:
Crew List visaed by the Mexican Consul and 7 simple copies.
Derat Exemption Certificate.
Passports or Seaman's Book for all crew.
Clearance from last Port of Call.
Passenger List visaed by Mexican Consul and 7 copies.
6 Stores Lists.
7 Manifests.
7 Bills of Lading (2 to be visaed).
Tonnage Certificate.
Certificate of Free Pratique.

PILOTAGE: Compulsory. Pilot boards about 3.5 miles North of the lighthouse from a fast launch. International signals to be used to call Pilot day and night. ETA should be passed to Agent via radio station at least 24 hours before arrival.
ANCHORAGES: Vessels waiting for a berth anchor 3 miles off the Fiscal Quay. The anchorage is marked on Chart H.O. 0966.
RESTRICTIONS: No night restrictions. Also see "Max. Size". No facilities for tankers.
MAX. SIZE: Max. LOA, 190 m. Max. draft 16 ft. (arriving), 16 ft. 06 in. (sailing).
HEALTH: The doctor boards the vessel at the quay. Where illness or fever is suspected on board, international rules are followed. If the vessel is arriving from another Mexican port, there is no health inspection. Radio Pratique is not obtainable.

Authorities require valid Derat Exemption Certificate.

RADIO: Progreso Radio XFN works from 0600 to 1900 hrs. every day and listens on frequencies 2,182 kHz and Channel 16 VHF on radio-telephony and 500 kHz on radio-telegraphy. Working frequencies are 2,756 kHz, Channel 14, Channel 13 and Channel 12 VHF for radio-telephony, and 420 and 429 kHz on radio-telegraphy. ETA can be passed through this station 24 hours in advance.
TUGS: No tugs available.
BERTHING: One pier heading 355° true. Berth available on both sides, East and West, with 204 m. length on each side, and both with 18 ft. depth alongside.
STEVEDORES: No ETA advice necessary if stowage plan received in advance by Agent. Otherwise, ETA advice for gangs required 6 hours prior to arrival. Stevedores' General Cargo discharging and loading rate about 12 tons per gang/per hour.
MEDICAL: Attention available. The port has a clinic. Hospitals are situated in Merida.
TANKERS: No facilities. See "Developments".
DENSITY: Average 1015.
FRESH WATER: Available from pier by hoses. Fresh water is treated in the plant.
FUEL: Bunkers are available. Delivery by tanker truck equipped with pumps. Diesel and fuel supplied. Agent requires 24 hours' notice.
FIRE PRECAUTIONS: No smoking allowed aboard vessels.
GANGWAY/DECK WATCHMEN: Not necessary, although sometimes Masters require them.
OPENING/CLOSING HATCHES: This work is normally carried out by stevedores, but sometimes is carried out by crew in order to save time in loading or unloading.
CUSTOMS ALLOWANCES: Any quantity to be used on board is permitted.
IDENTIFICATION CARDS: Not necessary, but crew must carry passport or Seaman's I.D.
CONSULS: The Consular Offices are located in Merida, the capital of State of Yucatan (20 minutes from Progreso by taxi):

Cuba	Tel: 1 66 77	Lebanon	Tel: 1 77 76
France	Tel: 1 60 13	Switzerland	Tel: 1 75 00
Germany	Tel: 1 21 77	USA	Tel: 1 60 30
Great Britain	Tel: 1 67 99		

REPAIRS: Small repairs can be carried out in shore shops. No dry docks available.
REPATRIATION: There are facilities for effecting crew changes and arranging necessary repatriation. All matters are handled by the Office of Immigration.
AIRPORT: International Airport in Merida, about 30 minutes from Progreso by taxi. Daily services to Miami, Fla., by Pan American World Airways and New Orleans, La., every 2 days. Other flights to Central America, Jamaica, and Germany.
POLICE: Police Tel: 5 00 26.
HOLIDAYS: January 1st; February 5th; March 21st; May 1st (Labour Day); September 16th (Independence Day); November 20th (Revolution Day); December 1st (every 6 years); December 25th. It is possible to work, paying 100% additional.
TELEPHONE: It is not possible to place telephones on board.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: S.B.M. to be installed.
AUTHORITY: Direccion General de Marina Mercante, Muelle Fiscal, 2 do Piso, Apartado No. 21, Progreso, Yuc. 97320. *Contact:* Captain Jose Omar Montalvo Hinojosa, Captain of the Port.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5. Mexico, 11 D.F. *Tel:* 553 87 11.

PUERTO MADERO: 14.44 N. 92.25 W. (See Plan Book)

PORT LIMITS: A vessel is considered an "arrived ship" when it is alongside the berth.

DOCUMENTS:

10 Crew Lists (Spanish language), 3 stamped.
10 Passenger Lists (Spanish language) 3 stamped.
10 Store Lists (Spanish language).
10 Cargo Manifest (Spanish language), 3 stamped.
3 Arrival Reports.
10 Bills of Lading.
3 Crew Customs Manifest.
1 W.H.O. Form.

All papers must be correct, Immigration Officer checks Crew List against all passports/seamen's book.

Vessels are boarded on arrival by 7 officials.

PILOTAGE: Compulsory. Pilot will board vessel 1 mile S.E. of Fairway Buoy, depth approximately 8 fathoms.

Vessel must send ETA 24 hours in advance of arrival. Ship's Agent to request services of Port Pilot in advance. Pilot will reply by giving instructions to be followed on arrival.

ANCHORAGES: Call the Pilot on VHF Channel 16 and agree on the position of anchorage and the side where the gangway will be positioned.

As a secondary area, vessels may anchor about 2 miles to the S.W. of the port entrance in 10 fathoms of water. The bottom is muddy at the anchorage and throughout the port.

RESTRICTIONS:

Access Channel	1,165 m. long	depth 8 m.
Channel Manoeuvring Area	450 m. long	depth 8 m.
Dock Access Area	350 m. long	depth 9 m.
Fiscal Dock	320 m. diameter	depth 9.5 m.

There is no entry to the port after 1800 hrs., and no sailings may take place before 0600 hrs.

MAX. SIZE: Max. LOA 165 m., max. beam 25 m., max. draft 8.0 m.

Measurements are in accordance with the manoeuvring area and the depth of water throughout the port.

Tankers are not received in the port as there are no discharge lines, and the manoeuvring area does not permit it.

HEALTH: Request Free Pratique 48 hours and 24 hours in advance of arrival via Salina Cruz.

Report any suspicious illness to Agent prior to arrival in order that vessel may be directed to Quarantine Anchorage.

Health Officials require:
Health Declaration.
Derat or Exemption Certificate.
Crew Vaccination Certificates.
Crew List.

RADIO: Via Manzanillo or Salina Cruz, ETA 48 hours and 24 hours prior to arrival.

All vessels approaching the port to berth, and when effecting manoeuvres within the area of the port or when leaving the port, must effect all communications by VHF Channel 16.

Additional communication or for safety provided by the Naval (Coast Guard) on 500 kHz. International Call Sign for Aid to Fishing Vessels 2182 kHz on R/T or Channel 16 VHF.

VHF: Salina Cruz and Puerto Madero on VHF Channel 16.

RADAR: There is a radar system but it is only used by the Naval "Coast Guard", and no contact with this system is possible, although all vessels approaching this port are detected by this radar.

TUGS: There is a service tug (750 h.p.) which comes alongside the vessel at the port entrance, working with vessel until she is berthed alongside a quay. The services of the tug are compulsory for all shipping.

BERTHING (Port under construction): There are 2 reaches, an expansion basin, a turning basin and a general cargo berth 150 m. length, the depth is 9.5 m. at LW (salt water).

The first reach is entered on a heading of 043° (T) and passes between the breakwaters, one of them 850 m. length and the other 650 m. length, the channel has 80 m. width. The second reach commences at the shore end of the breakwaters on a heading of 022° (T) for a distance of 250 m. The third reach is on a heading of 006° (T) and length of 650 m. At the end is the turning basin 320 m. wide and 350 m. length and depth 9.5 m.

Vessels usually moor port side alongside and drop the starboard anchor with 3 or 4 shackles. The cargo handling is by means of ship's own gear and there are four conveyor belts for the handling of boxed bananas.

CRANES: The port has no cranes, discharge and loading has to be with the ship's derricks.

BULK CARGO FACILITIES: In the port is a single general cargo berth. Bulk cargo is handled directly from the hold to the lorry or railway trucks using hoppers and scoops and loaded into the hold and raised by the ship's derrick.

At present the port handles bananas and coffee outwards and bulk fertilisers (and in sacks) inwards. Also bagged cement and heavy machinery for hydro-electric stations.

SPECIALISED CARGO FACILITIES: There is no equipment for handling container vessels.

BRIDGES: The entry of vessels is free, there being no bridges over the channel.

STEVEDORES: Masters of vessels must request the requisite number of gangs 24 hours in advance via the ship's agent.

General cargo – 18 to 20 tonnes/p.h./hook.
Bananas – 3,000 cases per hour by the side-port system.

MEDICAL: 24 hours' notice for requesting medical assistance.

A sick person can be hospitalised if the Master so requests by radio.

International Health requires Certificates of Vaccination and where necessary personnel can be vaccinated if required.

TANKERS: No facilities.

DENSITY: Average 1025.

FRESH WATER: The port quay has drinking water hydrants controlled by the Superintendency of Port Operations.

FUEL: It is possible to provide bunkers in small quantities via pipes, average supply 15,000 litres.

In cases of emergency, bunkers can be requested by radio from the ship's Agent.

FIRE PRECAUTIONS: Those normal for a cargo vessel.

CONSULS: There are no Consulates in the port. There is one in the town of Tapachula, Chiapas, 28 km. from the port.

Consul of Guatemala: 2a Calle Oriente No. 33, 30700 Tapachula, Chiapas. Tel: 6 – 12 – 52.

REPAIRS: It is possible to have repairs made to engines of small vessels in the town of Tapachula.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: It is necessary to post a watchman of the Immigration Service on the gangway when the vessel is berthed in the port.

HATCHES: Opening and closing of hatches by the crew or stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or their equivalent; 1 litre of spirits.

CARGO GEAR: Loading/discharging is carried out by means of the ship's derricks.

REPATRIATION: Possible.

AIRPORT: 12 km. from the port is the new International Airport of Tapachula.

Regular Flights – Aeromexico:

Mexico/Tuxtla Gtz./Tapach LA. Arrival at Tapachula at 1155 hrs., departure at 1255 hrs.

Mexico/Oaxaca/Tapachula. Arrival at Tapachula at 0855 hrs., departure at 0920 hrs.

Aviacion de Chiapas: Tapachula/Tuxtla Gutierrez. Arrival 0800 hrs., leave 0830 hrs. Arrive 1300 hrs., leave 1330 hrs.

In Tuxtla Gutierrez there is a connection with the whole state of Chiapas and part of the state of Tabasco.

Executive Air Services: To any part of the country and Central America.

TIME: Local time is GMT minus 6 hours throughout the year.

HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when the Executive Power is transferred.

Loading and discharge services can be provided on these days, but it is considered as overtime.

POLICE/AMBULANCE/FIRE: Police Headquarters, Tel: 6–10–93, Tapachula, Chiapas.

Mexican Red Cross, Tel: 6–19–49, Tapachula, Chiapas.

Fire Brigade, Tel: 5–20–65, Tapachula, Chiapas.

EMERGENCY CO-ORDINATION CENTRE: Headquarters of the 22nd Military Naval Area on 500 kHz. Also see "Radio".

TELEPHONES: There is no telephone service available in the port.

SERVICES: No tank cleaning or dirty ballast facilities.

BANKS:

Bancomer, S.N.C., Central Poniente y 4a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6–12–20. Telex: Bcchme – 77715 Bcchme/77716.

Banamex, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6–29–24. Telex: Bntpme – 77714.

Banca Serfin, S.N.C., 6a Avenida Norte No. 8, 30700 – Tapachula, Chiapas. Tel: 6–1/–70. Telex: Serfme – 77735.

Multibanco Comermex, S.N.C., 6a Avenida Norte y 5a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6–15–22.

Banco de Credito Rural del Istmo, S.N.C., 6a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6–14–20.

Banco Mexicano Somex, S.N.C., Central Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6–27–60. Telex: Bmsome – 77731.

Banco Nacional Pesquero y Portuario, S.N.C., Central Oriente No. 42, 30700 – Tapachula, Chiapas. Tel: 5–03–52.

Banobras, S.N.C., 6a Avenida Norte No. 4, 30700 – Tapachula, Chiapas. Tel: 5–15–58.

Banco Internacional, S.N.C., 1a Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6–28–00. Telex: Bichme – 77733.

Banpais, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 5–00–31.

Banco del Atlantico, S.N.C., Central Norte No. 18, 30700 – Tapachula, Chiapas. Tel: 5–12–90.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: A seaman's book is sufficient for going as far as the town of Tapachula, Chiapas.

DELAYS: There are no delays, on arrival a Pilot proceeds to bring the vessel into port, and the work gangs are already on the quay, commencing work as soon as the vessel is secured.

DEVELOPMENTS: It is planned to extend the breakwaters in 1985.

GENERAL: The port is relatively new, it lacks port infrastructure for loading/discharge of goods. But in order to handle any type of cargo, equipment can be brought from the nearest port if the ship's Agent requests it 48 hours in advance and at the same time presents the List of Cargo so as to ascertain the type of equipment required. With regard to the labour force, the gangs can alternate to provide 24 hours working.

SHIPMASTER'S REPORT: February 1977.
Documents:

10 Spanish Crew List (7 Certified).
12 Passenger List (5 Certified).
6 Store List (6 Certified).
6 Priced Shop List.
6 Cargo Manifest (8 Certified with Bills of Lading for Puerto Madero Cargo).
6 Arrival Reports.
2 Health Part 1 and 2.
2 Crew Customs Manifest.

All the above papers were taken.

Officials: Immigration Officer boarded *with the Pilot*, checked all I.D. Cards and Passports against the Crew List.

15 People boarded on arrival, all in uniforms, i.e. Army, Navy, Police, Quarantine and Port Captain.

All bonded lockers were sealed as well as the beer room. All store rooms were checked.

Meals were provided for 11 people. 2 Customs Guards remained on board at all times, a room is required for them at night.

Pilotage: Compulsory. Pilot boards from a large, black hulled launch with a red superstructure, about 0.5 miles off the entrance. Pilot speaks good English.

Approaches: New light structure, painted in red and white bands, and lying 0.3 miles North of entrance is conspicuous from seaward.

This light is expected to be in operation as from mid-February 1978, and will have the characteristics of the old one, lying 1 mile North, viz. Flash every 30 seconds. 2 rubble breakwaters 350 m. apart with red and green lights at their seaward ends are also conspicuous on Radar. All ranges into the port are marked with beacons and lights.

Turning basin is 280 m. in diameter, with a depth of approx. 10 m.

1 tug of 800 h.p. assists berthing, which is difficult. Berthing and unberthing should not be attempted during hours of darkness, nor when sea breeze is so strong as to hinder the attempt. Tidal streams outside the port are influenced by the wind. Tidal information is based on Standard Port of La Union, with a Secondary Port of Champerico, Guatemala, being used for Puerto Madero.

Anchorage: Anchorage may be obtained off the Port S.S.W. of the entrance about 0.5 to 1.5 miles off in mud, good holding ground.

A heavy swell may however be experienced with a passage of a "Tehuantepecer" or of a Tropical Revolving Storm passing far out in the Pacific.

Depths in the roadstead may be between 12 m. to 16 m.

Max. Size: Max. size of vessel handled LOA 145 m. Beam 22 m. Draft 7.5 m.

Radio: Advise ETA 48 hours and 24 hours prior to arrival via any Mexican Coastal station.

Tugs: One tug of 800 h.p. assists in docking and undocking.

Berthing: One wharf at present in use, of 150 m. length, bulkhead type well fendered, depth alongside 10 m. on completion of dredging programme. Proposal for dredging out another wharf at right angles to the first also of 150 m. length and 10 m. depth, this to take place within the next 2 years.

1 Naval facility wharf in side channel and basin, pier 60 m. in length, depth alongside approx. 5 m. to 6 m.

Fishing pier also 60 m. long depth alongside 4 m. to 5 m. No other details known.

Cargo Handling: Ship's Gear, supplemented by 2 conveyor belt systems suitable for cartoned or boxed cargo.

Cranes: None, but mobile tower cranes may be obtained from Tapachula given sufficient notice.

Medical: Medical services available at Tapachula and San Benito, the Hospital will accept seamen.

Fresh Water: Fresh water laid on to principal pier, approx. delivery 12 t.p.h. Should be treated before drinking.

Fuel: Fuel pipe-line is built below principal wharf, but as yet, January 1977, is not connected to any fuel terminal. Fuel Oil may be obtained by road transport for the time being.

Repairs: Only minor repairs at present.

Communications: Road Service to Tapachula, thence air services are readily available to Mexico City, thence to all parts of the world.

Plans are in hand to build a large Airport complex near to Puerto Madero.

No port radio as yet, but future plans call for a Radio Station, and eventually Port Office will have VHF facilities.

Services: Provisions available from Tapachula if notice given. Derat not available.

Consuls: There is a British Consul at Tapachula.

SHIPMASTER'S REPORT: August 1977.
Documents: Clearance from last port.

12 Crew Lists.
4 Store Lists.
4 Personal Effects Declaration.
1 Health Declaration.
2 Passenger Lists.
Ship's Register.
Derat Certificate.

Pilotage: Pilot boards vessel 1 mile West of breakwater. Pilotage is compulsory. 48 hours and 24 hours' notice to "Empresa de Servicios Portuarios de Puerto Madero".

Anchorages: 1.5 miles West of the breakwater in 8 fathoms of water.

Restrictions: No entering of port after 1800 hrs. No leaving of port before 0600 hrs.

Max. Size: Access channel 1,750 m. long, 10 m. deep, with an 80 m. wide bed. Turning basin 280 m.×325 m. and 8.5 m. deep. Pier 151 m. long, depth alongside 8.5 m. Pier equipped with cylindrical rubber fenders.

Tugs: 2 tugs available from November 1977.

Berthing: Loading and discharging operations with ship's gear. Dry bulk 28 m.t./hook hour (average). Sheds to handle banana shipments and conveyor belts, handling with side-ports system and average loading speed of 1,700 boxes per hour.

Fresh Water: Available from pier.

Gangway/Deck Watchmen: Security service rendered.

Time: GMT minus 6 hours all through the year.

Airport: International airport in Tapachula.

Services: The following services can be found in Tapachula City, Chiapas., 23 km. away from the port: Ship chandler service, mechanical and electric repair shops, hospital, telephone, telegraph and telex.

SHIPMASTER'S REPORT: October 1978.
Pilotage: Compulsory. Pilot boards 1 mile S.S.W. of North Breakwater, 24 hours' and 12 hours' notice required.

Restrictions: Limits of channels and Turning Basin are not marked. Daylight berthing and unberthing only.

Max. Size: LOA 160 m. Beam 25 m. Draft 27 ft.

Anchorage: 0.5 – 1.0 mile from North Breakwater, depth 45 ft.

Health: Quarantine Officials require 24 hours' and 12 hours' notice of vessel's arrival.

Radio: Salina Cruz.

VHF: Pilot and Port Authority on VHF Channel 16.

Tugs: One tug, 750 hp.

Berthing: General Cargo Berth: 2,200 m. from entrance. Max. size. LOA – 160 m., beam 25 m. and max. draft 27 ft. Vessel's size limited by width of turning basin. Least depth of water from sea to berth 9.0 m.

There are 6 hoppers available for bulk cargoes. No Ro-Ro facilities. No floating cranes. Security is good, berth surrounded by wire fence with only one entrance.

Density: 1025.

Consuls: British Vice-Consul in Tapachula.

Services available: Fresh water; Fresh provisions (with 24 hours' notice); Telex (at Tapachula); Doctor and Hospital; Airport (at Tapachula) 2 flights daily to Mexico City; groceries and meals (24 hours' notice).

AUTHORITY: Delegacion Puerto Madero, 3a Calle Poniente No.2 – 302, Apartado Postal No. 436, 30700 Tapachula, Chiapas, Mexico. *Tel:* (91–962) 6–34–46. *Contact:* David Hernandez Ramirez, Port Captain. Arturo Elorza Garcia, Port Operations and Development.

AGENT: Jose Antonio Tellez, P.O.Box 198, Tapachula, Chiapas (Province), Mexico. Tel. Office 612–40, Home 622–54.

Fruit Agent: Jose Leyba, P.O. Box 311, Tapachula, Chiapas (Province), Mexico. Tel: 615–31.

RABON GRANDE: 18.14 N. 94.23 W.

SHIPMASTER'S REPORT: September & October 1982.

LOCATION:
SBM No. 1 Lat. 18° 13′ 34″ N., Long. 94° 23′ 07″ W. Light "S".
SBM No. 2 Lat. 18° 13′ 34″ N., Long. 94° 20′ 29″ W. Light "O".

PILOTAGE: Pilot boards in a position midway between the two buoys. Tug rendezvous in same position with mooring equipment which is loaded on the port side.

ANCHORAGES: Anchorage position as advised by the Pilot is to the N.W. of a line joining the 2 SBMs and about 2 miles distant. A point of note is that there were at least 20 vessels anchored to the North and West of the port entrance, mostly oil tankers awaiting berth in the inner harbour. A U.S. Government chart covers the port area and SBM berths but was not available through the local Agency.

While the vessel was lying off in the rendezvous position waiting for Pilot and mooring equipment a very strong set to the S.E. was experienced, the wind being Northerly, Force 6 throughout the afternoon. Also during the vessel's stay it was noted that the wind increased to Force 5 – 6 every afternoon and gusting to Force 6 – 7 during the night time squalls.

Shipmaster's Report: January, 1982. Not same vessel.

Anchorage 2 to 8 miles Northwards from the breakwater. Poor holding ground anywhere in the area due to the river discharge giving a muddy ooze bottom. Even with over 9 shackles out in 18 fathoms of water, ships drag anchor when subject to the gales which blow from the Northern quadrants.

The onset of these gales are sudden and fierce, blowing towards the shore. Apart from the very accurate weather reports advising that a front is approaching, it was noted that an appreciable rise in barometric pressure preceeded the gale. The normal practice in the event of a gale being forecast was to have the engines on 10 minutes' notice and if the vessel began to drag, the anchor was weighed and the vessel cruised off the area until the storm abated.

RESTRICTIONS: Mooring to SBM in daylight hours only but unmooring allowed at anytime. Both operations depending on prevailing weather conditions.

Recommended arrival drafts are as follows:

Length O.A. (m.)	*Draft Forward* ft.	*Draft Aft* ft.
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28
over 300	20	32

RADIO: Communication between ship and shore is by vessel's VHF set and constantly monitored by shore personnel.

Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours before arrival:

(a) Vessel's name and Nationality
(b) Master's name
(c) Total crew on board
(d) Last port.
(e) Derat Certificate – Port and date of issue
(f) ETA local time (GMT minus 6 hours.)

It is also advisable to establish as soon as possible which grade the installation require to load first.

Communications with the Agency was by Telex via Portishead and/or Mobile, Ala., the latter preferred by the Agency until within range of the local station.

Pajaritos Radio Station: Call sign XFF2: Station operated by Pemex.

Traffic lists are broadcast on the even hour plus 30 minutes. Weather forecast at 0830, 1430, 2030 hrs. local time. Local time is GMT minus 6 hours.

Ship (Tx.) kHz.	*Shore (Tx.)* kHz.	*Times*
4191.0	3700.0	Night only
6286.5	6442.5	Day and night
12573.0	12790.0	Day and night
8382.0	8690.0	Day and night
16764.0	17075.0	

It is advisable to pass cargo information, grades, quantities and order of loading through this station as sometimes the Agencies fail to pass on information received from vessels to Pemex, the operating oil company.

On this visit (October 1982) all radio traffic was passed through Mobile Radio Station Alabama, and was received within a reasonable time at Coatzacoalcos.

BERTHING/LOADING: The 2 SBMs are fitted with 2×16 in. hoses with connection to port side of vessel.

Two grades are available, Isthmus Crude and Maya Crude and the line clearing amount is 34,000 barrels.

Loading rates vary from 17,000 to 35,000 U.S. bbls./p.h. depending on stocks and number of vessels loading. During heavy squalls and/or electrical storms loading is suspended. While secured to the buoy engines required on immediate/minimum notice.

During loading operations and while secured to the buoy the Pilot, Loading Master, 2 Petroleum Inspectors and 8 Hose Crew remain on board and have to be fed and housed. The Hose Crew change every morning and the Loading Master every third day or thereabouts.

October 1982: Once again loading on the SBM. 2 grades of oil, Maya and Isthmus Crude oils. The rate of loading varied from 12,000 to 25,000 bbls./p.h.

SHIPMASTER'S REPORT: July 1984.

Vessel (140,000 d.w.t.) anchored 320° (T) 2.1 nautical miles from No. 2 SBM which flashes 'U' every 15 seconds. Bottom was glutenous mud. Accommodation required for 1 Pilot, 1 Loading Master, 2 Cargo Surveyors and 8 hosemen. The 8 hosemen work in shifts so only require 4 beds.

Agent receives all Immigration, Customs and Health Papers. Documents required were 4 Crew Lists (1 visaed), Personnel Effects Lists and Stores Lists.

Launch service to shore available at times agreed with Agent.

In the event of squalls/thunderstorms tug will tow from the stern.

Stores are available and from the quality of items seen ashore – mangoes, avocadoes and fresh fish appear to be of good quality.

ROSARITO: 32.20 N. 117.05 W. (See Plan Book)

SHIPMASTER'S REPORT: 1975.

GENERAL: There is no port or approaches chart for Rosarito.

There are 3 sea berths only, 2 using anchors and stern buoys, and 1 single point mooring platform due to come into service in 1976. There is a continuous Westerly swell (July) and the berth is very exposed. Discharging a full cargo, it is advisable to commence ballasting as soon as possible to maintain a reasonable draft. There is no objection to this by the receivers.

DOCUMENTS: As for other Mexican ports re visaed Crew Lists etc. Suppliers in Curacao supplied all cargo documents with correct number of copies.

PILOTAGE: Pilot boards about 1 mile West of the berths from a black pilot launch equipped with VHF Channel 9. He speaks good English. The Boarding Officer boards with the Pilot. He speaks no English. The Pilot and Boarding Officer remain on board throughout cargo operations, also pilot/mooring launch is at hand at all times. All cargo operation liaison with the shore is by VHF operated by the Boarding Officer, who also does all Customs, Immigration work, etc., with the Pilot as interpreter.

APPROACHES: Straight forward, with a shelving bottom and ample depth of water up to the berths. Anchorage was found about 1.2 miles off the South buoy berth in 14 fathoms with good holding. Approach in poor visibility, common at this time of year, presented little difficulty once a position of berths is ascertained. Coronado Islands are good radar targets for position fixing.

RADIO: Communications to Agents in Ensenada through Manzanillo Radio XFM and then Ensenada Radio XFE on HF.

Petroleos Mexicano (PEMEX), the Charterers, have their own station at Rosarito which supplies berthing instructions, etc. Station XIB83 working on 8690 MHz and 500 kHz. They also keep a listening watch on VHF Channel 9.

OPERATIONS: Local flag tonnage gets preference for the berths. This should have little effect with the single point mooring coming into operation shortly, giving 2 product berths.

The pipe-line is handled by ship's staff. All ullaging etc. done by ship's staff. A comparison between ship's figures, B/Ladings and shore figure is made on completion of discharge, before clearance is issued by the Boarding Officer.

No difficulty was encountered in maintaining the requested back pressure of 6 kg. at the manifold using 1/2 pumps. Liaison with the shore is excellent, by Boarding Officer on VHF with hourly checks.

SUPPLIES: No bunkers or fresh water. Provisions can be obtained in small quantities but are difficult to get on board and expensive. Medical assistance can be obtained ashore, but again with the difficulty in getting ashore it would be only in a serious case.

AGENT: Only communication was on the second day by VHF but did not attend on board ship. This may be explained by the fact that due to the heavy swell it is difficult and sometimes dangerous to clear the breakwater by boat. This is endorsed wholeheartedly by Officers joining the vessel. However they were well attended by the Agent ashore. It is recommended that this port is not used for reliefs unless absolutely necessary. There was no shore leave allowed by me due to this.

SALINA CRUZ: 16.10 N. 95.12 W. (See Plan Book)

RESTRICTIONS: *Access Channel:* Length 760 m., depth 10 m.
BERTHING: Length of quays 915 m., depth alongside 9.5 m.
Repair Quay: Length 382 m., depth 1.5 m. – 4.0 m.
Storage Areas: Warehouses 20,160 sq.m.
Also see "Shipmaster's Report".
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
TANKERS: Tankers of 250,000 d.w.t. will berth at Offshore Terminal in the near future.
REPAIRS: Workshops for mechanical, electronic and electrical repairs.
DRY DOCKS: Drydock for vessels up to 21,000 tons displacement (25 ft. draft) and syncro-lift for vessels up to 8,000 tons displacement. Slipway for small craft.

SHIPMASTER'S REPORT: May 1982.
Berth: New container terminal in Outer Harbour. Length 240 m., depth alongside by sounding 8.8 m. – 12.0 m.
Pilotage: Pilot boards 1 mile South of harbour entrance.
Wharf: Concrete structure on concrete piles, protected by rubber fenders.
Chart: B.A. Chart No. 659.
Tugs: 2 tugs available.
Berthing: To prevent damage to vessel and gantry crane it should be ascertained that the gantry crane has been moved to the North end of the wharf before berthing.

SHIPMASTER'S REPORT: October 1983.
Documents:
Last Port Clearance
12 Crew Lists
3 Vaccination Lists
6 Ship's Store Lists
6 Crew Manifest Declarations
The local Authorities will board vessel on arrival.
Approaches: The Lighthouse of Salina Crûz and the Pemex tanks are easily seen when Bahia de Bamba is abeam to port at a distance of 7 miles.
Pilotage: Pilot will board vessel at position Lat. 16° 08.15′ N., Long. 95° 11.4′ W., if berthing on arrival.
Anchorages: A good holding anchorage at position: 1 mile E.N.E. of Buoy No. 3.
Radio: All telegrams via Mazatlan Radio/XFM or MW Salina Cruz/XFQ.
VHF: VHF Channel 9 is for Pilots/Pemex Operations. VHF Channel 13 is working channel and Channel 16 is for the Agent.
Tugs: Two tugs are used for mooring. One of 4,500 h.p. and the second of 2,600 h.p.

On completion of mooring, the second tug will make fast astern in order to hold vessel away from SBM at all times. It is wise to have engines stand-by on 10 minutes' notice in case of sudden Southern winds and to prevent any damage to the SBM.

Berthing: There are 3 SBMs (Monobuoys). No. 1 has 12 fathoms, No. 2 has 15 fathoms and No. 3 has 20 fathoms depth.
Loading: Two lines of 16 in. each which are connected with the main line of 36 in. to the shore.

Though "Pemex" (suppliers) tanks are placed high above sea level in the mountains, Pemex use 6 loading pumps with a rate of about 12,000 bbls./hr. each.

Cargo is Mexican Blend Crude Oil. API 33.5, temperature 90°F (approx.).

Ballast: There are no facilities for discharging dirty ballast to shore tanks or pits. Vessels must arrive with clean ballast.
Medical: Local Hospital and a Navy Doctor from Pemex available.
Density: 1025.
Fresh Water: Available by barge.
Fuel: Can be obtained via Pemex.
Consuls: None.
Repairs: Available for vessels up to 13,000 gross tons.
Surveyors: Lloyd's Surveyor can be reached via the local Agency.
Repatriation: Repatriation can be arranged. One must take the bus to the "Capital" of the State (two hours' ride). Thence to Mexico City by plane.

Time: GMT minus 6 hours (Standard Time).
Shore Leave: Pemex has a launch which will serve the vessel at certain hours. Agent to be notified of vessel's requirements. No shore-pass requested.
Developments: Port of Salina Cruz is now under construction. Calculated to be completed in three years' time.
General: N.N.E. winds are standard at Salina Cruz, rising up to 40 knots in Summer. Other seasons up to Force 5-6 (Beaufort).

Fresh provisions available at a very fair price.

The language is Castellanos (Spanish). Only "Pemex" representatives speak reasonable English.

AUTHORITY: Delegacion Coordinadora, Av. Tampico No. 39-B Altos. *Tel:* 4-04-36, 4-04-46.

Empresa de Servicios Portuarios, Recinto Portuario. *Tel:* 4-01-01 and 4-00-44.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553-87-11.

SAN CARLOS: 24.47 N. 112.08 W. (See Plan Book)

PORT LIMITS: The limit of the port is up to parallel 24° 39′ 41.5″ N. which passes through the position of the East Buoy of the channel entrance on Mexican Chart F.H.614.
DOCUMENTS:
Port Captaincy:
Clearance from Last port.
Crew List.
List of Passengers.
Voyage memorandum including dates and ports visited during the previous 3 months.
Port Operations:
Stowage plan.
Certificate of cargo handling equipment on board.
List of pecularities of the vessel.
Health:
List of Vaccination Certificates of the crew.
List of Vaccination Certificates of passengers for the port.
Derat or Exemption Certificate.
Immigration:
Visaed crew list.
List of passengers for the port, also visaed.
Maritime Customs: Vessels without cargo, and arriving from abroad:
Declaration of arrival in Ballast.
Vessels coming from abroad with cargo for the port:
General Manifest for the port.
List of passengers for the port.
List of explosives, corrosives, flammables for the port, visaed.
Vessels coming from a Mexican port to load:
Customs Clearance.
Vessels coming from a Mexican port to unload:
Customs Clearance.
Cargo Manifest, visaed.
List of passengers for the port.
List of explosives, corrosives, flammables for the port.
Inspection of Animal Health:
List of meats (tinned or fresh or refrigerated or in deep freeze).
Vessels bringing animals to the port:
Veterinary Health Certificate.
Transport Permit.
List of Meats (See above).
Inspection of Vegetable Health:
When products are not brought for discharge:
Derat Certificate or Exemption.
When products brought for discharge:
Derat Certificate or Exemption.
Vegetable Health Certificate.
Importation Permit from the Secretariat of Agriculture and Cattle Breeding of Mexico.
PILOTAGE: The Port Captaincy has VHF Channel 16 for receiving ETAs. The Pilot comes on board vessels by motor launch from San Carlos 2 miles from the entrance to the channel.
ANCHORAGES: Any location between meridians 112° 05.0′ W. and 112° 03′ W. and parallels 24° 38.5′ N. and 24° 37.5′ N. Depths approximately 105 ft., sandy bottom.
RESTRICTIONS: With 26 ft. draft, vessels may navigate the Channel between Buoys "C" and "D" to "5" and "8". With a tidal rise of 4 ft., vessels enter and leave with a draft of 30 ft. at high tide.
MAX. SIZE: LOA 600 ft., beam 100 ft. and draft 30 ft.
HEALTH: When coming from abroad, hoist the yellow flag. Inspection is effected when the vessel is berthed or at the Inner Anchorage. If the vessel is coming from another Mexican port, the Health Authority's visit is not necessary.
TUGS: None available.
RADIO: La Paz Coastal Radio: Call sign "XFK".
VHF: Port Captaincy on VHF Channel 16, operates between 0800 and 1800 hrs.
RADAR: This service does not exist.
BERTHING: The "L" shaped quay is made of concrete and has 102 m. of berthing length. There are two "Dukes of Alba" making up a length with the quay for berthing of 204 m. Also there are 2 mooring buoys, one at each end of the berth. The minimum depth at LW is 37 ft. in the berthing area. Loading and discharging is effected using the vessel's own gear. It is possible to work in 2 or 4 gangs, according to the type of vessel and cargo.
CRANES: None.
BULK CARGO FACILITIES: On the quay there are installations of "CONASUPO" with a tower for shipment of grain, located in the angle of the "L". The grain generally shipped is wheat at the rate of 200 t.p.h. The height of the end of the grain output tube above sea level at full tide is 12 m.
SPECIALISED CARGO HANDLING FACILITIES: Vessels berth at the same quay as above with ammonia, unloading by means of installations located in the angle of the "L". These installations are owned by Fertimex.
BRIDGES: None.
STEVEDORES: Vessel's Agent submits a request 24 hours in advance for stevedoring services through the Superintendent of the Port Operations. Three products are mainly handled in the port: cotton at a rate of 90 bales per hr. gang. Bulk wheat at a rate of 200 t.p.h., bagged at the rate of 25 t.p.h. Fertilisers in bags at a rate of 25 t.p.h. Since the mechanical equipment on shore is sufficient for 2 gangs in the case of cotton, stevedores are requested for this number of gangs. As far as wheat is concerned, the loading rate drops to 80 t.p.h. when the warehouse has little wheat in it.

Stevedores work from 0800 hrs. to 0200 hrs. of the following day i.e. they work 18 hours in 24 hours.
MEDICAL: There is a civil hospital in Ciudad Constitucion 45 minutes away from San Carlos. There is a telephone service available for calling ambulances. There are 6 doctors in the port.
TANKERS: No facilities.
DENSITY: 1023.
FRESH WATER: This is supplied when the vessel is berthed. There are various 2 in. hydrants. The rate of supply is 10 t.p.h., and the approximate cost is 6.90 Mexican Pesos per ton.
FUEL: Moderate quantities of diesel oil can be supplied, and it is brought by road tanker from La Paz, the vehicles themselves pumping supplies to the vessel.
CONSULS: There are no consuls in the port.
REPAIRS: There are workshops at Ciudad Constitucion 45 minutes away by road.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: This service does not exist.
HATCHES: Hatches are opened and closed by the stevedores.
SURVEYORS: None.
CUSTOMS ALLOWANCES: Tobacco, wine and spirits are placed under seal.
CARGO GEAR: For loading and discharge, ships' gear is used. There are no cranes in the port.
REPATRIATION: There are Immigration Authorities in the port. There are no hotels, however, there are several in Ciudad Constitucion and in La Paz. La Paz, is the capital of the State of Southern Lower California, and is approx. 3 hours away by road.
AIRPORT: None in the port. Airport at La Paz where there is an international airport called General Marquez de Leon.
TIME: GMT minus 7 hours. There are no seasonal time changes.
HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, and 1st December (every 6 years). These dates are all obligatory.
POLICE/AMBULANCE/FIRE: In the port there are Municipal and Prison Police, Tel: 25. Ambulance and fire fighting services come from Ciudad Constitucion.
TELEPHONES: No service for installing phones on board vessels, but in the port there is a telephone service for communications with any part of the world.
SERVICES: None available.
SHORE LEAVE: No restrictions.
IDENTIFICATION: Seaman's book is sufficient.
REGULATIONS: No naked lights when there is cotton in the port or ammonia is being discharged.
DELAYS: As there is only one berth, there are times when the berth is occupied, but this does not occur often. Berthing is done in shifts.
DEVELOPMENTS: At the moment, there is no programme.
GENERAL: *Post Office:* At the moment, there is no Post Office in San Carlos.
Telegraph Office: There is a telegraph office but the service is not for maritime traffic. For such purpose, vessels must send their ETA via La Paz Coastal Radio Station.

SHIPMASTER'S REPORT: 1976.
Documents:
Visaed Crew List by Mexican Consul and 9 copies.
Visaed Cargo Manifest from each loading port and 4 copies.
Derat Exemption Certificate.
Valid Smallpox Certificates for all on board.
Passport or Seamen's Book for all on board.
Clearance from last port of call.
Approaches: A very strong current was experienced running from S.E.-N.W. when entering Bahia Magdalena at Pta. Redondo. Caution should be exercised making this approach, because currents can be strong and unpredictable in this area.
Pilotage: Compulsory. Pilot boards at Lat. 24° 39′ N., Long. 112° 05′ W. from small boat with outboard engine.

Anchorage is also good in this position should it be necessary to await Pilot or berth. The 2 buoys marking the entrance make good radar targets and are distinctive.
Restrictions: Channel must be navigated at suitable time of tide giving careful consideration to vessel's draft, in order to clear numerous shallow patches. Max. draft to date of vessel navigating channel was 30 ft. 4 in. on top of high water.
Radio: La Paz Radio (XFK) 500 kHz and 441 kHz. Working hours appear to be uncertain, but there is a working arrangement with Agent to transmit messages free of charge.
Charts: Chart used to navigate channel was Mexican No. FH. 614. Masters are strongly advised to obtain this chart.
Berthing: 1 pier 420 ft. long.

Fresh Water: Available at pier at 10 t.p.h.
Communications: Very poor. No telex, no telephone and no cable service. Telephone available at Villa Constitucion 57 km. away by paved highway. Plans are in force to introduce a telephone service in the fairly near future.
Consul: If consular advice is required it is best to contact the British Embassy in Mexico City. Tel: 5 11 48 80.
Laundry Service: None.
Ship Chandler: None. A pick-up wagon can be supplied by Agent to obtain essential stores from supermarket at Villa Constitucion.

AUTHORITY: Capitania de Puerto de San Carlos.

TAMPICO: 22.16 N. 97.47 W. (See Plan Book)

PORT LIMITS: Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.

Permission to tie up will be granted on the quay or whilst in mid-stream, and occasionally during periods of very good weather a vessel is authorised to anchor in the port entrance.

DOCUMENTS:
1 Crew List visaed by Mexican Consul.
9 simple copies of Crew List.
1 Visaed Cargo Manifest from each loading port.
4 simple copies of Cargo Manifest.
1 Visaed Passenger List or visaed Statement to the effect of no passengers, and 5 simple copies.
2 copies of Store List.
2 copies of Personal Effects List.
Derat Exemption Certificate.
Passports or Seaman's Books of all crew.
Clearance from Last Port of Call.
3 copies of lists of packages containing explosives, flammable or corrosive materials.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice of vessel's arrival. Pilots board vessels 2 miles off the breakwater. Vessels may anchor about 2 miles off the breakwater waiting for Pilot. Pilots have radio-telephone, frequency 2182 and VHF Channel 16.

ANCHORAGES: About 2 miles East of breakwater in 40-60 fathoms of water.

RESTRICTIONS: There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working. The depths at these berths are as follows:

*Free Zone Quay	30 ft.
Minera Autlan Quay	32 ft.
Petroleos Mexicanos Quay	30 ft.
Mexican Gypsum Quay	26 ft.
Metals and Minerals Quay	29 ft.
Anahuac Cement Quay	23 ft.

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 31 ft.
*This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship Agents.

MAX. SIZE: The max. length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.

HEALTH: No Radio Pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.

RADIO/VHF: Tampico has a coastal station with frequency 2182, as have the Port Captain, the Pilots' Office and Gulf Tugs' Office. All have the same frequency and VHF Channel 16.

TUGS: 3 tugs are available, intended solely for port manoeuvres, comprising *Guayalejo* 2,000 h.p., *Tamesi* 1,000 h.p., and *Panuco* 800 h.p. Also Petroleos Mexicanos have tugs whose power varies between 1,000 and 3,000 h.p.

BERTHING:

1 berth at the Minera Autlan quay where manganese is moved by moving belt at the rate of 1,200 t.p.h.

5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600-800 t.p.h., by means of 4 in., 6 in., 8 in. and 10 in. pipes.

1 berth at the Mexican Gypsum quay where calcium sulphate is moved by moving belt at the rate of 500 t.p.h.

2 berths at the Metals and Minerals Quay, where bulk minerals are moved by 4 moving belts at the rate of 125 t.p.h. per belt.

1 berth at the Anahuac Cement quay, where bulk cement is moved by means of 10 in. pipes at the rate of 250 tons per pipe, there being 2 ducts.

7 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 t.p.h. per gang.

Berth	*Length*	*Berth*	*Length*
1	145 m.	5	145 m.
2	145 m.	6	145 m.
3	145 m.	7	180 m.
4	145 m.		

Depth alongside 10.5 m. Official fresh water draft 9.14 m.

All quays have lighting for night operation and telephone facilities.

CRANES: Heavy lift crane, capacity 300 tons.

STEVEDORES: No ETA advice necessary if Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hours prior to arrival. Stevedores' general cargo discharging and loading rate about 20 t.p.h. per gang. Mineral loading at Metals Pier about 125 t.p.h. per belt (2 conveyor belts available to service both berths).

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: See "Berthing". Dirty ballast is received ashore.

DENSITY: Average 1006.

FRESH WATER: Available on written request from ship's Agent. Drinking water delivered by pump at the rate of 12 cu.m. per hour.

FUEL: Available preferably at the Petroleos Mexicanos Quays, although with 1 week's advice prior to arrival this service can be provided at the public service quays.

CUSTOMS ALLOWANCES: No allowances to be taken ashore, but reasonable amounts of tobacco and spirits are allowed to be taken out of bond, but to be kept on board for use of crew and passengers only.

CONSULS: Belgium, Brazil, Great Britain, Peru, Germany, Netherlands, Norway, Sweden, Italy, Uruguay and Lebanon.

REPAIRS: Hull repairs can be effected, as can work on steering system, machinery, marine auxiliaries and other equipment of less importance.

There are specialist workshops attached to the dock.

DRY DOCKS: Length 250 m., depth 9.5 m., width 37 m. Max. size 55,000 d.w.t.

GANGWAY/DECK WATCHMEN: No watchmen necessary. Customs guard keeps watch at gangway while vessel alongside.

REPATRIATION: In the port there is an office of the Administrative Secretariat, where the repatriation of any crew member can be negotiated. This negotiation will be for the account of the ship's Agent who is required to deposit a bond of $20,000 per person.

AIRPORT: At a distance of 10 km. from the port, there are regular flights to Monterrey, Nuevo Laredo, and Mexico City with connections in any direction.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; November 20th; December 25th; December 1st (every 6 years).

FIRE/AMBULANCE/POLICE: Fire Department Tel. 2 12 22; Red Cross Tel. 2 13 33; Police Tel. 2 11 57; Police (Jail) Tel. 2 10 32.

DEVELOPMENTS: Constant programming for more space at wharves, sheds, warehouses, continuous dredging and increasing capacity of operational equipment.

SHIPMASTER'S REPORT: September 1980.

Pilotage & Radio: 2182 does not appear to be in use but 500 kHz and VHF are the popular mode, most Agencies having the latter.

Restrictions:

Minera Autlan Quay for manganese loading: 33 ft.
Muelles des Minerals (Metals & Minerals Quay): 30 ft.

Max. Size: All vessels in river berths moored starboard side to, head up, and if at Muelles des Minerals and over 500 ft. length, the vessel will have to drop down river stern first before turning aided by tugs.

Berthing: Muelles des Minerals: This open apron berth adjacent to the railway sidings at Colonia del Golfo is situated before the sharp bend leading to the main wharfage at Tampico and the bulk cement wharf by the entrance to the Canal Cortadura.

The method of loading is to wheel portable belts adjacent to the hatch in conjunction with another belt lifted aboard and a chute that is suspended from the vessel's gear and braced for direction by guys.

The mineral is dumped into the hopper at the lower end by bulldozer and it will depend upon the situation of the pile as to the speed that can be obtained. Thus if the cargo is in railway gondolas it will be grabbed out by rail cranes into trucks for transport to the apron where a pile is created for the 'dozers, a method which has several areas of slow working or waiting time.

Ideally the cargo has been stockpiled on the rear side of the quay from which it can be lifted directly by the 'dozers for dropping into the belt hoppers. It is this system that can achieve a good rate.

Fresh Water: Observed delivered by road tanker.

TUXPAN: 20.57 N. 97.24 W.

SHIPMASTER'S REPORT: January 1982.

LOCATION: Tuxpan is situated on the North bank of the Rio Tuxpan. On the opposite side (the South bank) is situated part of Tuxpan called Santiago de la Pena.

The entrance of the Rio Tuxpan is situated at Lat. 20° 58.2′ N. Long. 97° 18.1′ W. Breakwaters on both sides of the river mouth. Approximately 100 m. and 120 m. seaward of the mole heads is a bar with quick changing depth over it. The bottom of the bar is sand, covered with a thin layer of mud. After a strong North wind the depth on the bar is one foot less than the day before. The permissible entering draft is 18 ft. – 20 ft. at HW and calm sea with nearly no swell. Occasionally vessels with 21 ft. draft can enter. Normally there is a low swell from the East all the year. After a strong North wind (Norte) you can expect a Northerly swell of 2 ft. – 4 ft. for 1 to 2 days. A dredger is working in the river entrance most of the time.

PORT LIMITS: One mile off all port installations and structures, including SBM and breakwaters.

PILOTAGE: Pilotage is compulsory. Pilot boards vessel approximately 2 miles to 2.5 miles East of entrance. Pilot boat: A white 20 ft. boat with white cabin and blue/white deck.

Equipped with VHF Channel 16. Pilot Office open from sunrise to sunset and listening on VHF Channel 16. Call: "Tuxpan Pilot".

The Pilot has to be ordered by Agent 24 hours in advance.

VHF:

Port Authorities	Channel 16
Pilot	Channel 16
Pemex	Channel 16
Tecomar (Agency)	Channel 68

DOCUMENTS:

1 original and 4 copies B/L's of all Tuxpan cargo.
12 Cargo Manifests.
1 Health Declaration.
8 Crew Lists.
8 Passenger Lists (even when none/nil – lists).
1 Vaccination List (smallpox only).
4 Store Lists.
2 Personal Effects Lists.
(No special forms required/IMO-Forms are sufficient).

Documents which have to be shown to Port Authorities:

Tonnage Certificate.
Ship's Register.
Derat Certificate.
Seaman's Books or Passports.

ANCHORAGES: East of breakwaters from 2 miles – 4 miles on a breadth of 1 mile North and 1 mile South of this line.

Caution: Many submerged gas and oil-pipes in the vicinity of entrance to Rio Tuxpan.

Best anchorage: North mole head bearing 270° (T) and 2.8 miles off. Ground: Muddy sand, good holding.

RESTRICTIONS: Entering port and river only in daytime. Departing vessels have to pass the bar at river entrance before sunset.

MAX. SIZE: Length of ships handled is 190 m., always in accordance with the draft.

HEALTH: There is a hospital at Tuxpan. Surgeons and Dentists are available. No vaccinations can be done.

Meat and vegetable rooms are sealed and opened once a day to take provisions. Garbage has to be kept on board in watertight and covered containers.

RADIO: No radio station at Tuxpan. Closest Tampico or Vera Cruz. Good communication between Tuxpan and these radio stations.

There is no repair of radars, VHF or other electric and electronic equipment possible. If required, technicians and spare parts have to be ordered from Tampico.

TUGS: 2 privately owned tugs are available. One of 500 h.p. and one of 600 h.p. Tugs to be ordered by Agent in advance. The tugs are very helpful when turning in the river.

RIVER: Ground: Mud. Density of water: Approximately 1005.

The current in the river is nearly always outwards and is from 0.5 knots in the dry season up to 6.5 knots in rainy season.

At Tuxpan there is a stationary bridge, which can only be passed by very small ships.

BERTHING: (Places for dry cargoes):

	Length (m.)	*Depth Alongside* (ft.)
Muelle Fiscal	152	23
(Extension under construction)		
Grain Dock	70	22
Ro/Ro Berth	—	18
Berth for the Dredger (North bank)	60	18
Berth for Fishing Boats	80	15

CARGO HANDLING FACILITIES: No shore cranes, no forklifts, 2 small mobile cranes of unknown capacity; 2 special mobile cranes on container yard (These 2 cranes cannot be rented.)

Four mobile grain elevators.

Several oil companies have own small berthing places and handle their cargoes themselves.

STEVEDORES: Agent has to order gangs from Port Operations 24 hours in advance. Approximately 120 men available.

Working Hours: 0800 – 1600 hrs. = 1st shift
1600 – 2400 hrs. = 2nd shift
0000 – 0800 hrs. = 3rd shift

Saturday and Sunday also, but all at overtime rates.

TANKERS: Tankers up to 6,000 tons gross can be taken inside the river to the oil companies' small jetties.

Offshore there are 2 SBMs in position:
No. 2 = Lat. 21° 02.58′ N., Long. 97° 17.43′ W. and
No. 1 = 135° – 1.9 miles from No. 2 SBM.

Tankers with 55 ft. draft acceptable. These SBMs are mainly used by Pemex. 2 additional buoys are to be installed.

FRESH WATER: No potable water available. Small quantities of wash-water can be delivered by trucks.

FUEL: Small quantities of clean diesel oil can be delivered by trucks. No marine diesel oil or heavy fuel oil available.

DRY DOCKS: None.

SHIPYARD: For fishing boats, some slipways available.

REPAIRS: Minor repairs can be done by the fishing boat shipyards.

REPATRIATION: Repatriation is possible via Tajin Airport to Mexico City. Tajin Airport is approximately 30 miles from Tuxpan and can be reached by a good road.

At Tuxpan on the left (North) riverbank is a small Airport (Fausto Vega Santander) only for VFR flights. Runway 1,600 m. No commercial flights.

HOLIDAYS: 1st January, 1st May, 5th May, 16th September, 25th December.

TIME: GMT minus 6 hours throughout the year.

TELEPHONE: No telephone connections at the piers.

Useful telephone numbers: Police, 40252; Port Captain, 40020; Pilot Office, 40043; Custom's Office, 40055.

Office Hours: Monday – Friday 0800 – 1500 hrs.

Some offices are also open on Saturday from 0800 – 1300 hrs.

SHORE LEAVE: Allowed without restrictions. No special identification cards required.

PROVISIONS: No ship chandlers at Tuxpan. Small quantities of vegetables and fish can be bought at the local market. For this Agent orders a permission from Customs Office.

If necessary ship's stores can be ordered within 24 hours from Tampico.

VERA CRUZ: 19.12 N. 96.08 W. (See Plan Book)

PORT LIMITS: Area bounded by the reef lighthouses outside the breakwater.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: Compulsory, advise Agent 24 hours before arrival giving name, flag, ETA and draft.

The Port Captain is to be given a minimum of 2 hours' notice by the Agent. This to be done between 0800 – 1800 hrs. (Pilot office hours). Orders for Pilots between 1800 – 0800 hrs. to be made between 0800 – 1800 hrs.

The Pilot normally boards within the port limits, but if his services are requested outside such limits the Pilot will proceed to the location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expected vessel is sighted. The launch has a black hull with white superstructure and false funnel painted black.

ANCHORAGES: In good weather, vessels may anchor in the outer area off the port, in the case of bad weather, to the South of the Isle of Sacrifices (Isla de Sacrificios). If the vessel prefers to anchor within the port limits, it must request the services of the Pilot and on anchoring for its own account within this sector must pay the fees due to the pilotage service.

RESTRICTIONS: In normal weather conditions there are no restrictions on entry and departure, the sole consideration being the draft of the vessel, since if this exceeds 29 ft. the time of the tide must be taken into consideration, and also after a strong North wind, a vessel drawing more than 24 ft. must wait for the tide. Depth in access channel 10 m. – 12 m.

MAX. SIZE: Length 200 m., at Berth nos. 4 and 6 or the oil terminal.

HEALTH: The International Health Office gives a 24 hour service for the arrival and departure of vessels. To obtain Free Pratique on arrival of vessels there is a medical inspection, with submission of the Maritime Health Declaration, signed by the Master, and examination of documents of Derat Certificate, certificates of vaccination of the crew and passengers; cholera, yellow fever, (dependent upon the location from which the ship has come); examination of crew members or passengers who might be declared as suffering from contagious illnesses. With these formalities fulfilled, Free Pratique is granted. Free Pratique can be granted by radio, provided it is considered that the vessel's arrival will not give rise to the introduction or propagation of illnesses covered by the regulations, and that also the following requirements are fulfilled:

1. Exercise of greater epidemiological vigilance in respect of illnesses covered by International Health Regulations.

2. The Master's radiogram must be presented to the International Health Delegation 8 hours in advance and must invariably fulfil all the stipulations as set out in the attached form.

3. Without prejudice to the foregoing, the Health Doctor or whomsoever he may designate, and where it is considered appropriate, shall go on board for the purpose of receiving the Maritime Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining Free Pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of disease covered by the Health Regulations (cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdan" and "Regional de Veracruz".

The Office of International Health has immunisation services required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

RADIO: Radio station Vera Cruz Radio, call sign XFU. Transmits on 420 and 451 kHz and listens on 425, 454, 463 and 480 kHz. Also VHF Channels 12, 16, 26 and 27.

TUGS: 4 tugs available, 810, 900, 1,000 and 1,200 h.p.; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

BERTHING:

Berth	*Capacity*	*Length* (m.)	*Depth* (m.)
No. 1	2 vessels	384.50	10
No. 2	2 vessels	431.00	9 to 10
No. 4	5 vessels	795.20	9 to 10
No. 6	5 vessels	725.00	9 to 11
No. 7	5 vessels	548.00	6 to 8
Grain Quay	1 vessel	250.00	9 to 10
Container Quay	1 vessel	170.00	10
Pemex	2 vessels	958.00	10

STEVEDORES: *Handling rates:* General cargo, 12 tons/hook hour. Bulk cargo, 30 tons/hook hour.

BULK HANDLING FACILITIES: Handling of grain at a mechanised plant, with storage capacity of 25,000 tons and an average discharge rate of 250 t.p.h. and loading rate of 400 t.p.h.

Handling of bulk sugar by mechanised installations, with storage capacity of 40,000 tons and an average loading rate of 800 t.p.h.

Handling of aluminium, coal brickettes, cement, latex, crystallised honey, chemical products, vegetable oils and crude oil.

MEDICAL: Doctors, dentists and hospital facilities available (see "Health").

TANKERS: Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

DENSITY: 1025.

FRESH WATER/FUEL: Available.

REPAIRS: Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

DRY DOCKS: "Astilleros de Veracruz S.A." has 4 docks, 2 floating and 2 dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

Length on stocks	169.210 m.
Internal useful beam	30.400 m.
Height of keel stocks	1.400 m.
Max. draft on keel stocks	8.200 m.
Lifting capacity	30,000 d.w.t.

Dock No. 2: with capacity for vessels up to 10,000 tons

Useful length	154.000 m.
Useful beam	19.400 m.
Draft	5.180 m.

Served by a 45 ton capacity crane

Floating Dock No. 3: with 3,000 ton capacity lifting capacity

Useful length	25.900 m.
Useful beam	13.550 m.
Draft	5.800 m.

Served by 2 cranes of 10 ton capacity each.

Dry Dock No. 1

Length	45.720 m.
Useful beam	7.920 m.
Draft	2.130 m.

SURVEYORS: Lloyd's, Norske Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Mechanical hatches usually opened by crew, otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man and will attend as necessary for further issues.

CARGO GEAR: Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10×4 ton mobile cranes. Various cranes at piers 4 and 6. 2 floating cranes available max. lift 46 tons.

REPATRIATION: Possible, arranged by Agent.

AIRPORT: 8 km. from Vera Cruz, flights daily to Mexico City.

TIME: GMT minus 6 hours all year round.

HOLIDAYS: During the year the following holidays are observed: 1st January, 5th February, 21st March, 1st May, 5th May, 16th September, 12th October, 20th November and 25th December.

GENERAL:

Government Secretariat – Local Administration Office

In accordance with the stipulations of Article 75 of the General Local Administration Law, vigilance of foreign crew members in vessels of any nationality tied up in national ports, together with visits or stays by the said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personnel who will carry out vigilance of the vessel, in accordance with the provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vessel, provided they deposit at the Local Administration Office their identity documents which for such purpose may be issued to them and their passports and other documents, all of which will be returned to them on re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all legal purposes shall be responsible for the complete embarkation of crew members and for the costs involved in repatriating any who may remain behind after the vessel sails. When a crew member wishes to stay in the country, he must obtain documentation in compliance with one of the categories as set out in the appropriate Law and Regulations.

POLICE/FIRE/AMBULANCE: Police – 2.28.23, Fire Brigade – 2.25.00, Red Cross – 2.01.40.

TELEPHONES: Available on most piers but not on vessels.

SERVICES: Provisions, laundries, and dunnage available. Garbage must be removed every 48 hours.

SHORE LEAVE: Possible.

DEVELOPMENTS: A new petroleum quay is to be constructed to take 2 tankers of 40,000 tons.

A transtainer, portainer crane and other equipment will be acquired in the near future.

SHIPMASTER'S REPORT:

Documents:

1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival form.

The Customs require a complete list of all shop goods priced in U.S. Dollars, failure to produce this will cause confiscation and $10,000 fine. The Customs thoroughly check bond and beer locker and seal same. All storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated and kept under seal for 24 hours. All refrigerated stores – except U.S.A. meat is sealed up.

Pilotage: Pilot boards 1 mile W.N.W. of Angeguda de Adentro Light beacon from black boat flying pilot flag.

Tugs: 2 tugs available for berthing.

Restrictions: Port open day and night. Prevailing Northerly winds are sometimes too strong to allow ship's movement in harbour.

Health: Health authorities board after berthing.

Radio: ETA to be sent 48 hours in advance via XFB Cuidad de Carmen. Agent orders Pilot.

Fuel: Bunker C and Diesel are available. A mixing machine is being installed to supply intermediate. Bunkers are supplied from most quays and are expensive for foreign ships.

Consul: There is a British Consul.

Repairs: There are 3 drydocks and all repairs can be done.

Surveyors: There are Lloyd's and N.B. Surveyors available.

Airport: The airport is 6 km. from Vera Cruz with twice daily flights to Mexico City.

AUTHORITY: Delagacion Coordinadora, Edificio Oficinas Ligadas al Puerto, Plaza de la Republica No. 210, 5th floor. *Tel:* 2–13–19 and 2–30–40.

Empresa de Servicios Portuarios, Plaza de la Republica No. 210. *Tel:* 2–92–22, 2–40–22 and 2–74–11.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11

NOTES

Please also advise Shipping Guides Ltd.

Federated States of Micronesia

TOMIL HARBOUR, Yap: 09.31 N. 138.10 E.

PORT LIMITS: Vessel is considered an "Arrived Ship" on reaching buoy No. 1. Laytime commences at this time.
DOCUMENTS: All necessary documents required by the Clearance Department shall be prepared before arrival. (e.g. Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates etc.)
PILOTAGE: All Pilotage Services must be requested by the Master or his Agent on their behalf 24 hours prior to vessel's arrival.

ETA messages for Pilotage are best routed through Yap Radio Station on VHF Channel 16.
ANCHORAGES: Inside Tomil Harbour, depth is 84 ft. MLW. Distance from dock, 3,000 ft.
RESTRICTIONS: There is no restriction in accordance with the state of tide and draft. However, restriction imposed upon vessel entry after 1800 hrs. and before 0600 hrs. because the channel is marked by an unlit buoy and can. Except in case of emergency arrival/departure will be limited to daylight hours.
MAX. SIZE: The length of the channel is 9,600 ft., breadth is 300 ft. Max. size for any vessel entering the port and for tankers is 6,000 g.r.t. Depth in the channel 78 ft.
HEALTH: Master of vessel or designated Agent should advise Port Authority 24 hours in advance of her arrival of any communicable diseases, sickness or injury found among its crew even if the vessel's last port of call was in the Federated States of Micronesia.
RADIO: Vessel should route her ETA via Yap Radio by using 5.205 kHz or use VHF Radio Channel 22A or 16.

Port Authority does not have VHF Radio Communication facilities in operation, therefore please use above frequencies to contact Port Authority with vessel's ETA.

Also see "Pilotage".
VHF: Yap Radio – Channels 16 and 22A.
RADAR: No port radar.
TUGS: None.
BERTHING: Dock is 451 ft. long, depth is 78 ft. MLW, max. size permissible at LW (salt water) is 6,000 gross tons.
CRANES: None. Discharge is by ship's gear.
BRIDGES: None.
STEVEDORES: ETA advices required 24 hours before arrival in order to arrange Terminal personnel.

Terminal Operator: Waab Trans Co. Inc., P.O.Box 177, Yap, Western Caroline Islands 96943.
MEDICAL: Advise Agent prior to arrival if medical assistance required.
TANKERS: Load/discharge lines are 2 in. diameter for Federated States of Micronesia registered vessels. Other vessels will require reducers.
DENSITY: Average 95% salt water, 5% fresh water.
FRESH WATER: Available on pier apron using fire hose connected to fire hydrant for drawing fresh water.
FUEL: Advance notice required through Agencies' Offices in order to arrange fueling with Mobil Oil Inc. Plant. Fuel line available at the dock.
CONSULS: No consuls available.
REPAIRS: Deck and engine repairs are possible upon request of the Ship's Master. Location for such repairs will be designated by the Sea Port Director.
DRY DOCKS: Not available.
SURVEYORS: None.
HATCHES: Normally opened/closed by combination of crew and stevedores.
CUSTOMS ALLOWANCES: Each crew member is permitted to hold out of Bond a maximum of 2 bottles of wine, 2 cartons of cigarettes, 12 cans of beer, etc.
CARGO GEAR: Discharge is by ship's own gear. Other relevant gear such as forklifts and trucks provided by the Terminal Operator (see "Stevedores").
REPATRIATION: Effecting crew changes will be arranged by the proper Agency Office.
AIRPORT: Distance from Sea Port to Airport is 2.5 miles, served by regular airline with 3 flights per week on Tuesdays, Thursdays and Saturdays.
TIME: GMT plus 10 hours. No alterations made throughout year.
HOLIDAYS: Cargo work can be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police tel: 3333, Ambulance tel: 3444, Fire Department tel: 3222.
TELEPHONES: Placement available only for Yap State owned vessels. Telephone available at the dock terminal for other vessels.
SERVICES: Tank cleaning equipment, discharge of slops, compass adjustment, etc., are not available in this port.
SHORE LEAVE: Crew members are allowed ashore if no communicable disease found onboard.
IDENTIFICATION CARDS: Seamen's book is sufficient.
DELAYS: Usually depends on the quantity of cargo, especially bulk cargo.
GENERAL: *Garbage:* Disposal of garbage in port is strictly prohibited.
DEVELOPMENTS: There are expected draft increases. New facilities and installations are expected in the foreseeable future.
AUTHORITY: The Port Director – Tomil Harbour, Yap Transportation Division Office, P.O.Box 290, Yap, Western Caroline Islands, Federated States of Micronesia. *Tel:* 2178. *Cables:* Sto Yap. *Contact:* Frederick Figir, Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Monaco

MONACO: 43.44 N. 07.26 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are materialised by the 2 breakwaters at the Eastern entrance.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists – 3 Landing Passenger Lists.
2 Store Lists.
1 Manifest (cargo).
1 Bill of Health.
Ship's Register.

PILOTAGE: ETA via Monaco Radio – Channels 16, 12, 23, 15, within range. Pilot boat is a small white tugboat with a black "P" painted on the hull. Meets vessels 1 mile radius from the harbour entrance.

Pilotage available: 15th June – 15th September (0800 hrs. – 2300 hrs.). 16th September – 14th June (0800 hrs. – 2000 hrs.).

ANCHORAGE: One half mile East of the Southern breakwater lighthouse. Depth at the anchorage 68 m.

MAX. SIZE: Max. length 130 m. Stern to the pier on the West side or alongside the North quay, only from October to March and with 8 days' notice. Max. draft allowed: West Pier 8 m; North Quay, 7 m.

HEALTH: Health Declaration must be handed to the Customs. If coming from neighbouring countries (France, Italy, Spain) not requested.

RADIO: Monaco Radio VHF Channel 16. Port operations Channel 12. Public telephone calls Channels 23 and 25.

RADAR: No port radar service.

TUGS: Pilot boat 96 h.p. available without notice. 1 tug boat 200 h.p. with notice and 1 tug boat 450 h.p. available with notice.

BERTHING: All 3 quays plus inner sides of the breakwaters and Western "T" pier are available for mooring yachts stern to. The port may be congested during the Summer season. The possibility remains of anchoring off the dock.

MEDICAL: There is a state hospital fully equipped for surgery, etc.

FRESH WATER: Can be supplied at all berths alongside the quay. If vessel on Roads, water may be provided by barge up to 500 tons per day, with one week notice. Tel. Cannes 39.36.12.

FUEL: There is a fuel berth in S.W. area of port for ships up to 80 ft. LOA. Bunkers are available on the quay by truck but no heavy fuel available.

CONSULS: Most countries are represented in Monaco.

CUSTOMS ALLOWANCES: Same as in French ports.

REPAIRS: Only for yachts.

DRY DOCKS: 1 slipway × 100 tons, 1 slipway × 40 tons, 1 crane × 10 tons.

REPATRIATION: Good railway connections.

AIRPORT: Nice – Cote d'Azur. Distance 25 km.

TIME: GMT plus 1 hour. May to September GMT plus 2 hours.

HOLIDAYS: New Year; National Holiday, (Jan. 27th); Easter Monday, (May 1st); All Saints' Day; His Serene Highness' birthday Nov. 19th. Harbour services work on Sundays and Holidays.

POLICE/FIRE/AMBULANCE: Maritime Police, Quai Antonie 1st Tel. 30.22.39; Ambulance/Police Secours Tel. 17; Fire brigade Tel. 18.

TELEPHONE: Available at all berths.

SERVICES: Engine repairs. Electronics. Maintenance for yachts. 220 volts available at all berths. TV aerial sockets at all berths free of charge.

SHORE LEAVE: Crew members allowed ashore.

DEVELOPMENTS: The new yacht harbour at Fontvieille (West of the old town of Monaco) is now open. It is a private harbour with about 100 berths for yachts up to 35 m. All berths are fitted with water and electricity. Port Office Telephone No. 50.80.99.

This new port provides very good shelter regardless of wind direction.

REGULATIONS: *Recommendations to Ship-Owners, Masters and Crew Members:* Ship-owners, Masters and Crew members are strongly requested not to dispose of hydrocarbon, household refuse and other rubbish into the Monaco harbour (i.e. cartons and mainly plastic containers).

Used motor oils and other petroleum residues must be transferred into tanks exclusively provided for this purpose at the beginning of the North and South jetties and on the landing stages facing the Rainier III swimming pool.

These tanks are signposted with panels bearing the words "Huiles Usees" (used oil) in red letters on a white background.

Household refuse and other rubbish is to be put into garbage containers located around the harbour throughout the year. Furthermore, during the Summer, special individual bags are made available free of charge to all in-coming vessels.

Those responsible for ships equipped with used water tanks or bilges are requested to empty these containers off the coasts of the Principality at a minimal distance of 6 miles.

Those whose ships are not equipped with these used water tanks are requested not to dispose of their used water during their stay in the Monaco harbour, and to use the sanitary installations and facilities made available to them within the harbour.

Offenders infringing the above provisions will be penalised in accordance with the stipulations of Law No. 954, dated April 19th, 1974, dealing with the fight against water and air pollution.

AUTHORITY: Service De La Marine, Avenue J. F. Kennedy, MC 98000 Monaco. *Tel:* (93) 30-76-87. *Contact:* Captain Gaston De Welle, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Morocco

AGADIR: 30.25 N. 09.38 W. (See Plan Book)

DOCUMENTS:

Health Declaration.
4 Cargo Manifests.
6 Stores Lists.
6 Crew Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. Pilot boards at port entrance. International code signals used. Pilot on VHF Channel 16, day and night.

ANCHORAGE: Good anchorage in open roadstead.

MAX. SIZE: Up to 29 ft. draft. Max. LOA 160 m., however vessel with LOA 190 m. has been accepted.

HEALTH: Pratique given immediately after berthing when port doctor boards.

TUGS: 3 tugs available, 1 × 350 h.p., 1 × 1,275 h.p., 1 × 1,500 h.p.

RADIO: Agadir Radio operates 24 hours a day.

BERTHING:

No. of Berths	*Length (m.)*	*Depth (m.)*	*Remarks*
4	150	9.0	—
1	110	7.0	Ro/Ro.
3	100	6.0	Oil tankers and butane carriers.
1	—	6.0	Used by Moroccan tankers only.
1	120	5.0	Equipped with fish pumps.

STEVEDORES:

Working Hours: 0700 – 1200 hrs., 1400 – 1800 hrs. , 2000 – 0600 hrs. (With 24 hours' notice of ETA).

New times to be introduced but date not fixed: 0700 – 1500 hrs. and 1500 – 2300 hrs.

CRANES: One Titan crane of 40 tons capacity.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available from pipe-line at berths.

FUEL: Fuel and gas oil available from pipe-lines at berths.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.

IDENTIFICATION CARDS: Required.

CONSULS:

	Tel.		*Tel.*
Belgium	217 00	Norway	238 40
France	228 29	Spain	221 26
Italy	226 66	U.K.	209 05 (Casablanca)

REPAIRS: Small machinery (up to 500 h.p.) and electronic repairs can be effected.

POLICE/FIRE/AMBULANCE:

	Tel.		*Tel.*
Police	19	Hospital	224 77
Fire/Ambulance	15	Port Police	223 49

HOLIDAYS: Fete du Trone, (Throne holiday); 3rd March; Fete du Travail (Labour Day); 1st May; Al Massira Al Khadra, 6th November; Fete de l'Independance (Independence Day) 18th November; Aid El-Fitr, (1st and 2nd Chaoual); 1st January; Aid Adha (10 et 11 Hija); Le Premier Moharrem (The first Moharrem) and Aid Maouloud Annabaoui (12 et 13 Rebia I).

Note: Chaoual, Hija and Rebia are months in the Muslim calendar.

The following days are movable feasts governed by the Arabian Calendar – 1/2 Choual, 10/11 Diahijja, 1 Moharram, 1/13 Rabia I.

Work may be arranged on all holidays.

SHORE LEAVE: Allowed.

DEVELOPMENTS: 2 quays under construction, length 375 m., depth 6.0 m.

SHIPMASTER'S REPORT: November 1979.

Documents:

3 Copies Crew's Personal Effects.
6 Crew Lists.
3 Stores Lists.
3 Vaccination Lists.

Anchorage: Vessel anchored 0.5 miles South of breakwater.

Pilotage: Compulsory. Pilot boards 0.5 miles S.W. of the outer buoy. 1 hour's notice required.

Restrictions: Vessel can enter and sail during hours of darkness and at any stage of the tide.

Max. Size: Max. LOA 600 ft. (approx.) and max. draft. 26 ft. (approx.). Size of vessel limited by the swinging room.

Radio: Agadir Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: Two available.

Berthing: Vessel berthed at No. 8 berth on the South mole which is about 7 cables from the harbour entrance. Max. LOA approximately 600 ft. and max. draft approximately 26 ft. Least depth of water in channel from sea to berth is approximately 30 ft. The bottom at the berth is sand and mud and the density is 1025.

There are no special bulk handling facilities. There are 10 cranes with safe working load of 10 tonnes. Ro/Ro facilities available, no floating cranes. There is ample equipment for handling palletised cargoes also storage space for palletised and break bulk cargoes. Containers are handled by ship's gear and storage space for containers is limited.

Facilities: The following are available: Fresh water (poor quality), fresh provisions, small repairs, there is a small machine shop, airport, Lloyd's Surveyor and laundry service.

AUTHORITY: Ministry of Equipment, Agadir Port Directorate, Agadir, Morocco. *Contact:* M. Abdelali, Port Director.

CASABLANCA: 33.36 N. 07.37 W. (See Plan Book)

PORT LIMITS: Vessels considered as "arrived" when passing buoy CA 5 in position Lat. 33° 37′ 05″ N., Long. 7° 35′ 02″ W.

DOCUMENTS:

Certificate of Registration.
Cargo Manifests.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.

PILOTAGE: Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the foot of Jetee Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 4″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of Jetee Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the Pilot station for port radar service by VHF Channel 12.

ANCHORAGES: The anchorage outside Casablanca Harbour is partially protected from winds between South and West but a Westerly swell finds its way into the bay. With a heavy Westerly or Northwesterly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathoms North of Jetee Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12.8 m. (42 ft.).

MAX. SIZE: Max. length permissible, about 884 ft.; max. breadth permissible, about 105 ft.; max. draft permissible, about 32 ft.; but normally 30 ft. for berthing alongside. Tankers: up to 34 ft. draft.

HEALTH: Masters must fill in the declaration of health and display the "Q" flag, to obtain Pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.

RADIO: The name of radio station for ETA cables to Agents, receivers, etc., is Casablanca Radio.

TUGS: There are 6 tugs of 800 – 1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for 1 tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.

BERTHING: To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring: When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10 in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.

CRANES: Floating crane, 45 tonnes capacity.

CARGO HANDLING: Phosphate loading: up to 5,000 t.p.h. Depth alongside 32 ft. to 26 ft.

Grain Handling: discharging 800 t.p.h., loading 400 t.p.h. Depth at silo berths 30 ft.

Containers: straddle carrier for handling up to 20 ft. containers.

Roll-on/roll-off: three berths for Ro/Ro vessels, depth 30 ft.

STEVEDORES: There are 13 stevedoring companies. Normal working days are in two shifts (from 0700 to 1500 hrs. and 1500 to 2300 hrs.). Ship's Agents arrange gangs in connection with stevedores. Two daily orders (at 1100 hrs. and 1600 hrs.) are made to fix the number of gangs.

MEDICAL: It is necessary for Agent to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: There are 4 tanker berths, *(a)* one for Import and Export of white products and max. permitted draft 34 ft. (Berth P3). *(b)* three berths for Import and Export of black products. These berths (No. 60, 61 and 62) are situated inside the harbour, vessel's draft should not exceed 30 ft. Security tug necessary when handling certain petroleum products.

FIRE PRECAUTIONS: Two firemen remain on board tankers while vessel berthed alongside. One fireman is required for other vessels carrying dangerous cargo.

FRESH WATER: Numerous feeders along berths. Also delivery by barges is possible.

FUEL: All grades available. Ex-wharf or by barge.

CONSULS: The following countries are represented by consuls in Casablanca:

Algeria
Argentina
Austria
Belgium
Brazil
Denmark
Finland
France
Germany
Great Britain
Greece
Haiti
Italy
Netherlands
Norway
Panama
Poland
Portugal
Spain
Sweden
U.S.A.
Yugoslavia

GANGWAY/DECK WATCHMEN: It is necessary to have watchmen on board. They are hired by the ship's Agent.

OPENING/CLOSING HATCHES: This work is normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes are permitted for each crew member to be held out of bond.

IDENTIFICATION CARDS: Needed.

REPAIRS: Only small repairs and dry docking works are carried out.

DRY DOCKS: One large dry dock, 152 m. long and 22 m. wide (lifting power 10,000 tons). Three slips for ships up to 700 tons.

REPATRIATION: Facilities exist for effecting crew change and arranging any necessary repatriation.
AIRPORT: Distance from airport, 25 miles. International connections.
POLICE/AMBULANCE/FIRE: Police, 2210-74 or 19; Ambulance, 15; Fire, 15.
TELEPHONES: Only arrangements for placing telephones on board passenger ships are possible.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Directeur du Port.
AGENT: Lasry Maroc, 30, Avenue de l'Armee Royale, Casablanca. Telex: 21949-21092. Tel: 2688-75, 2669-46. Cables: "Jolasry".

EL AAIUN (Laayoune): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in Lat. 27° 03′ 55″ N., Long. 13° 27′ 45″ W.
DOCUMENTS: See "Casablanca".
APPROACHES: There is a light located at the end of the bulk phosphate terminal in position Lat. 27° 03′ 09″ N., Long. 13° 27′ 07″ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At night the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.
PILOTAGE: Compulsory. Pilot boards about 0.75 miles off the pier head.
ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.75 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when lying at anchor.
MAX. SIZE: Depth 17.0 m. at LWL at the phosphate terminal berth, and 8.0 m. LWS at the berth for general cargo ships, located at the middle of the pier.
HEALTH: Valid yellow fever and cholera certificates are required. Otherwise, usual clearance.
RADIO: There is no coast radio station in El Aaiun. VHF radio communication is being placed at the phosphate terminal to work on Channels 12 and 16.

Ships calling at the terminal are required to send ETA cables or telegraph 72, 48 and 24 hours prior arrival to "Phosboucraa el Aaiun".
TUGS: 2 tugs, each 960 h.p., are available to assist vessels.
BERTHING: Aaiun Mineral Terminal located approx. 6.5 miles South of El Aaiun City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the three loading stations for 100,000 (non-inclinable), 40,000 and 20,000 d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in 2 of the stations, and 2,000 t.p.h. at the 3rd. The phosphate is loaded by means of movable loading machines with telescopic spouts to permit perfect trimming.

Facilities at the general cargo berth available for vessels up to 8,000 d.w.t. are 2 cranes of 6 tons each, and 1 derrick of 150 tons capacity.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.
AIRPORT: Aaiun (30 km. from harbour).
REPAIRS: No repairs can be effected at this port.
BUNKERS: No bunkers available.
PROVISIONS: Provisions may be obtained.
AUTHORITY: Phosboucraa – Laayoune, B.P. 76, Laayoune, Morocco. *Tel:* 22-36-28, 22-36-29, 22-36-30. *Telex:* 31727 M. *Contact:* Port Manager. Operator: DC/AV Casablanca and DC Paris.

EL JADIDA (Mazagan): 33.15 N. 08.31 W. (See Plan Book)

DOCUMENTS: As for "Casablanca".
PILOTAGE: Arranged by Agent, basis vessel's ETA given in advance. Pilot boards about 2 miles from the port entrance.
ANCHORAGES: About half a mile from head of North jetty in depths of 13 m. to 14 m. Hard rock bottom covered in sand. Holding ground is fair only.
RESTRICTIONS: The port comprises an entrance channel 50 m. wide and an outer harbour area 7 hectares, partially dredged to 3 m. depth to make a waiting basin. In the Southern part of the outer harbour is a quay, called the barge quay, 120 m. long, dredged to 6 m. depth.
MAX. SIZE: No limitations for vessels anchoring. For entering harbour, max. length 80 m., draft 5 m., entering at high water.
RADIO: No local radio station. Use Casablanca Radio for messages to Agent.
TUGS: Available. Normally join vessel 2 miles from port entrance.
CRANES: 2 electric cranes and 2 diesel cranes available.
MEDICAL: Hospital facilities available. Vaccinations can be arranged.
FRESH WATER: Available at the quay.
FUEL: Can be supplied subject to 24 hours' notice.
WATCHMEN: Recommended to employ watchmen.
OPENING/CLOSING HATCHES: Work performed by ship's crew.
CONSULS: The only consular representatives are those of France an Portugal.
REPATRIATION: Can be arranged via Casablanca.
REPAIRS: Small repairs can be done on board, or parts sent Casablanca. One small dry dock reserved for Port Authority vessels an fishing boats.
AIRPORT: Nearest commercial airport is Nouasseur. The airport Camp Cazes, Casablanca, operates for internal flights only.
HOLIDAYS: Sundays and holidays, except for National holidays, can b worked on payment of overtime.
POLICE/AMBULANCE/FIRE: Police, Tel: 19; Ambulance, Tel: 15; Fir Tel: 15.
TELEPHONES: Cannot be connected to vessel, but telephone situate on the quay.
AUTHORITY: Arrondissement de L'Equipment et de la Promotic Nationale.
AGENT: Lasry Maroc S.A., 2 Rue William Redman, El Jadid Tel: 3276, 3370. Telex: 23690 Jolasry M. Cables: Jolasry El Jadida.

JORF LASFAR: 33.08 N. 08.38 W. (See Plan Book

SHIPMASTER'S REPORT: May 1984.

LOCATION: The port of Jorf Lasfar is situated approximately 62 nautic miles by sea, and 120 km. by a good tar sealed surfaced road from th town of Casablanca, in Morocco. The natural deep water bay along th coast has afforded the development of an industrial complex, designe for the export of phosphates and minerals, also phosphoric acid an sulphuric acid.

Local sources of information have indicated to me that developme began some 7 years ago. Large earth moving equipment carved awa the hillsides, moving several million cu.m. of rock and earth, an transformed an area approximately 2,200 m. × 1,700 m. which no forms the complex harbour and port of Jorf Lasfar. The port area an wharves are enclosed by a man made breakwater.

The principal breakwater, (Outer Breakwater) extends in a directio N.W. from the shore, 1.75 miles S.S.E. of Cap Blanc du Nord, on whic is erected a "Yellow" square tower 31 m. in height with a black top, th position of which is Lat. 33° 09.8′ N., Long. 08° 37.6′ W. The lig exhibited from tower is occulting white and red 6 secs., eclipse 1.5 sec White visibility 9 miles 018° – 190° (172°), red visibility 6 mile 190° – 018° (188°). The breakwater then turns S.W. and S.S.W. for total length of 3,100 m. The Contre Digue or Lee Breakwater extend 1,250 m. N.W. from the shore 1 mile S.S.W. of the root of the Oute Breakwater.

Light structures stand each side of the entrance, on the Oute Breakwater about 500 m. N.N.E. of its head, and on the head of the Le Breakwater (Contre Digue).

On arrival and during the vessel's stay in port (April 1984), these ligh were unlit.

Local Authorities advise me that as electric power has not yet bee laid on to the port area the lights are functioning by gas, but whether was for economical purposes, or any other reason, as already reporte the lights were not functioning. Unless for some specific reason, this is no consequence as entry into the port is only permitted in daylight hour

Development appears to progress very slowly as will be seen from th facilities at present available. Local Authorities assured me that the po will be fully operational in 1985. Our stay was 22 days to discharge cargo of bulk wheat and corn (55,000 tons).
APPROACHING: *Noon Day Before Arrival:* Position Lat. 33° 00′ N Long. 12° 59′ W. Course 088°(T) allowed 2° set Gyro course 086°.
Day of Arrival: 0139 hrs. Sat. Nav. fix Lat. 33° 04′ N., Long. 09° 39′ W disallowed set.

Radar observation of the coastline was made when 43 miles off (rad JMA 159B/3 cm.) but no positive fix. Vessel running in on Sat. Nav. D position.

0443 hrs. Radar fix obtained of Cap Blanc du Nord, 25 miles.

As vessel had no port information or charts ETA given as 0700 hrs (Sunrise 0612 hrs. GMT).

Called Casablanca Port Control on Channel 16 from 0530 hrs Reception was poor and distorted.

Called Jorf Lasfar Pilot on Channel 12 . . . No reply.

About 7 miles off, the Principal Breakwater was clearly outlined o radar screen, and observed 1 small coaster at anchor off the port.

Weather was cloudy, visibility clear, a light Easterly wind was blowing slight sea with low, heavy, Westerly swell.

When about 4 miles off, contact was made with the Pilot. Due to th berthing of the coaster, we were delayed, and vessel was turned aroun on reciprocal course. At 0745 hrs. turned vessel around and mad approach to embark Pilot, on his advice.
Embarking of Pilot: Under normal circumstances a pilot launch available. Unfortunately for us, the launch was under repair and Pil came out to embark on a rather large tug. Not a very suitable propositio at the best of times.

No positive position for Pilot Boarding has yet been established an no Sea Buoy to indicate any approach.

Ladder was rigged on starboard side. The tug had great difficulty manoeuvre to come alongside, but after several attempts and muc helm and engine movements, further hampered by the heavy swe running for both vessel and tug, the Pilot (French) boarded without an incident.

I am of the opinion, that the Pilot should board approximately 1.0 to 1.5 miles off the Principal Breakwater Head, by pilot launch, with vessel's speed about 5 knots, to afford a good lee and counteract the swell. The tugs should be secured before the ship enters the port as there is about a 90° to 120° port turn to line up with the entrance, with very little room for error. Both anchors to be ready for letting go. Once the turn into the entrance is made, the way must be taken off the vessel quickly and stopped, to effect a port swing again of 90° to back into the berth, for starboard side alongside berthing at Quay No. 2 where vessel berthed.

The 2 tugs attending, "El Hafid" and "Casablanca", 2,000 h.p. and 1,600 h.p. respectively, were adequate under the prevailing conditions. Both tugs used ship's lines. Vessel was secured with 5 head and 5 stern lines also 2 springs forward and aft.

Whilst alongside with a heavy swell outside the harbour area, surge was experienced alongside. Rope springs are suggested for use, or wire springs with rope tails.

The foregoing was a deeply laden vessel, length 224.5 m., draft 38 ft. salt water even keel.

PORT LIMITS: The seaward boundaries of the port have not yet been defined. There are no designated anchorages off the port for vessels carrying the various categories of cargo.

There is no designated Pilot Boarding Ground.

There is no Sea Buoy, or Channel Marker Buoys to indicate a safe Fairway.

Charterer's particular requirements to vessel's Agents to be sent through Casablanca Radio, CNP (8 MHz).

We were able to contact Casablanca Radio, 5 days prior to arrival (1,600 miles).

Preliminary "Notice of Readiness" was tendered to Agents and receivers of cargo by radio on arrival (0700 hrs.).

I prepared 5 copies of my own "Notice of Readiness" which was handed to the Agent on berthing. He signed in acknowledgement, for transmission to the receivers.

"Notice of Readiness" was accepted at 0830 hrs., which was office opening hours on our arrival day.

DOCUMENTS:

Crew List, 6 copies.

Passenger List, 6 copies.

Customs Crew Personal Effects Declaration, 1 copy and 1 copy for Agent.

Ship's Stores List, 1 copy and 1 copy for Agent.

Ship's Manifests. If on board for delivery to Agent.

Bills of Lading. If on board for delivery to Agent.

Ship's Particulars, 1 copy for Agent's use.

Ship's Certificates: To produce Ship's Register, Safety Equipment, Ship Construction, Safety Radio, Tonnage Certificate, Derat Exemption.

PILOTAGE: Give ETA to Agent at Casablanca. He arranges Pilot and tugs. Pilot comes by road from Casablanca.

Apparently 1 tug is always stationed at Jorf Lasfar port, but is not manned. A second tug comes from Casablanca. (Ordered by Agent, who arranges time). Two tugs seemed adequate for this vessel under the prevailing conditions. Advise Agent accordingly if you require more. Pilots consider 2 tugs are adequate.

Minimum 24 hours' notice is required for Pilot and tugs.

Pilot Launch: Approximately 7 m. in length, black hull, white topsides, with the word "Pilote" painted in white bold lettering on each side. (Also see "Approaching".)

ANCHORAGES: See "Port Limits".

Pilots recommended 2 miles off breakwater, keep entrance to harbour clear. Holding ground good. Obstructions not charted.

Keep well clear of Cap Blanc du Nord. I have seen heavy breakers 0.5 miles to 0.75 miles off this point in strong Westerly winds and heavy swell/sea.

Depth lines showing a 1 m. difference in soundings have been charted on locally produced chart.

RESTRICTIONS: Movements, entry and departure are restricted to daylight hours only. From observations (personal) tidal range at spring tides is approximately 8 ft. No tidal predictions are as yet available.

We entered with a draft of 38 ft. (11.58 m.) salt water even keel. No adverse effect, or ground effect noticeable. Be careful of lift and fall in heavy swell, and rolling which will increase draft. As previously stated, apart from the light on Cap Blanc du Nord, no other lights are as yet available as an aid to navigation.

Depths: Entrance Channel 17 m. No. 1 Berth 13.5 m. (phosphate).

MAX. SIZE: Nothing yet stipulated by Port Authority.

Our vessel: Overall length 224.50 m. Moulded breadth 32.20 m. Max. Summer draft 12.956 m. Max. d.w.t. (Summer) 64,931. G.r.t. 35,417, N.r.t. 21,296. Panamax bulk carrier.

Also see "Restrictions" and "Cargo Gear".

HEALTH: Pratique free from one Moroccan port to next Moroccan port.

Master to send cable 24 hours prior to arrival to Agent. Cable to include following information: Number of crew (including Master) on board, certify vessel free of infectious disease, all crew healthy, and in possession of valid health and travel documents (passports) and last port or ports of call (21 days prior) arrival, and request Agent to supply for Radio Pratique and Immigration Clearance.

Prepare Health Declaration Papers if on board, otherwise Agent will prepare on arrival at berth, for signature.

Vaccination Lists, 2 copies.

RADIO: "Casablanca Radio". Call sign CNP on 8 MHz.

We made contact 5 days (approximately 1,600 miles from Casablanca) prior to arrival.

VHF: Use Casablanca. Call CNP2. Frequency Channels 16, 12 and 14.

When you know from the Agent that the Pilot will board on arrival at Jorf Lasfar, then call "Jorf Lasfar Pilot" on Channel 12.

Also see "Approaching".

RADAR: Not available.

TUGS: Tugs do not have their own lines, ship's lines are used.

Also see "Approaching" and "Pilotage".

BERTHING:

Berth No.	*Depth Alongside* (m.)	*Length of Wharf* (m.)	*Width of Wharf* (m.)	*Surface Area* (sq.m.)
1	15.60	300	82.28	24,684
2 – 3	12.50	180	75.00	13,500
4 – 5	12.30 – 11.50	180	30.00	5,400
6 – 7	11.50	45	30.00	1,350
8 (Oil Berth)	15.60	45	15.00	675
9 (Oil Berth)	12.70	45	15.00	675
Q.C./10	5.25 – 6.75 – 9.00	360	20.00	7,200
Q.S.	3.50 – 4.00 – 5.00	215	20.00	4,200

Note: The above information has been obtained from the Port and Harbour Authority. The maximum permissible draft for our vessel at Berth No. 10 was declared as 26 ft. This information was given by the Pilot who shifted the vessel from Berth No. 2 to Berth No. 10 and agreed to by the Port and Harbour Authority. I requested this in writing before shifting the vessel.

From the above legend for the Quai de Commerce (Berth No. 10) the shallowest part is at the Eastern end near the Ro/Ro adjustable run-off. *Berth No. 10* Surface unsealed, and consists of loose metal/sand/stones, many potholes, dry grass, and totally unsuitable for discharge of grain.

Note of Protest and Indemnification of Liability served on the receivers by the vessel's command through the Agents. Receivers accepted it without question.

I am led to understand that the port is to be divided into 2 sections. Berth Nos. 1 to 7 will be privately operated, and the remainder of the port will be operated by the government.

On some plans, a grain silo is shown on the Southern side of "Quai de Commerce", adjacent to the Ro/Ro terminal. This I believe will now not be developed, and Jorf Lasfar will not be used as a grain port. At times vessels use Jorf Lasfar to lighten ship to 30 ft. and then proceed to Casablanca for further discharge.

Berth use (on completion of port):

No. 1	Phosphates	Nos. 8 & 9	Petroleum
No. 1 Bis	Coal	Nos. 10 & 10 Bis	General
No. 2	Phosphates	No. 11	Service
No. 2 Bis	Coal	No. 12	Fish
No. 3	Phosphates	No. 3	Ro/Ro
No. 3 Bis	Minerals	No. 14	Cereals
Nos. 4 & 5	Sulphur	No. 15	Containers
Nos. 6 & 7	Acid		

CRANES: There are no permanent cranes to speak of at any of the berths.

6 mobile cranes were made available for the discharge of our vessel.

Type: Gottwald/Dusseldorf, luffing and slewing, diesel/motors.

Capacity: 6 tons × 8 m., 6 tons × 25 m.

Outreach: With base spreaders out, and tyres afloat, and in position the cranes could not plumb further than the centreline of the ship. (Beam 32.2 m. max., fenders alongside wharf).

No heavy lift cranes ashore or afloat available.

While in port 3 vessels were seen discharging heavy lifts for the industrial complex with their own gear.

One vessel discharged machinery and general cargo with ship's cranes.

Note: 1. Gearless ships would be serviced by the above mentioned mobile shore cranes.

2. Vessels with their own gear would have no difficulty to discharge cargoes such as grain/ores/coal/fertilisers/sulphurs/copra, etc.

BULK CARGO FACILITIES: Refer to legend of berths, cranes, and additional notes.

SPECIALISED CARGO HANDLING FACILITIES: A container terminal is envisaged but at time of writing is non-existent, (wharf or cranes).

Berth is available for Ro/Ro vessels with adjustable ramp, (power facilities and terminal non-existent).

Berth for tankers (Berth Nos. 8 and 9), available but as yet no pipe-lines to storage tanks, behind the ridge of hills in the background of the port, have been laid on.

Berths available for liquid chemicals, (see plan), but no pipe-lines or facilities as yet available.

No facilities for LPG/LNG.

BRIDGES: None.

STEVEDORES: Agent will organise gangs with receivers.

Port Working Hours: Monday to Saturday inclusive 0700 – 2300 hrs. over 2 consecutive shifts 0700 – 1500 hrs. and 1500 – 2300 hrs. Overtime, Sundays and holidays when available and/or compulsory. A third shift overtime also possible when ordered by receivers and agreed by Port Authority (2300 – 0700 hrs.).

There appeared to be no "meal breaks" or "smokos".

There is a language barrier unless you speak French and/or Arabic.

Rates of Work: Nothing established for the port. The labourers work very hard. I estimate rate would be for bulk grain discharge 5 gangs, 16 hours per day = 80 gang hours. 30 – 35 t.p.h.

TANKERS: Two berths. No pipe-lines laid at present.

DENSITY: During vessel's stay, when cargo discharged, calculations and final draft survey by ship was necessary. The average salinity (density) corrected for temperature was 1027.5/1028. Temperature varies between 16° – 25°C.

FRESH WATER: No fresh water available at Jorf Lasfar, nor are there any facilities yet laid on the wharf for this purpose.

Vessel maintained consumption, average 12 tons per day (which included domestic, culinary, toilet flushing purposes and laundry) from the water made by evaporator at sea on passage and prior to arrival.

Agents advise me that in very urgent circumstances, fresh water is available by tug, approximately 40 tons maximum, from Casablanca, but very expensive. (Not less than US$2,500 per 40 ton delivery.)

MEDICAL: See "Documents".

There is a private clinic, and 3 hospitals for the general public, available at a town called El Jadida, about 25 km. from Jorf Lasfar.

Notify Agents who will make the necessary arrangements. Preferably 24 hours' notice is required due to the fact that there is no communication available from the ship or wharves (telephone). There is a telephone available at the Port Authority Office some 1.5 miles distant from the wharf area, but the office is not open day and night, also the Agent lives at Casablanca some 120 km. distant. My crew were cautioned to exercise care in their work habits to avoid accidents. Shore labourers will request first aid from the ship for minor cuts and bruises.

Dental treatment is also available at El Jadida.

It is advisable to have Cholera/Yellow Fever/Smallpox inoculations. Some charterers include this as a must in their charter parties. There is a Port Health Officer stationed at El Jadida, who clears the vessel on arrival.

FUEL: Not available.

FIRE PRECAUTIONS: Normal ship safety fire precautions. No equipment available from wharf. Nearest available fire brigade is from El Jadida.

CONSULS: None available at Jorf Lasfar, or El Jadida, nearest is Casablanca. British Consul will act for certain Marine matters for British registered vessels.

I was able to have an extension to the vessel's "Safety Equipment Certificate" done in 30 minutes.

Take your passport to the British Embassy to gain entry. This will be checked after you have filled in a small form to indicate the purpose of your call.

REPAIRS: There are no facilities available for ship repairs, deck or engine.

The nearest repair yards and facilities are available at Casablanca. From the port plan, it would appear that there is to be 2 small docks or slipways, with workshop attached.

DRY DOCKS: None.

SURVEYORS: 1. Cargo Surveyors/Inspectors not available at Jorf Lasfar.

2. Ship's Surveyors (Lloyds/ABS/BV) not available at Jorf Lasfar.

Agents will arrange for Surveyors from Casablanca to attend. I was able to get the Lloyd's Surveyor at Casablanca to extend vessel's "Safety Construction Certificate". It took 7 days. Lloyd's Surveyor: Mr. A. Hamad.

GANGWAY/DECK WATCHMEN: Compulsory. Two per vessel, one for ship and one on the wharf. It was noticed that they do a 24 hour shift. It is not essential to victual them, but as there is food available, it would seem the best idea to feed them and get good co-operation and service. The watchmen are ex-seamen and understand English. Agent will sign the victualling voucher.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 750 ml spirits per man/per week. They will open the bond stores for further issue weekly. Cost of obtaining Customs Officials per week 600 Dirhams which is about US$75.

Beer is not sealed.

If vessel's stay is to be an extended one, obtain permission and take out the required amount for the stay, on *arrival.* This will save you the charge each time the bond store is opened. The Agent only advised me of this after the first request for additional allowance.

Customs Officials will examine personnel and their baggage on leaving ship and returning from shore.

CARGO GEAR: Discharge was effected by shore gear, as our vessel is a gearless vessel.

Grabs were used, of which there were 8. They leak like sieves. ("Note of Protest" for loss of weight/quantity was served on receivers). The grabs are not the automatic open release type. They were landed on the hopper steel framework to effect release. The crane hooks were not moused, thus several times the grab wires came unsecured.

6 hoppers, the sides were not high enough, hence constant spillage.

A corkscrew type shaft, with an 8 in. tubular outer casing powered with a small electric motor at its head, driven by portable mobile electric generator, is used as a mini-elevator to load the grain which is dumped on the wharf into trucks and transported to the various consignees is one of the methods employed.

Cargo is also bagged from this stockpile on the wharf and carried and stacked on flat top trucks (240 bags per truck average) for delivery to consignees.

Canvas tarpaulins are used to cover the grain, in the event of rain.

We experienced 2 heavy downpours lasting about 3 to 5 hours, when pools and deep puddles of water developed (Berth No. 10), and 2 to 3 light rain periods lasting about 1 hour.

Include in your protest on arrival "Ship not responsible for damage due to discharge in wet or inclement weather, or for contamination and deterioration". This will be accepted by the receivers without question.

Direct loading from grab to hopper to trucks is also carried on. There is no weighbridge for weight checking.

Also see "Port Nador" – "Report, January 1984".

REPATRIATION: Crew members are able to join vessels or be repatriated.

Visas are required for certain citizens, whose country of domicile do not have diplomatic reciprocal consulates. Therefore please check before effecting any crew replacement.

On arriving at "Mohammed V" Airport at Casablanca, Immigration Authorities will endorse your passport with an entry permit. Cable or advise Agent the flight number and request Agent to assist in Immigration entry facilities.

You will have a baggage check at the airport.

When cleared you have to proceed to El Jadida where the Immigration will again endorse your passport. You will possibly have another baggage check at Customs in El Jadida and then proceed to Jorf Lasfar. This is because Jorf Lasfar is outside the jurisdiction of Casablanca.

AIRPORT: "Mohammed V" Airport is situated approximately 35 km. from Casablanca, allow 45 minutes driving time from the heart of the city. The airport is serviced by a great many airlines, to name but a few, Royale Air Maroc, Iberia, Air France, Sabena, British Caledonian, K.L.M., Swiss Air, Aeroflot, Lufthansa, British Airways, Iraqi Airways, Kuwait Airways, Libyan Arab Airlines.

Internal domestic flights are available to Agadir (on the coast), Marakesh and Ouarzazate (inland), Rabat the capital city of Morocco and Tangier.

There is no airport at Jorf Lasfar.

TIME: From October to May time kept is GMT/UTC.

From May to October time kept is GMT/UTC plus 1 hour. This is official. However, when we arrived (April '84) Summer Time GMT/UTC plus 1 hour was already in operation, so it will pay to check.

HOLIDAYS: There are 5 official governmental holidays.

There are 3 religious holidays (movable dates).

New Year's Day (English calendar).

On the above days "No Work is performed". This is questionable as we did work and sail on May 1st (Labour Day), which is one of the supposedly official holidays.

POLICE/AMBULANCE/FIRE: As yet there are no facilities available at the wharf in Jorf Lasfar. There are facilities at El Jadida 25 km. away. No assistance will be afforded the Master if he wishes security escort or Immigration facility for discharging crew members who are being dismissed for offences aboard ship, and have to be lodged in hotels prior to repatriation. They will only assist if there has been criminal assault on board.

EMERGENCY CO-ORDINATION CENTRE: None available at Jorf Lasfar. The Agent is your co-ordinator.

TELEPHONES: None at all available on ship, or wharf, at time of writing. Also see "Medical".

Overseas calls are possible from the Post Office at El Jadida or some of the 4 or 5 star hotels at Casablanca. There are no direct dialling facilities. Connections are made through Paris.

I had difficulty contacting my Owners at Singapore, so had to use the telex from the hotel and request them to call me, which did not take long.

SERVICES: None available at Jorf Lasfar. Casablanca is the nearest town to offer facilities for radio and radar repairs, through the Agents.

BANKS: None available at Jorf Lasfar. "Banque Credite Maroc" operates in El Jadida. Casablanca is the nearest city to offer any facilities for transactions.

STORING: Vessels can be stored by truck.

No barges available. No launches available, only the pilot launch. In due course when the port becomes fully operational storing from barge on the offside will be possible with ship's gear.

No regulations in force regarding storing at present.

Trucks can proceed alongside ship at the berths.

Fork lift trucks (2 available – 3 ton) belonging to the port. 1 front end loader rubber tyre was available.

Customs Regulations: Ship's machinery, spare parts, deck stores, goods shipped from overseas, are subject to Customs clearance.

VERY IMPORTANT: Declarations/invoices *must* be in the French language, proper, clear and precise nomenclature for *every item,* with the cost per individual item.

e.g. It took 9 days to clear a container (LCL) containing equipment for the installation of "Halon 1301" after the container was landed at Casablanca to be delivered to ship's side.

SHORE LEAVE: Shore leave is permitted for ship's Officers and crew. Passes are issued by the Immigration Authorities, after the vessel has berthed.

You must be in possession of your pass ashore.

If intending to stay at an hotel in El Jadida or Casablanca take your passport to check in at the hotel, as without it, you might not gain entry. Your passport will be held at the reception desk until account settled prior to checking out.

There is no way to obtain a taxi *from* the port.

Cargo transport trucks, initially offered crew transportation to El Jadida or Casablanca. Transport is available (taxis) from Casablanca or El Jadida, to the ship. Cost varies (day or night). Normal fare: El Jadida to ship 50 Dirhams (US$6). Casablanca to ship 350 Dirhams (US$42). Small mini-taxis are available for short distance transport in Casablanca. They do not have meters, 10 Dirhams seem to be the normal fare, for reasonably short distances.

"Siesta Time" is from 1330 to 1500 hrs. Business Houses (offices) close from 1300 to 1430 hrs. Working hours from 0830 to 1300 hrs. and 1430 to 1830 hrs.

Hotels: Casablanca: Several from 3 star to 5 star and prices range from 135 – 300 Dirhams for a single. Hyatt, 500 – 600 Dirhams. Consult tourist guide for information.

El Jadida: 2 hotels, the "Salam" and "Dounia", on the beach front. The former is more modern.

Sunbathing and swimming permitted in and around the hotel swimming pools. Tennis courts, volley ball, archery, horse riding, indoor dance and disco. Price for a single room 120 Dirhams. (No T.V. or telephone). Prices quoted do not include breakfast, lunch or dinner.

IDENTITY CARDS: See "Shore Leave".

REGULATIONS: No regulations as yet promulgated by the Port Authority. A Moroccan Harbour Master was appointed 1 week before we sailed.

As mentioned earlier Pilots are ordered by the Agent and come from Casablanca. The Harbour Master will not be doing pilotage.

DELAYS: We had none, having berthed on arrival. However, I would expect some delay if the wharf area has not been cleared from the previous vessel's cargo.

WEATHER: *April:* During the vessel's stay in port, strong winds Beaufort Force 7 were logged, coming from a West to W.N.W. direction. Winds backed to South and East, Beaufort Force 5. Heavy rain showers accompanied the winds. Temperatures ranged from 15°C at night to a maximum of 25° – 27°C during the day. Heavy dew after sunset.

AGENT: The Charterers and Owners both used the services of the same Agency.

Lasry Maroc, 30 Avenue de l'Armee Royale, Casablanca. Telex: 21949, 21092. Tel: 31.38.75, 31.19.54. Cables: Jolasry.

The above Agent has an office equipped with telex and telephone facilities at El Jadida.

Lasry Maroc, 2 Rue William Redman, El Jadida. Telex: Jolasry 78990 M. Tel: 3276, 3370. Cables: Jolasry, El Jadida.

Note: 1. The telex number at Casablanca we used was Sagnav 24646 M.

2. The telephone numbers at Casablanca shown above are those printed on Agent's visiting cards.

KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.

PILOTAGE: Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from 2 hours before until 1 hour after HW during the night, and from 3 hours before until 2 hours after HW during the day. The Pilot boards vessels at river mouth. The Pilot will be on station 2 hours before HW.

On arrival at the Roads or after 0830 hrs., call the Pilotage Department and advise arrival time at the Roads and draft. Pilotage Department on VHF Channel 16 and 2182.

RESTRICTIONS: From the mouth of the river up to the port is a dredged channel. Depths are 4.20 m. during neap tides and 5.40 m. during spring tides. Height of tide during neap tide is 2.60 m. Height of tide during spring tide is 3.80 m. The constant is 1.60 m.

During the Winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra port radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.

Vessels are berthed and unberthed in daytime only at present time.

RADIO: Messages to ship's Agent should be sent through Casablanca Radio. In the ETA message to Agent, also advise vessel's draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during HW, on 2182 kHz.

TUGS: Two tugs of 250 h.p. and one of 130 h.p.

BERTHING: The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 m. and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.

FRESH WATER: Supplied alongside the quays.

FUEL: There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.

REPAIRS: There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.

CONSULS: The Consular representatives at Kenitra are those of Belgium, France and Portugal.

AIRPORT: The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.

AUTHORITY: Directeur du Port.

AGENT: Consortium Industriel Commercial et Maritime, 19 Boulevard Imam Ali, Kenitra. Tel: 22 56 (3 lines). Telex: 91030 Boutrans and/or 91966 Incomar. Cables: "Incomar Kenitra".

MOHAMMEDIA: 33.45 N. 07.22 W. (See Plan Book)

DOCUMENTS:

Bill of Health.
3 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
Manifests and Ship's Papers for Agent.

PILOTAGE: Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot available for vessels arriving during night and wishing to enter the basin when conditions are possible.

ANCHORAGES: Three good anchorages in depths of 11 to 6.5 fathoms about a mile N.E. of the entrance, and N.W. and S.E. of the pipe-line area.

RESTRICTIONS: Vessels with a draft over 15 ft. wishing to berth in the basin are obliged to wait for tide.

MAX. SIZE: Sea line installations:

No. 1 Berth – Tankers up to 100,000 d.w.t.
No. 2 Berth – Tankers up to 120,000 d.w.t.
For the basin: max. length 150 m., max. draft 6.9 m. (22 ft. 8 in.).

HEALTH: Port Sanitary Control Officer boards immediately after arrival for Pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.

RADIO: Casablanca Radio Station.

TUGS: There are no tugs but 3 pilot boats of 150 h.p. will assist vessels if necessary, or tugs can be ordered from Casablanca.

BERTHING: Vessels up to 150 m. in length and drawing up to 6.9 m. (22 ft. 8 in.) at Spring tides and 5.4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 m. with a depth of 8.50 m. (28 ft. alongside).

Quay No. 2 has a length of 170 m. with a depth of 5.50 m. (18 ft. alongside). Max. LOA 120 m. Max. draft 6.0 m.

Quay No. 6 has a length of 60 m. with a depth of 6.00 m. (19 ft. 8 in. alongside).

TANKERS: Sea line installations located in position Lat. 33° 44′ 01″ N., Long. 7° 23′ 02″ W. in depth of water 70 ft. Diameter of swinging area: 850 m.

Vessels may be berthed by day. Mooring is effected by 6 floating nylon ropes, each 200 m. long, made fast to the after end of the vessel and by both anchors.

The buoy is connected to a floating crude oil line, 20 in. diameter, with two flexible hoses of 16 in. diameter. One flexible hose of 8 in. diameter is available for discharging refined products. There are no facilities for discharge of slops or dirty ballast.

Smaller tankers may also berth at harbour quay No. 1.

Also see "Max. Size".

STEVEDORES: The loading and discharging capacity of general cargo or timber is 300 tons per day. Gangs are arranged by the stevedores according to the cargo plan given by the consignee to the harbour authorities.

MEDICAL: There is the hospital in Mohammedia, and other hospitals and clinics in Casablanca (16 miles away). Vaccinations can be arranged.

DENSITY: 1025.

FRESH WATER: Water can be supplied at any time alongside the quays at the rate of 15 t.p.h. There is no fresh water supply to the offshore tanker terminals.

FUEL: Available from Casablanca at 48 hours' notice.

FIRE PRECAUTIONS: All tankers are confined by gates and watched over by special firemen.

GANGWAY/DECK WATCHMEN: Watchmen are recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. When carried out by stevedores the cost is charged.

IDENTIFICATION CARDS: Passport required and police permit for leaving the harbour.

CONSULS: There is no consul in Mohammedia. All are in Casablanca.

AIRPORT: The nearest airport for international flights is Nouasseur. Casablanca Airport operates internal flights only.

HOLIDAYS: 1st January; 1st May; 3rd March; 18th November; and any other religious holidays which are not at regular dates. Only on two days (1st January and 1st May) no cargo work can be arranged.

POLICE/AMBULANCE/FIRE: Police, 21.51; Ambulance/Fire, 15.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Breakwater, length 2.6 km. under construction. The breakwater will have 5 berths with depths of 20 m. which will be able to accept tankers up to 150,000 d.w.t.

AUTHORITY: The Harbour Master, RAPC, Port de Mohammedia.

PORT NADOR (Beni Enzar): 35.17 N. 02.56 W.

SHIPMASTER'S REPORT: November 1979.

DOCUMENTS:

6 Crew Lists.
3 Stores Lists.
Vaccination List.

PILOTAGE: Compulsory. Pilot boards off the breakwater and requires 1 hour's notice.

ANCHORAGE: About 0.5 miles N.E. of the breakwater.

RESTRICTIONS: Vessel is able to enter and leave at any stage of the tide, day or night.

MAX. SIZE: LOA 500 ft. (approx.). Max. draft 8.5 m. (approx.). Size of vessel limited by swinging room. Underkeel clearance of 1.5 m. required.

RADIO: Nador Radio.

VHF: Port Authority and Pilot on Channel 16.

TUGS: One tug of 600 h.p. An additional tug of 1,500 h.p. may be available.

BERTHING: *Berth No. 1:* The berth is close to the entrance and the max. size permissible is approximately 400 ft. LOA and approximately 8.5 m. draft. The least depth in the channel from sea to the berth is 13 m. The nature of the bottom at the berth is sand and mud and the density is 1025.

Cargo Facilities: There is 1 ore loader for small vessels. There are 4 mobile cranes with safe working load of 6 tonnes. No Ro/Ro facilities. There is ample mechanised equipment for handling palletised cargoes. There is storage space for break-bulk cargoes and storage for palletised cargoes, however, there is little covered space. There is no equipment for handling containers and there is no storage space for containers as there is no hard ground.

FACILITIES: The following are available: fresh water, fresh provisions, small repairs, small machine shop, airport (at Oudja 140 km.), Lloyd's Surveyor, Salvage Surveyor, laundry service, doctor and hospital, groceries and meats.

CONSULS: Spanish Consul located in the port. British and French Consuls at Oudja.

TIME: GMT.

GENERAL: Port Nador is situated next to Melilla, and the same entrance between the breakwaters is used for entering, although both ports are run entirely separately, Melilla being Spanish and Port Nador being Moroccan. The Moroccans are sure that Melilla will soon be theirs, then it will become one large port.

The port under construction is to have 14 berths, at the moment there are only 2 berths working, both of which are only partially completed. The only shed constructed is used for palletising and storing fruit.

Maximum intended draft when all is completed will be 13 m.

DEVELOPMENTS: Port construction is taking place at the present time and eventually 14 berths will be available and when this is completed Melilla and Port Nador are expected to become one port. There will be 1 oil/mineral berth with depth of 12.5 m., 2 berths with 8.5 m., 1 berth with 6.5 m. and 1 berth with 5 m. in the initial stages.

REPORT: Dated September 1980.

This port is still under construction but for the last 2 years has been open for trade of iron ore, lead and citrus fruit (seasonal). There are 3 piers now in use as follows:

Mole No. 1 (S.W. side) for the shipping of iron ore.
Mole No. 2 (N.E. side) for lead and general cargo.
Mole No. 2 (S.W. side) for citrus fruit.

The N.E. side of Mole No. 1 will also be for minerals but is still under construction.

REPORT: January 1984.

Ships have discharged on voyage charter at Nador on two occasions with similar experiences in the discharge of grain. Ships berthed at an open quay and the cargo was 'dumped' by portable cranes of light construction which are fitted with anemometers, in an area too far from the side of the ship to allow the use of ship's cranes. When the wind reaches Force 4 it is considered too dangerous to continue discharge and work ceases.

Charterers claim that work is stopped by the Port Authorities and that such time lost does not count as laytime, claiming it is a non weather working day.

This method of discharge is used because of a shortage of lorries, which, if they were available, could be loaded using ship's gear alongside the ship during such stoppages for wind.

Whilst no delays have been experienced at the port of Jorf Lasfar, the Master informed us that the same method of discharge was used at that port.

Owners should endeavour to protect themselves when fixing business which is likely to include discharge at this port as the wind seems to reach Force 4 on many days and a lot of time is lost resulting in costly delays.

AUTHORITY: R.A.P.C.

SAFI: 32.19 N. 09.12 W.

DOCUMENTS: Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects Lists, 3 Passenger Lists and 1 Stores Lists only are required. Other documents are presented on berthing.

PILOTAGE: Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's Office. The pilot boat is located inside the harbour and the Pilot boards in position Lat. 32° 19′ N., Long. 9° 16.1′ W. Pilot ladder only is required.

ANCHORAGE: Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 d.w.t. vessels. Vessels should keep port entrance clear.

MAX. SIZE: Vessels with a draft of more than 28 ft. and up to a max. of 30 ft. enter and sail at high water.

Also see "Shipmaster's Report".

HEALTH: Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.

RADIO: Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF Channel 16.

TUGS: Tugs stand by vessel inside breakwater and, usually, ship's lines are used.

BERTHING: Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900 hrs.

STEVEDORES: Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.

MEDICAL: Advance notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Vaccination is only necessary when vessels have called at cholera and yellow fever ports.

TANKERS: Only small tankers used in this port. White products and gas oil imported; no export. Ammonia tanker berth max. draft HW 30 ft.

DENSITY: Density varies between 1024 and 1026.

FRESH WATER: Availability not limited; by hoses from quay.

FUEL: Limited supplies gas oil; diesel available but must be stemmed. Fuel oil and large quantities diesel, gas oil can be delivered by tanking lorry from Casablanca.

GANGWAY/DECK WATCHMEN: Watchmen necessary. One watchman day and night.

OPENING/CLOSING HATCHES: Normally done by crew but can be arranged by stevedores with advance notice.

CUSTOMS ALLOWANCES: 200 cigarettes, and one open bottle of spirit allowed each man. Bond is sealed and heavy fines are imposed by Customs for smuggling.

IDENTIFICATION CARDS: These are needed.

CONSULS:

Denmark,	Tel: 30.39	France,	Tel: 27.97
El Salvador,	Tel: 28.76	Portugal,	Tel: 23.58
Finland,	Tel: 31.40	Sweden,	Tel: 29.06

REPAIRS: Major repairs not possible; small workshops only for repairing fishing boats.

REPATRIATION: Repatriation by air or sea through Casablanca, 150 miles away.

AIRPORT: Nearest at Nouasseur, served by principal European airlines.

HOLIDAYS: On the following holidays no work is possible: 1st January (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Day); 18th November (Independence Day). Other Moslem and Christian holidays are subject to last minute decisions as far as tariff is concerned, but work can be arranged.

TELEPHONES: No telephones can be placed on board. Public telephone available on the quay during working hours only.

GENERAL: Masters are strongly advised to take local currency from their Agent. Landing of foreign currency encourages black market transactions and incurs confiscation and heavy fines as well as delays by the Customs Authorities.

SHORE LEAVE: Police permits are required by crew and are delivered by Immigration Authorities.

SHIPMASTER'S REPORT: January 1983.

Max. Size: Maximum draft on entry was said to be 35 ft. (10.67 m.) on HW.

At Phosphate Wharf vessels loading to more than 8.8 m. must – due to berth/draft restrictions – work for completion on HW. Max. LW draft at inner end was given as 9.3 m. minus 0.5 m. for surge effect.

Air draft problems affect large vessels in ballast and it is advisable to keep tank ballast in until alongside.

Conveyor outreach limits can cause problems for wide beam twin hatch vessels.

Berthing: Restriction on night entry on longer vessels applicable. (This vessel sailed at 2300 hrs. on HW with a draft of 10.54 m. Pilot transferred to another large deep draft vessel which was to move into our berth after we cleared).

Stevedores: At Phosphate Wharf, 24 hour working to suit tides, via 2 conveyors each of capacity 750 t.p.h., weights found to be accurate.

General: Small amounts of foreign currency may be taken/used ashore; occasionally gate officials enter amount on back of landing permit.

Phosphate company generally require all final ships' paperwork to be signed in their office ashore.

AUTHORITY: Capitainerie de Port.

AGENT: Lasry Maroc, 14 Quai de l'Industrie, Safi, Morocco. Tel: 313875, 311954. Telex: 71067.

TANGIER: 35.47 N. 05.48 W. (See Plan Book)

PORT LIMITS: To the South by the coast and port installations and to the North by a line joining Pointe de Malabata and the Mouth of L'Oued el Youd.

DOCUMENTS: Required on arrival:

Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.

Required on departure:

5 Cargo Manifests.
5 Manifests of Passengers Embarking.

PILOTAGE: Pilotage is compulsory for ships of more than 50 g.r.t. for entering, leaving and shifting in harbour. Departure possible throughout 24 hours, entry up to the last departure. Pilot on VHF Channel 16 throughout 24 hours. Vessels should advise arrival 6 hours and 1 hour in advance.

Pilot boards 0.5 miles North of head of breakwater.

ANCHORAGES: There are good anchorages to the East and Southeast of the breakwater head in depths of 10 m.–16 m.

RESTRICTIONS: The harbour area between the breakwater and the extremity of the main pier has a minimum depth of 9 m.

HEALTH: Apart from the international laws which must be obeyed, vessels coming from an infected area must send in advance (12 hours) a telegram to "Saniport Tangiers" describing the state of the vessel and persons on board.

Vessels having a sick person on board to be landed at the port must send a telegram as soon as possible to "Saniport Tangiers" with all details concerning the case to be brought ashore and await the corresponding reply.

Hospitalisation will be in a State hospital, or, if needs be, in a clinic. No disembarkation of a sick person may take place without the presence or ruling of the health authorities of the port.

Vaccinations necessary in case of need are carried out on the spot and in accordance with the requirements of the OMS.

Evacuation of sick persons is effected by ambulance, either municipal or private, after having advised the Port Health authorities.

RADIO: Tangiers Radio listens on 2182 kHz and VHF Channel 16. Weather forecast at 0915 hrs. and 1630 hrs. GMT on 1911 kHz.

TUGS: The port owns 1 tug of 1,500 h.p. equipped with fire-fighting equipment.

BERTHING:

Total Length	*Max. Draft*	*Remarks*
290 m.	28 ft.	
300 m.	28 ft.	New Mole
200 m.	20 ft.	
100 m.	14 ft.	

Berth TC: (extension of the new mole) has a depth of 12.0 m.

Car Ferry Berths: 3 installations for car ferries (2 ramps and 1 quay). Max. load on ramps 60 tonnes (30 tonnes per axle).

Roll-on/Roll-off: Berth T3: Length of quay 90 m. Max. draft 5 m. Width of vehicle approach way 5.30 m. Max. weight permitted 40 tonnes.

Berth T4: Length of quay 140 m. Max. draft 6 m. Width of ramp at landside 6.60 m. and at ship's side 10.8 m. Max. capacity 50 tonnes.

CRANES: 7 mobile cranes, lifting capacity 6 tonnes. 1 Titan rail mounted crane with capacity of 60 tonnes. No floating crane available.

STEVEDORES: Normal working hours are from 0800–1200 hrs. and from 1400–1800 hrs. Overtime: 1200–1400 hrs. and 1800–2400 hrs. Usual loading and discharging rates are as follows: 15–18 t.p.h. goods in sacks; 12–15 t.p.h. for bales; 10 t.p.h. for general cargo; 7–8 t.p.h. for cork.

TANKERS: Length of berth 60 m. Butane gas carriers also handled.
FRESH WATER: Replenishment of fresh water can be made at all times alongside the quays at the rate of 30 t.p.h.
FUEL: There are no refuelling installations at the quays. Only very small quantities can be supplied by tanker lorries belonging to the oil companies.
GANGWAY/DECK WATCHMEN: Advisable, order through Agent.
REPAIRS: Slipway for small vessels, no shipyard.
AIRPORT: International airport 12 km. from port on the road to Rabat.
TIME: GMT in Winter. GMT plus 1 hour in Summer (Date of change variable).
TELEPHONE: Installation only possible at the jetty.
POLICE/AMBULANCE/FIRE: Police: Tel. 19; Town Ambulance: Tel. 324-44, 342-42 and 376-83; Private Ambulance: Tel. 210-89; Fire Brigade: Tel.15.
GENERAL: *Tides:* Height of Springs, 2.20 m. Height of neaps, 0.50 m. *Wind:* (October – May) W. and S.W., (May – October) E.N.E. (sometimes Force 8).
Swell: From the N.W. in Winter which creates fairly rough seas in the port.
Currents: Insignificant.
AUTHORITY: Regie d'Aconage du Port de Tanger, B.P.305, Tangier, Morocco. *Tel:* 360-40/45. *Telex:* 336-90. *Contact:* Port Commandant.
AGENT: Lasry Maroc (Tangier), 4 Rue de la Mediterrannee, Tangier. Telex: 33064. Tel. 335-75-325-76. Cables: "Jolasry".

TAN-TAN: 28.29 N. 11.01 W.

The following is a translation of French Notices to Mariners.

The new fishing port of Tan-Tan is situated close to and to the S.W. of Cape Nachtigal. The main breakwater is 1,698 m. long, running N.E. for about 900 m. and then to the East towards the coast. The counter-dyke (230 m.) is perpendicular to the main breakwater at about 100 m. from its end. In the extension of the counter-dyke, and starting from the coast, the cross dyke is 548 m. long.

The port entrance faces S.W., the passage is about 100 m. wide between the ends of the counter-dyke and the cross dyke.

The port has 2 berths with 6 m. and 4 m. depth, one berth on the cross dyke and the other on the main breakwater. It also has a slipway 100 m. long and 50 m. wide.

Inside the port care must be taken when the winds are from West to North which produce a fairly strong undertow.

In October 1979 there were no lights or buoys. Arrival by day is recommended. A characteristic gap in the cliff and buildings to the N.E. of the port, together with a mountainous summit to the South will be seen. To the North of the main breakwater, the sea breaks over a barrier reef. Near the port the current runs Southwards.

Anchoring is possible in 12 m. – 13 m. of water, with sandy bottom and very firm, 1.2 miles to the W.S.W. of the end of the main breakwater. A shallow of 6.4 m. is located 0.5 miles to the West of the end of this breakwater.

VILLA CISNEROS (Dakhla): 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*
Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.
Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.
PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 g.r.t. Contact Pilot by radio-telephone, via Port of Villa Cisneros Radio operating on 2182 and 2626 kHz from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.
ANCHORAGES: In depths of more than 10 m. about 0.6 miles East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading transhipment cargo anchor in position with Punta Galera Light bearing 030°T, 1.2 miles off. The prevailing winds blow mostly from the North up to Force 3 with a long low swell mostly from a Northwesterly direction.
MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.
HEALTH: Masters are required to complete a health certificate for the Port Captaincy declaring that the vessel has not called at any infected ports.
TUGS: None available, only one small launch which may assist.
BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.
STEVEDORES: Employed by Port Authority and engaged by ship's Agent.
MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.
TANKERS: Moor at Jetty No. 2. Pipelines 4 in. diameter.
FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.
FUEL: Atlas Company can supply fuel subject to advance notice.
OPENING/CLOSING HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.
IDENTIFICATION CARDS: Seamen going ashore must take an identity card or a shore pass, issued by the Master.
CONSULS: No local representation.
REPAIRS: Only facilities for very minor repairs.
REPATRIATION: Can be arranged provided that documentation is in order.
AIRPORT: Situated 1 km. from the port. 5 flights per week.
TIME: GMT is used all year round.
HOLIDAYS: Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).
POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire, Tel: 18. Ambulance, Tel: 17.
SHORE LEAVE: Allowed without restriction.

NOTES

Please also advise Shipping Guides Ltd.

Mozambique

BEIRA: 19.46 S. 34.50 E. (See Plan Book)

PORT LIMITS: Vessels are considered to be "arrived ships" when they enter the pilotage area, i.e. when they enter within a radius of 5 miles from the pilot boat. The custom of the port is that vessels are in "Free Pratique" only when they have entered port and have been cleared by the Immigration Authorities. Immigration will only clear vessels in port.

DOCUMENTS:

Customs Clearance from last port.
Health Certificate.
8 Crew Lists.
8 Lists Passengers in Transit.
8 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
8 copies of Manifest of Beira Cargo.

Shipmaster's Report: March 1981.
Customs Clearance from Last Port.
Declaration of Health (Form Modelo No. 101-s.s.).
2 Sets Vaccination Lists.
7 Crew Lists.
7 Passenger Lists (with Passport Nos.)
2 Store Lists (Lista De Mantimentos).
2 Crew Declarations (Company Form).
3 In-Transit Cargo Lists (Tonnage and Main Items) Company Form/Letter.
3 Hazardous Cargo Manifests.
Register of Entrance (Form DSM-079) (To Pilot).

Note: Shore passes issued at gate in exchange for seaman's ID card/book. Radio Pratique not available.

PILOTAGE: Compulsory for all ships other than naval vessels. Ship's name, ETA and draft should be radioed via Beira Radio, call sign CRS, 24 hours in advance to Port Captain Beira and owner's Agent.

The pilot boat – black hull, grey upperworks, black funnel with white "P" – is stationed Lat. 19° 52′ 47″ S., Long. 34° 57′ 21″ E. Pilot boat call sign CRL H – W/T: listens on 500 kHz, replies on 480 kHz, – R/T: listens on 2,182 kHz, replies on 2,341 kHz. – VHF: frequency 156.6 MHz. (Channel 12).

Unless instructed to the contrary by the pilot boat, vessels with a draft under 25 ft. anchor by "P" buoy, 19° 52′ 47.3″ S., 34° 57′ 21.1″ E., and vessels with draft over 25 ft. anchor between "P" and "A" buoys, 19° 56′ 20.1″ S., 35° 02′ 44″ E.

In bad weather pilot boat may leave above position and enter port. In such cases vessels should anchor as indicated above, weather permitting.

ANCHORAGES: At Bar, "P" and "A" buoys as indicated above. There is anchorage for 4-6 ships, depending on size, in inner harbour off Cabedelo sand-pit.

RESTRICTIONS: Ships with draft 16 ft. and under can enter at any time. Ships with draft over 16 ft. generally enter 2 hours either side of high water.

MAX. SIZE: Max. permissible length about 800 ft. Max. permissible drafts between 33-36 ft. at springs, about 27-29 ft. at neap tides.

HEALTH: Vessel to radio "Sanidade Maritima", Beira, their ETA and "All Well". If "All Well", Health Certificate given by Pilot.

RADIO: Vessels to route messages through Beira Radio – call sign CRS. Agents radio ships through same station. Naval Radio Station – call sign CRX 3 available for distress signals.

TUGS: Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. 4 tugs available, up to 3,200 h.p.

BERTHING: No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Pungue Wharf:

Berth No.	*Depth (ft.*	*in.)*	*Length of Berth (ft.)*	*Cranes (Electric)*
1	32	02	580	2× 6 tons 4× 3 tons
2	31	02	530	2× 6 tons 4× 3 tons
3	33	00	530	3× 6 tons 3× 3 tons
4	32	00	525	2× 6 tons 3× 3 tons
5	26	09	530	2×3.5 tons 1× 5 tons 1× 3 tons
6	26	03	540	1× 10 tons 5× 5 tons
7	29	04	540	1× 10 tons 5× 5 tons
8	32	00	630	Conveyor Belt
9	27	08	540	1× 10 tons 5× 5 tons
10	31	06	550	1× 20 tons 5× 5 tons

Note: Wharf No. 1 is generally used by trawlers, No. 2 by trawlers and coasters, No. 3 by vessels loading cement, Nos. 4, 5, 6, 7, 9 and 10 for general cargo.

Range of Tides: 15–21 ft. Maximum depth of water should only be taken as an approximate guide as actual depths are dependent on the port dredging programme. Maximum permissible draft for turning ships round at or off the wharves is 30 ft.

Chiveve Cais; length, 446 m.; depth, max. 10 m., min. 3 m.

CARGO HANDLING FACILITIES: There is a mechanical ore appliance at No. 8 Berth Pungue Wharf, used mainly for minerals like chrome, coal, etc. This appliance has an average loading rate of 1800-2000 tons per 20 working hours. It is equipped with only one spout.

Mobile Cranes: 25 cranes with capacity 1-10 tons.

Electric Cranes: See "Berthing" – Pungue Wharf.

Steam Cranes: 19 cranes at Chiveve Wharf with capacity 3-20 tons.

Molasses: Storage tanks, capacity 18,000 tons. Served via No. 8 Berth.

Vegetable Oils and Tallow: 3 tanks×400 tons capacity.

STEVEDORES: Ordered by Agent. Vessels should advise Agent their ETA at least 12 hours in advance (weekdays), 24 hours in advance (week-ends).

Port Cargo Working Hours:

Normal	–	Weekdays	– 0700–1100 1300–1700
		Saturdays	– 0700–1100
Overtime	–	The remainder of the day and up to 1700 hrs. on Sundays is considered overtime. All vessels are required to work full overtime including Saturdays and Public Holidays as ordered by Port Authorities. The only time when no work is carried out is from 1700 hrs. on Sundays to 0700 hrs. on Mondays.	

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid cholera and yellow fever certificates on international forms. Vaccination fever inoculations and certificates may be obtained ashore if required.

TANKERS: Discharge lines white and black oils, 2×10 in. lines feeding into 12 and 14 in. lines leading to storage tanks. Also a 22 in. discharge line for crude oil. No slop discharge facilities. 2 tanker berths max. permitted drafts about 31 ft.

DENSITY: In harbour area allow 3 to 4 in.

FRESH WATER: Available at all Pungue Wharf berths, pumping rate about 50 t.p.h.

FUEL: Fuel oil 1,000 Secs R. viscosity, marine diesel 43.1 Secs R., diesel 34.1 Secs R. 3-4 days advance notice required. Bunkers delivered when alongside, no bunkering barge available.

GANGWAY/DECK WATCHMEN: Compulsory to employ watchmen to prevent pilferage.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CUSTOMS ALLOWANCES: There is no restriction on crew member holding in his cabin any amount of tobacco/wine, spirits.

SHIP CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CARGO GEAR: All gear supplied by stevedores except rope slings, rain tents, and spreaders for heavy lifts.

IDENTIFICATION CARDS: Required. Passport if possible, otherwise Seamen's Book.

CONSULS: None at present time.

REPAIRS: Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

DRY DOCKS: 1 dry dock 115×17×8.5 m., suitable for ships up to 5,000 tons, LOA 377 ft. and max. beam 55 ft.

REPATRIATION: Facilities exist and a valid passport is necessary as Immigration Authorities do not recognise a Seamen's Book as a valid travel document.

AIRPORT: Beira Airport situated 7 miles from sea port and is served only by domestic airline which maintains 2 flights per day to Maputo from where international connections available.

TIME: Local time 2 hours. ahead of GMT. No alterations made to clocks during year.

HOLIDAYS: January 1st (New Year's Day); February 3rd (Hero's Day); April 7th (Woman's Day); May 1st (Labour Day); June 25th (Independence Day) and September 25th (Army Day).

POLICE/AMBULANCE/FIRE: Port Police (Tel. 22920); Ambulance (Tel. 22442); Fire (Tel. 22222).

TELEPHONES: No telephones placed on vessels.

SERVICES: Services normally available for tank cleaning, compass adjusting, minor repairs to radar and radio.

SHORE LEAVE: Crew members and officers are allowed ashore, and shore passes are issued against Seaman's Book or Passport.

DELAYS: Generally no delays, but sometimes 24-48 hours' delay following rain or bunching of arrivals.

GENERAL: Beira port works 20 hours per day, 7 days a week (except 1st January) and overtime working is compulsory.

DEVELOPMENTS: A long term master plan is to be undertaken.

The plan includes a new oil terminal for tankers up to 50,000 d.w.t., new coal terminal for vessels up to 125,000 d.w.t., new bulk terminal for sugar and cereals and new container/multi-purpose terminal. The access channel will also be deepened in order to accommodate larger vessels.

AUTHORITY: Direccao do Porto da Beira.

AGENT: Rennies Freight Services (Mozambique) SARL, P.O.Box 270, Beira. Tel: 2 2091. Telex: 7332. Cables: Thaine.

MAPUTO: 25.59 S. 32.36 E. (See Late Plans)

DOCUMENTS:

6 Crew Lists.
1 Stores List.
6 Passenger Lists.
Last Port Customs and Port Clearance.
1 List of Ports of Call.
1 Health Declaration (given by Pilots on arrival).
1 Entrance Report (given by Pilot on arrival).
1 Customs Entrance (given by Agent on arrival).
1 Railway Statistics Form (given by Agent on arrival).

Shipmaster's Report: March 1981.
Same as Beira Report except:
6 Crew Lists (1 to Pilot).
1 Stores List.
6 Passenger Lists.
1 Crew Declarations.
1 List Ports of Call.
In Transit and Hazardous Cargo not required.

Notes: Immigration requires all-hands muster with I.D. card/book both entering and sailing.

Immigration Clearance: Inwards: 0600 – 1800 hrs. only inside harbour proper. Outwards: 0600 – 2400 hrs. except in special circumstances.

N.B. Vessels at the pilot station cannot obtain Pratique because this includes Immigration clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

PILOTAGE: Compulsory. Channels in 24 hour use, but sailing after 2400 hrs. only by special arrangement with Immigration. Berthing only during daylight.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 12).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.

Pilot Boarding Position: See "Shipmaster's Report".

ANCHORAGES: Inside harbour: One each for vessels drawing 33, 31, 27 and 26 ft. respectively. Six for vessels between 17 ft. and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

RESTRICTIONS: Berthing during daylight only. Unberthing 0600 hrs. to 2400 hrs. with exceptions of Matola piers where ships can only unberth during daylight. Ships over 650 ft. may not pass through dredged Channels at night. Ships up to 23 ft. may sail at any time, any tide up till midnight. Thereafter arrangements to be made with the Pilot Department for ETD.

MAX. SIZE:

	Max. LOA	*Depth LWOST*
General Cargo Wharf	750 ft.	22 ft.–34 ft.*
Matola Oil Pier	750 ft.	32 ft. 6in.
Matola Ore Appliance	820 ft.	40 ft. but governing draft is at the North Bar.*

*Maximum drafts published by Port Authorities. Approximately 34 ft. 5 in. to 37 ft. 2 in. depending on tide.

BERTHING: At Matola Ore Berth vessels must berth only at permissible times according to tides.

Main Wharf: All facilities owned and operated by Caminhos de Ferro de Mocambique (CFM), except stevedoring.

Dimensions: Wharf is in an uninterrupted line running roughly N.E./S.W., accommodating 12 – 15 vessels. Length: 3,033 m.

For loading or discharging bulk grain there are 2 Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 t.p.h. A recent vessel averaged 2,900 tons per day.

Coaling Appliance (Reported Inoperative): The coaling appliance can berth vessels of LOA 750 ft., beam 91 ft. 10 in. and a max. draft of 34 ft. 6 in.

The best loading rate, in theory, is about 10,000 tons per day, however, in practice, allowing for shunting trucks, warping ship, etc., average rate is about 7,500 tons per day.

The length of the chute is 181 m. and it operates between angles of 46° and 58° to the perpendicular. At 46° the tip of the chute is 4.80 m. above wharf level and 9.50 m. from the wharf edge. At 58° the tip of the chute is 7.60 m. above wharf level and 11.80 m. from the wharf edge. At lowest spring tide the water at the coaling berth is 5.90 m. below wharf level and at highest spring tide 2.15 m., the difference between max. extremities being 3.75 m.

Sugar Terminal: The daily intake capability of installation is 2,000 tonnes and it has storage facilities in three sheds with a capacity of 40,000 tonnes each. It has a nominal loading capacity of 750 tonnes. The stowage within each hold is done by means of a telescopic trough and a mechanical distributor (projector) and is capable of projecting the sugar in various angles and distances. Max. reach of the jib is 17 m. Min. reach of the jib (in use) is 11.50 m. and the limit of inclination of the jib (in use) is ± 15°. Max. draft alongside is 33 ft. 06 in.

Depths Alongside:

Berth A	30 ft.
Berth B	32 ft.
Berth C	30 ft.
Berth D	31 ft.
Berth D3	31 ft.
Coal Tip	33 ft.
Berth Frigo	30 ft.
Berth G	33 ft.
Berth H	33 ft.
Wharf extension	40 ft.

LPG Carriers: Berth at Matola Ore Berth.

Timber: Vessels berth at Matola, Post No. 1 (P.I.). Max. draft 32 ft. Max. LOA, 600 ft. Vessels over 550 ft. LOA and draft over 25 ft. berth and sail during daylight hours only.

HEALTH: Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Maputo.

RADIO: Advice of arrival 16 hours before to the Port Captain or Chief Pilot and Port Health should be sent through the station CRX (Naval), operating 24 hours on 500 kHz, replying on 437 kHz, also 2000 to 0500 hrs. GMT on 8356 to 8376 kHz (replying 3642 kHz) and 0800 to 2000 GMT on 12534 and 12564 kHz (replying 1299 kHz). All other non-official messages through station CRL, operating 0200 – 1800 GMT on 6 MHz at even hours, 0400 to 1800 GMT on 4 MHz at even hours plus 30 minutes (answering on 4259 kHz). Continues watch 0200 – 0400 GMT on 4 MHz. Radio telephone through CRL on 2132 kHz at even hours plus 45 minutes 0600 – 1700 GMT answering on 4415 kHz.

VHF: Pilot boat (Inhaca Station) and port radio operate on Channel 16 (calling) and Channel 12 (working) from 0530 to 1830 hours.

TUGS: 4 tugs available, 3,200 h.p., 3,200 h.p., 1.500 h.p. and 1,200 h.p.

CRANES: *Electric Cranes:* 82 units with capacity 3 to 20 tons.
Mobile Cranes: 63 units with capacity 4 to 12 tons.

Heavy lift crane with capacity of between 60 – 80 tons.

STORAGE CAPACITIES:

Ore and Coal Dumps: Gorjao Wharf.

	Tons
Coal	96,000
Ores	600,000
Copper	40,000
Vermiculite	4,000
Steel, Beams and Billets	46,000
Vanadium	7,000

Oil: Storage capacity 200,000 tons.
Molasses: 4 tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.
Fruit: 7,500 tons (1.133 cu.m./ton) in 100 chambers.
Fish: 200 tons.
Ore: Matola. Capacity 1.3 million tons. Loading speed for iron ore 1,500 t.p.h. and chrome ore 750 t.p.h. (via trucks) and 1,200 t.p.h. (ex bins).
Sugar: See "Berthing".
Containers: Containers and steel handled at the New Wharf Extension (Length 3,000 ft. – 3,500 ft.). 20 ton cranes available, also 20 ton fork lifts for moving steel. Ro-Ro vessels are handled.

STEVEDORES: *Working Hours:*

Normal:	Weekdays:	0700 – 1100, 1300 – 1700
	Saturdays:	0700 – 1100.
Overtime:	Weekdays:	1900 – 2300, 0000 – 0600.
	Saturdays:	1300 – 1700, 1900 – 2300.
	Sundays:	All day.

Overtime is compulsory on a daily basis (including Saturdays and Sundays) from 1900 – 2300 hrs.. and from 0000 – 0600 hrs.

The responsibility for overtime costs should be clearly defined in the Charter Party, normally 50/50 between charterers and owners.

TANKERS: Matola Mineral Wharf, 40 ft. LWOST, max. length of vessel 820 ft. Matola Oil Jetty, 32 ft. 6 in. LWOST, max. length of vessel 750 ft.

Dolphin berth at Matola (P3) has been erected for tankers. Max. draft 35 ft. Max. LOA 750 ft.

FRESH WATER: Available at all berths, not available ex-barge.

FUEL: Vessels can be supplied from pipe-lines whilst working at all berths, including the Matola Appliance and Tanker jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 to 500 tons per hour depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800 – 1130 hrs. and 1400 – 1730 hrs.; Saturdays 1000 – 1130 hrs., but always available on an emergency call.

REPAIRS: No dry dock except for small coasters. Facilities for most normal work, except underwater riveting, cutting and welding, and shaft balancing.

CONSULS:

Brazil
France
Germany
Italy
Norway
South Africa
Spain
Sweden
Switzerland
United Kingdom
U.S.A.

IDENTIFICATION CARDS: Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)

WATCHMEN: Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid passport and visa is necessary as Immigration Authorities do not recognise a Seaman's Book as being a valid travel document.

AIRPORT: About 5 miles from centre of town.

CUSTOMS ALLOWANCES: Bonded stores are usually not sealed.

HOLIDAYS: No cargo work on 1st January and 25th December, on other holidays, work continues normally in the port.

TIME: Local time GMT plus 2 hours. No alterations made to clocks during the year.

SHORE LEAVE: Crew are allowed ashore, from 0600 – 2400 hrs. excepting nationals of those countries not maintaining diplomatic relations with Mozambique.

TELEPHONES: A telephone will be placed on board the vessel.

GENERAL: Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilise main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours' notice.

Customs guards to be supplied with meals and accommodation whilst at Inner Anchorage and alongside the wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.

DEVELOPMENTS: Administration are considering the construction of a deep-sea port on the coast between Inhaca Island and the Natal border. This port will be mainly used by coal and iron-ore carriers and have a capacity of approximately 6 million tons per annum.

2 container cranes to be installed in 1984.

Dredging to be undertaken.

SHIPMASTER'S REPORT: May 1984.

Chart: B.A. Chart No. 644.

Pilotage: Pilot boards at the South Entrance within 1 mile radius of Buoy No. 4 (position Lat. 25° 56′ S., Long. 32° 44.5′ E.).

Also see "Tugs".

Anchorage: Between Baixo Ribeiro Beacon Light and Buoy No. 4.

Radio: Maputo Radio, Durban Radio or Capetown Radio.

Tugs: One tug working. Tug used for berthing and embarking/disembarking Pilot at Buoy No. 4. Delays of 2 – 3 hours may be expected if ships leaving port.

Berthing: No fenders on piers. Damage to vessel or piers possible.

Fresh Water: Available alongside.

Fuel: Available if advance arrangements made.

Watchmen: Compulsory. Ship to provide meals.

Identification Cards: Issued by Immigration Office at main gate in return for seaman's book. Seaman's book returned when crew return to main gate.

Customs/Quarantine: No crew muster. Customs check and seal bonded store.

Shore Leave: Crew: 1800 – 2400 hrs. Officers: 0800 – 2400 hrs.

Provisions: Not available.

SHIPMASTER'S REPORT: August 1984.

Vessel: 80,000 d.w.t.

Arrival Draft: Forward: 6.6 m., Aft: 8.6 m.

Cargo: 8,000 tons Cracked Fuel Oil.

Approaches: Following a report received from a Master dated May, 1984, it was noted that the original Pilot Boarding Area had been changed from N.W. of Inhaca Lighthouse to 1 mile East of No. 4 S Buoy. Also in view of this report which advised that the majority of the buoys were unlit and some out of position it was decided to make the approach to the North Channel Buoy (No. 2 N) and the subsequent passage in daylight. The vessel ended passage at 0400 hrs. abeam of Inhaca Light and proceeded with caution from there with the echo sounder running continuously.

Buoy No. 2 N: (North Channel Approach Buoy) – found to be in the recently corrected charted position but unlit. This buoy, however, was visible on the 3 cm. Radar at 12 miles and was observed visually at 5 miles. This buoy carries no topmark and the colour is indistinguishable.

Lacerda Lighthouse: Unlit and covered with bush – not conspicuous.

Macomana Lighthouse: Unlit and covered with bush – not conspicuous.

Buoy No. 4 N: Unlit, Radar conspicuous at 6 miles (3 cm.), fitted with radar reflector. Has a definite can shape, is rusty in colour and covered with weed.

Buoy No. 1 N: Unlit, no radar reflector, reasonable target on 3 cm. Radar, again can shaped with general appearance of spar buoy, colour again indistinguishable.

No. 3 Buoy: In position but unlit.

No. 6 N Buoy: Approx. 4 cables North of charted position, unlit.

Red Can Buoy: (No. 3 Buoy for South Channel) Unlit, Radar conspicuous 3 miles, has damaged radar reflector, definite can shape but rusty in colour.

Buoy No. 4 S: Fl. R. 5 sec: This appears to be one of the maintained buoys, Pilot boards 1 mile East of this buoy, however, is often obscured by vessels at anchor near the Pilot Station.

Ribeiro Light Beacon: (The Mast) Unlit but good 3 cm. target at 15 miles, visual at 7 miles – 8 miles.

NOTE: 1. There is a very conspicuous wreck on the shoals in position Lat: 25° 52′ S., Long: 32° 44.9′ E., visible in daylight at 7 miles and giving a good radar image. This wreck is not charted but its position was ascertained by Radar.

2. The tip of land on Pta. de Macaneta obviously uncovers more than the chart shows and should be considered unreliable for radar images.

3. The coastline between Lacarda Lighthouse and the tip of Macaneta shows well on the radar at 6 miles range but is very low lying and rather indistinguishable at ranges over 10 miles.

Tidal Effect: Found almost negligible.

Soundings: As mentioned, inbound, the echo sounder was running throughout the period vessel entered the North Channel on a rising tide and the minimum under keel depth recorded was 3 m. However, when leaving the port about 2 hours after High Water heavy mud/water was observed in vessels' wake from No. 4 S Buoy and No. 6 N Buoy with the echo sounder showing almost zero. The vessel's departure draft being 6.6 m. and 8.2 m.

Pilotage at Maputo: Pilot boards 1 mile from No. 4 S Buoy, this is the only fully working buoy in the port system (painted bright red).

The following comments are made in conjunction with BA Chart 646.

Buoy No. 4 S: In charted position, can buoy painted red with light.

No. 5 Buoy: In charted position, unlit, but fitted with radar reflector, a conical buoy of a nondescript dark colour.

No. 6 Buoy: In charted position, unlit, no radar reflector, conical buoy of rusty colour.

No. 7 Buoy: Unlit, fitted with radar reflector. In charted position, rusty colour, conical shape.

No. 8 Buoy: Unlit, No radar reflector. Conical of nondescript colour, in position.

No. 9 Buoy: Missing.

No. 10 Buoy: In charted position, newly painted Red can buoy, unlit with half the top structure missing.

No. 11 Buoy: In position, unlit.

No. 12 Buoy: In position, unlit, with radar reflector.

No. 13 Buoy: Missing.

No. 14 Buoy: In position, unlit, with damaged radar reflector, no topmark but of a definite black colour.

No. 15 Buoy: In position, unlit, no radar reflector, no topmark, conical of a nondescript colour.

No. 17 Buoy: In charted position, unlit, but a large distinctive can buoy with radar reflector. Colour black to grey.

No. 14A Buoy: Missing.

General Comments: Pilotage this voyage was handled by the Senior Pilot but only after a meeting ashore and also subject to his inspection of the vessel prior to entry. This apparently was due to the fact that the supposed max. length of vessels entering Maputo is restricted to 200 m. while this vessel was 242 m. We were also restricted to entering the port in daylight and at High Water.

There are only 2 tugs in operation, one of which is only operating on half power, while the other appears to have stability problems as it develops a rather alarming list when it alters course.

There is no pilot boat, the half power tug acts in this capacity (this is the reason for the pilot station being brought in to No. 4 S Buoy). The port has 10 Pilots plus a number of local personnel under training. Should several vessels be leaving the Port at the same time, they must wait in the vicinity of the pilot area until the final ship arrives, then the tug will do the rounds and pick up all the Pilots. The standard of pilotage was very good, the main problem being lack of back-up.

Harbour has not been dredged for 10 years, thus charted depths are suspect.

Matola Oil Berth:

1. See "Late Plans" for mooring arrangement.
2. Berth ended approximately quarter ship's length from aft thus only access to vessel was by pilot ladder and the only way to connect shore hoses to ship's manifold was to run approximately 300 ft. of 8 in. hose along maindeck. The state of these hoses was suspect as the last test date was 1968, the average life of flexible hose being about 18 months.
3. Maximum discharging rate was found to be 350 t.p.h. with 8 kilo pressure at the rail, while the maximum loading rate was between 350 t.p.h. – 400 t.p.h.
4. No emergency back-up system, no fire service available, tugs not fitted as fire tugs, the only fire fighting appliance observed was 1 × 50 lb. fire extinguisher.
5. Communications between ship and shore almost non-existent, the only way to raise the Agents was through the vessel's VHF. This was assuming that the city was not blacked out through power failure.
6. No illumination at all on the jetty.
7. Only 1 mooring boat of insufficient power to handle wires.
8. Vessels are required to backflush the cargo lines with water before disconnecting, this was not convenient for an SBT tanker and our vessel overcame the problem by using the ship's air supply. Agent advised that the jetty was a prime target for terrorist attacks, this was apparently official Government advice.
10. Shore leave was available for all crew, however, there were no taxis available.
11. Any cash drawn by Master cannot be returned to Agent.
12. Vessel moored using starboard anchor to swing, when alongside moorings as per plan.

AUTHORITY: Capitania do Porto de Maputo.

AGENT: Rennies Freight Services (Mozambique) SARL, P.O.Box 351 or 292, Maputo. Tel: 2 3021/6. Telex: 6221. Cables: Reniform.

MOZAMBIQUE: 14.58 S. 40.45 E.

DOCUMENTS:

Customs Clearance from last port.
Port Clearance.
Health Certificate.
6 Crew Lists.
6 Passenger Lists in Transit.
7 Passenger Lists Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
6 copies of Manifest of Mozambique Cargo.

PILOTAGE: One Pilot available, 24 hours Pilot boat is black and grey. Ships take Pilot near buoy No. 2 (Red Buoy) placed off Goa Island. At night ships should send Morse signals with Aldis lamp to the middle of Mozambique Island (location of port office). ETA should be given as soon as possible to pilot station off Mozambique Island and/or to ship's Agent.

ANCHORAGES: When waiting for Pilot, or due to their draft (more than 30 ft.) ships may drop anchor off red buoy No. 2 (0.5 miles seawards). Depths between 60 ft. and 90 ft. Bottom with sand and some broken coral; current from North to South, sometimes up to 4 knots.

MAX. SIZE: Only ships with drafts less than 30 ft. can cross the bar and enter the Port.

HEALTH: Quarantine flag should be flown, even after calling at other ports in this country. Health Certificate given by Pilot.

RADIO: Radio Mozambique call sign CRQ. Also available Maputo or Beira Radio Stations.
TUGS: Tugs are not necessary in this port.
BERTHING: No quay berths. Vessels work cargo at anchor.
STEVEDORES: All requirements on this purpose must be sent to the Agent.
MEDICAL: Medical assistance can be given at any time, even to vessels unable to cross the bar because of draft. Hospital with adequate facilities, and emergency services available.
FRESH WATER: Always available in any quantity. Supplied by barge of 40 tons capacity.
FUEL: Small quantities available.
OPENING/CLOSING HATCHES: By stevedores.
CARGO GEAR: Vessels anchor in bay and load and discharge by lighter and barges.
IDENTIFICATION CARDS: Required.
CONSULS: No local representatives.
REPAIRS: Light repairs can be effected.
REPATRIATION: All facilities available.
AIRPORT: Situated about 7 km. from Mozambique. Connections to Beira and Maputo every day.
HOLIDAYS: 1st January; 2nd March; 1st and 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December. Cargo handling can be arranged on these days.
POLICE/AMBULANCE/FIRE: Maritime Police, Customs and Agents will always be on board during stay.
TELEPHONES: No telephones, but walkie-talkies are available; arrange with Agent.
AUTHORITY: Capitania do Porto de Mocambique.

NACALA: 14.32 S. 40.37 E.

PORT LIMITS: The line joining Ilha Goman to Cabo Columulomo Light at the entrance of Bay of Fernao Veloso.
DOCUMENTS:
Customs Clearance from last port.
Port Clearance from last port.
Health Certificate.
7 Crew Lists.
7 Lists Passengers In Transit.
7 Lists Passengers Disembarking.
4 Stores Lists.
4 Lists Deck Stores.
4 Lists Cargo In Transit (main items of cargo only).
10 Copies of Manifests of Nacala Cargo.
4 Lists of Dangerous Cargo.
6 Copies, Ports of Call of Present Voyage.
Shipmaster's Report: March 1981.
Same as Beira Report except:
5 Passenger Lists.
6 Lists Ports of Call.
In Transit & Hazardous Cargo not required.
PILOTAGE: Compulsory for berthing/unberthing. Normally working only during day time. Vessels come inside the bay and wait for Pilot at inner anchorage.
ANCHORAGE: Fine natural harbour. Entrance half a mile wide, depths up to 60 m. Good anchorage for any size vessels. Sand and mud bottom.
MAX. SIZE: For anchoring, no restrictions. For berthing, up to 31 ft. draft.
RADIO: No facilities at present. Advise ETA through Agent.
HEALTH: Due to poor communication, health services should be contacted by Agents.
VHF: Channel 16.
TUGS: One available, 1,000 h.p.
BERTHING:
North Wharf: There is a pier with berths for 4 vessels with a length of 426 m.
Depths: Wharf 1: 24 ft.
„ 2: 21 ft.
„ 3: 30 ft.
„ 4: 30 ft.
Cranes: 11 cranes available 8×5 tons
2×10 tons
1×20 tons
South Wharf: There is a pier to berth 2 vessels.
Depth: 45 ft.
Cranes: 5×5 tonne cranes under construction.
CRANES: 11 electric cranes with capacity 1 to 20 tons.
BULK CARGO FACILITIES: Not available, bulk cargoes discharged through buckets at an average of 100/200 tons per day of 24 hours. 3 gangs working from 0600 – 2200 hrs. and 1 gang 2200 – 0600 hrs.
SPECIALISED CARGO HANDLING FACILITIES: Two 20 ton forklifts available for handling containers. Containers handled at the South Wharf at an average of 600 per month Imports/Exports. Vessel to be geared as no shore cranes on container berth. If vessel ungeared, berth at general cargo wharf No. 2, where 20 tons crane available and quantity normally limited to 5 containers.

At container berth, a gantry crane available for loading/unloading of the wagons, cannot be used for vessel's handling.

Ro-Ro vessels also able to berth and load/discharge at South Wharf. No special equipment available to handle Ro-Ro vessels.

STEVEDORES: Working hours 0600 to 1400 hrs., 1400 to 2200 hrs. (2200 – 0600 for container vessels) weekdays, Saturday and Sundays. One stevedoring firm in operation, under Port Railway control.

Gang requested at the following hours:

0930 –	for day shifts –	1400 – 2200
1500 –	for night shifts –	2200 – 0600
	for day shifts –	0600 – 1400
1000 –	for Saturday and Sunday –	For whole weekend until 0600 – 1400 hrs. on Monday

Very important that Agents are advised of accurate ETA as vessels normally not berthed or worked if gangs not requested. If gangs are requested and vessel not available, standby fines paid.
FRESH WATER: Available and delivered direct from the pier or by barges.
FUEL: Only available if requested from Petrmoc at Maputo.
CONSULS: Not available locally, only at Maputo/Beira.
REPAIRS: Not available.
DRY DOCKS: Not available.
SURVEYORS: Available operated by M/s Cory Mann George (Malawi) Ltd. Lloyd's Sub-Agents.
CUSTOMS ALLOWANCES: No restrictions provided quantities in crew's possession declared on vessel's arrival.
AIRPORT: The only commercial airport is Nampula Airport, 200 km. from Nacala.
MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid yellow-fever certificates, cholera certificate compulsory. Vaccination/fever inoculations and certificates may be obtained ashore if required.
GANGWAY/DECK WATCHMEN: Compulsory, under supervision of Immigration Department.
OPENING/CLOSING HATCHES: By ship's crew.
CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.
REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid passport is necessary as Immigration authorities do not recognise a Seaman's Book as being a valid travel document.
TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during year.
POLICE: Tel. No. 2820, 2710.
AMBULANCE: No telephone. Contact must be done through Agents, local hospital Tel. No. 2347.
TELEPHONES: Not possible to place telephones on board.
SERVICES: Not possible to perform any service to the vessels, as no facilities.
SHORE LEAVE: Crew members are allowed ashore, excepting nationals of those countries not maintaining diplomatic relations with Mozambique, weekdays from 1800 – 2400 hrs. only. Saturdays from 1400 – 2400 hrs. and Sundays/Holidays from 0800 – 2400 hrs.

Passports/Seaman's Book to be remitted at Immigration premises, 50 m. outside the gate. As shore leave hours often vary, times should be confirmed with Immigration when port clearance is given.
HOLIDAYS: New Year's Day (1st January); Mozambican Hero's Day (3rd February); Mozambican Woman's Day (7th April); Workers' Day (1st May); Independence and Frelimo's – Foundation Day (25th June); Lusaka Agreement Day (7th September); Revolution and Forcas Populares de Libertacao de Mozambique's Day (25th September); Family Day (25th December).

Normally no cargo work on 1st January and 1st May; while on other days work continues with reduced personnel.
REGULATIONS: Crew are not allowed to take cameras on shore also are not allowed to take photographs in the port area.

When vessels are at anchor, special attention must be taken with the small fishing boats whose owners normally approach the vessels and try to exchange local goods with clothes, soaps, etc. These transactions must be avoided at all costs otherwise Masters will be subject to heavy fines.
DEVELOPMENTS: Installation of Coast Station (Radio): 1984.
Installation of telex link Nacala-Blantyre (Malawi): 1984.
Renewal of rail-line Nacala/Malawi border: 1984-1988.
Ship/shore crane for container berth: 1986.
Acquisition of 3 Ro/Ro trucks and trailers: 1985.
AUTHORITY: Direccao Nacional dos Portos, Direccao do Porto de Nacala, Caixa Postal No. 70, Nacala.
Administracao Maritima de Nacala, C.P. No. 10, Nacala.
AGENT: Navir Sarl, P.O.Box 175, Nacala. Cables: 'Navir Nacala'.

PEMBA: 13.00 S. 40.28 E.

DOCUMENTS:
6 Crew Lists.
6 Lists of Passengers Disembarking.
6 Lists of Passengers in Transit.
1 Master's Declaration.
1 Stores and Provisions List.
1 Health Declaration.
5 Sets Cargo Manifests.
2 Sets non-negotiable Bills of Lading.
Clearance Documents from last port.
PILOTAGE: It is necessary to order by radio request to Agent 14 hours before arrival.

ANCHORAGES: Vessels may anchor South of the dock about 300 m. off. Other suitable anchorages will be indicated by the Pilot.
RESTRICTIONS: Vessels may enter with Pilot at any hour day or night.
MAX. SIZE: Draft up to 27 ft. 6 in. for berthing.
HEALTH: In case of contagious disease on board, the Port Health Authorities must be advised in advance.
RADIO: Send messages through Beira radio.
TUGS: None available
BERTHING: One berth, length 182 m., depth alongside 28 ft.
STEVEDORES: In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.
MEDICAL: In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary as there is a permanent guard on board.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: Bond is not sealed and no restrictions made.
IDENTIFICATION CARDS: Required by police.
REPATRIATION: Can be arranged.
AIRPORT: Situated 7 km. away. Flights to Beira and Maputo daily.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: No work performed from 1700 hrs. Christmas Eve until 0600 hrs. 26th December; no work performed from 1700 hrs. New Year's Eve until 0600 hrs. on 2nd January. Work may be arranged on the following holidays: 1st January, 3rd February, 7th April, 1st May, 25th June and 25th September.
POLICE/FIRE/AMBULANCE: Police, Tel: 2828; Hospital, Tel: 2211.
SHORE LEAVE: Allowed. Except for nationals of countries not maintaining diplomatic relations with Mozambique.
AUTHORITY: Capitao do Porto de Pemba.

NOTES

Please also advise Shipping Guides Ltd.

Namibia

LUDERITZ: 26.39 S. 15.09 E. (See Plan Book)

PORT LIMITS: East of the line from Angra Pt. to a point 1,097 m. due North thereof, thence by a line from the latter point to the South shore extremity of N.E. Point.

DOCUMENTS:

1 copy South African Transport Services arrival form T958.
2 copies Crew List.
2 copies Passenger List.
Certificate of Ship's Registry.
Ship's Articles.
Manifests.
Charter Party.
Bills of Lading.
Official Log Book.
List of Dutiable Stores.
Ship's Radio Station Licence.
Safety Certificate.
Light Dues Certificate.

PILOTAGE: ETA at least 72 hours in advance if possible; unless in an emergency. Cables addressed to Harbourmaster Luderitz.

All pilotage inside port limits is compulsory unless a Pilotage Exemption Licence has been granted (in the case of local vessels of 70 m. length or less).

Pilot boarding positions: Fine weather: One mile North of Angra Point. Adverse weather: 0.7 miles N.E. of Angra Point.

Pilot vessels: "Fisant": Black hull, white wheelhouse and yellow roof. Yellow funnel. "Tern": Black hull, white upperworks, wooden wheelhouse. Yellow funnel.

Specific requirements:

Two manropes at ladder.
Lifebuoy at ladder.
Ship's officer in attendance when pilot embarking or disembarking.

At night, the ladder is to be lit without blinding pilot. No broken or slippery ladder rungs. Also see "Radio" and "VHF".

ANCHORAGES: Outside port limits: Shearwater Bay; between Diaz Pt. and Angra Pt. Good holding ground. Depth up to 20 m.

Inside port limits: Luderitz Harbour: between Angra Pt. and Shark Island. Good holding ground. Depth up to 16 m.

Robert Harbour; between Shark and Penguin Islands. Good holding ground. Depth up to 9 m. Confined anchorage.

Anchorage may take place inside the port limits between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

RESTRICTIONS: Docking and undocking may take place between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

MAX. SIZE: Shearwater Bay: No restrictions. Luderitz Harbour: No length restrictions, draft 15 m. Robert Harbour: Length approx. 140 m., draft 7.5 m. Alongside main jetty: Length normally approx. 95 m., draft 6.0 m.

HEALTH: Port Health Officer carries out formalities. Tel: 2815. Cables: "Port Health Luderitz".

RADIO: Radio-telephone calls, cables etc. to Agents, Shippers, etc, through Walvis Bay Radio; call sign ZSV. Frequencies as per International Telecommunication Union list of Coast Stations.

VHF: VHF contact with Port Control on Channel 16. Working Channels: 6, 8, 9, 10, 11, 12, 13, 14, 17, 67, 68, 69, 70, 71, 72, 73 and 74. Same VHF channels apply to Pilot and Tugs.

Diaz Point Lighthouse maintains a 24 hour watch on VHF Channel 16; with working channels as for Port Control. If no reply from port control, contact Diaz Point Lighthouse.

RADAR: No port radar service.

TUGS: Two small tugs are stationed at the Port: "Tern" (diesel) of 850 h.p. length 26 m. and "Fisant" (diesel) of 220 h.p. length 14 m.

Tugs usually join vessel at head of the channel in Robert Harbour. Tugs lines' are used; at no extra charge.

Tugs are equipped with fire fighting hoses and salvage pumps.

BERTHING: Entrance Channel: Length 708 m., width 60.9 m., depth 6.1 m.

Turning Basin: 236 m. by 198 m., depth 6.1 m.

Main Jetty: Length 242 m. Two berths of 92 m. length, depth 6.1 m.

Wooden Jetty: Length 168 m., depth 3.5 m.

One berth is available on each side of the main jetty for vessels up to approximately 95 m. in length. Longer vessels may be accommodated by prior arrangement; weather conditions, etc., permitting. A draft restriction of 6 m. at low tide exists.

The wooden jetty is used mainly for the local fishing fleet of small wooden boats.

No specialised berths exist at Luderitz, at present.

CRANES: 2 × 4 ton cranes able to work over either side of jetty but unable to work in tandem. Any heavier lifts by ship's gear only.

STEVEDORES: 72 hours' notice is required in order to arrange gangs. Average rates: Frozen fish 18 t.p.h. General cargo 32 t.p.h. Timber 45 t.p.h.

MEDICAL: 2 doctors, one hospital (36 beds), one hospital (160 beds), notice of 4 hours required, except emergencies.

TANKERS: 2 × 10 in. diameter DGO pipe-lines, all necessary fittings ashore. SG 0.854.

DENSITY: 1025.

FRESH WATER: Available on jetty by pipe-line through meter at approximately 25 t.p.h.

FUEL: Gas oil connections to 2×254 mm. pipe-lines from shore tanks.

Gas oil bunkers points on the main jetty supply at approximately 25 t.p.h. 1,200,000 litres of gas oil are available.

Small quantities of gas oil by 6,819 litre capacity road tanker are also available at immediate notice.

CONSULS: None.

REPAIRS: Light engineering facilities exist.

DRY DOCKS: One slipway of 400 tons capacity and 1×150 ton capacity. Used mainly by local fishing boats.

SURVEYORS: Department of Transport surveyor is available at Walvis Bay. Cargo surveys, underwater surveys and other independent surveys are available by Master Mariner.

GANGWAY/DECK WATCHMEN: Not necessary but available if required.

HATCHES: Opened and closed by crew.

CARGO GEAR: Alongside jetty by shore cranes (4 ton capacity) by ship's gear at anchor when using lighters. Eight lighters, 26 m. long, 150 ton capacity are stationed at the port.

REPATRIATION: Handled by Agent with little difficulty.

AIRPORT: 12 km. from harbour. 6 flights a week (Tarmac Air Cape) to and from Windhoek and Cape Town. Charter flights may be arranged.

TIME: GMT plus 2 hours.

HOLIDAYS: Cargo can be worked on any day.

POLICE/AMBULANCE/FIRE: Police: 10111, Ambulance: 2266, Fire: 2607.

TELEPHONES: Available R30.00 per connection plus usage.

SERVICES: Compass adjusting, diving and cargo surveys.

SHORE LEAVE: 24 hours at anchorage, launch available.

IDENTIFICATION CARDS: Seaman's book.

DELAYS: No delays normally, except due to weather.

GENERAL: Fresh provisions, supplies and services available by arrangement with Agent.

Basic weather conditions: Summer – South to S.W. wind up to 35 knots frequently experienced. Winter – winds variable but mainly North up to 20 knots. Fog is frequently experienced West of Angra Pt.

Charts: BA. 3861 and 3863; South African Naval Charts: 1002 and 1003.

DEVELOPMENTS: The buoyage system presently used in the port is due to be changed to the IALA Maritime Buoyage System during 1984/85.

SHIP'S OFFICER'S REPORT: December 1983.

Medical: No facilities for blood tests; these can only be done when there is a direct flight to Capetown.

Surveyors: Pilot/Harbourmaster acted as Cargo Surveyor.

Customs: Very strict regarding magazines. These should be sealed in bonded store, otherwise fines payable.

Shore Leave: Possible from anchorage using tug.

Stores: Fresh vegetables available, but at very high prices.

AUTHORITY: South African Transport Services, P.O.Box 88, Luderitz 9000. *Tel:* 2337 or 21240. *Contact:* Captain I. G. Rees, Harbour Master and Pilot.

AGENT: King & Sons (Pty.) Ltd. P.O.Box 11, Luderitz 9045. Tel: (06331) – 2054. Telex: 56-796. Cables: Baronet.

WALVIS BAY 22.57 S. 14.30 E. (See Plan Book)

PORT LIMITS: The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:

5 copies Crew List.
8 copies Passenger List.
2 copies Report Inwards/Outwards.
2 Certificates of Clearance DA3.
2 copies Transire DA4 for each port of call.
Manifest of Cargo in duplicate.
3 copies Manifest of Stores DA5.
1 SATS Clearance.
Shipping Master's Certificate.
Immigration Certificate.
Post Office Certificate.
Income Tax Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes Form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office, working Channel 12. Pilot boats are normally black with a white superstructure and have a yellow funnel with horizontal green stripes.

The Pilot boards at a point approximately 0.5 miles North of the Fairway Buoy (Entrance Channel Buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The Pilot will inform the Master by means of the VHF on which side the pilot-boarding ladder and manropes are required.

ANCHORAGES: Varying in depth from 13 m. – 14 m. at LWOST 1.0 miles North of Fairway Buoy. Bottom – sand and silt. (Please also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours (berthing 0600 hrs. – 2000 hrs., unberthing up to 2145 hrs). The maximum permissible draft is 9.9 m.

MAX. SIZE: Max. LOA 224 m., max. draft 9.9 m.

HEALTH: Master to contact Port Health via Walvis Bay Radio to request Pratique. Same procedure applicable if disease reported.
RADIO: Call sign ZSV. VHF radio in Port Captain's Office.
VHF: Port Control equipped with VHF Channels 16 – 12. Port working Channels 9 – 11.
RADAR: Radar is fitted to the harbour tugs and pilot boats. Master to contact Port Control for radar service.
TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone, direction-finding apparatus and salvage and fire-fighting appliances; 2 Pilot boats and 1 launch.

Tugs normally join a vessel on Pilot's request in the entrance channel and are secured by means of the tugs' wires.
BERTHING: 8 berths available excluding tanker berth. Quay length 1,409 m., max. permissible draft 9.9 m. (salt water). Load/discharge by shore cranes unless cargo of such nature that it is essential to use ship's derricks. Berth Nos. 1 – 6 general cargo, No. 7 container berth and No. 8 berth allocated to bulk loaders, also utilised as repair berth.
CRANES: 18 cranes available, 17 × 4 tons, 1 ×15 tons.
BULK CARGO FACILITIES: Berth Nos. 1 – 6 utilised if necessary. Berth No. 8 exclusively used for salt loading as this utilises ship's gear only. Berth Nos. 1 – 6 served by shore cranes. Max. draft 9.9 m. (salt water). Bulk cargoes at Walvis Bay consist of salt/petalite. Loading rate salt by shore crane approximately 95 t.p.h., petalite approximately 30 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 7 utilised as container berth. Ro/Ro vessels berthed at No. 6, liquid chemicals at Berth No. 5. Container stacking area and 2 container stacking cranes available. Ship's gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.
STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

Stevedores require minimum notice 72 hours prior arrival. Main export salt in bags rate 18/25 t.p.h. depending on method of delivery to ship's side (rail/road).
MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.
TANKERS: Only one berth available. Max. length of vessel accommodated 650 ft. Diameter of load/discharge lines 10 in. and 12 in. Discharge rate 10 in. – 240 t.p.h. and 12 in. – 350 t.p.h. Max. draft 9.9 m.
DENSITY: 1025.
FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 35 t.p.h.
FUEL: Gas oil only available, 12 hours' notice required. Delivery by pipe-line or tank truck.
FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.
CONSULS: France.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 72 m., max. beam 13 m., and a depth of 10 m. is operated and owned by the Department of Sea Fisheries.
SURVEYORS: Lloyd's and N.V. represented.
GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.
HATCHES: Opened by crew.
CUSTOMS ALLOWANCES: Officers: 200 cigarettes, wine 3 litres, spirits 1 litre, beer 2 litres.

Crew: 3 litres wine, 200 cigarettes.

Allowances are based on 4 day issues.
CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes. 30 ton mobile crane available in case of emergency.
REPATRIATION: All facilities available.
AIRPORT: Situated 14 km. from Walvis Bay. Served by Namib Air/Air Cape, 3 flights per week, Wednesday/Friday/Sunday.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo worked on all holidays except Christmas.
POLICE/AMBULANCE/FIRE: Police Tel. 10111; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117.
TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.
SERVICES: 24 hour launch service available, divers inspect fouling, underwater photography, tank cleaning, hold cleaning, compass adjusting, radar repairs, hull cleaning.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Seaman's Book sufficient.
REGULATIONS: A copy of the Regulations are supplied gratis to Masters on arrival.
DELAYS: Most delays caused by fog.
GENERAL: Various sports and recreational facilities exist.
AUTHORITY: S.A. Transport Services, Private Bag 19, Walvis Bay, Namibia. *Tel:* 8213. *Telex:* 295. *Contact:* The Port Manager.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 529, Walvis Bay 9190. Tel: (0642) 2771. Telex: 56004. Cables: Baronet, Walvis Bay.

NOTES

Please also advise Shipping Guides Ltd.

Nauru Island

NAURU: 00.32 S. 166.56 E. (See Plan Book)

DOCUMENTS:

International Declaration of Health, 1 copy.
Clearance from Last Port.
Crew Lists, 2 copies.
Passenger Lists, if any, 2 copies.
Manifest, 1 copy.

PILOTAGE: Pilotage compulsory and is available without charge; Masters are advised to avail themselves of this service. It is necessary that Masters, through Radio Nauru, inform telegraphic address "Nauruphos Nauru" of ETA 48 hours before arrival, confirming or altering this 12 hours before arrival. "Nauruphos" will reply through Radio Nauru on receipt of second message giving time for the vessel to close in to 0.5 miles West of loading plants, where Pilot will board. In case of adverse weather or congestion, Masters will be notified by radio, or by VHF Channel 16, 156.8 MHz. with range of about 40 miles. Vessels are handled inwards in daylight only, and should fly flag when approaching island. A safe and clean pilot ladder should be provided, a good lee made for the Pilot to embark.

ANCHORAGES: No anchorages are available owing to the extreme depths of water. Vessels waiting normally drift off and return at daybreak or when instructed to do so.

RESTRICTIONS: Tide and draft have no bearing on entry but it is normal not to handle vessels into berth in darkness. However, vessels are unmoored at all hours.

MAX. SIZE: Vessels have been handled up to an overall length of 630 ft. Beam should not exceed 90 ft., but there are no draft limitations.

HEALTH: Masters of vessels approaching Nauru are required to send a telegram addressed to the Quarantine Officer, Nauru within 24 hours of arrival. The telegram should state the name of last port, date, presence of any infectious disease. On receipt of telegram, the Quarantine Officer will send reply indicating whether or not Pratique is granted. It is still necessary to fill out the International Declaration of Health and hand this to Boarding Officer after berthing.

RADIO: Nauru Radio Station, call sign C2N. Should, through atmospheric conditions, difficulty be found in raising Nauru, it is suggested that the message be passed through Sydney or any other convenient coastal station.

VHF: Port Radio VHF, calling Channel 16, working Channel 12, permanent service.

TUGS: No tugs available for berthing.

BERTHING: Such special requirements which relate to berthing in the port are contained in a Letter of Advice to Ship Masters issued by the APC. Shore labour boards the vessel with the Pilot to assist in mooring to the buoy system.

STEVEDORES: As stevedoring is carried out by Nauruphos, no separate advice is required. Loading rate of bulk phosphate is as high as 3,000 t.p.h.

MEDICAL: Medical treatment can be given at short notice. Limited hospital facilities are available, and emergency surgery can be carried out. Smallpox vaccination is required, and cholera if the vessel has come from an infected area.

TANKERS: Lengths and drafts as for bulk phosphate vessels. 8 in. discharge line to shore storage tanks.

DENSITY: Normal salt water all states of tide.

FRESH WATER: Island water is imported, and water will be supplied only in cases of emergency.

FUEL: Island stocks are imported for use in the phosphate industry, and only limited quantities of heavy fuel or diesel oil can be made available in cases of extreme urgency.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Carried out by crew.

SHIP CERTIFICATES: Derat Certificate only.

CUSTOMS ALLOWANCES: No restrictions apply.

CARGO GEAR: Cargo gear should be up to the standard demanded in Australian ports.

CREW IDENTIFICATION CARDS: Some form of identification, passport, discharge book, or identity card should be carried by crew members.

CONSULS: An Australian Representative is resident on the Island.

REPAIRS: The phosphate industry requires good workshop facilities of various kinds for maintenance of their own heavy plant and such workshops are kept busy at all times. Small repairs such as welding, brazing, lathe work, etc., can be carried out, but only when essential to allow the vessel to proceed on its voyage. Main engines cannot be immobilised whilst the vessel is moored to any section of the buoy system.

REPATRIATION: Repatriation can be arranged. No facilities for crew changes.

AIRPORT: Air Nauru operates a twice weekly service to Melbourne and Hong Kong. Other routes include Fiji, Majuro, Japan, Samoa, Vila, Honiara and Taiwan.

TIME: Local time is GMT plus 12 hours. No alterations during the year.

HOLIDAYS: Christmas Day, New Year's Day, and Good Friday are normally closed holidays. Other National holidays occur during the year but normally work continues on these days.

POLICE/AMBULANCE/FIRE: All emergencies are handled by the Harbour Masters, one of whom remains aboard the vessel throughout the time the vessel is attached to the mooring system.

TELEPHONES: Telephones are put aboard for the use of island staff working the vessel.

SERVICES: No special services available.

SHORE LEAVE: This may be granted at the discretion of the Master but should in all cases terminate at 1700 hrs.

PORT REGULATIONS: No vessel may immobilise main engines whilst moored to the buoy system. Main engines should be on instant readiness, deck power should be available at all times, and the vessel must proceed to sea when instructed to do so by the Harbour Master.

DELAYS: Normally no delays should be expected. Vessels could wait a day, or possibly 2 due to port congestion, but this seldom happens; delays can occur due to adverse weather, the duration of which is unpredictable.

AUTHORITY: Nauru Phosphate Corporation, Aiwo, Republic of Nauru, Central Pacific. *Tel:* 4189, 4439. *Telex:* Nruphos Zv 33082. *Cables:* Nauruphos, Nauru. *Contact:* G. Israni, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands

AMSTERDAM: 52.22 N. 04.54 E. (See Plan Book)

PORT LIMITS: Notice of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ymuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

DOCUMENTS:

Health Certificate. Forms obtainable from sea Pilot.

Crew List in triplicate.

2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.

Passenger List in triplicate.

1 copy of Manifest.

1 copy of Bills of Lading.

Dangerous Cargo List.

Ship's Register.

1 copy Stores List.

PILOTAGE: Pilotage is compulsory. Pilot boards from tender in the vicinity of Ymuiden between the light whistle buoy and the moles.

In order to avoid delays, Masters who require a Pilot must advise their ETA not less than 4 hours in advance to "Pilotage Ymuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain: *(a)* the words "ETA-pilot", *(b)* expected time arrival (group of 4 figures) in middle European time, *(c)* draft with indication of unit applied, *(d)* port of destination.

"Pilotage Ymuiden" can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation is possible at night.

Pilotage by Helicopter: When the pilot service by pilot cutter has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. diameter. Deck plans should be provided in advance.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind force 10 (55 kts.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Pilots strictly adhere to regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

ANCHORAGE: Anchoring in Ymuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

RESTRICTIONS: Entry possible at night. Official max. draft is 43 ft. (salt water). By permission of Government Harbour Master at Ymuiden it is possible to enter with max. draft 45 ft. (S.W.). Such permission to be applied for at least 14 days prior to arrival.

MAX. SIZE: Vessels proceeding to Amsterdam have to pass locks at Ymuiden. Dimensions of Northern lock (largest): 1,312 ft. long, 164 ft. wide and 49 ft. 2 in. deep.

The official max. draft to enter Ymuiden is 43 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam after special permission thereto has been given by the Government Harbour Master at Ymuiden. Such permission to be applied for well in advance.

RADIO: Cable Agents giving ETA, draft, cash and other requirements via Scheveningen Radio/PCH.

RADAR/VHF: Harbour radar is installed at Ymuiden. In bad visibility radar assistance will be given for incoming ships day and night. A radio portophone is provided by Pilot. Direct communication between incoming and outgoing ships and commanding post of locks is possible by means of VHF radio telephone, Channel 11. Government patrol boats are also equipped with VHF installations. The Radio-Radar Station (Redeplot) can also be contacted via VHF Channel 12 before approaching Ymuiden.

Gemeentelijk Havenbedrijf Amsterdam (Port Management of Amsterdam) on VHF Channel 14, day and night.

V.T.S. in operation.

TUGS: Sea-going tugs available between piers at Ymuiden assisting vessels, into locks or outer harbour. Harbour tugs available in locks assisting vessels to Amsterdam. The rates include use of tug hawser.

CRANES:	*Capacity*	*Number*
General cargo cranes	1 – 30 tons	93
General cargo cranes for inland craft	1.5 – 5 tons	6
General cargo cranes for timber	1 – 10 tons	4
Bulk-cargo cranes (shipping)	2 – 16 tons	10
Container cranes	50 tons	3
Mobile container cranes	36 tons	2
Container railway cranes	35 tons	2
Van carriers	30 tons	3
Table cranes	5 – 30 tons	7
Transporter bridges	7 – 50 tons	8
Floating general cargo cranes	2.5 tons	3
Floating bulk cargo cranes	2.5 – 16 tons	8
General cargo cranes (industry)	1 – 40 tons	13
Bulk cargo cranes (industry)	1.5 – 6 tons	10
Mobile cranes (shipping)	1 – 6.5 tons	12
Overhead travelling cranes	1 – 7.5 tons	34
Floating derricks	10 – 300 tons	12

STEVEDORES: In order to enable Agents to order gangs in time it is recommended to keep Agents duly informed about ETA. No ETA to stevedores necessary.

BERTHING: Possible at night. If no berth available vessels may be moored on buoys.

Length of quays for sea-going vessels and depth of adjacent navigable water.

Length of Quays for Inland Craft: In the port area 5,990 m., in town about 5,000 m. All quays provided with railway-connections (115 km.)

34 Buoys for sea-going vessels offering a berth for 24 sea-going vessels.

MEDICAL: If immediate medical assistance will be required in the locks at Ymuiden, Agents must receive advance notice.

CARGO HANDLING FACILITIES: Grain: *I.G.M.A. (Internationale Graanoverslag Mij. Amsterdam B.V.):* The grain terminal is specially designed for the fast discharge and transhipment of grain.

Depth alongside 49 ft. 3 in.

A fast conveying installation transports grain into the silos or to receiving ships. Capacity of the silos: 51,000 tons. Also soyabeans are transhipped to the soyaoil extraction plant.

Equipment: The installation has a main jetty of 1,200 ft. length to accommodate 2 vessels up to 100,000 d.w.t. The ships are unloaded by 2 mobile pneumatic suckers, with a capacity of 200 t.p.h., 2 screen grain dischargers with a capacity of 800 t.p.h. each and 2 floating elevators one of which has a capacity of 400 t.p.h. and one which has a capacity of 250 t.p.h. Two weighing towers with a capacity of about 300/400 tons heavy grain each, used for transhipment of cargoes ex seagoing vessels per crane are operated. A floating crane, capacity 8 tonnes is available for handling stores, spare parts, etc. Further there is an installation to fill bags so that bagged cargoes can can be delivered ex-silo.

Despatch: With the modern equipment and the efficient way of handling, a good despatch can be realised. If two or three suckers are available, a bulkcarrier with 30,000 tons will be completed within 2 days. Daily discharge capacity in total is about 25,000 tons.

Supplies: Water obtainable from ashore, stores must be transhipped on barge at the quay as jetty is not accessible to trucks; bunkers by barge.

Pier C: Alongside this berth bulk carriers and tankers can be accommodated to load directly ex-silo. Max. draft 30 ft., max. airdraft 30 ft. Loading capacity 2,000 t.p.d.

Cargill B.V.: Located adjacent to the IGMA Grain Terminal.

Importing vessels are berthed alongside the IGMA pier and the plant receives the soyabeans directly by conveyor belt.

The finished products are loaded into coasters which moor alongside the jetty of the plant along the Mercuriusharbour. Loading capacity: About 200 t.p.h.

Ore, Coal, Agricultural Products, Derivates, etc.: *B.V. Overslagbedrijf "Amsterdam":* This stevedoring company for the transhipment and storage of all kinds of dry bulk cargoes is situated in the West Dock, only 10 miles from Ymuiden. Along the quay with a length of 2,600 ft., large bulkcarriers with a draft up to 45 ft. salt water can be accommodated.

There are no restrictions as to the length, height or beam of the ships. Maximum outreach of loading/discharging gear over water: 164 ft.; maximum height of loading/discharging gear above water level: 80 ft.

Equipment: Four high speed gantry cranes, gross lifting capacity 3 × 30 tons (15/18 tons net) and 1 × 50 tons (30/33 tons net) with built-in electronic weighing system.

Double independent conveyor belt-system for simultaneous stockpiling/reclaiming into barges and/or railcars with separate cranes for that purpose.

Grain loading and discharging systems, capacity 1,700 cu.m.p.h.

Loading machines for (push) barges and sea-going vessels up to 18,000 d.w.t.

Discharging equipment for railcars. Double track rail connection with Dutch Railway System with automatic weighing equipment. Storage capacity up to 3 million tons.

Capacity: Total discharging rate of gear: For ore up to 100,000 tons per 24 hours; for coal up to 60,000 tons. Loading rate of gear into seagoing vessels from stockpile: up to 2,000 t.p.h. Ex barges: depending on size of barges.

Supplies: Water, stores and bunkers can be delivered by truck and/or barge.

Anthraciet Handels Vereniging on the Adenhaven, quay of 180 m., water depth 33 ft., 1 table crane of 7.5 tons.

Scheepvaart en Steenkolen Maatschappij in the Spoorweghaven, quay length 40 m., water depth 25 ft., 1 table crane of 6 tons.

Havenbedrijf Ertskade in the Ertshaven, quay length 170 m., water depth 28 ft., 1 table crane of 6 tons.

Havenbedrijf de Rietlanden B.V. Besides two electric gantry cranes on their main premises in the eastern port with a depth of 35 ft. and a quay length of 4,800 ft., they own 2 large floating grab cranes which can be used anywhere in the port area and can also perform transhipments at buoys where a depth of 45 ft. is available. They have 700,000 sq.ft. of paved yards (approx.) with portable partition walls for careful and clean storage. Railway connections are excellent and own weighing bridge for railway trucks is available.

Equipment: 2 gantry cranes with a capacity of 7 tons each; 1 grab crane of 4 tons; 2 floating grab cranes, 1 of 16 tons and 1 of 10 tons each.

Capacity: Capacity of about 15,000 tons per running day. When combined working of gantries and floating cranes even more.

Supplies: Stores, bunkers can be delivered by truck, and/or barge.

Phosphate: *Amfert B.V.*

At the fertiliser works, rock phosphate is discharged and after manufacture the ready product (fertiliser) shipped in bulk.

Equipment and berth: The main jetty has a depth alongside of 31 ft. and 2 vessels of up to about 25,000 tons can be accommodated. With the 2 grab cranes a daily out turn of 7,000 tons phosphate is reached.

Container and Ro-Ro/Ferry Terminals:

Combined Terminals Amsterdam B.V. (C.T.A.): Combined Terminals Amsterdam B.V. offer a complete container terminal service on the Westterminal which is located in the Westhaven.

Container Freight Station and Intercontainer Railway Terminal incorporated on the terminal site.

Roll-on/Roll-off ramp especially constructed for heavy axle loads. Car terminal facilities for handling large quantities of factory automobiles/trucks.

Berths:
Berth No. 1: Length 250 m. Depth alongside 13 m. (42 ft.)
No. 2: Length 215 m. Depth alongside 11.5 m. (37 ft.)
No. 3: Length 140 m. (Ro/Ro) Depth alongside 11.0 m. (35 ft.)
No. 4: Length 290 m. Depth alongside 11.0 m. (35 ft.)

Equipment: 3 Portainers, with lifting capacity 50 tons each, outreach 36 m. (116 ft.), rail width 20 m. (65 ft.) and backreach 24 m. (80 ft.) with 20 ft., 30 ft., 40 ft. and adjustable spreaders, also to lift two 20 ft. containers simultaneously.

Two multi-purpose-rail mounted dock cranes with lifting capacity of 30 tons on 20 m. (66 ft.) and 12 tons on 40 m. (131 ft.) outreach.

Two rail mounted transtainers, capacity 35 tons and 45 tons with 28 m. (90 ft.) and 40 m. (129 ft.) span rotating and adjustable spreader serving 3 railway tracks.

Eight van carriers, terminal tractors and chassis and heavy lift trucks equipped for containers, steel coils and pulp.

Facilities: Container storage yard 130,000 sq.m. (35 acres) with expansion possibilities of 600,000 sq.m. (150 acres).

Car park 140,000 sq.m. (28 acres).

Container freight station 3,000 sq.m. (33,000 sq.ft.) 46 doors.

Two transit sheds 16,000 sq.m. (172,000 sq.ft.).

Workshop for the maintenance and repair of containers and road chassis.

40 reefer receptacles at the required voltages.

Depot of lease containers and road chassis. Container railway terminal.

Working Hours: Usually around the clock, 7 days per week.

Supplies: Fresh water obtainable from the quay, bunkers by barge.

Verenigd Cargadoorskantoor: VCK operates 2 modern stevedoring terminals of which one is equipped for Roll-off/Roll-on and passenger traffic: the Scandia Terminal. Regular ferry services sail from there to Norway (Summer passenger service) and Finland (cargo service).

Scandia Terminal: Located in the Suezhaven, 10.5 nautical miles from the sealocks in Ymuiden. Total area 105,080 sq.m., marshalling area 625,630 sq.m., quay length 530 m., depth 33 ft., shed space 39,451 sq.m. and 1 cold storage shed of 1,600 sq.m., modern passenger building. 3 Ro/Ro berths and a mobile container crane with a capacity of 35 tons.

Vlothaven Terminal: 1 mobile container crane of 45 tons. 11 breakbulk cranes of 2 tons – 10 tons. Total area: 5,600 sq.m., quay length: 570 m., shed space: 13,700 sq.m. Marshalling area: 42,340 sq.m.

Also available on both terminals: side loaders (20 tons), tugmasters, slave trailers, flats, containers and forklift trucks.

P. Ter Haak & Zn. B.V.: Double berth Ro-Ro Terminal – Draft 39 ft. Regular Ro-Ro Service to East Coast Sweden.

Molasses: Tradax–2 jetties, max. draft 11.30 m. receiving capacity 1,000 t.p.h. Max. d.w.t. 65,000 tons (approx.). Connections 8 in.

Minerals: Eggerding & Co. B.V. Length of quay 400 m. Depth alongside 33 ft. Discharge is carried out by floating cranes.

TANKERS: *Oiltanking B.V.:* 1 jetty for 2 vessels of 100,000 tons. Max. draft 44 ft. 6 in., 2 jetties for 2 vessels of 3,500 tons, 1 jetty (used in case of fire). One jetty for 1 ship up to 45,000 d.w.t. Pipe-line connection 6 in. and 8 in. Receiving rate 2,000 t.p.h. Loading rate 2,000 t.p.h. depending on grade and condition. Fresh water available from jetty, fuel by barge. Stores by barge or trucks. (Jetty not accessible to trucks). Dirty ballast by barge.

Mobil: 2 jetties, 1 for vessel of 30,000 tons and another for vessel of 80,000 tons. Max. draft 44 ft. 6 in. pipe-line connections 10 in. and 12 in.

One jetty for coast tankers or LPG tankers up to 2,500 tons.

The receiving rate for crude oil is 4,000 cu. m./hr. The loading rate varies from 400–1,900 cu.m/hr. depending on grade.

Fresh water available from jetty. Fuel available, pipe-line 8 in. Facilities available for dirty ballast if vessel to load at berth. Max. capacity 10,000 tons. Stores by barge or truck (Jetty not accessible to trucks).

Amatex: 4 jetties, depth alongside 32 ft. – 41 ft. Pipe-line connections 6 in. – 12 in.

Receiving rate, 4–1,200 t.p.h. depending on grade and back pressure, if any. The loading rate is about 1,000 t.p.h. depending on grade.

Fresh water available by barge. Fuel available by barge. There are facilities for dirty ballast under special conditions. Stores mainly by truck (Jetties not accessible to trucks).

Comos: Two jetties, depth alongside 44 ft. 4 in. Pipe-line connections 8 in. and 12 in. Four jetties available for seagoing vessels and barges up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up to about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipe-line. Stores by truck. There are no facilities for dirty ballast.

Smid & Hollander: 2 berths for receiving crude oil, max. draft 42 ft. 8 in. Fresh water and fuel available by barge. Stores by truck (Jetty not accessible to trucks).

Noord Europees Wijnopslagbedrijf B.V.: One jetty, max. draft 41 ft. Fresh water and fuel available by barge. Stores by truck.

CERTIFICATES:
Ship's Register.
Usual Cargo Certificate.
Safety Radio.
Safety Equipment Certificate.
Crew Roll.
All usual certificates required for navigation.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man or equivalent of tobacco or cigars. Wine and/or Spirits: 5 litres of wine per man. Spirits: total 5 litres for the whole ship.

CARGO GEAR: Usual cargo certificate.

IDENTIFICATION CARDS: Not needed.

DENSITY: Amsterdam is not a tidal port. The water is brackish to fresh.
FRESH WATER: Drinking and boiler water can be supplied by barge, or if connection available, from shore. Price depends on quantity ordered.
FUEL: All grades of fuel are available and delivered mainly by barge. Advance notice 48 hours.
FIRE PRECAUTIONS: No repair work to be carried out to tankers without permission of Harbour Authorities. Usual non-smoking precautions, etc.
GANGWAY/DECK WATCHMEN: Not required. Dependent on commodity of cargo.
OPENING/CLOSING HATCHES: Liner vessels by crew or by stevedores, payable per man per hour. Tramp vessels as per Charter Party.
REPAIRS: All types of deck and engine repairs are possible including gas-freeing and tank-cleaning.
DRY DOCKS: ADM: 4 dry docks, largest of which length 817 ft., breadth 120 ft., depth 28 ft. Capacity 72,000 d.w.t.; 2 floating docks largest of which length 677 ft., breadth 97 ft. 6 in., lifting capacity 40,000 tons d.w.t.; other floating docks available for vessels up to 4,500 tons.

SERVICES: 1 tank cleaning installation, compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Usually no congestion.

AUTHORITY: Gemeentelijk Havenbedrijf Amsterdam. (Port Management of Amsterdam), De Ruyterkade, 7, 1013 AA Amsterdam. *Tel:* 20-221201. *Telex:* 12247 Ampor Nl. *Contact:* J. Den Toom, Managing Director or C. J. Muilwijk, Harbour Master (Tel: 20-221515).

AGENT: Wm. H. Muller & Co. Nederland B.V., "Havengebouw", 7 De Ruyterkade, P.O. Box 182, 1000 AD, Amsterdam. Telegrams "Mineral". Telex 12058. Tel. (020) 26 34 56.

DELFZIJL: 53.20 N. 06.54 E. (See Plan Book)

LOCATION: On the estuary of the River Ems, opposite Emden.
DOCUMENTS: See "Rotterdam".
PILOTAGE: Pilot boats normally cruise at Wester-Ems Buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and Pilot Office on Channel 14 VHF; distance from pilot station to Delfzijl 36 miles. Pilot service compulsory for all vessels drawing over 2.2 m. Foreign vessels may call Pilot on 2182 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz.

Approaching vessels from sea should inform the Pilot Commissioner of their ETA in M.E.T. with a notice at least 4 hours in advance via Scheveningen Radio (PCH); the pilot cutter may be informed via VHF.

The ETA message should contain the following details: *(a)* ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); *(b)* Draft; *(c)* Port of destination.

Departing vessels should apply for a Pilot at least 1 hour before ETD; the request should be made to the Office of the Inspector of Pilotage.

Pilotage from Delfzijl to Emden is not compulsory. On request however a Pilot may be put at the Master's disposal for a trip to Emden. This is not applicable for a trip from Emden to Delfzijl or Eemshaven.
ANCHORAGE: Vessels up to 4,000 tons d.w.t., which for some reason have to anchor outside the piers can do this East of the harbour entrance near Oterdum. Anchorage is situated within the following area: a line connecting the buoys 53/PS1-55 and PS2-BW28. Request for anchorage at the Pilot Office, VHF Channel 14. Larger vessels should seek an anchorage in the Doekegat. There is no anchorage inside the harbour.
ENTRANCE: The harbour entrance lies opposite the former village of Oterdum. The entrance extends to reach the deep water of the Bocht van Watum, and lies opposite the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

The harbour entrance has an initial depth of N.A.P. – 10 m., and a bottom width of 200 m. The harbour channel has the same depth, and a width of 100 m.

Depths: All depths are indicated in relation to N.A.P. LLWS at Delfzijl lies 2.03 m. below N.A.P. (Normal Amsterdam Level).

Tides: The range at Springs is 3.05 m. and at Neaps 2.35 m. Tidal movement is diurnal with an average range of 2.7 m.
MAX. SIZE: The harbour entrance has a depth of 8 m. at LLWS. Vessels drawing up to 9 m. can enter under normal HW circumstances; a keel clearance of about 1 m. will be maintained. Masters of vessels with large draft are recommended to contact the Pilot Service in good time with regard to the water level to be expected near Paapsand-Sud and in the Zeehavenkanaal. In the harbour "always afloat" can be guaranteed along the entire length of the Handelskade West for vessels with a draft up to 8.7 m. See "Depths" above.
TUGS: Tugs up to 850 h.p. available. Additional tugs can arrive within 3 hours from Emden.
BERTHING: The Outer Harbour is divided into 3 communicating basins: Handelshaven, Balkenhaven and Zeehavenkanaal.

Handelshaven, in the Western part of the Outer Harbour, has a deepwater quay, 520 m. long, with a depth of 11 m. alongside, 2 mooring buoys in a depth of 11 m. also jetties 110 and 130 m. in length, with a depth of 7 m. alongside.

Balkenhaven, East of Handelshaven, has depths of 8.5 m. to 5.5 m.; there are berths at several mooring buoys for small sea-going vessels.

Zeehavenkanaal is the Eastern part of the Outer Harbour and is being developed as a deep-sea harbour; it has a depth of 10.0 m. – 10.5 m. There are several private mooring facilities in the Sea Harbour Channel, from West to East:

a. Private quay of Wagenborg Terminal B.V. with a depth of 7 m.;
b. Private jetty of the Alcohol Factory. Tankers up to 25,000 d.w.t. can be accommodated here. Depth alongside 12 m.;
c. Private jetty of N.A.M. Tankers up to 6,000 d.w.t. can be handled. Depth alongside 9.5 m.;
d. Private jetty of AKZO is equipped with a loading station with a loading capacity of 500 tons salt/hour. Ships up to 25,000 d.w.t. can be accommodated here; depth alongside 12 m.;
e. Private jetty of the Methanol Chemie Nederland (M.C.N.) equipped with a loading station with a loading capacity of 500 tons of methanol per hour. Tankers up to 20,000 d.w.t. will be accommodated here in the future;
f. Private jetty of Aluminium Factory equipped with 1 crane and is able to accommodate ships up to 30,000 d.w.t. Depth alongside is 12 m.

The Oosterhornhaven behind the dyke is a basin with a total length of 3,100 m. and a width of 60 m.

Navigating Oosterhornhaven is prohibited for vessels having a LOA exceeding 75 m. and/or having a maximum beam exceeding 12.50 m. and or having a draft exceeding 4.50 m., unless a special permission is obtained from the Harbour Master subject to certain conditions.

Amongst others there are mooring facilities located in this canal alongside the yard of Azko, Methanol Chemie and Upjohn Polymer, equipped with loading installation and a tanker jetty.

The Eemskanaal:

Several private mooring facilities are located here. These are the following:

Name	*Type*	*Suitable for*
Jonker's Terminal	Potatoflour, bulk term	Coasters
Aceco	Grain elevator	Inland vessels/Coasters
Terminal Delfzijl	Timber Terminal	Coasters
North Sea Petroleum	Oil storage	Inland vessels
O.M.O.	Oil storage	Inland vessels/Coasters
Eemsmond	Cement factory	Inland vessels/Coasters
Mulder Marne	Grain elevator	Coasters

The Sea Locks:

The link between the Outer Harbour and the Eemskanaal and also the Oosterhornhaven of the port area is formed by the provincial sea locks. Sea-going vessels up to 6,000 tons d.w.t. with a beam of 16 m., a length of 120 m., and a draft of up to 5 m. can use these locks. As this will generally apply to vessels in ballast, the locks for this size of vessel are only of importance for the Groningen Shipyards.

For loaded vessels, the limit lies between 2,000 and 2,200 d.w.t. In the Outer Harbour of the locks sufficient berths have been provided for vessels waiting to pass through the locks.

Dimensions of Locks:

The Western (small) Lock has a length of 123 m. at falling tide and 81 m. at rising tide, a width of 7 m., a depth of sill outside 4.2 m. inside 2.4 m.; across each lock head lies a bascule bridge. The Eastern (large) Lock has a length of 120 m., a width of 16 m., depth of sill 5.4 m.; across each lock head lies a drawbridge. The opening times of the locks are continuous on weekdays.

Sheds and Warehouses:

There are several sheds and warehouses (total capacity: 3,250 sq.m.); also open storage. Grain silo with a storage capacity of 2,000 tons loose and 500 tons in bags. Also several private sheds, warehouses and grain silos.

CRANES: There are 7 shore cranes with capacities up to 30 tons for handling general cargoes and bulk commodities, a floating 60 ton crane and mobile cranes.

STEVEDORES: *Working Hours:* Work carried out 24 hours. 0500 – 1300 hrs., 1300 – 2100 hrs. and 2100 – 0500 hrs. Each shift has 30 minutes' break.

Work on Saturdays and Sundays: Work on Saturdays and Sundays can be arranged in the same manner as this is done in the ports of Rotterdam and Amsterdam, *viz.* in consultation with the stevedores.

RADIO: Cable to Agents via Radio Scheveningen. (PCH).

VHF: The Harbour Master's Office is equipped with a VHF installation, Channel 14. The station is constantly manned.

BRIDGES: Bridge to the Damsterhaven may always be worked. Bridge to the Oosterhornhaven will be handled from Monday to Saturday. On Sunday bridge may be opened on special request at the Harbour Master's Office.

DENSITY: Ranging between 1012 and 1018, depending on the tide.

FRESH WATER: Water obtainable alongside the quays or can be delivered by motor tankers, capacity 20 t.p.h.

FUEL: Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.

GANGWAY/DECK WATCHMEN: According to Port Regulations, Master has to keep watchmen on board.

AIRPORT: Eelde (Groningen).

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CONSULS:

At Delfzijl		*At Groningen*	
Denmark	Tel: 05960-15026	Belgium	Tel: 050-141555
Finland	Tel: 05960-16016	France	Tel: 050-345322
Norway	Tel: 05960-15026		

REPAIRS: Most engine and deck repairs can be carried out by two local shipyards.

DRY DOCKS: Dry-docking is limited to ships up to 3,000 d.w.t. with a draft not exceeding 32 dm. For larger vessels, dry-docking facilities exist in the nearby port of Emden (Germany).

CERTIFICATES: The Tonnage Certificate should be shown to Harbour Master on first call every year.

HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES: See "Rotterdam".

REGULATIONS: *Regulations for Arrival and Departure of Sea-Going Vessels:*

1. The arrival of a sea-going vessel, other than vessels passing through the port, must be reported in writing by the Master, or his local representative at the Harbour Master's Office 24 hours prior to arrival;
2. The declaration of arrival must contain:
   a. name and flag of vessel;
   b. nature and amount of the cargo to be discharged and/or loaded;
   c. dangerous goods, according to the IMO Code;
   d. last port of call;
   e. ETA and next port of call.
3. Declaration of Arrival must be made on the special forms or per teleprinter (53299 Hsddz);
4. At least 3 hours before departure the Master, the shipping company or its local Agent must notify the Harbour Master's Office of the intended departure, stating the estimated time of departure and the destination of the vessel.

DEVELOPMENTS: New Quay of 320 m. length to be built for ocean-going vessels and inland shipping.

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960 – 14966. *Telex:* 53299 Hsddz. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain G. Martini, Deputy Harbour Master.

AGENT: Maritima Scheepvaart en Handelmaatschappij B.V., De Vennen 52, Delfzijl. Tel: (05961) 6444. Cables "Maritima". Telex 53153.

DORDRECHT: 51.49 N. 04.40 E. (See Plan Book)

LOCATION: At the junction of four important rivers, the "Merwede", which is the lower end of the Rhine and main route of all inland water traffic to Germany, France and Switzerland; the "Noord" leading to Rotterdam; the "Dordtse Kil" leading to Antwerp and Belgium and the "Oude Maas" giving Dordrecht its own open connection with the North Sea. Vessels up to 31 ft. can be accommodated.

Entrance: The main entrance is via Maasmond (see "Rotterdam"), Rotterdam waterweg and Oude Maas, a distance of 26 miles above Hook of Holland, with a least depth of 32 ft. below NAP.

DOCUMENTS:

2 copies Cargo List.
3 copies Crew List.
Health Certificate.
Also see "Rotterdam".

PILOTAGE: Compulsory. Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-drafted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").

ANCHORAGE: At sea off Hook of Holland (see "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.

RESTRICTIONS: Maximum L.B.P.P. 175 m., beam 25 m., draft 31 ft. Vessels exceeding maximum length or beam could be allowed to navigate the Oude Maas under certain conditions.

For tankers a minimum visibility of 500 m. is required (1,640 ft.). For dangerous cargoes, see "Rotterdam".

The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a min. of 3 – 4.

Vessels exceeding 135 m. LOA or 17.5 m. beam must give notice to the Harbour Co-ordination Centre (H.C.C.) before navigating the Oude Maas. (H.C.C. Tel: 010-764855, Telex: 27370 Drhcc NL.)

Notice should contain: Ship's name, call sign, nationality, GRT, length, beam and draft, first port of call and berth (port and berth in case of ships leaving or shifting berth), ETA in Oude Maas or time of departure if leaving/shifting berth, Agent's name.

Tides and Currents; The tides are diurnal, with a daily rise and fall of 1 m. – 1.2 m. The current turns about half an hour after HW and LW.

RADAR: No radar service on River Oude Maas or Dordrecht.

RADIO/VHF: See "Rotterdam".

TUGS: Tugboats ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.

BERTHING: *Harbours:* There are 6 basins for sea-going vessels.

Wilhelmina Harbour: Has a water area of 52 acres, can accommodate ocean-going vessels with a draft of about 31 ft. A 300 ft. wide pier with railway connections, a spacious transit shed and an open storage site of 200,000 sq.ft. for bulk cargo has been constructed. Furthermore, at a distance of 80 ft. from this pier, there is a jetty 900 ft. long and 31 ft. wide with a depth alongside of about 31 ft. below NAP. Rivercraft can moor either directly alongside the large vessels or in the basin between pier and jetty. The basin has a depth varying between 13 ft. and 20 ft. below NAP. There are 9 mooring buoys.

Juliana Harbour: 3 basins, has a water area of 67.5 acres and a depth of about 29 ft. below NAP. The basins are mainly in use for handling of mineral oils and chemicals. The Gebr. Broere B.V. has established a big tank storage installation with a capacity of 250,000 cu.m.

The storage terminal has 7 jetties by which quick despatch can be given to sea-going tankers and river-tankcraft. Moreover, its situation is excellent for further distribution by river tankcraft, rail and road-tankers to inland destinations. Three smaller companies handle gasoline and grease-oil. There are 2 sand and gravel jetties, 1 cattle fodder jetty owned by the Fret Co. This last jetty has a depth of 27 ft. alongside. There are 2 sheds for general cargo with a capacity of 30,000 sq.ft.

The Mallegat: 2 basins, has been closed by 2 dams, one 500 m. North of the Wilhelmina Harbour entrance and the other 600 m. South of the Juliana Harbour entrance. By closing the Mallegat, the area of the harbours of Dordrecht has been increased by about 40 acres. The North basin with a water area of 18 acres and a depth of 16 ft. below NAP. The South basin with a water area of 22 acres and a depth of 24 ft. below NAP. Besides, as a sea harbour. Dordrecht is an important centre of inland navigation.

Principal Riverside Quays:	*Length*	*Depth – NAP*
Buitenkalkhaven	1,000 ft.	12 ft.
Hooikade	550 ft.	10 ft.
Groothoofd Passenger Landing Pier		13 ft.
Merwekade	1,050 ft.	13 ft.
Handelskade	450 ft.	16 ft.

Coasters can be accommodated at the Handelskade, Buitenkalkhaven, 2nd and 3rd Merwedehaven. For clearance of inward and outward bound coasters, the lower part of the Handelskade has been reconstructed. Mooring free of harbour dues is restricted to the time needed for clearance only.

Principal Harbours – Inland Vessels and Coasters:

	Length	*Width*	*Depth – NAP*
Binnenkalkhaven	800 ft.	230 ft.	11 ft.
Bomhaven	265 ft.	165 ft.	10 ft.
Wolwevershaven	1,000 ft.	165 ft.	8 ft.
Riedijkshaven	650 ft.	120 ft.	10 ft.
1st Merwedehaven	2,000 ft.	400 ft.	10 ft.
2nd Merwedehaven	2,000 ft.	450 ft.	15 ft.
3rd Merwedehaven	2,000 ft.	600 ft.	15 ft.

CRANES: 2 Transporting bridges 15 tons each, 2 Portal cranes 12.5 tons each, 1 Portal crane 7 tons, 1 cargo crane 5 tons capacity.

BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.

Immediately above first confluence into Nieuwe Maas, the Oude Maas is spanned by 2 lifting bridges:

1. The Botlek Bridge with a free width of 53.80 m.
2. The Spijkenisse Bridge with a free width of 80.00 m.

A secondary entrance is from S.W. via Roompot and Hollands Diep, a distance of 58 miles with least depth of 5.2 m. (17 ft. 6 in.), or 7.6 m. (25 ft.) at HW. The S.W. approach through Roompot is spanned by the Zeeland-Bridge, a 3-mile long road-bridge with only 11.5 m. (38 ft.) clearance under the middle of each passage span. A bascule span at the Northern end has a free width of 35 ft.

STEVEDORES: Working hours: 0730 hrs. on Monday until 1900 hrs. on Saturday.

TANKERS: Oil installation of Gebr. Broere N.V. has 7 tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.

DENSITY: Fresh water.

REPAIRS: B.V. Scheepswerf en Machinefabriek "De Biesbosch" Maasstraat 24, 3313 CR Dordrecht, Tel: 078-14 70 77, Telex: 29494 Biesb. NL.

Machinefabriek L. Straatman B.V. Kuipershaven 61, 3311 AM Dordrecht. Tel: 078-14 24 22.

B.V. Scheepswerf Hoebee, Merwedestraat 56, 3313 CS Dordrecht. Tel: 078-13 00 88.

Machinefabriek C.P. Bolier B.V., Grevelingenstraat 21, 3313 LB Dordrecht. Tel: 078-16 41 11, Telex: 29329 Bomak. N.L.

FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat.

FUEL: Available by barge.

CONSULS: Denmark Tel: 132177, Norway Tel: 132177. Other consulates at Rotterdam at 20 km. distance.

POLICE/AMBULANCE/FIRE: Tel. Police 339911; Ambulance and Fire 133333.

AIRPORT: Rotterdam and Amsterdam airports at a distance of 30 km. and 90 km. respectively served by regular airlines.

PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES: See "Rotterdam".

HOLIDAYS: New Year's Day, Easter Day, H.M. Birthday (30th April), Ascension Day, Whit Sunday, Christmas Day.

TIME: GMT plus 1 hour. Summer plus 2 hours.

AUTHORITY: Gemeentelijke Havendienst der Gemeente Dordrecht, Binnen Kalkhaven 47, 3311 JC Dordrecht, Netherlands. *Tel:* 078-134211. *Telex:* NL 29492 Haven. *Contact:* R. L. Guicherit, Harbour Master.

AGENT: See "Rotterdam".

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan Book)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.

PILOTAGE: See "Delfzijl".

ANCHORAGE: Near the Western Mole of the Eemshaven is an anchorage with a depth of about 16 m.

RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 11 m. thus enabling ships with draft up to about 11 m. to enter at HW. Plans exist to increase the possible draft to about 13 m.

Tides: The range at Springs is 3.05 m. and at Neaps 2.35 m. Tidal movement is diurnal with an average range of 2.7 m. (all approx.).

Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).

RADIO/TUGS/VHF: See "Delfzijl".

BERTHING: The harbour is divided into 4 communicating basins:

Doekegatkanaal: Has a depth of 14 m. at the entrance and 11 m. further on. The bottom width at the moles is 300 m. at 14 m.; the minimum width is 275 m. at 11 m. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 10 m.

Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 17 m. and a bottom width of 200 m. This basin has a length of 600 m. Mooring facilities will be constructed by future industries.

Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 m. to 300 m. ultimately. The depth of this basin varies between 14 m. and 17 m.

To the South of this basin a quay has been constructed with a length of 600 m. and a width of 300 m. The quay is equipped for general and unitised cargo handling to be handled with 4 cranes with a maximum lifting capacity of 20 tons and 1 crane with a lifting capacity of 30 tons. A Ro/Ro ramp is incorporated in the construction of this quay. To the West of the existing quay, the quay will be extended by 500 m. (under construction from April 1984).

Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.

A floating jetty for inland ships with a length of 150 m. has been constructed and is operated by the Port Authority.

SUPPLIES: Fuel oil and provisions should be arranged in advance.

REGULATIONS: See "Delfzijl".

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960-14966. *Telex:* 53299 Hsddz. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain G. Martini, Deputy Harbour Master.

AGENT: See "Rotterdam".

FLUSHING: 51.27 N. 03.35 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.

PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.

Wielingen (Southern approach) or via Scheur: Vessels approaching the Scheldt estuary from the English Channel pass the lightvessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at Lat. 51° 22′ N. and Long. 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.

Oostgat (Northern approach): Vessels approaching the Scheldt estuary from the North can take a Pilot in the vicinity of the S.B.Z. lightbuoy (Lat. 51° 42.3′ N. and Long. 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

ETA Messages: Masters' telegrams via Scheveningen Radio, call sign P.C.H., are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt should cable, at least 4 hours in advance, their:

1. ETA "Wandelaar" (Southern Approach) to:
   "Pilotage Ostend", via Ostend Radio (OST):
2. ETA "Steenbank" (Northern Approach) to:
   "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: *(a)* the words "ETA Pilot Wandelaar or Steenbank". *(b)* ETA central European time shown in a group of four figures. *(c)* draft (S.W. or FW) with indication of unit applied. *(d)* port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing Roads.

APPROACHES:

Approaches to the Scheldt Estuary are:

	Depth MLWS	*Max. Draft SW Neap*	*Max. Draft SW Spring*	*Keel Clearance*
S. Channel:				
Wielingen	26 ft. 02 in.	33 ft. 06 in.	36 ft. 09 in.	5 ft.
Scheur	37 ft. 6 in.	45 ft.	48 ft. 06 in.	5 ft.
N. Channel:				
Oostgat	27 ft.	31 ft.	34 ft.	5 ft.

ANCHORAGE: The Roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 of a mile from the Northern Coast. In this part of the roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. Two hours after HW the stream is running in N.W. direction gradually veering West.

A new anchorage Wielingen Noord, North of the line of the lightbuoys W6 and W10, is marked by yellow conical buoys. It is strongly recommended that vessels carrying dangerous cargoes anchor there, exceptional circumstances excepted and weather permitting.

MAX. SIZE: *Flushing East Harbour:* Entrance 34 ft. 4 in. at MLWS. A depth of 38 ft. (length 550 m.) and 41 ft. (length 350 m.) alongside the quay.

Max. draft at Buoys 41 ft. (2 berths).

Outer Harbour: West side, max. draft 40 ft.

Inner Docks: Max. depth 24 ft.

Total: Max. length 280 m., max. draft 49 ft. (S.W.), max. d.w.t., 100,000 tons. However, draft is controlled by the depth in the approach channels.

HEALTH: No certficates required. In event of any disease or fever contact Agents.

BERTHING: *Outer Harbour:* West side, quay of 1,150 ft. long, depth of water 40 ft. LWOST. Quay height above sea level 2 m. at high tide and 7 m. at low tide. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 20 ft. Depth at HW 29 ft.

Flushing East Harbour: Quay length 1,740 ft., depth 38 ft. LWOST and 1,030 ft., depth 41 ft.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 455 ft., width 72 ft., depth on still LWOST of 17.5 ft. The other lock is 213 ft. long, 26 ft. wide, and 10 ft. deep. Sluice 113 ft. wide, 28 ft. deep. Constant depth of water at quay 24 ft.

STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel.: 01184–15070. Telex: 37837 A.

Stevedore Company – Westerschelde. Tel: 01184-60020. Telex: 37798.

RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 14. Harbour tugboats and pilot cutters operate on VHF Channel 6. Port Authority VHF Channel 9.

RADAR/VHF: Port radar service available. River service under consideration. Flushing Radio Channel 14. Every 5 minutes each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.

TUGS: Join vessels in Flushing Roads. Vessel's lines usually used. Extra for tug lines. For contract holders 5% reduction.

MECHANISED CARGO HANDLING: Quay length 2,800 ft. equipped with 2 portainers (65 tons capacity), suitable for handling 20 ft. up to 40 ft. containers. Straddle carriers capacity 32 tons and fork-lifts capacity
32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro-Ro facilities for deep sea vessels, as well as Ro-Ro facilities for short sea Ro-Ro traffic.

TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21° C., or over 22,000 gallons with flash point up to 55° C. require Harbour Master's permission for entry.

2 discharging berths alongside the quay. Discharge lines 3 × 8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and 3 jetties for barges and coasters with depth of 20 ft. and 30 ft.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.

MEDICAL: Two hospitals available.

DENSITY: About 1024.

FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing Roads weather permitting.

FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.

CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons	2 cranes – 10 tons
2 cranes – 25 tons	1 crane – 8 tons
3 cranes – 12 tons	

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	tel. 66989	Germany	tel. 01188–1764
Denmark	tel. 14272	Norway	tel. 12272
France	tel. 12373	Sweden	tel. 16828

REPAIRS: All repairs possible.

DRY DOCKS: Largest (Graving) 712 ft. 5 in., width 98 ft. 4 in. Draft 28 ft. 6 in., 45,000 d.w.t. and 4 smaller docks.

A dry dock with 300,000 metric d.w.t. capacity is planned.

REPATRIATION: All facilities available for crew changes; good railway connections.

AIRPORT: Rotterdam (Zestienhoven) 125 km.; Brussels (Melsbroek) 150 km.; Amsterdam (Schiphol) 180 km.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day (May 15th); Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.

POLICE/AMBULANCE/FIRE: Police 13333; Ambulance and Fire 14444.

TELEPHONES: Possible to place telephones on board and for vessels berthing at the shipyard "De Schelde".

SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: Flushing Ports Authority, Engelandweg, Sloehaven, Vlissingen-Oost, P.O.Box 1056, 4388 ZH Oost-Souburg, Netherlands. *Tel:* 01184-68080. *Telex:* 37865 Haven Nl. *Contact:* Captain H. Th. Giezen, Harbour Master. Tel: 01184-70270 (Residence).

AGENT: Wm. H. Muller & Co. Nederland B.V., 16 Boulevard de Ruyter, P.O.Box 81, 4380 AB Flushing. Tel.(01184) 12171. Telex 37868. Cables "Mineral".

GRONINGEN: 53.15 N. 06.34 E. (See Plan Book)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.

DOCUMENTS: Clearing is done at Delfzijl.

PILOTAGE: For the approach of the lock see "Delfzijl".

The length of the lock is 120 m. and the width 16 m. Depth over sill at LW 3.9 m. and at canal level 6.07 m.

On the locks Canal-Pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 3 bridges all 16 m. wide.

MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)

TUGS: Available at Delfzijl and Groningen.

BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., four grab cranes 3.5 tons.

Oosterhaven: North side 150 m. quayage, max. beam 12 m., max. draft 3.6 m.

Deense Haven: 3 mooring buoys, max. draft 4.5 m. One private grab crane on wharf, capacity 8 tons.

Eemskanaal: Private silo. Max. beam 12 m., max. draft 3.6 m., private timber yard max. beam 12 m., max. draft 3.6 m.

Van Starkenborghkanaal: Private silo. Max. beam 9.6 m., max. draft 2.9 m., private timber yard max. beam 9.6 m., max. draft 2.9 m.

CRANES: Floating sheerlegs up to 250 tons.

STEVEDORES: Available.

MECHANICAL CARGO HANDLING: Silos with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.

MEDICAL: 3 hospitals available.

FRESH WATER: Supplied by Authority's water boats.

FUEL: By barge only.

CERTIFICATES: On arrival, Ship's Register only.

CONSULS: Belgium, Tel: 138222; Norway, Tel: 189444; Spain, Tel: 137879.

REPAIRS: All repairs possible at Delfzijl.

DRY DOCKS: Transverse slipway at Delfzijl.

AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.

HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel: 121212; Ambulance Tel: 123456; Fire Brigade Tel: 123456.

TELEPHONES: Can be placed on board alongside Hunzehaven Quay.

AUTHORITY: Gemeentelijk Havenbedrijf Groningen, Bornholmstraat 4, 9723 Ax Groningen. *Tel:* 050-120306 and 125777. *Contact:* H. J. de Lange, Harbour Master. *Tel:* 050-347192 (Private).

ROTTERDAM: 51.55 N. 04.24 E. (See Plan Book)

DOCUMENTS: Maritime Declaration of Health, Tanker Check List (all tankers over 1,600 b.r.t.), obtainable from River Pilot. Crew List in duplicate on special Dutch forms, obtainable from Agents. Ship's Register. Store List. Crew Customs Declaration showing quantity cigars, cigarettes, tobacco, spirits, wine, radios, cameras, etc., and souvenirs for each crew member.

Also see "Shipmasters Report".

Oil Pollution Damage Certificate: Tankers carrying over 2,000 tons of oil or oil products in bulk have to produce in Dutch ports a certificate of insurance in respect of civil liability for oil pollution damage (TOVALOP Certificate). Fines will be imposed if vessels do not comply with these international regulations and authorities will not allow such vessels to leave the port.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

PILOTAGE: River pilotage compulsory from sea to harbour area and vice versa, except vessels in ballast drawing less than 7 ft. 3 in.

Harbour pilotage compulsory from fairway to berth in harbour area and vice versa, except for vessels under 475 g.r.t.

Pilot Cutters: Cruising continuously, day and night, off entrance to New Rotterdam Waterway, one North of line North Mole/Maasbuoy and one near Maasbuoy. Characteristic signals:

1. By day pilot flag, being a blue flag with white letter "L", displayed from main top mast.
2. At night, lights as prescribed by Regulations for Preventing Collisions at Sea.
3. During bad visibility the fog signal prescribed by Rule 35 of these Regulations.

Ordering a Pilot:

1. Vessels bound for New Rotterdam Waterway must cable, at least 6 hours in advance, ETA pilot station, gross tonnage and draft to:
   (a) Pilotage Hook of Holland via Coastal Station Scheveningen Radio (PCH) or
   (b) Coastal Station Maassluis Radio (Radio Dirkzwager) by VHF Channel 12 (Port operations) or
   (c) Station Maas Approach at Hook of Holland by VHF Channel 20.
   This ETA notification shall, with due observance of the aforementioned 6 hours period, be rectified if the ETA will be more than 1 hour later than the ETA last reported.
   Without prejudice to this provision the Master shall indicate his requirement for a Pilot by displaying the prescribed visual signals when his vessel arrives within visual range of the pilot vessel.
   The ETA message shall contain:
   (a) The words "ETA Pilot"
   (b) ETA (group of 4 figures) in Central European Time
   (c) Draft of vessel including unit of measurement (feet or decimetres)
   (d) Port of destination.

BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.

Immediately above first confluence into Nieuwe Maas, the Oude Maas is spanned by 2 lifting bridges:

1. The Botlek Bridge with a free width of 53.80 m.
2. The Spijkenisse Bridge with a free width of 80.00 m.

A secondary entrance is from S.W. via Roompot and Hollands Diep, a distance of 58 miles with least depth of 5.2 m. (17 ft. 6 in.), or 7.6 m. (25 ft.) at HW. The S.W. approach through Roompot is spanned by the Zeeland-Bridge, a 3-mile long road-bridge with only 11.5 m. (38 ft.) clearance under the middle of each passage span. A bascule span at the Northern end has a free width of 35 ft.

STEVEDORES: Working hours: 0730 hrs. on Monday until 1900 hrs. on Saturday.

TANKERS: Oil installation of Gebr. Broere N.V. has 7 tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.

DENSITY: Fresh water.

REPAIRS: B.V. Scheepswerf en Machinefabriek "De Biesbosch" Maasstraat 24, 3313 CR Dordrecht, Tel: 078-14 70 77, Telex: 29494 Biesb. NL.

Machinefabriek L. Straatman B.V. Kuipershaven 61, 3311 AM Dordrecht. Tel: 078-14 24 22.

Machinefabriek C.P. Bolier B.V., Grevelingenstraat 21, 3313 LB Dordrecht. Tel: 078-16 41 11, Telex: 29329 Bomak. N.L.

FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat.

FUEL: Available by barge.

CONSULS: Denmark Tel: 132177, Norway Tel: 132177. Other consulates at Rotterdam at 20 km. distance.

POLICE/AMBULANCE/FIRE: Tel. Police 339911; Ambulance and Fire 133333.

AIRPORT: Rotterdam and Amsterdam airports at a distance of 30 km. and 90 km. respectively served by regular airlines.

PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES: See "Rotterdam".

HOLIDAYS: New Year's Day, Easter Day, H.M. Birthday (30th April), Ascension Day, Whit Sunday, Christmas Day.

TIME: GMT plus 1 hour. Summer plus 2 hours.

AUTHORITY: Gemeentelijke Havendienst der Gemeente Dordrecht, Binnen Kalkhaven 47, 3311 JC Dordrecht, Netherlands. *Tel:* 078-134211. *Telex:* NL 29492 Haven. *Contact:* R. L. Guicherit, Harbour Master.

AGENT: See "Rotterdam".

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan Book)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.

PILOTAGE: See "Delfzijl".

ANCHORAGE: Near the Western Mole of the Eemshaven is an anchorage with a depth of about 16 m.

RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 11 m. thus enabling ships with draft up to about 11 m. to enter at HW. Plans exist to increase the possible draft to about 13 m.

Tides: The range at Springs is 3.05 m. and at Neaps 2.35 m. Tidal movement is diurnal with an average range of 2.7 m. (all approx.).

Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).

RADIO/TUGS/VHF: See "Delfzijl".

BERTHING: The harbour is divided into 4 communicating basins:

Doekegatkanaal: Has a depth of 14 m. at the entrance and 11 m. further on. The bottom width at the moles is 300 m. at 14 m.; the minimum width is 275 m. at 11 m. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 10 m.

Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 17 m. and a bottom width of 200 m. This basin has a length of 600 m. Mooring facilities will be constructed by future industries.

Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 m. to 300 m. ultimately. The depth of this basin varies between 14 m. and 17 m.

To the South of this basin a quay has been constructed with a length of 600 m. and a width of 300 m. The quay is equipped for general and unitised cargo handling to be handled with 4 cranes with a maximum lifting capacity of 20 tons and 1 crane with a lifting capacity of 30 tons. A Ro/Ro ramp is incorporated in the construction of this quay. To the West of the existing quay, the quay will be extended by 500 m. (under construction from April 1984).

Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.

A floating jetty for inland ships with a length of 150 m. has been constructed and is operated by the Port Authority.

SUPPLIES: Fuel oil and provisions should be arranged in advance.

REGULATIONS: See "Delfzijl".

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960-14966. *Telex:* 53299 Hsddz. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain G. Martini, Deputy Harbour Master.

AGENT: See "Rotterdam".

FLUSHING: 51.27 N. 03.35 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.

PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.

Wielingen (Southern approach) or via Scheur: Vessels approaching the Scheldt estuary from the English Channel pass the lightvessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at Lat. 51° 22′ N. and Long. 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.

Oostgat (Northern approach): Vessels approaching the Scheldt estuary from the North can take a Pilot in the vicinity of the S.B.Z. lightbuoy (Lat. 51° 42.3′ N. and Long. 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

ETA Messages: Masters' telegrams via Scheveningen Radio, call sign P.C.H., are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt should cable, at least 4 hours in advance, their:

1. ETA "Wandelaar" (Southern Approach) to:
   "Pilotage Ostend", via Ostend Radio (OST):
2. ETA "Steenbank" (Northern Approach) to:
   "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: *(a)* the words "ETA Pilot Wandelaar or Steenbank". *(b)* ETA central European time shown in a group of four figures. *(c)* draft (S.W. or FW) with indication of unit applied. *(d)* port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing Roads.

APPROACHES:

Approaches to the Scheldt Estuary are:

	Depth MLWS	*Max. Draft SW Neap*	*Max. Draft SW Spring*	*Keel Clearance*
S. Channel:				
Wielingen	26 ft. 02 in.	33 ft. 06 in.	36 ft. 09 in.	5 ft.
Scheur	37 ft. 6 in.	45 ft.	48 ft. 06 in.	5 ft.
N. Channel:				
Oostgat	27 ft.	31 ft.	34 ft.	5 ft.

ANCHORAGE: The Roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 of a mile from the Northern Coast. In this part of the roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. Two hours after HW the stream is running in N.W. direction gradually veering West.

A new anchorage Wielingen Noord, North of the line of the lightbuoys W6 and W10, is marked by yellow conical buoys. It is strongly recommended that vessels carrying dangerous cargoes anchor there, exceptional circumstances excepted and weather permitting.

MAX. SIZE: *Flushing East Harbour:* Entrance 34 ft. 4 in. at MLWS. A depth of 38 ft. (length 550 m.) and 41 ft. (length 350 m.) alongside the quay.

Max. draft at Buoys 41 ft. (2 berths).

Outer Harbour: West side, max. draft 40 ft.

Inner Docks: Max. depth 24 ft.

Total: Max. length 280 m., max. draft 49 ft. (S.W.), max. d.w.t. 100,000 tons. However, draft is controlled by the depth in the approach channels.

HEALTH: No certficates required. In event of any disease or fever contact Agents.

BERTHING: *Outer Harbour:* West side, quay of 1,150 ft. long, depth of water 40 ft. LWOST. Quay height above sea level 2 m. at high tide and 7 m. at low tide. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 20 ft. Depth at HW 29 ft.

Flushing East Harbour: Quay length 1,740 ft., depth 38 ft. LWOST and 1,030 ft., depth 41 ft.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 455 ft., width 72 ft., depth on still LWOST of 17.5 ft. The other lock is 213 ft. long, 26 ft. wide, and 10 ft. deep. Sluice 113 ft. wide, 28 ft. deep. Constant depth of water at quay 24 ft.

STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel.: 01184-15070. Telex: 37837 A. Stevedore Company – Westerschelde. Tel: 01184-60020. Telex: 37798.

RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 14. Harbour tugboats and pilot cutters operate on VHF Channel 6. Port Authority VHF Channel 9.

RADAR/VHF: Port radar service available. River service under consideration. Flushing Radio Channel 14. Every 5 minutes each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.

TUGS: Join vessels in Flushing Roads. Vessel's lines usually used. Extra for tug lines. For contract holders 5% reduction.

MECHANISED CARGO HANDLING: Quay length 2,800 ft. equipped with 2 portainers (65 tons capacity), suitable for handling 20 ft. up to 40 ft. containers. Straddle carriers capacity 32 tons and fork-lifts capacity 32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro-Ro facilities for deep sea vessels, as well as Ro-Ro facilities for short sea Ro-Ro traffic.

TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21° C., or over 22,000 gallons with flash point up to 55° C. require Harbour Master's permission for entry.

2 discharging berths alongside the quay. Discharge lines 3 × 8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and 3 jetties for barges and coasters with depth of 20 ft. and 30 ft.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.

MEDICAL: Two hospitals available.

DENSITY: About 1024.

FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing Roads weather permitting.

FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.

CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons
2 cranes – 25 tons
3 cranes – 12 tons
2 cranes – 10 tons
1 crane – 8 tons

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	tel. 66989	Germany	tel. 01188–1764
Denmark	tel. 14272	Norway	tel. 12272
France	tel. 12373	Sweden	tel. 16828

REPAIRS: All repairs possible.

DRY DOCKS: Largest (Graving) 712 ft. 5 in., width 98 ft. 4 in. Draft 28 ft. 6 in., 45,000 d.w.t. and 4 smaller docks.

A dry dock with 300,000 metric d.w.t. capacity is planned.

REPATRIATION: All facilities available for crew changes; good railway connections.

AIRPORT: Rotterdam (Zestienhoven) 125 km.; Brussels (Melsbroek) 150 km.; Amsterdam (Schiphol) 180 km.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day (May 15th); Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.

POLICE/AMBULANCE/FIRE: Police 13333; Ambulance and Fire 14444.

TELEPHONES: Possible to place telephones on board and for vessels berthing at the shipyard "De Schelde".

SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: Flushing Ports Authority, Engelandweg, Sloehaven, Vlissingen-Oost, P.O.Box 1056, 4388 ZH Oost-Souburg, Netherlands. *Tel:* 01184-68080. *Telex:* 37865 Haven NI. *Contact:* Captain H. Th. Giezen, Harbour Master. Tel: 01184-70270 (Residence).

AGENT: Wm. H. Muller & Co. Nederland B.V., 16 Boulevard de Ruyter, P.O.Box 81, 4380 AB Flushing. Tel.(01184) 12171. Telex 37868. Cables "Mineral".

GRONINGEN: 53.15 N. 06.34 E. (See Plan Book)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.

DOCUMENTS: Clearing is done at Delfzijl.

PILOTAGE: For the approach of the lock see "Delfzijl".

The length of the lock is 120 m. and the width 16 m. Depth over sill at LW 3.9 m. and at canal level 6.07 m.

On the locks Canal-Pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 3 bridges all 16 m. wide.

MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)

TUGS: Available at Delfzijl and Groningen.

BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., four grab cranes 3.5 tons.

Oosterhaven: North side 150 m. quayage, max. beam 12 m., max. draft 3.6 m.

Deense Haven: 3 mooring buoys, max. draft 4.5 m. One private grab crane on wharf, capacity 8 tons.

Eemskanaal: Private silo. Max. beam 12 m., max. draft 3.6 m., private timber yard max. beam 12 m., max. draft 3.6 m.

Van Starkenborghkanaal: Private silo. Max. beam 9.6 m., max. draft 2.9 m., private timber yard max. beam 9.6 m., max. draft 2.9 m.

CRANES: Floating sheerlegs up to 250 tons.

STEVEDORES: Available.

MECHANICAL CARGO HANDLING: Silos with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.

MEDICAL: 3 hospitals available.

FRESH WATER: Supplied by Authority's water boats.

FUEL: By barge only.

CERTIFICATES: On arrival, Ship's Register only.

CONSULS: Belgium, Tel: 138222; Norway, Tel: 189444; Spain, Tel: 137879.

REPAIRS: All repairs possible at Delfzijl.

DRY DOCKS: Transverse slipway at Delfzijl.

AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.

HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel: 121212; Ambulance Tel: 123456; Fire Brigade Tel: 123456.

TELEPHONES: Can be placed on board alongside Hunzehaven Quay.

AUTHORITY: Gemeentelijk Havenbedrijf Groningen, Bornholmstraat 4, 9723 Ax Groningen. *Tel:* 050-120306 and 125777. *Contact:* H. J. de Lange, Harbour Master. *Tel:* 050-347192 (Private).

ROTTERDAM: 51.55 N. 04.24 E. (See Plan Book)

DOCUMENTS: Maritime Declaration of Health, Tanker Check List (all tankers over 1,600 b.r.t.), obtainable from River Pilot. Crew List in duplicate on special Dutch forms, obtainable from Agents. Ship's Register. Store List. Crew Customs Declaration showing quantity cigars, cigarettes, tobacco, spirits, wine, radios, cameras, etc., and souvenirs for each crew member.

Also see "Shipmasters Report".

Oil Pollution Damage Certificate: Tankers carrying over 2,000 tons of oil or oil products in bulk have to produce in Dutch ports a certificate of insurance in respect of civil liability for oil pollution damage (TOVALOP Certificate). Fines will be imposed if vessels do not comply with these international regulations and authorities will not allow such vessels to leave the port.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

PILOTAGE: River pilotage compulsory from sea to harbour area and vice versa, except vessels in ballast drawing less than 7 ft. 3 in.

Harbour pilotage compulsory from fairway to berth in harbour area and vice versa, except for vessels under 475 g.r.t.

Pilot Cutters: Cruising continuously, day and night, off entrance to New Rotterdam Waterway, one North of line North Mole/Maasbuoy and one near Maasbuoy. Characteristic signals:

1. By day pilot flag, being a blue flag with white letter "L", displayed from main top mast.
2. At night, lights as prescribed by Regulations for Preventing Collisions at Sea.
3. During bad visibility the fog signal prescribed by Rule 35 of these Regulations.

Ordering a Pilot:

1. Vessels bound for New Rotterdam Waterway must cable, at least 6 hours in advance, ETA pilot station, gross tonnage and draft to:
   (a) Pilotage Hook of Holland via Coastal Station Scheveningen Radio (PCH) or
   (b) Coastal Station Maassluis Radio (Radio Dirkzwager) by VHF Channel 12 (Port operations) or
   (c) Station Maas Approach at Hook of Holland by VHF Channel 20.
   This ETA notification shall, with due observance of the aforementioned 6 hours period, be rectified if the ETA will be more than 1 hour later than the ETA last reported.
   Without prejudice to this provision the Master shall indicate his requirement for a Pilot by displaying the prescribed visual signals when his vessel arrives within visual range of the pilot vessel.
   The ETA message shall contain:
   (a) The words "ETA Pilot"
   (b) ETA (group of 4 figures) in Central European Time
   (c) Draft of vessel including unit of measurement (feet or decimetres)
   (d) Port of destination.

Please note that vessels which do not comply with the abovementioned Regulations and fail to state their ETA timely or accurately, may only be provided with a Pilot 6 hours after their arrival at the pilot station, provided that other vessels which reported themselves correctly will not be delayed.

2. Vessels bound for Port of Dordrecht should also state their destination, as Pilots for Dordrecht embark from pilot cutter on roads.

On arrival at pilot station vessels requiring Pilot are to display following signals, separately or together:

1. *By day:* International code signal "G". Pilot flag, viz., vessel's National Flag with white border from foremast.
2. *By night:* Morse signal "G" by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for 1 minute at short intervals.
3. *During bad visibility:* At least 3 seconds after the normal fog signal the international code signal "G". Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal "H" (I have Pilot on board).

Vessels constrained by their draft (68 ft. – 70 ft.) are to announce their expected time of arrival as follows:

The announcement shall be reported at least 24 hours before arrival at the rendezvous, "13 miles North from Cap de la Hague" if the Pilot is to be embarked in the channel.

Pilotage for Deep Draft Vessels and Helicopter Service: Vessels drawing 57 ft. (SW) and over must make use of the "Eurochannel" between the "Euro Buoy" and the "Maas Centre Buoy". Pilots board by helicopter in position Lat. 52° 00′ N., Long. 03° 00′ E. Helicopter may ask vessel to work on Channel 12 or 20.

For vessels drawing over 57 ft. (SW) 1.5 times the pilotage tariff Sea – Hook of Holland is applicable.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind force 10 (55 knots.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Vessels with a freeboard over 9 m. must provide an accommodation ladder in addition to the pilot ladder. If boarding equipment does not strictly comply with the SOLAS provisions, Pilots must be embarked/disembarked by helicopter. Generally Pilots refuse to use mechanical pilot hoists or other constructions not within the recommendations of the "European Maritime Pilots Association".

Notice: *Informal Translation of the Neth. N.t.M. 112/84.*

Netherlands Regulations for requesting a Pilot in the district "Rijnmond".

The Director of the district "Rijnmond" (D.G.S.M.): paying attention to Article 38 of the Algemeen Loodsreglement (General Pilotage Regulations), (Stb. nr. 433 van 1932); announces:

Article 1.

The expected time of arrival (ETA) at the pilot stations "Maas Center" or "MW 5" has to be announced as follows:

(a) The announcement shall be reported at least 6 hours before arrival at the pilot station concerned;

(b) The announcement shall be transmitted to Scheveningen-Radio (call sign PCH) or directly via VHF Channel 20 to Traffic Centre "Maas Approach" at Hook of Holland;

(c) The announcement is to be addressed to D.G.S.M. district "Rijnmond-HCC", Rotterdam;

(d) The announcement shall, include the following particulars:
  1. Vessel's name, call sign and gross tonnage;
  2. The words "ETA-Pilot";
  3. Port of destination;
  4. The ETA (group of 4 ciphers) in Central European Time;
  5. The max. draft of the vessel, on arrival (feet or decimetres);

(e) The announcement shall be rectified if a delay of 1 hour or more is being expected.

Article 2.

Vessels constrained by their draft are to announce their ETA as follows:

(a) The announcement shall be reported at least 24 hours before arrival at the rendez-vous "13 sea-miles North from Cap de La Hague" if the Pilot is to be embarked in the Channel;

(b) Other vessels constrained by their draft are to announce their arrival at the rendezvous (Lat. 52° 00′ N., Long. 03° 00′ E.) at least 8 hours in advance

(c) Article 1, sub (b), (c), (d) and (e), is applicable accordingly;

(d) By or on behalf of the Director of the district "Rijnmond" further particulars can be requested.

Article 3.

The Master of a vessel lying in a port in district "Rijnmond" requiring a Pilot, shall make an application for a Pilot at least 3 hours in advance to the "Loodsenbesteldienst" of the D.G.S.M. district "Rijnmond-HCC" Rotterdam (Tel: 010-762855/762408, Telex: 27370 D.G.S.M. district "Rijnmond").

In case of vessels constrained by their draft, the request is to be made at least 6 hours in advance.

The request should include the following particulars:

(a) Vessel's name;
(b) Nationality;
(c) Gross tonnage;
(d) Maximum draft;
(e) Port of destination;
(f) Nature of cargo;
(g) Berth;
(h) Means of transport by Pilot;
(i) Name of Master and/or shipbroker's clerk, as well as the telephone number(s) where they are attainable;
(j) Agency with telephone number;
(k) Expected date and time of departure as well as the time upon which the Pilot is required.

The request for a Pilot is to be rectified as soon as possible, if it appears, that the ship's departure may be delayed by 1 hour or more.

Note: The corrections mentioned in Neth. N.t.M. 151/84 are incorporated.

(Gids Ned. Kust 1979 blz. 45 t/m 48).

(Nr. 3 and 10/84 D.G.S.M. Rijnmond: Hydr. L23).

Rotterdam, April 1984.

ANCHORAGES:

The following 5 anchorages are available:

1. Long term anchorage for deep draft vessels.
2. For deep draft vessels which have to wait for a short period (for tide or pilotage) before they can enter the DW route to Rotterdam-Europort.
3. For vessels which on account of their draft cannot normally anchor in 4 or 5.
4. "Maas West".
5. "Maas Noord".

See Chart L (D2-D5) 3371.

RESTRICTIONS:

Dangerous Goods

General Information:

Regulations are based on several Governmental laws and Municipal bye-laws.

The "Dangerous Goods Department" of the Municipal Port Management is the centre where all information on dangerous goods on board vessels is collected, administrated and distributed to those concerned.

Inspection on board vessels berthed in the Port of Rotterdam will be carried out mainly by inspectors of the Municipal Dangerous Goods Department, although in certain cases (e.g. explosives), Governmental Dangerous Goods Inspectors are in charge as well.

For detailed information the following Regulations should be consulted:

Rotterdtam Port Bye Laws (Havenverordening Rotterdam)

Order of the State Secretary for Traffic and Public Works No. i-3/V20146 of 10 Jan. 1980

(Beschikking van de Staatssecretaris van Verkeer en Waterstaat Nr. i-3/V20146 of 10 Jan. 1980)

Notice to Shipping of the Governmental Harbour Master No. 11/1980 (Bekendmaking aan de scheepvaart No. 11/1980)

Notice to Shipping of the Dept. of Public Works No. 50/1967 (Bekendmaking aan de scheepvaart No. 50/1967)

From these Regulations the following significant obligations have been extracted:

1. Signals:

Vessels carrying:

In Packages

(*a*) More than 100 kg. gross of IMO class 1.1 and 1.5

(*b*) More than 1,000 kg. gross of IMO class 1.2, 1.3, 1.4 (explosives) and 5.2 (organic peroxides).

(*c*) More than 1,000 kg. poisonous gases of IMO class 2.

In Bulk

(*d*) Any dangerous substances in any quantity. Also empty tanks which are not certified as being clean by an acknowledged expert should hoist the following signals before entering the Rotterdam Waterway area:

I. by day: the International signal "B";

II. by night: 2 red lights at the same level at a distance of 1 m.

2. Prior Notification:

Masters of vessels carrying:

a. Dangerous goods of class 1 and 5.2 in packages;

b. More than 1,000 kg. gross weight per substance of the other IMO classes in packages.

c. Dangerous substances in bulk: Report these commodities to the Dangerous Goods Dept., of the Municipal Harbour Master 24 hours before arrival.

3. Explosives:

There is a restriction on the carriage of explosives by ships, dependent on kind, quantity and stowage of the explosives.

Permission to deliver explosives is given by the Minister of Transport.

Masters of vessels are advised to make sure whether such a permission has been granted.

4. Dangerous Cargo List:

Apart from these obligations the Rotterdam Port Bye Laws prescribe that a vessel having any dangerous cargo on board is prohibited from being in the harbour unless there is a list on board and an identical list has been submitted to the Harbour Master, stating the correct technical names, IMO class flashpoint if below 61° C and the stowage of these materials.

5. Operational Notice:

Masters of vessels showing the signals as mentioned above ("B" flag or 1 red light) shall give notice to "Pilot Maas" on VHF Channel 20 on arrival.

This notice shall be given at least half an hour but not more than 1 hour before the ship enters the Rotterdam Waterway area.

Upon departure: On Channel 1 to "Central Post" or Channel 3 if sailing from the Europoort area.

This notice shall contain: ship's name, position, destination and expected time of entering or leaving the Rotterdam Waterway area.

Should there be considerable alteration in this time, "Pilot Maas" should be notified again 30 minutes in advance.

After the first notice and during the further voyage on the Rotterdam Waterway, VHF Channel 14 should be kept on stand-by. Listening watch should be kept on.

When visibility is less than 500 m., ships are prohibited from navigating the Rotterdam Waterway, unless permission has been obtained from State Harbour Master.

6. Pilotage:

Ships carrying:

a. more than 1,000 kg. explosives (IMO Class 1), liable to mass explosion;

b. substances of IMO Class 2, Class 3 (not miscible with water) or Class 6.1 in bulk, must have a Pilot on board when entering the Rotterdam Waterway area. At least 24 hours before arrival and 1 hour before departure the following particulars shall be given to the Governmental Harbour Master via the H.C.C. (Harbour Coordination Centre);

1. Name and call sign;
2. Nationality;
3. Gross tonnage and draft;
4. Nature and quantity of dangerous cargo;
5. Berth;
6. ETA/ETD;
7. Agent.

Incoming ships shall also give notice 4 hours before arriving at the Pilot Cruising Station stating:

1. Name and call-sign;
2. Draft;
3. ETA;
4. The code word "IMO".

by radio telegram via the Netherlands Coastal Radio Station (PCH) addressed to: "Pilotage Hook of Holland" or by VHF on Channel 12 to "Maassluis Radio" (Dirkzwager).

Navigation on the Rotterdam Waterway might be prohibited if circumstances make this necessary.

Alterations:

For commodities in quantities above those mentioned in the list, there might be restrictions on certain berths.

Name of Dangerous Goods or Group of Dangerous Goods	*Limited Quantity*
1. Chlorine	1,000 kg.
2. Phosgene	1,000 kg.
3. Fluorine	1,000 kg.
4. Hydrogen Cyanide	5,000 kg.
5. Hydrogen Sulphide	5,000 kg.
6. Carbon Disulphide	5,000 lit.
7. Hydrogen Bromide	10,000 kg.
8. Hydrogen Chloride	10,000 kg.
9. Hydrogen Fluoride	10,000 kg.
10. Sulphur Dioxide	10,000 kg.
11. Methyl Bromide	10,000 kg.
12. Acetone Cyanohydrin	40,000 lit.
13. Acrylonitrile	40,000 lit.
14. Acrolein	40,000 lit.
15. Allyl Alcohol	40,000 lit.
16. Allyl Chloride	40,000 lit.
17. Epichlorohydrin	40,000 lit.
18. Acetonitrile	40,000 lit.

For bigger amounts apply to the Harbour Master.

Remarks:

a. Particular berths are the Eemhaven basins and the harbour basins to the West of them on the South bank of the New Rotterdam Waterway.

b. Liquid dangerous cargoes in bulk only in the oil harbours.

Restrictions for entering:

Fog: Tankers and vessels carrying poisonous and explosive cargoes may not be allowed to manoeuvre in fog with visibility of less than 500 m. (1,640 ft.).

Entry times: Depend on prevailing circumstances, as follows:

Europoort: Tankers:

up to 65 ft. (SW) draft – Any time.

over 65 ft. (SW) draft – Ships have to sail inward over the top of high water Hook of Holland to keep track with the prevailing keel clearances.

Vessels with a draft of 57 ft. (SW) or more and/or a length of 250 m. or more must comply with the "Shipping rules for large vessels".

On entering Europoort, tugboats are made fast just inside the breakwaters. On departure tug's hawsers must be used aft.

The time at which deeply loaded vessels destined for Europoort enter the New Waterway depends on the prevailing circumstances and is always subject to agreements made between the Pilot Service and the Harbour Master.

Botlek:

Max. draft 44 ft. (SW), exceptionally 45 ft. (SW), under certain conditions. To obtain permission one should apply to the State Harbour Master at H.C.C. in writing, if possible 10 days before arrival, giving particulars of call and vessel.

Max. length 270 m. Vessels exceeding 270 m. in length and drawing 44 ft. (SW) may have to lighten at Europoort/Maasvlakte.

As a rule entering times are as follows: (Salt Water draft).

33 ft. – 37 ft. Anytime, except from 4.5 hours before, till HW at Rotterdam.

37 ft. – 39 ft. At Slack Low or at Slack High Water, depending on the prevailing circumstances.

39 ft. – 44 ft. At Slack High Water.

Vessels with a length of over 200 m. (656 ft.) can only enter at slack tide.

Vessels which have been lightened at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at slack water according to before-mentioned rules.

Waalhaven:

Vessels with a draft of 36 ft. salt water, or a length of over 200 m. should arrive at the entrance of the Waalhaven at slack water Rotterdam.

Other basins: Vessels with a draft of 28 ft. or more and a length of over 180 m. are generally tidebound.

All harbours in the Rotterdam area can be entered at any time during day and night.

Restrictions for several harbours are made on some drafts and ships' lengths as follows: (To be read in conjunction with the above).

Botlek and 3rd Petroleum Harbour: For ships with a length over 200 m. or a draft over 33 ft.

U.K.F.: Draft over 30 ft., no length restriction.

1st Petroleum Harbour: Draft over 25 ft. or longer than 200 m.

2nd Petroleum Harbour: Draft over 31 ft. or longer than 200 m.

Vulcaanhaven Vlaardingen: Draft over 33 ft.

Eemhaven: Draft over 36 ft. or longer than 240 m.

Schiedam, Shipyard Wilton: Ships longer than 200 m.

Schiedam, Wilhelminahaven: Draft over 21 ft. or longer than 200 m.

Shipyard R.D.M.: Ships longer than 180 m.

Waalhaven: Draft over 36 ft. or longer than 200 m.

MAX. SIZE: (Also see "Developments")

Entrance and river area	*Channel width in m.*	*Max. SW draft (High tide)*	*Keel-clearance*
Euro buoy – Euro 5A	600	70 ft.	20%
Euro buoy – Euro 5A	1,200	65 ft.	20%
Euro 11 buoy – Maas centre	600	70 ft.	17.5%
Euro 11 buoy – Maas centre	1,200	65 ft.	17.5%
Maas centre buoy – Entrance	600–400	70 ft.	15%
Entrance – Europoort	400–350	70 ft.	10%
Entrance – Botlek	250	44 ft.	10%
Botlek – Waalhaven	250	40 ft.	10%
Waalhaven – Rijnhaven	200	34 ft.	10%

Shipping Rules for Large Vessels:

Vessels drawing 68 ft. – 70 ft. (20.7 m. – 21.4 m.) must embark the district Pilots for the Eurochannel off Cherbourg, they should request them via the vessel's Agency in Rotterdam at least 48 hours before ETA off Cherbourg.

The message should contain the following items:

Vessels name;
Call sign;
Time (UTC), date and position where the Pilot has to embark;
Draft in metres;
Name of Agent.

Vessels drawing 17.4 m. (57 ft.) (SW) to 68 ft. (20.7 m.) must make use of the approach channels "Eurogeul" and Maasgeul". Such vessels must report, at least 2 hours prior to their arrival at the Pilot "rendezvous" position 52° N. 03° E., by radio telegram to "Traffic Centre Hook" (TCH) via Scheveningenradio (PCH), the following information:

(a) Name and call sign of the ship
(b) GRT and deepest arrival draft in SW
(c) ETA rendezvous position
(d) Confirmation that the following equipment functions well:
1. Gyro compass
2. Radar installation
3. VHF, operational on Channels 6, 14 and 20
4. Decca receiver Mark XII or XXI, provided with a connection for the so-called Brown Pattern Indicator (Brown Box Connection).

The intention to leave Europoort must be reported by the Master or the Agents, at least 3 hours prior to departure to "Traffic Centre Hook", giving the information mentioned above under a, b and d.

Vessels with a length of 250 m. or more but with a draft of less than 57 ft. SW (not bound to use the approach channels) must report, at least 6 hours prior to their arrival at the "Maasbuoy", the information mentioned above under a, b, c and d, 1, 2 and 3.

The intention to leave the port must be reported by the Master or the Agents, at least three hours prior to departure to "Traffic Centre Hook", giving the information mentioned above under a, b, d, 1, 2 and 3.

The 6 hours' report prior to arrival will also be considered the 6 hours' ETA message for obtaining a Pilot.

Vessels equipped with a "T.O.R." installation can send their messages to "Traffic Centre Hook" via Dirkzwager's message relay and ships reporting station: Telex No. 26751 "dirk nl".

Outward bound vessels drawing 57 ft. (SW) or more, having to make use of the "Maasgeul" and "Eurogeul" must give 12 hours notice of their intended departure to the Harbour Coordination Centre/Municipal Harbour Service, giving the information mentioned under a, b and d.

Shifting: Vessels which have been partly discharged at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at slack water according to Rules. The following rules in view of length and draft apply:

Max. length overall	*Max. draft allowed*
up to 260 m.	44 ft. SW
260–270 m.	42 ft. SW
270–280 m.	41 ft. SW
280–300 m.	39 ft. SW

Tidal Information:

The mean height of sea-level off the Hook of Holland = 1.5 in. below DATUM (=N.A.P.).

LLWS (Low Low Water Spring) = 3 ft. 5 in. below DATUM
MLW (Mean Low Water) = 2 ft. below DATUM

All permissible drafts and depths of water mentioned are given at MLW, unless otherwise mentioned.

Tidal Range:

	Neap Tides	*Spring Tides*
Mean Rise above DATUM	2 ft. 11 in.	3 ft. 5 in.
Mean Fall below DATUM	2 ft. 3 in.	2 ft. 4 in.
TIDAL RANGE	5 ft. 2 in.	5 ft. 9 in.

Duration of the flood tide:.. 4 hrs. 34 min.
Duration of the ebb tide: .... 7 hrs. 51 min.

HEALTH: Master has to fill in and sign Maritime Declaration of Health which is handed to him by Pilot. Vessels subject to medical inspection have to hoist flag signal according to Pilot's orders.

RADIO: *E.T.A. messages and T.O.R.:*

Masters' telegrams via Scheveningen radio, call-sign P.C.H., are passed on to Agents 24 hours a day, weekends inclusive. For this reason it is advisable that Masters communicate with Agent via Scheveningen Radio, via which station they also route messages to vessels.

Ships equipped with "Telex Over Radio" may, outside office hours, channel their messages to Agent via Dirkzwager's message relay and ships' reporting station at Maassluis, Telex No. 26751 Answerback "Dirk NL". Such messages are passed on to Agent immediately, also during weekends.

OBO-Carriers:

Masters of this type of vessels must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival, the following information:

1. that vessel has no slops on board and is certified gasfree or alternatively
2. a. correct name of liquid cargo carried last, with place and date of discharge
   b. stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not
   c. whether non-gasfree spaces are adjacent to dry cargo holds and if so, which holds
   d. which spaces contain inert gas.

RADAR/VHF: Chain of 8 shore-based radar stations permits navigation during all weather conditions. Radio and Radar station Maas Approach, at Hook of Holland, communicates via VHF Channel 20 (Port Operations).

VHF range = about 15 miles.

Radar range = about 14 miles in S.W. and West direction, and 10 miles in North direction.

Masters are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Mass Approach provides vessels within range with nautical information and acts as a link with pilot cutters.

Radio-Radar Station

The radio station, "Traffic Centre Hook" (TCH), in Hook of Holland acts as a Communication Centre and a Traffic-Regulating Station near the entrance and on the New Waterway. The station provides weather forecasts on request by VHF Channel 14. Radar assistance is provided on VHF Channel 3 from CA2-NW1 separation buoy into Europoort and vice versa.

Information on berths, Harbour Pilots, tugboats and linesmen in Europoort can be obtained on Channel 11.

TUGS: Tugs normally join vessel on river when nearing the basin where vessel will be accommodated. Vessel's towing lines used. On departure from Europoort the tow ropes, fastened to the stern, must be supplied by the tugs.

BRIDGES: New Waterway connects port of Rotterdam with North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Maas-Bridges" (Koningshaven), which are on working days opened at regular times.

To reach berths in Brittanniehaven vessels have to pass the Calandbridge. To reach berths in Seinehaven and Neckarhaven vessels have also to pass the Rozenburg locks (between the Calandcanal and Hartelcanal).

SPECIALISED CARGO-HANDLING FACILITIES: Quick dispatch, Brittanniehaven Car Terminal. Quay length 300 m., storage capacity about 15,000 cars.

Ro/Ro Facilities:

Company	Location	Number of ramps
Maatschappij Zeeland	Hook of Holland	2
Multi-Terminals C.V.	Waalhaven	2
Seaport Terminals B.V.	Prins Johan-Frisohaven	2
	+ 2 Brittanniehaven (1985)	
Quick Dispatch B.V. (Tor Line)	Prins Johan-Frisohaven	2
Quick Dispatch B.V.	Prinses Beatrixhaven	2
Europe Container Terminus B.V.	Prinses Margriethaven	1
	+ 1 Europahaven (1985)	
North-Sea Ferries B.V.	Beneluxhaven	2
Transport Ferry Service (Townsend Thoresen)	Beneluxhaven	1
Vijfwinkel	Merwehaven	1

L.A.S.H.: Vessels discharge and load at buoys in Waalhaven. Average permissible draft at buoys 36 ft. (FW). Max. draft at Buoys 6, 12 and LASH buoys, 40 ft. (SW).

Esso Chemie N.V.: The fertiliser plant in Europoort produces ammonia, urea, nitric acid, calcium ammonium nitrate.

Max. size: 30,000 d.w.t., length 690 ft., draft 42 ft. 6 in. in SW.

GENERAL CARGO FACILITIES: General Cargo Terminals:

	Max. FW draft at LW	*Length of quay*	*No. of cranes*	*Capacity in tons*
Schiehaven	9.0 m. (29 ft. 6 in.)	620 m.	8 1	5—17.5 30 tons (Containerlift)
Lekhaven	10.0 m. (32 ft. 10 in)	855 m.	8	5—25
Merwehaven	10.0 m. (32 ft. 10 in.)	600 m.	8	5—25
Waalhaven, Pier 1	10.5 m. (34 ft. 6 in.)	860 m.	12 1	5—25 30 ton (Containerlift)

The 17.5/25 ton cranes are mainly used for the handling of containers and steel. In combination these cranes can lift 28 tons.

General Cargo Facilities: *(continued)*

Multi-Purpose Terminals:

	Maashaven	*Waalhaven Pier 6*	*Prinses Beatrixhaven*
Facilities/commodities	Containers and Unit Loads General Cargo	Steel Products Roundwood Forest Products	General Cargo Steel & Forest Products
Maximum Draft	9 m. (29 ft. 6 in. FW)	11 m. (36 ft.)	10 m. (33 ft.)
Quay Length	750 m.	771 m.	733 m.
Marshalling area	62,900 sq.m.	72,800 sq.m.	61,000 sq.m.
Sheds	3	2	2 + 1 office building
Covered storage area	12,958 sq.m.	6,097 sq.m.	18,370 sq.m. all temperature controlled
Open storage area	27,000 sq.m.	34,352 sq.m.	22,460 sq.m.

5. Latenstein Silo Excelsior B.V.						
Rijnhaven				1 shore at 60 t.p.h.		32,200
6. J. Soufflet Holland B.V.						
Lekhaven				1 shore at 100 t.p.h.		1,300
7. N.V. Silo-En Veembedrijf Meneba						
Maashaven				2 shore at 80 t.p.h.		100,000

Total annual discharging capacity of the Grain Elevator Comp. (G.E.M.): 25 million tons.

Berthing possibilities for bulk carriers and OBO's:

Beneluxhaven: Europoort Silo B.V. 1; G.E.M.-Europoort 4.

Botlek: G.E.M. installation 2; G.E.M. buoys 1; Buoy No. 21 1.

At the G.E.M.-Europoort terminal it will be possible to discharge vessels of up to 200,000 d.w.t. Conveyor belts (1 per elevator) will transport the grain at a capacity of 800 cu.m.p.h. to a central building with automatic weighing machines.

Grain Loading: Grain loading into vessels of up to 30,000 d.w.t. can be effected both by means of floating elevators, ex-barges, and at the G.E.M.-Botlek shore installation.

Unimills B.V.: On a site between G.E.M. installation and Europoort Silo B.V., situated at the Beneluxhaven and Dintelhaven, a soya extraction plant has been built. Annual capacity: 1.25 million tons. Both the supply of raw material and the loading of extracted soyameal are effected via the adjacent installation of the G.E.M.

CONTAINER HANDLING FACILITIES:

Europe Container Terminus B.V.:

Europe Container Terminus B.V. (E.C.T.), specially equipped for the handling of container vessels, is situated in Prinses Margriethaven and in Prins Willem Alexanderhaven.

At present 38 container lines including a number of feeder services are operating from the E.C.T. terminal.

145 Container trains are despatched every week to 45 destinations in Europe.

Present capacity: 1,000,000 containers per year.

At this terminal 3rd generation container vessels and containers of all sizes and weights are handled.

Technical Data:

15 container cranes.	
18 forklifts (13 ton)	12 Forklifts (up to 2.5 ton)
40 van-carriers	75 terminal trucks
4 stacking cranes	535 terminal chassis
2 railway gantry cranes	3 rail tracks of 500 m.
1 Ro/Ro ramp.	
Quay length:	3,000 m. (9,840 ft.)
Marine terminal:	88 ha. – marshalling area
Control terminal:	10 ha. – data processing, administration
Land terminal:	12 ha. – storage empty containers, chassis, C.F.S. activities

The maximum draft allowed amounts to 40 ft. (SW) although the water depth alongside the quay permits drafts of up to 41 ft. 4 in. (SW) in view of trim during cargo handling. Depth of water: 13 m. at LW.

A new container-terminal, called Delta Terminal, located at the Maasvlakte, is being developed in 2 phases. Phase I, operational in 1984 has a quay length of 1,200 m. and an area of 81 hectares. It is equipped with 7 container gantry cranes. Phases II and III provide for a further 290 hectares when required with ample quay lengths available. The biggest container vessels can be handled. There will also be a Ro-Ro facility.

Multi-Terminals Rotterdam B.V.:

Multi-Terminals Unitcentre B.V.: Waalhaven Pier 7. Full container terminal

Annual capacity: 350,000 containers.

Technical data:

Maximum draft	12.2 m. (40 ft. FW)
Quay length	800 m.
Pier width	250 m.
Storage and marshalling area	240,000 sq.m.

	number	capacity	outreach
Container gantry cranes	5	60 tons	45 m.
Rail-mounted gantry cranes for stacking	6	45 tons	45 m.
Railway tracks	5		
Reefer station	65 connections		

Ro/Ro ramp: For vessels with an angled or slewing ramp a special outer ramp is available.

Container/Ro-Ro Terminal Heijplaat and CFS: This is a container/Ro-Ro terminal with an annual throughput capacity of 150,000 containers. There is a quay length of 800 m. provided with 3 cranes having a maximum capacity of 60 tonnes on 24 m. outreach and 40 tonnes on 40 m. There is is common user Ro-Ro berth having a length of 270 m. and a ramp width of 9 m.

Technical data:

Indoor storage capacity:	13,500 sq.m.
Outdoor storage capacity:	40,000 sq.m.
Container Freight Station	
Storage/repair of containers	

Multi-Terminals Waalhaven B.V.: Waalhaven Pier 2. Multi-purpose terminal Ro/Ro ramps.

Technical data:

Maximum draft:	10.36 m. (36 ft. FW)
Quay length:	1,500 m.
Marshalling area:	60,000 sq.m.
Covered storage and consolidating area:	45,000 sq.m.

	number	capacity
Level luffing cranes	11	5–45 tons
	1	60 tons
Mobile cranes	3	4–25 tons
Floating crane	1	7 tons
Rail-mounted gantry cranes for stacking	1	36 tons
Forklift trucks	63	up to 37 tons
Tugmasters		
Terminal chassis railway connections		

Ro/Ro facilities: One ramp for stern operations
One ramp for angled platforms (45°)

Bell Lijn B.V.: Brittanniehaven. The Bell Line B.V. Terminal consists of a concrete piled jetty 219 m. in length, 50 m. wide with a minimum depth of water alongside of 6.5 m. The berth is accessible at all states of the tide. The total area of the terminal is 3.7 hectares and it is served by a Kone gantry 35 ton and a Paceco Vickers gantry crane of 32 tons capacity. The effective outreach over water is 19 m. and 60 m. over the marshalling area and containers are stacked up to 3 high. The handling operation is controlled by one man who is in touch with the crane driver and the ship by VHF radio.

Services:

Between Rotterdam and the UK/Ireland:

Bell Lines

Rotterdam – Teesport (Middlesbrough) – 4 to 5 sailings weekly.
Rotterdam – Waterford – 3 to 4 sailings weekly.
Rotterdam – Bellport (Newport, Gwent) – 1 to 2 sailings weekly.
Rotterdam – London – 3 sailings weekly.

BULK HANDLING FACILITIES: Also see Tables on pages 979 & 981.

Europees Massagoed – Overslagbedrijf (EMO), B.V.: (European Bulk Transhipment Company (EMO) B.V.) Also see "Tables".

World's largest bulk transhipment and storage installation is situated on the Maasvlakte, which has been reclaimed from the North Sea. Fully loaded ore carriers up to 270,000 d.w.t. can be handled.

EMO B.V. is an executing company which concludes transhipment contracts, primarily for ores and secondly for coal. Participants in this company are: SNV, 51%; Frans Swarttouw, 30%; Manufrance, 19%.

A.G. Messrs. EMO operate 2 transhipment installations:

1. Maasvlakte Terminal – E.K.O.M. (Erts Kolen Overslag Maasvlakte).
   Participants: Frans Swarttouw
   Manufrance
   S.N.V. (Transport – en Handelmaatschappij Steenkolen Utrecht B.V.)

A conveyor belt system connects the discharging pier in the Mississippi Haven with the barge loading section in the Hartelhaven and with the loading installation for railway wagons, both direct and via the stockpiling area.

Technical data:
Discharging quay, length 600 m., draft 69 ft. S.W.
Additional (May 1984), length 460 m., draft 72 ft. S.W.
Future, length 460 m., draft 75 ft. S.W.
Loading barges, length 700 m., draft 15 ft. F.W.
2×50 ton unloaders, capacity 11,000 t.p.h. (max.)
1×85 ton unloader, capacity 6,000 t.p.h. (average)
3 stackers/reclaimers, capacity 11,000 t.p.h.
1 loading machine (4/1984), 6,000 t.p.h.
2 barge loaders, 11,000 t.p.h. (max.), 6,000 t.p.h. (average)
1 railway loader, 3,000 t.p.h.
Outreach discharging gear – 45 m. (148 ft.).
Max. height of gear above MHW – 30 m. (98 ft.).
Storage capacity – 8 million tons.
Transhipment capacity – 25 million tons per year.

2. Botlek Terminal – Botlek B.V. See "Tables".

Ertsoverslagbedrijf Europoort C.V.:

This transhipment installation, specialised in the handling of iron ore, is situated between Caland Canal and Dintelhaven.

Participants in this installation, partly via their Dutch sister companies, are: August Thyssen-Hutte A.G.; Fried. Krupp-Huttenwerke A.G.; and Mannesmann A.G. (50%, 30%, 20%).

A conveyor belt system connects the discharging quay in the Caland Canal with the barge loading section in the Dintelhaven, both direct and via the stockpiling area. For further details of this installation see "Tables".

Technical data:
Quay length discharging section 645 m. (2,116 ft.).
Max. draft allowed at MLW – 59 ft. SW.
Max. capacity – 6,900 t.p.h.
Average discharging rate – 4,500 t.p.h.
Outreach discharging gear – 34.75 m. (114 ft.)
Max. height of gear above MHW – 24 m. (78 ft. 8 in.)
Storage capacity – 3.5 million tons
Transhipment capacity – 15 million tons/year.

TANKER BERTHS:

Europoort

No facilities for discharging dirty ballast at Mobil at 2nd Petrol Haven, Chevron/Esso at 5th Petrol Haven, Tank Terminal Rotterdam, Panocean and Paktank.

No bunkers (ex-installation) at Mobiloil, Esso, Tank Terminal Rotterdam, Panocean, Vo-Matex, Chevron and Esso.

Tank Cleaning – Ballast Water:

Messrs. Tankcleaning United C.V. and Booy Clean have floating and rolling equipment for all cleaning jobs and for the collection of contaminated ballast water.

Shore installation at: Verolme Tankcleaning, Botlek.

Crude Oil Washing System:

For applying the crude washing system to tankers the permission of the oil installation, the Charterers and the Port Authorities is required.

Moerdijk:

The route New Waterway, Oude Maas and Dordtse Kil is frequently used by 20,000 ton tankers, loaded for 70%, proceeding to and from the Petrochemical installations of Shell Moerdijk, which are connected by pipe-lines to Shell-Chemie at Rotterdam-Pernis. Cleaning/gas-freeing is not allowed in this area.

All vessels with a LOA exceeding 135 m. and/or a beam exceeding 17.5 m. and planning to navigate the rivers Oude Maas and/or Dordtse Kil shall report in writing (telex no. 26043) to the State Harbour service at the H.C.C., 24 hours in advance:

(a) name and call sign of vessel,
(b) nationality,
(c) LOA and beam,
(d) g.r.t.,
(e) port of destination or departure,
(f) deepest draft and
(g) ETA at Oude Maas/Dordtse Kil or ETD from berth.

Restrictions:

Max. draft Oude Maas 30 ft., max. draft Dordtse Kil 25 ft. 6 in.; max. length 175 m., max. width 23 m. (max. width 25 m. with special permission under specific conditions. Information to be obtained from State Harbour Master's Office), max. height 41 m., channel width 250 m.

The use of tugboats is compulsory for certain categories of vessels, the number of which depends upon length, draft and circumstances.

STEVEDORES: Normal working hours:

Bulk cargoes except grain: Monday 0730 – Saturday 1400 hrs. uninterrupted.

Europoort C.V. operate throughout 24 hours.

Grain: Europoort Silo B.V.: (Beneluxhaven).

	Day-shifts	*Night-shifts*
Monday-Friday	0700 – 1130 hrs.	1530 – 1930 hrs.
	1200 – 1530 hrs.	2000 – 2400 hrs.
Saturdays	0700 – 1100 hrs.	
	1130 – 1500 hrs.	

In principle no work is performed on Saturday-nights, Sundays and holidays.

Grain Elevator Company (G.E.M.) B.V.: Europoort (Beneluxhaven).

Continuously from Monday 0730 until Saturday 1530 hrs.

Meal breaks	1130 – 1200 hrs.	0330 – 0400 hrs.
	1930 – 2000 hrs.	

Botlek and Floating Elevators:

Monday-Friday	Monday-Thursday
0730 – 1130 hrs.	1630 – 2030 hrs.
1200 – 1600 hrs.	2100 – 0045 hrs.
Saturday	Friday-night
0730 – 1130	1630 2030
1200 – 1530	

Overtime: The Grain Elevator Company *does not charge* any overtime expenses, except for work on Sundays and holidays and the nights preceding and following them.

For weekend work after Saturday 1530 hrs. permission will normally only be granted when the operations can be completed on Sunday-morning early. Labourers have to be obtained on a volunteer basis.

Permission to work on Sunday from 0045 until 2200 hrs. is granted in exceptional cases only.

Official Office Hours at Rotterdam:
Monday – Friday 0900 – 1700 hrs.
Saturday 0900 – 1200 hrs.

Off-Port Notice Clause: In view of the fact that for large vessels a restricted number of berths is available only, such vessels frequently have to wait for a berth outside at sea.

In such cases laytime will count only in case the relevant Charter Party contains a proper off-port notice clause.

(continued on page 982)

BULK HANDLING FACILITIES: (continued)

Installation		Quay-length (m.)	Max. depth at MLW	Equipment	Discharging rate (t.p.h.)	Max. outreach discharging gear	Max. height of gear above MHW	Loading rate (t.p.h.)	Max. outreach loading gear	Capacities

				4 floating cranes	Max. 1,000				(66 ft.)	
7. S.H.V. Waalhaven		345	36 ft. FW	4 transporter bridges	Max. 1,400/	39 m.	14 m.	Ex stock-pile 500.	When loading	80,000 tons coal
pier 5					1,600	(128 ft.)	(46 ft.)	Ex barges 150/400	ex. barges max.	
									beam of vessels	
The activities on this coal pier to be transfered to E.M.D. Massvlakte.									amounts to 106 ft.	

*Max. draft allowed at HW in Botlek 44 ft. (SW), under certain conditions 45 ft. (SW) and in Vulcaanhaven 39 ft. (FW).

Bulk cargoes are also handled at the buoys in all basins by means of floating cranes of Messrs. Aegir, S.H.V. and Interstevedoring.

STEVEDORES: *(continued from page 980)*

Lay-by Berth: In case the off-port notice clause stipulates the use of a lay-by berth, the vessel, in such a berth, should be at the immediate and effective disposition of the charterers.

In order to avoid heavy extra shifting expenses the charter party should stipulate that such a lay-by berth should be situated in that part of the port where the discharge will be actually effected (Europoort or Botlek).

Shifting Expenses: Berths midstream at the buoys in Botlek, Waalhaven and at the dolphins in Rijnhaven and Maashaven are recognised regular discharging berths where bulk cargoes are handled by means of floating equipment.

Disputes about shifting expenses from the buoys, especially when no work has been done there, to the Botlek shore installation can be avoided by stipulating for whose account shifting expenses between "berths" are.

Oil: At the oil refineries of Shell, Chevron, Esso, Gulf and B.P. tankers can discharge continuously, including week-ends without extra charge. This also applies to the Mobil Oil Terminal and to the Maasvlakte Oil Terminal.

The oil storage companies Paktank and Nieuwe Matex work from Monday to Friday during daytime only, unless overtime arrangements are made.

General Cargo:

A. *In daytime Monday – Saturday*
morning shift 0730 – 1145 hrs.
afternoon shift 1230 – 1600 hrs.

B. *Night-work Monday – Friday:*
evening shift 1600 – 2015 hrs.; 2045 – 0015 hrs.
night shift 0000 – 0330 hrs.; 0400 – 0730 hrs.

Gangs have to be ordered for two shifts.

Overtime (weekends and holidays):

1. *Saturday 0730 – 1600 hrs.*
One third of the labour is available.
More labour may be engaged on a volunteer basis.
2. *Saturday 1600 – Sunday 0730 hrs.*
Permission can be granted if operations will be completed before Sunday 0730 hrs. Labour on a volunteer basis.
3. *Sunday 0730 – 2400 hrs.*
Permission is granted in exceptional cases only. Labour on a volunteer basis.
4. *Sunday 0000 – Monday 0730 hrs.*
Permission is usually granted. Labour on a volunteer basis.
5. *Official Holidays:*
The surcharge for work on official holidays is identical to that for work on Sundays. The nights prior to and following a holiday are to be regarded as Saturday/Sunday nights.
The possibilities to engage gangs are limited.
No work is permitted:
24th December 1600 hrs. – 26th December 0730 hrs.
31st December 1600 hrs. – 1st January 1700 hrs.

Containers: The large Container Terminals E.C.T. and Unitcentre operate around the clock, week-ends inclusive. No work is permitted: 24th December 1530 hrs. – 26th December 0715 hrs. and 31st December 1530 hrs. – 1st January 1515 hrs.

Agents should be kept closely advised of vessel's position. In view of ordering gangs for next morning/evening Master's final ETA message is required before 1400 hrs. For work on Monday mornings a final ETA is required before Friday 1400 hrs.

DENSITY: *Europoort:* At high water 1025; at low water 1022.

Botlek: At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: at high water 1004; at low water 1000. All depending upon amount of fresh water carried down river.

MEDICAL: All medical facilities available. Advance notice only in emergency or if attendance required during week-end.

OPENING/CLOSING HATCHES: On liners by stevedores. On tramp vessels by crew; stevedores lifting beams.

FRESH WATER: Can be supplied ex quay at many berths. Where no shore connections are available and at buoys: by waterboat.

Fresh water can also be supplied in the Roads off the Hook of Holland, weather permitting.

FUEL: All types of oil bunkers can be supplied by means of barges or ex-shore installations for tankers. Coasters can take bunkers ex installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during week-ends.

FIRE PRECAUTIONS: No floating objects are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

CUSTOMS ALLOWANCES: Spirits: first arrival each month, 5 litres per vessel plus 1 bottle per man. Otherwise, 0.75 litre per man with a max. of 5 litres per vessel. Wine: 5 litres per man.

Each Crew member permitted out of bond 200 cigarettes, or 25 cigars, or 500 gm. tobacco.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: Ship's Register and Derat Exemption Certificate.

Tankers bound for a general cargo basin or a shipyard need to have a Gas Free Certificate (issued by a recognised Marine Chemist after inspection), before entering into the basin.

CONSULS: Area Code 010.

REPAIRS: (Also see "General"). A variety of shipyards and workshops is available for engineering and all types of repairs. Various yards have specialised in the construction of dredgers, ferry boats, offshore equipment, heavy derrick vessels and/or in the jumboizing of vessels.

The largest drydocks in the Rotterdam port area are owned by the following shipyards of the Rhine-Schelde-Verolme group:

Verolme Dock- and Shipbuilding Company	Graving dock 7	500,000 d.w.t.
Wilton-Fijenoord, Schiedam	Graving dock 8	160,000 d.w.t.
Rotterdam Drydock Company	Floating dock 10	110,000 d.w.t.

Wilton-Fijenoord, Rotterdam Dockyard Co. and Verolme Rozenburg have combined their fleet of tugboats for assistance at the R.S.V. shipyards in the New Waterway area.

If V.L.C.C.'s with a length of over 270 m. do not have full engine power for manoeuvring or have not made sufficient engine trials after repairs they must be escorted to and/or from the repair yards by two tugboats of sufficient capacity.

The Government Harbour Master (Rijkshavenmeester) must be notified in this respect 12 hours prior to arrival or departure.

Tank cleaning facilities are available.

Voyage repairs are carried out in the entire port area including Botlek and Europoort/Maasvlakte.

Some shipyards are situated beyond the bridges across the river Maas, East of Rotterdam. They can be reached via the Koningshaven, where a traffic and a railway bridge have to be passed.

Max. draft at HW: 21 ft. FW.
LW: 17 ft. FW.

Engine Repairs: All types.

Specialised work: Port repairs for hulls, deck and electrical equipment. Cleaning and engine repairs.

Other work: After-sales service and spare parts for Daihatsu and Hanshin diesels, Thune Eureka pumps, Pusnes deck machinery, Tanabe compressors, Naniwa pumps, Hitma Crosby safety valves.

DRY DOCKS: Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation for largest vessels.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Rotterdam airport Zestienhoven (distance 6 km.) and Amsterdam airport Schiphol (distance 70 km.) are served by regular airlines.

TIME: During Winter GMT plus one hour. During Summer GMT plus 2 hours.

HOLIDAYS: New Year's Day; Easter Monday; Queen's Birthday (30th April); Ascension Day; Whit Monday; Christmas Day (25th December) no work; Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police head office tel. 14.31.44; Alarm and accidents tel. 14.14.14; Ambulance tel. 33.33.00; Fire tel. 29.29.29.

TELEPHONES: At major shipyards, oil and grain terminals telephone is placed on board without extra charge.

DEGASSING/CLEANING: Free translation of circular issued 17th April 1973 by the Docks Industry of the Municipality of Rotterdam, reads: Safety requirements in regard to degassing/cleaning of tanks and/or holds on board ocean tanker vessels.

A recent accident during cleaning activities of tanks having contained combustible gases or liquids, poisonous or not, has resulted in the following directives to maintain the safety and to protect the environment in the dock area.

The articles 55 and 56 of the Port Regulations Rotterdam (Municipal Gazette 1971, No. 3) prescribed a written consent of the Port Superintendent for degassing/cleaning. To obtain such a written consent on behalf of an ocean tanker vessel, the Master should apply to the Office of the Port Superintendent, Department of Dangerous Substances, at least 24 hours before the actual cleaning. Conditions may be made in respect of, and amongst other things:

(a) safe cleaning procedure, and

(b) presence of an expert.

To that effect an investigation may be held on board as to a safe rinsing procedure, and relevant subjects, in consultation with the ship's management.

A statement may be demanded from the Master stating whom he charges with the supervision of the activities. From this person expertise is demanded, to the satisfaction of the Port Superintendent. This "Expert" may be a member of the ship's crew, respectively a person to be designated by the Owner (e.g. a laboratory expert). Without the express consent of the Port Superintendent cleaning must not be started.

These measures have become effective at once and are applicable to all ocean tanker vessels, of which the tanks to be cleaned have contained a combustible liquid as its last contents with a flash-point lower than, or equal to, 55° C.

For ships berthed at a shore tank-cleaning station and handled by that company, the cleaning-company concerned shall be liable for a safe treatment and consequently no separate consent shall be required.

In the following summary, the ship's data necessary to obtain a consent has been stated.

The cleaning of tanks, as indicated in this circular, is not permitted without the consent of the Port Superintendent of Rotterdam. Concerning stench-causing substances further directives will be issued.

It will be tried to restrict the delays possibly occurring as a result of this new regulation minimum.

Summary: By "degassing" to be understood: Degassing or ventilating a tankage, steaming or cleaning and the activities related thereto.

Reporting: At least 24 hours before commencement of the cleaning activities the ship (ship's Agent) should make a request by Telex to the Port Superintendent of Rotterdam (Port co-ordinating centre) to obtain a consent pursuant to Art. 55 or 56 Port Regulations.

The following data should be stated when making the application: (1) name ship; (2) nationality; (3) tonnage in g.r.t.; (4) name Agent; (5) berth where cleaning is to be carried out; (6) indication of tanks to be cleaned; (7) correct technical denomination of the last 2 products carried in these tanks; (8) expected time of commencement cleaning; (9) cargo still on board; (10) by whom cleaning will be carried out (ship's own crew respectively name cleaning company); (11) destination slush (remaining on board respectively discharge to . . .).

GENERAL:

Ship Repairing: For repairing (except cold work outside the cargo-area) on board any vessel outside a ship-repair yard permission from the municipal Harbour Master is required.

Dependent on nature and location of repairs a certificate may be required to be issued by a recognized Marine Chemist after inspection.

For sea-going tank vessels an application for permission shall be made by telex to the Harbour Master of Rotterdam (Harbour Co-ordinating Centre, Dangerous Goods Department. Telex GEVST 25720), containing the following information:

1. Ship's name.
2. Date of commencement repairs.
3. Duration of repairs.
4. Berth.
5. Nature of repairs.
6. Location of repairs.
7. By whom repairs will be carried out.
8. Any cargo-operations, bunkering etc., during repairs.
9. Cargo on board and stowage.
10. Effect of repairs on ship's manoeuvrability and time and duration of immobilized situation.

The Municipal Dangerous Cargo Department will contact the Harbour-Inspectorate, which organisation is in charge of the National law: cleaning and repairing of tank vessels.

Inspection of International Safety Certificates:
As from January 1st, 1979 Harbour Pilots on board foreign vessels entering the port area of Rotterdam will keep a check on the presence of valid international safety certificates according to the "International Convention for the Safety of Life at Sea 1960" and the "International Convention on Loadlines 1966".

This check will be executed on behalf of the State Shipping Inspection to which Harbour-Pilots have to report. The Harbour-Pilots entrusted with this inspection are in the possession of an authorisation provided with photograph issued by the State Shipping Inspection (Scheepvaartinspectie). Should the reporting of a Harbour-Pilot be negative, any measures to be taken will solely remain the task and responsibility of the State Shipping Inspection.

"Off-Port Notice" clause:
Large grain vessels still often have to wait off the port for a berth. For that reason a proper "Off-Port Notice" clause is still recommended in order to avoid loss of time and sometimes heavy shifting expenses.

Control on delivery of cargo:
At Rotterdam, bulk grain cargoes are mainly discharged direct overboard into receivers' barges. Therefore, a careful supervision by an independent control company is recommended so as to make sure that no cargo is delivered to receivers before original Bills of Lading have been presented.

DEVELOPMENTS: In December 1981, a start was made on deepening the Approach Channel to Rotterdam to enable vessels with a draft of 72 ft. to berth at Europoort and Maasvlakte Terminals (1985). From August 1983 vessels with a draft of 70 ft. can be accommodated and, from January 1985, 72 ft. will be accommodated from Euro-1 Buoy to Maas Pilot at the Hook of Holland.

Radar Service: The present chain of 8 shorebased radar stations will be replaced by a new system, which should be fully operational in 1985.

The equipment which the central and regional traffic control stations will use in future is described as Vessel Traffic Management System (VTMS), which is a nautical operational data-processing system.

The system will comprise a centrally operated traffic control from the approach routes off the Hook of Holland up to the Van Brienenoord bridge, East of the city and to the Spijkenisser bridge over the river Oude Maas. The radar screenings will include the major harbour basins so as to be able to pass-on traffic and position data to tugboats and seagoing vessels manoeuvring in these basins.

Maasvlakte Coal Terminal: Maasvlakte Coal Terminal (M.C.T.) has been set up jointly by:

Shell, Esso and B.P.
Frans Swarttouw
SHV
Ruhrkohle
Thyssen
Manufrance

The MCT is situated North of, and adjacent to, the transhipment installation EKOM. The installation is planned to be constructed and developed in three phases:

The first phase of MCT became operational in 1983. Coal carriers are discharged at the EKOM installation and the cargo stockpiled at the MCT area of 10-15 ha. (25-37.5 acres) at a capacity of 4 million tons annually.

Stockpiling and bargeloading machines are available.

In the second phase the Municipality will construct a separate harbour providing 1,100 metres quay length suitable for vessels up to 250,000 d.w.t.

In the final phase, planned for the years 1990-1993, a transhipment of 25 m. tons of coal is foreseen on a site of 110 ha (275 acres).

Container Overflow Terminal: Work on a new container terminal (location Maasvlakte) started in April 1982. The 81 ha. (200 acres) terminal with a quay length of 1,200 m. and 5 cranes is planned to be operational in 1984.

Bulk Transport to the Ruhr: Ore cargoes are usually transhipped at the Maasvlakte and Europoort terminals into combinations of max. 4 push barges of up to 2,750 tons and transported to the Ruhr area via the Hartelcanal (since 1982 without locks), the rivers Oude Maas, Waal and the Rhine.

Pusherboats of 5,400 h.p. could during normal conditions, move 16,000 tons in 6 barges.

SHIPMASTER'S REPORT: November 1981.

On stores lists, wines and spirits should be total amounts in litres.

Require 4 crew lists, 2 stores lists and 2 crew declarations. Immigration board and take one crew list and leave one stamped. Any personnel joining should have their particulars put on the back of this crew list which will be collected by the Agent prior to departure.

Regulations regarding craft coming alongside are very strict. Basically, once discharging, ballasting or gas-freeing operations have commenced then no craft is allowed to come alongside a vessel if its engine is running when it is less than 25 m. from the vessel. Therefore, if bunkering or storing from barges these craft must be alongside before discharge etc., commences.

SHIPMASTER'S REPORT: July 1984.

Agents required us to use Dirkzwager Radio for all communications to them, chandlers and shore authorities. COW permissible but only after inspection by harbour authorities. Berthing Pilot boards around entrance to Europort.

AUTHORITY: Port of Rotterdam, P.O.Box 6622, 3002 AP Rotterdam. *Tel:* 010-896911. *Telex:* 23077 (Eurot Nl) *Cables:* Eurogate. *Contact:* ECZ Department.

SCHIEDAM: 51.54 N. 04.25 E.

DOCUMENTS: See "Rotterdam".
PILOTAGE: See "Rotterdam".
ANCHORAGES: See "Rotterdam".
RESTRICTIONS: See "Rotterdam".
MAX. SIZE: *Wilhelminahaven:* Length 260 m., draft 24 ft.
Wiltonhaven (private): Length 305 m., draft 33 ft.
HEALTH: See "Rotterdam".
RADIO: See "Rotterdam".
VHF: See "Rotterdam".
RADAR: See "Rotterdam".
BERTHING: Offshore facilities operated by Brown & Root B.V. at the Wilhelminahaven. Several berths for all kinds of offshore vessels are available.

J. Soufflet Holland B.V. import French and British cereals for transhipment at Wilhelminahaven. Length of berth 100 m.

CRANES: None.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: None.
MEDICAL: Full hospital facilities available (2 hospitals).
DENSITY: 1000.
FRESH WATER: See "Rotterdam".
FUEL: See "Rotterdam".
FIRE PRECAUTIONS: Specific precautions for tankers during repairs at "Wilton-Fijnoord B.V." are according to the Harbour Regulations Schiedam.
REPAIRS/DRY DOCKS: Largest dry dock 1,000 ft. long and a depth of 35 ft. (graving dock). One graving dock 656 ft. in length and 98 ft. wide at entrance with 2 building berths; 2 graving docks each 700 ft. long 93 ft. wide at entrance, and with a depth of 32 ft.

One of the largest floating docks in Europe – extreme length 760 ft., width at entrance 128 ft., depth on blocks 33 ft.

There are 3 other floating docks with lifting capacities of 3,700 – 12,500 and 21,500 tons respectively.

SURVEYORS: See "Rotterdam".
GANGWAY/DECK WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: See "Rotterdam".
REPATRIATION: See "Rotterdam".
AIRPORT: Zestienhoven, 6.4 km. (Rotterdam). Schiphol 96 km. (Amsterdam).
POLICE/AMBULANCE/FIRE: Police, Tel: 260760; Ambulance, Tel: 333300; Fire, Tel: 735544.
TELEPHONES: This service is available aboard vessels at all berths at the shipyard.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Municipal Harbour Master, Havenstraat 6, 3115 HD, Schiedam. Postal Address: P.O.Box 79, 3100 AB Schiedam. *Tel:* 010–622222 (ext. 168–169). *Telex:* 24407 Onsdm Nl. *Contact:* Captain Th. Sabel, Harbour Master.

TERNEUZEN: 51.20 N. 03.50 E. (See Plan Book)

LOCATION: At mouth of the ship canal from the River Scheldt to Ghent. Lat. 51° 20′ 14″ N., Long. 3° 49′ 39″ E.
DOCUMENTS: Also see "Rotterdam". Customs clearance takes place in the docks, except vessels bound for Belgium. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents in triplicate: Cargo and Crew Manifest, and Stores List. Masters are requested to have Crew List completed beforehand to avoid delay in the lock.
PILOTAGE: Compulsory for all sea-going vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at Buoy A1, Lat. 51° 22.00′ N., Long. 2° 53.24′ E. for ships entering by Wielingen Channel; or at Middensteen Bank Buoy, Lat. 51° 39.30′ N., Long. 3° 19.00′ E. for ships entering by the Oostgat Channel.

In Wielingen Channel Belgian and Dutch Pilots available. In Oostgat Channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter "P", the Dutch pilot boat has a blue flag with a white letter "L". Communicate with pilot cutter by VHF Channel 6.

Also see "Ghent – Pilotage" in Belgium.

Warning: In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag "D", or by night a searchlight from each vessel.

ANCHORAGE: Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.
RESTRICTIONS: No restrictions on night entry.
MAX. SIZE: Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of max. draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through West lock and canal: length 256 m., breadth 34 m., draft in fresh water (canal) 12.25 m.

Vessels loading a maximum cargo for Ghent should not exceed 12.25 m. draft.

Also see "Ghent".

Also see "Berthing".

HEALTH: Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen Roads or Outer Harbour.
RADIO/RADAR: Communicate via Traffic Control Terneuzen on Channel 3 between Buoy Nos. 17 and 35 including the Braakmanhaven West, East and Ferry Harbour.

Radar Control also operates between Buoy Nos. 17 and 35 on Channel 3. 24 hour watch maintained.

Every 5 minutes to each hour a weather-bulletin, navigation reports and warnings are given.

Communicate on the Canal via Traffic Control Terneuzen, Channel 11.

TUGS: Towage not compulsory. Tugs can be ordered from Terneuzen Tugboat Company or Towage and Salvage Union Ltd. respectively by Channel 72 and Channel 32. Both companies maintain continuous listening watch on Channels 6, 11 and 14.
BERTHING: The port has 4 outer harbours: Braakman, West, East and Ferry. The Braakman Harbour is only in use for handling chemical products. There are 2 jetties, also see "Dow Chemical". Braakman Jetty 450 m. in length, least depth 0.8 m., max. length of ship 140 m. Ocean Dock 350 m. length, least depth 14.5 m., max. length of ship 252 m. The West Harbour has 2 locks (West and Middle), which is mainly used by sea-going vessels. The East Harbour has 1 lock (East Lock) for inland craft, while the Ferry Harbour (no locks) is used mainly by fishing craft and yachts. Ships not exceeding the following dimensions are allowed to pass through the West Lock and Canal: length 256 m., breadth 34 m., fresh water draft (canal), 12.25 m. Middle Lock is under construction and cannot be used until 1985. East Lock: ships of a length 140 m., breadth 22.80 m., draft 4.0 m. can pass. This lock is used by inland craft. Sea-going vessels with a max. length of 65 m. and a max. draft of 9 m. may also pass through the East Lock.

There are 4 harbours on the East bank of the canal situated about 1 mile South of Terneuzen Locks.

Noorderkanaalhaven (Northern Canal Harbour): Length of North Quay, 170 m., max. draft 5.50 m.; South Quay, 192 m., max. draft 5.50 m.; in the middle of the harbour max. draft 7.50 m.

Zuiderkanaalhaven (Southern Canal Harbour): Length of North Quay, 225 m., max. draft 2 m.; South Quay, 230 m., max. draft 5.75 m.; in the middle of the harbour max. draft 8.25 m. and 5 m.
Massagoedhaven (Bulk Harbour): Length of North Quay 504 m., max. draft 12.25 m. and 6.50 m. Length of South Quay 275 m., max. draft 6.50 m.
Zevenaarhaven (Zevenaarharbour): Length of North Quay 421 m., max. draft 8.25 m.; South Quay, 259 m., max. draft 8 m., in the middle of the harbour max. draft 9.50 m. *Sluiskil* (sub-port, about 4 miles South of Terneuzen) length of quay, 900 m., max. draft 10 m. to 10.50 m. *Sas van Gent* (sub-port, on the canal about 7 miles South of Terneuzen) length of quay, 210 m., max. draft 7.50 m.

There are several sheds and warehouses, total capacity 160,000 sq.ft., also open storage, total capacity, 100,000 sq.ft. Grain silo with a storage capacity of 10,000 tons. Vessels up to 80,000 d.w.t. which for some reason have to anchor outside the piers can do so on the River Scheldt near Buoy No. 27. Ships with max. draft of 40 ft. 6 in. can reach Terneuzen under practically all circumstances.

Also see "Developments".

Cranage: 10 movable cranes of 5 tons capacity; 4 floating cranes, 1×8.5 tons and 3×16 tons; 1 floating derrick of 40 tons. At Sluiskil there are 2 coke-loading plants, 3 cranes of 15 tons and 4 loading bridges. Sas van Gent has 2×5 ton cranes. Water and provisions available.

Container and Ro-Ro Facilities: Ro-Ro Harbour, width 24 m., max. draft 6.75 m. Ro-Ro Berth Zevenaarharbour South, width 15 m., max. draft 9.50 m. Ro-Ro Berth Zevenaarharbour North, width 28 m., max. draft 8.25 m. In Zevenaarharbour a ro-ro berth for 2 vessels, depth 10 m. and 7.50 m.

Ore and Bulk Cargo Facilities: Available at the Massagoedharbour.

Dow Chemical: *On the Scheldt River – The Scheldt Jetty:* The Scheldt Jetty provides 1 berth only and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 22,500 tonnes deadweight (d.w.t.).

The jetty has no draft limitations and the maximum allowable length of the vessels (LOA) is 200 m. Also see "Product Handling Facilities".

In the Braakman Harbour – The Barge and Coaster Docks: The Barge and Coaster Docks have 3 platforms, providing 5 berths for loading and unloading purposes.

Berth A (East) is for the handling of barges only and excluded for the accommodation of seagoing vessels.

Certain draft limitations as well as size restrictions for the various berths have to be taken into account. See "The Braakman Harbour". For product handling facilities at the Barge and Coaster Docks see "Product Handling Facilities".

In the Braakman Harbour – The Ocean Dock: The Ocean Dock provides 2 berths and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 100,000 tonnes deadweight (d.w.t.).

Certain draft limitations as well as size restrictions have to be taken into account, see "Braakman Harbour". For product handling facilities at the Ocean Dock see "Product Handling Facilities".

General Facilities and Limitations: Bunkering facilities are not available.

Supplies of bunker oils, fresh water or large quantities of stores can be supplied with a barge alongside the vessel. In this case the cargo operations have to be interrupted for the time the barge is alongside. Depending on conditions in the port such operations will as a rule be limited to those vessels for which bunkering on the roads is legally not allowed. (LPG vessels with one or more cargo tanks greater than 3,000 cu.m. in size and LPG vessels of over 15,000 cu.m. tank capacity in total).

Bunkering at the berth requires 24 hours' notice and will be co-ordinated by the Loading Master. Limited quantities of stores can be taken on board via the jetties.

If for bunkering or any other reason a barge or boat has to moor alongside a ship, moored on one of the Dow Jetties, the Loading Master has to be informed 24 hours before the operation.

With the permission of the Loading Master it is allowed to transport cylinders with acetylene, nitrogen, helium, hydrogen, freon and oxygen from the jetty on board the moored ships and vice versa. By hoisting the cylinders it is obliged to use the specially made blue hoisting-containers from Dow. The cylinder valves must be protected by the screw-caps.

Slops or ballast water cannot be received.

Tank cleaning of oil or chemical tankers is not permitted alongside the jetties. LPG vessels can be purged. Nitrogen and methane for purging purposes are available.

Vessels, moored at the Dow Jetties, have to comply with the International Ship/Shore Safety Checklist and the additional Dow Marine Safety Regulations.

Dow Chemical Marine Department can be contacted by VHF radio on Channels 6, 8, 11, 13 and 34. Constant radio watch is kept on Channels 6, 13 and 34.

A telephone set and an intercom will be placed on board immediately after berthing. The intercom is for direct communication with the Loading Master.

The Braakman Harbour: General lay-out: See "Plan Book".

It should be noted that given water depths on the plans are valid immediately after dredging. A certain siltation should be taken into account. *The average rate of the siltation is unknown.*

Given water depths are translated to the General Mean Level for the Netherlands (N.A.P.). For the calculation of actual water depths, undermentioned tidal differences should be taken into account.

Tidal differences in metres:
High Water Spring (HWS) +2.7
High Water (HW) +2.0
Mean Level (N.A.P.) ±0.0
Low Water (LW) −2.0
Low Water Spring (LWS) −2.6

Barge and Coaster Docks:
Dock A (West) – Max. size 10,000 d.w.t. Depth 11 m.
Dock A (East) – Barges only. Depth 7.5 m.
Dock B (West) – Max. size 15,000 d.w.t. Depth 11 m.
Dock B (East) – Max. size 8,000 d.w.t. Depth 9.5 m.
Dock C (West) – Max. size 10,000 d.w.t. Depth 11 m.

In addition to the information, given on the Plan, the following "General Directives" should be observed:

For all berths, the overall length of vessels is restricted to a maximum of 140 m.

Berth A (East) is reserved for the accommodation of barges only.

Mooring at Berth B (East) is limited to the port side only.

The Ocean Dock: North and South Berth: Max. d.w.t. 100,000 tonnes. Max. length 252 m. Depth 18.5 m.

In addition to the information, given on the Plans, the following "General Directives" should be observed:

Time of berthing at/or departing from the Ocean Dock depends on tidal conditions and max. d.w.t. or draft of each vessel and will be appointed by the pilotage.

The maximum allowable draft of vessels is determined by the water depth at the Scheldt River Entrance, at Scheur. At present max. draft is at least 43 ft. (approx.). New figures are published every month.

Berthing with ship's bow pointing seaward is compulsory.

Port Regulations: To maintain Order and Safety of Navigation and based on Article 7 of the Port Regulations, the Director of the Port Authority of Terneuzen has announced the following with regard to the Braakman Harbour and the berths, situated therein:

Admittance into the Harbour:

1. The largest admittable lengths and/or widths are for:

Sea-going vessels:

– in the harbour	:	length overall 252 m.
– along the Ocean dock	:	length overall 252 m.
– along the B & C docks	:	length overall 140 m.
inland craft	:	length 140 m.
push barges	:	length 185 m. width 22.8 m. considering that an additional length of 8 m. is permitted, provided that the maximum length of the barge does not exceed 153 m. and the pushtug is lashed in the axis of the barge.
lashed barges	:	length 110 m. width 22.8 m.

2. It is prohibited to enter the harbour with vessels or boats which:
   a. Do not have to load or unload in the harbour.
   b. Do not have to carry out any work.
   c. Are not equipped with an VHF radio, suitable for transmitting and receiving on Channel 3.

3. Dispensation from measurements and conditions as mentioned in sub. para 1 and sub. para 2 above can be granted by the Director of the Port Authority or his Substitute. Such Authority can also be prosecuted by the Harbour Master or his substitute with the exception for 'maximum admittable length' of 252 m. as mentioned in sub. para 1.

Traffic Control:

1. Traffic is controlled by the Terneuzen Traffic Control Station. Tel: 01150-12161. Telex: 55482. VHF: Channel 3.

2. The procedure of "Reporting in Writing" is also compulsory for inland craft, whereby the term of 3 hours also applies for the activities as mentioned in (a).

3. Terneuzen Traffic Control Station must be contacted by VHF, Channel 3, when:
   (b) Entering or leaving the harbour.
   (c) Berthing or unberthing.
   (d) Shifting berth.

4. All traffic inside the harbour or harbour entrance is obliged to have VHF radio tuned to Channel 3.

5. If necessitated by weather, or other circumstances, the required number of tug boats can be prescribed by, or on behalf of the Harbour Master to seagoing vessels and/or inland craft.

6. *Seagoing* vessels, having to carry the signals in accordance with Article 22 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 Nr.A-5/071054 (Regulations for Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

Inland craft, having to carry the signals in accordance with Article 10 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 (Regulations of Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

Above mentioned vessels, which during the approach enter into these conditions of visibility may be ordered by, or on behalf of the Harbour Master, to berth or drop the anchor at a place which, according to his opinion, is suitable.

Dispensation from the paragraphs as provided above may be granted by or on behalf of the Harbour Master.

7. Entering the harbour is prohibited if a second red light is shown next to the normal red harbour light.

Mooring:

1. Masters must ensure that their vessels remain afloat under all circumstances.

2. Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master.

At least 1 steel wire must be positioned on both the bow and the quarter of the ship. Each wire must be properly made fast and adjusted for easy pick-up by a tug.

Pilotage: Pilotage is compulsory for seagoing vessels, entering, leaving or manoeuvring in the harbour.

Dispensation may be granted by or on behalf of the Harbour Master. Further to the above, and in connection with the completion of a number of modifications in the Braakman Harbour and the Ocean Dock having become operational, the Director of the Port Authority of Terneuzen withdraws publication Nr.3 (dated 8th August, 1977), Nr.4 (dated 6th September, 1977), Nr.5 (dated 5th September, 1977), and announces the following:

Marking:

1. The entrance of the harbour is marked by a fixed green, and a fixed red light on top of piles on West side and East side of the white leading lights.

2. Night and day, the axis of the harbour entrance is marked by 2 synchronous interrupted white leading lights (iso 2 sec.) located on the Southern Harbour Dyke. Bearing is 191°.

3. The green and red harbour lights are located respectively 170 m. and 215 m. from the axis, indicated by the white leading lights.

The minimum width of the harbour entrance on either side of the axis, measured at right angles, is 112 m.

4. Night and day the centre of the turning-basin, West of the Ocean Dock, is indicated by interrupted green leading lights (3 sec. on, 1 sec. off). These lights are located on the Southern Harbour Dyke. Bearing is 211.5°.

5. The centre of the almost circular turning basin lies at the intersection of the green leading lights and the Westward lengthened axis of the Ocean Dock. The radius of the turning basin is 200 m.

6. During fog, 2 sodium fog-lights are lit underneath the green light of the harbour entrance.

One of these fog lights is directed towards the Scheldt River, the other one towards the harbour.

During the night and poor visibility, the piles, marking the harbour entrance are illuminated by floodlights.

7. The shoal in the harbour, extending from the South side of the Barge and Coaster Docks to further Southward is covered by 2 light buoys, located on a water depth of N.A.P. −7.5 m.

The line between the North Buoy "Bra 2" (Qk. Fl. Red) and the South Buoy "Bra 4" (iso 8 sec., Red) marks the Western boundary of the shoal.

Depths:

1. The dredged bottom-depths in the harbour are:

In the Harbour Entrance : N.A.P − 15 m.
In the Turning Basin : N.A.P − 16 m.
The Western Berths of the
B & C Docks : N.A.P − 11 m.
B & C Dock Berth B-East : N.A.P − 9.5 m.
B & C Dock Berth A-East : N.A.P − 7.5 m.

The above mentioned bottom depths are target figures and certain deviations as a result from siltation has to be taken into account.

2. Information with regard to admittable draft can be obtained from the Harbour Masters' Office or from the Traffic Control Station, mentioned under 2 sub. para 1.

Addition:

A seagoing vessel, not equipped with a bow-thruster has to be assisted at least by 1 tug-boat during arrival and departure from the jetties in the Braakman Harbour.

A seagoing vessel, calling for the Ocean Dock, has to be moored with the bow in N.W. direction, unless otherwise agreed by the Harbour Master.

Turning the vessel has to be done preferably in the Turning Basin.

Product Handling Facilities and Capabilities: LPG.

Storage: Propylene, butadiene, spent C-4 and crude C-4 are stored in pressurised tanks at ambient temperatures.

For propylene, there are in-line cooling facilities available for product delivery to vessels at a minimum temperature of −10°C.

Ethylene is stored at atmospheric pressure in refrigerated tanks. (−95°C to −102°C.). In-line cooling facilities are available for product delivery to vessel at −103°C.

Butane and propane are stored in refrigerated – or pressurised tanks and loaded/unloaded at ambient temperature and refrigerated.

Two refrigerated storage tanks of 50,000 cu.m. each, for propane and butane, are operational.

Marine Loading Equipment: All LPG products are loaded/unloaded at the Barge and Coaster Docks. Butane and propane can also be loaded/unloaded at the Ocean Dock. The following equipment is available:

B & C (A-West): 2 stainles steel loading arms for ethylene, propane, nominal diameter 6 in., minimum temp. −104°C.

1 carbon steel loading arm for LPG (propylene, butadiene, spent C-4, crude C-4, butane and propane), nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (A-East): 1 carbon steel loading arm for LPG (propylene, butadiene, spent C-4, crude C-4, butane and propane), nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-West): 1 carbon steel loading arm for LPG (propylene, butadiene, spent C-4, crude C-4, butane and propane), nominal diameter 8 in., with integrated vapour return line, nominal diameter 6 in., minimum temp. −10°C.

B & C (B-East): 1 carbon steel loading arm for LPG (propylene, butadiene, spent C-4, crude C-4, butane and propane), nominal diameter 8 in., with integrated vapour return line, nominal diameter 6 in., minimum temp. −10°C.

B & C (Dock C): 2 stainless steel loading arms for ethylene, nominal diameter 6 in., minimum temp. −104°C.

O.D. (South): 2 low temperature steel loading arms for LPG, nominal diameter 10 in., minimum temp. −50°C.

O.D. (North): 2 low temperature steel loading arms for LPG, nominal diameter 12 in., minimum temp. −50°C.

Except for the carbon steel loading arm on Berth A (West and East), all other arms are equipped with an emergency shut-off/disconnecting device and a fire fighting nozzle, directed on the ship's cargo line manifold.

On the Braakman Jetty a butane vaporiser and booster pump are available for butane unloading from barges which do not have own discharge facilities.

Without vaporiser also propane can be unloaded with this booster pump. Nitrogen or methane supply from shore is necessary to reach enough overpressure in the ship tanks.

Purging: Purging of LPG vessels with nitrogen or methane can be carried out at the Barge and Coaster Docks. Maximum delivery rate of nitrogen is 2000 Nm3/hr., Methane 1800 Nm3/hr.

Nitrogen can be heated to a temperature of +80°C. to increase the drying effect of ship's cargo tanks which were waterwashed prior to the purge.

Prior to loading, LPG vessels must meet the requirements as laid down in the "Guidelines for Cargo Tank Condition".

MEDICAL: Two modern hospitals available.

TANKERS: Slop tanker available. Also see "Berthing" – Dow Chemical.

FRESH WATER: Available from water barge.

FUEL: Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal available by prior arrangement.

GANGWAY/DECK WATCHMEN: Available. Tariff increase 100% on Sundays and holidays.

OPENING/CLOSING HATCHES: Can be effected by crew or stevedores.

CUSTOMS ALLOWANCES: See "Rotterdam".

IDENTIFICATION CARDS: Not required.

CONSULS:
- Belgium
- France
- Finland
- Norway
- Spain

REPAIRS: Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.

SURVEYORS: See "Flushing" or "Rotterdam".

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Rotterdam".

SERVICES: Repairs of radio, radar, etc., can be effected.

BANKS: Amsterdam-Rotterdam Bank, Herengracht 15, 4531 GM Terneuzen. Tel: 94041. Telex: 55249.

Raiffeisen-Boerenleenbank, Herengracht 1, 4531 GM Terneuzen. Tel: 94651. Telex: 55260.

Algemene Bank Nederland, Herengracht 7, 4531 GM Terneuzen. Tel: 95051. Telex: 55429.

EMERGENCY CO-ORDINATION CENTRE: Harbour-Control Terneuzen continuous watch on VHF Channel 11. Tel: 12161. Telex: 55482.

STORING: Vessels can be stored by barge and truck. At Braakman Harbour only with special permission of Dow Chemical Company, and not during loading and discharging. Trucks can proceed alongside at the berth except at Braakman Harbour. Approximate distance from truck to ship at Braakman Harbour, about 300 m.

At Braakman Harbour, no forklift trucks can be used to handle stores.

For Customs Regulations, see "Rotterdam".

Local Riggers can be employed to assist with storing.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Plans made to widen and deepen Outer Harbour.

New terminal (August de Meyer B.V.) to be built by extending Zevenaar Harbour. The basin will be extended by 300 m. and deepened to 13.5 m. to provide accommodation for vessels up to 65,000 d.w.t. The terminal will be equipped with 2 Kangaroo cranes, each with a capacity of 440 t.p.h. and fitted with dust-free grabs. The 2 warehouses will have a capacity of 130,000 tons in total.

AUTHORITY: Havenschap Terneuzen, Maritiem District Scheldemond, Buitenhaven 1, P.O.Box 1033, 4530 GA Terneuzen. *Tel:* 01150-95651. *Telex:* 55494. *Contact:* Port Director.

AGENT: See "Flushing".

VLAARDINGEN: 51.54 N. 04.20 E.

On the Waterway about 5 miles from Rotterdam.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Harbour Pilots are always available.

TUGS: Available.

BERTHING: *Old Harbour (Municipal):* For tugs and inland craft. Depth at entrance 10 ft. at LW. Total length of quay 2,000 m.

Koningin Wilhelminaharbour (Municipal): Depth 12 to 17 ft. at LW. Length of quay 1,300 m.

Vulcaan Harbour (Private): Suitable for vessels up to a draft of 10 m. (33 ft.) at LW. Stevedoring by: Frans Swarttouw's Havenbedrijf.

Length of quay for cargo-handling: 750 m. Phosphate loading jetty (on riverside) for barges 140 m. 3 electric 16-ton cranes, 3 electric 6-ton cranes and two 5-ton mobile-cranes. Belt conveyors on phosphate jetty. Large shed with a capacity of 30,000 tons and 6 storage tanks with a total capacity of 90,000 tons for various bulk cargoes.

Nieuwe Matex Wharves (Private): 3 berths for sea-going vessels on riverside up to 35 ft. draft at L.W. Several berths for barges and coasters on inner side of jetty up to 22 ft. draft.

Large tank installation; bonded warehouse, 424 storage tanks (total) capacity 450,000 cu.m. for vegetable and mineral oils, molasses, latex and chemicals.

Lever-Sunlight Jetty (Private): Jetty 75 m. max. draft 10 ft. at LW. (no harbour dues).

N.V. Van Neerbos Ind. en Handel My. Jetty (Private): Length of jetty 70 m., max. draft 10 ft. at LW. 1 electric 3-ton crane.

Royal Shell Jetties (Private): 4 jetties, length 25 m. each, with berths for vessels up to 12 ft. draft. Tank installation for mineral oils; 77 tanks, total capacity 412,640 cu.m.

Harbour dues by arrangement.

Windmill Holland Fertilizer Works Harbour (Private): Length of harbour 300 m. max., draft 11 to 14 ft. at LW. One jetty on riverside, length 105 m. Max. draft 16 ft. at LW. Harbour dues by arrangement.

FRESH WATER: Available by barge.

FUEL: Available by barge.

REPAIRS: *Ship Repair Yard "Vlaardingen Oost":* All kinds of repairs undertaken. Outfitting quay of 1,100 ft. length. Anchor and chain factory. *Machinefabriek Kreber:* Builders and repairers of boilers, engines and various kinds of dredgers.

SURVEYORS: Saybolt Cargo Inspectors available at Vlaardingen, others (Caleb Brett, Bureau Verwey, etc.) at Rotterdam.

Lloyd's Register, American Bureau, Bureau Veritas and Det Norske Veritas Surveyors available at Rotterdam.

DRYDOCKS: Three drydocks (capacity 3,500, 4,200 and 5,300 tons) and one broadside slipway of 400 ft. (capacity 3,500 tons) in Vulcaan Harbour (Western part).

AIRPORT: Rotterdam Airport (designed for international short and medium haul air traffic) lies at a distance of 10 km. from the Vlaardingen port area.

EMERGENCY CO-ORDINATION CENTRE: Alarmcentrale Politie. Tel: 34 44 44. Telex: 26420. VHF Channel 11 (Port of Rotterdam).

AUTHORITY: Port of Vlaardingen, Gemeentewerken, Hoflaan 27, P.O.Box 141, 3130 AC Vlaardingen, Netherlands. *Tel:* 010 – 340044/342370. *Contact:* Mr. S. van Berge, Harbour Master.

YMUIDEN (Ijmuiden): 52.28 N. 04.34 E. (See Plan Book)

Also refer to "Amsterdam".

DOCUMENTS:

2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.

PILOTAGE: On entering and leaving Ymuiden Government pilotage is compulsory. A pilot vessel with Pilots cruises at sea in the vicinity of Ymuiden between the light whistle buoy and the moles. Pilot boarding position: Lat. 52° 28.8′ N., Long. 4° 25.6′ E.

In order to avoid delay, Masters, who require a Pilot must advise their ETA not less than 4 hours in advance to "Pilotage Ymuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain:

a. The word "ETA-Pilot".
b. Expected time arrival (group of 4 figures) in middle European time.
c. Draft with indication of unit applied.
d. Port of destination.

"Pilotage Ymuiden" can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation are possible at night.

Pilot Ladders: Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Pilot from Helicopter: When the pilot service per pilot cutter has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. in diameter. Deck plans should be provided in advance.

Helicopter rates:

Dfl. 5,170. – per flying hour/pro rata exclusive fuel costs.
Dfl. 282. – per hoist transfer.
Dfl. 400. – Additional charge per flying hour from 1800 until 0600 hrs. and on Saturdays, Sundays and Dutch public holidays.

A variable fee per flying hour for fuel consumption fluctuating monthly.

Restrictions

1. Minimum visibility 800 m. at 150 ft. above sea level.
2. Maximum wind Force 10 (55 kts.).
3. Severe turbulence and icing conditions.

ANCHORAGE: Vessels may anchor off Ymuiden outside the breakwaters.

MAX. SIZE: For North Sea Canal, entrance lock 1312 ft. long, 164 ft. wide. 49 ft. 02 in. depth. Density: 1016.

The official maximum draft to enter Ymuiden is 43 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam after special permission thereto has been given by the Government Harbour Master at Ymuiden. Such permission to be applied for well in advance.

HEALTH: Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

RADIO: *Obo-Carriers:* Masters of this type of vessel must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival, the following information:

1. That vessel has no slops on board and is certified gas free or alternatively;
2. a. Correct name of liquid cargo carried last, with place and date of discharge.
   b. Stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not.
   c. Whether non-gas free spaces are adjacent to dry cargo holds and if so, which holds.
   d. Which spaces contain inert gas.

RADAR/VHF: The port is equipped with a shore based radar installation to facilitate navigation if necessary. Ymuiden has a VHF installation and Masters of vessels entering or leaving the port area are strongly recommended to contact the Harbour Master's Office by VHF Channel 11 to obtain information for safe navigation and rapid locking.

New Maritime Traffic Control Centre in operation.

TUGS: Available. Meet vessel in harbour entrance if required.

BERTHING: Outer Harbour: Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

Quay 1: Length of quay: 1,360 ft. Depth alongside quay: 29 ft. 6 in. LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. depth).

Equipment:

2 cranes, lifting capacity 30 tons, max. outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 2: Length of quay: 1,800 ft. Depth alongside quay: 45 ft. 9 in. at LLWS.

Max. draft: The entrance to Outer Harbour is accessible to vessels up to 43 ft. draft and with special permission of the Harbour Authorities up to 45 ft. draft salt water.

Equipment:

3 bridgecranes, lifting capacity 40 tons each, max. outreach 115 ft.
2 conveyor belt systems (capacity 6,000 t.p.h.).

Despatch:

About 60,000 tons iron ore per 24 hours. About 50,000 tons coal per 24 hours.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 3: Length of quay: 825 ft. Depth alongside quay: 31 ft. 6 in. LLWS. With special permission of the harbour authorities, max. sailing draft 34 ft. 6 in. West of the quay are 4 dolphins available where a vessel can wait for a loading/discharging berth (up to 31 ft. 6 in. draft).

Equipment: 2 cranes with a capacity of 60 tons each. Outreach 70 ft.

Inner Harbours: These harbours are mainly used for loading or discharging smaller vessels having drafts between 11 ft. and 20 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

CRANES: Inner Harbour No. 1 – 1 portal crane.
Inner Harbour No. 2 – 1×7.5 ton portal crane.
Inner Harbour No. 3 – 3×30 ton portal cranes.

STEVEDORES: *Working Hours:* In the Outer Harbours round the clock, also on Sundays and holidays.

In the Inner Harbour round the clock except from 1400 hrs. on Saturdays until 0600 hrs. on Monday.

FRESH WATER: Available from quay.

FUEL: Available by barge.

MEDICAL: Doctors, hospital and all services available.

REPAIRS: Possible.

DRY DOCKS: None.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member; 5 litres spirits for whole ship.

CONSULS: And all general information; refer to "Amsterdam".

DEVELOPMENTS: Proposed new outer port to be built South of South Harbour Entrance Mole to accommodate vessels up to 62 ft. draft.

AUTHORITY: Rijkshavendienst Ymuiden.

AGENT: See "Amsterdam".

ZAANDAM (Zaanstad): 52.26 N. 04.49 E. (See Plan Book)

LOCATION: Zaandam lies on the Northern side of the North Sea Canal, near to Amsterdam. See "North Sea Canal" and "Amsterdam" plans. The port of Zaanstad is divided into two parts by "Wilhelmina" sluice, the outer harbour being for large vessels and the inner harbour for coasters, etc.

PORT LIMITS: A line drawn from the Western side of Nieuwe Zeehaven entrance to the Eastern side of Zijkanaal "G" entrance defines the port limits.

DOCUMENTS: IMO crew list, IMO fal form 5, other Customs papers to be supplied by Agents.

PILOTAGE: Procedure, etc. same as for Amsterdam. Not compulsory, but recommended. Pilot will take vessels all the way to Zaanstad. Amsterdam Harbour Service should be notified on VHF Channel 14 of vessel's intentions, they will arrange for Zaanstad Harbour Service vessel to meet the vessel at the entrance to Zijkanaal "G" and direct it to its berth. When a vessel is leaving for sea, notice should be given to the Sluice Command via VHF Channel 11.

ANCHORAGE: It is prohibited to anchor in the port of Zaanstad.

RESTRICTIONS: Vessels with dangerous cargoes will not be handled at night.

All Zaandam harbours have direct unrestricted connection with the North Sea Canal.

LOCKS: Wilhelmina Sluice is 116.8 m. long, 12 m. wide and has a depth of 3.12 m.

MAX. SIZE: Max. draft 9.0 m.

HEALTH: Same as Ijmuiden.

RADIO: Scheveningen Radio.

VHF: Wilhelmina Sluice – Channel 20. Alexander Bridge – Channel 20. Hembrug Bridge (across North Sea Canal) – Channels 14 and 11.

RADAR: No port radar service.

TUGS: Available.

BERTHING: (Docks)

Isaac Baarthaven: Length 900 m., width 70 m., depth 9 m. Quayage 370 m., with depths of 5 m. – 9 m. alongside.

Dirk Metselaarhaven: Length 600 m., width 112 m., depth 10 m. Quayage 180 m., for transhipping liquids only (Private).

Zijkanaal E: Length 400 m., width 45 m. depth 7 m. Quayage 40 m., for transhipping only.

Old Timber Harbour:
Quay length 230 m., Depth 9 m.
Quay length 300 m., Depth 5 m. – 9 m.
Havenstraat, 4 Dolphins, 170 m. Depth 5 m.
Quayage, Pont-south, 90 m., Depth 5 m.
Quayage, Pont-north, 90 m., Depth 8 m.
Slipways only for small ships.
4 Ro/Ro berths, Width approximately 20 m. each, depth 9 m.

Nieuwe Zeehaven: Length 700 m., Width 130 m., Depth 9 m. Vessels up to 9 m. draft can berth. No bridges and no locks.

CRANES: Mobile cranes only.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro vessels can be discharged in Oude Haven.

BRIDGES: *Regulations concerning railway bridge (Hembridge) across the North Sea Canal:*

If, on account of the bridge being closed to shipping, more than one ship has to come to a stop on either side of the bridge, vessels have to wait in the order they arrived, keeping proper distance. In foggy weather, two fixed white lights with adjustable power are shown from the South pillar West side and the protecting pillar East side and one identical fixed white light on the protecting pillar West side and the protecting pillar East side. When visibility is
Less than 1000 m.: minimum power
Less than 500 m.: half power
Less than 200 m.: maximum power.

If the Hembridge is closed, vessels with a maximum height of 10.70 m. above Amsterdam level (that is 11.20 m. above ordinary canal level) are allowed to pass underneath, only if a yellow light is shown in the lower line of the revolving part above the fairway.

Notices, indicating the distance from the bridge, have been placed at 500 m. at either side and notices to stop at 150 m. at the West side and 225 m. at the East side. Near each notice to stop a scale shows the height of the bridge's revolving part above the canal level.

When the bridge is closed Masters must stop their ships and they may on no account proceed unless the signal is given that passage is allowed. Ships, however, being in the actual course of proceeding towards the bridge and with their bows already passed the 500 m. distance notice, at the time the signal is hoisted that the passage is obstructed, may continue and pass the bridge as yet. Ships whose bows have not passed the 500 m. distance notice at the time the signal is given, must be brought to a full stop before the stop notice.

After the bridge is opened again the ships must pass in the order they arrived.

Between the notices mentioned ships sailing in the same direction must keep a distance of at least 70 m.

STEVEDORES: *Working Hours:* Monday – Friday 0600 – 2130 hrs.
Saturday/Sunday: 2130 – 0600 hrs.

MEDICAL: Full hospital facilities available without prior notice.

DENSITY: 1015.

FRESH WATER: Available.

FUEL: Arranged from Amsterdam.

REPAIRS: Possible.

DRY DOCKS: At Amsterdam.

CONSULS: Ghana, Tel: 075-35 16 31.

All others at Amsterdam (20 km.).

REPATRIATION: Possible.

AIRPORT: Schiphol Airport (Amsterdam) 20 km.

POLICE/AMBULANCE/FIRE: Tel: 075-32 32 32.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Port holidays similar to major Dutch ports, plus 2 extra holidays (Whit Tuesday and 1st May).

AUTHORITY: Municipality of Zaanstad, Westkade 2, 1506 BA Zaandam, Netherlands. *Tel:* 075-12 30 60. *Contact:* P.C.C. Majoor, Harbour Director.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands Antilles

BARCADERA, Aruba: 12.29 N. 70.00 W.

(See Plan Book)

LOCATION: The industrial harbour of Aruba is situated three miles S.E. of Oranjestad.

DOCUMENTS: Documents and all general information, refer to "Oranjestad".

PILOTAGE: Compulsory.

RESTRICTIONS: Harbour open day and night. Depth of water in entrance and throughout harbour is 36 ft. Swinging basin width 1,000 ft.

MAX. SIZE: Max. LOA 232 m., max. draft 33 ft.

TUGS: Available.

BERTHING: 1,150 ft. of dockside accommodation.

FRESH WATER: Not available.

FUEL: Can be supplied.

AUTHORITY: See "Oranjestad".

BONAIRE TERMINAL (Brasil): 12.13 N. 68.23 W.

(See Plan Book)

OPERATORS: Bonaire Petroleum Corporation N.V. Terminal is capable of handling all types of crude oil and heavy oils (bunker C and residual fuels). Heated and non-heated storage tanks are available for storage, blending and transhipment.

LOCATION: No. 1 Jetty is situated on the South coast of the Northern portion of the Island of Bonaire in Lat. 12° 13′ 12.9″ N., Long. 68° 23′ 17.2″ W.

DOCUMENTS:

5 Crew Lists.
2 Stores List.
2 Lists of Personal Effects of Crew.
5 Medicine and Drugs Lists.
1 Vaccination List.

PILOTAGE: Compulsory. The Pilot-Berthing Master will board the vessel at the established arrival point in Lat. 12° 10′ N., Long. 68° 25′ W., which is 3.6 miles, 208° True from No. 1 Jetty.

The Pilot will embark from one of the tugs or launches assigned to assist the vessel in the berthing operation. The Pilot will assist the Master in every way possible to manoeuvre the vessel from the arrival point into the berth with the assistance of 2, or in case of a VLCC 3 tugs and utilizing the services of 1 or 2 mooring launches to run mooring lines from the vessel to the breasting and mooring dolphins.

ANCHORAGE: There is no anchorage area at Bonaire for tankers; therefore, if the berth is occupied, vessels will be appropriately instructed to remain within radio/telephone (VHF Channels 16 and 13) radius pending advice with respect to a clear berth or other advices.

NAVIGATION: Navigable waters surrounding Bonaire Island are clear; however, the coasts of the Island are steep-to and should be avoided. The currents in the offing and off the points of the Island set Westward. On days with little wind a weak current sets to the Westward, generally parallel with the coast from Kralendijk Roads toward Wekoewa Point and parallel to the coast line in way of the jetty. It is urged that reference be made to the British Admiralty South American Pilot Volume V or United States HO Pub. 22 Sailing Directions for the West Indies Volume II or equivalent publication of the Netherlands Government.

Lacre Point, on which a light is shown, is at the Southern extremity of Bonaire. A light is situated on Boca Spelonk, the Eastern mid-point of the Island. Seroe Bentana Light, situated near the Northern extremity of the Island, is visible for approach from the N.E. through N.W. South of 250°/070° on the West side of the Northern end of the Island this light is obscured and then jetty lights and Radio Netherland Towers may be used for bearings.

Prevailing winds are the E.N.E. trade winds.

HAZARD ZONE: *Radio Transmitting Installation:* Vessels approaching Bonaire should remain clear of an area within a radius of 3 nautical miles from the Radio Netherlands Towers situated on the Island of Bonaire in Lat. 12° 13′ N., Long. 68° 19′ 15″ W. This area is noted as a danger area due to strong radiation from the powerful radio transmitters on shore. Bonaire Terminal is situated sufficiently West of this area to be well clear of any radio radiation influence.

HEALTH: There are no health formalities.

RADIO: When a vessel leaves its loading port, the shipper should advise the date of anticipated arrival at Bonaire. For vessels departing from remote loading ports, the estimated arrival date should be revised at least once each week while the vessel is en route.

A government wireless/telegraph station operates daily from 0700 to 2130 hrs. local time (1100 to 0130 hrs. GMT). Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC).

Arrival Advice: The Master should advise his estimated time of arrival not less than 72 hours in advance, again 48 hours in advance and again 24 hours prior to arrival, and this last message should be revised if an unusual change in the ETA should occur. Wireless telegraph messages of this nature must be sent to the ship's Agent who, in turn, will immediately relay the information to the Terminal Management.

Tankers from Mediterranean, Africa and Middle East should give ETAs 10 and 5 days as well as 72, 48 and 24 hours.

The text of any one of the arrival advices should contain the following data in addition to the declared time of arrival:

1. Draft of vessel, fore and aft.
2. Available fittings, i.e. number and diameter of connections at deck manifold system for prompt connecting of 2×24 in. and/or 2×12 in. steel swivel loading arms.
3. Any conditions which may affect loading or unloading operations.
4. Any unusual condition which may require abnormal attention prior to berthing.
5. Quantity of ballast and estimated time of deballasting.

VHF: International VHF Maritime Band Communication should be commenced within a radius of 30 miles from the Terminal, or more, if possible. The Terminal may be called on International VHF Channel 16 (156.800 MHz). When radio/telephone contact with the Terminal has been established, communication should then be shifted to Channel 13 (156.650 MHz).

After initial radio/telephone contact has been established, radio/telephone communication with the Terminal will remain on Channel 13. This will include communication with the 2 tugs and the 2 mooring launches on standby, all of which will be available to assist the vessel into the berth.

Mooring, Unmooring VHF Communication: Communication on Channel 13 during the immediate approach and mooring procedure will be confined rigidly to berthing operations which includes all directives from the Berthing Master to the tugs, the mooring launches and the jetty. The only messages which may interfere with these communications will be those caused by an extreme emergency.

After the vessel has been secured in the berth and the Berthing Master has cleared all berthing operations, communication on VHF Channel 13 will be secured and all base VHF receivers will be returned to guard Channel 16 pending an emergency or when the Berthing Master resumes his function for a departing vessel. It is to be noted that hand radio/telephone sets transmit and receive only on Channel 13. The base sets in the Terminal Office (Control Room) and on each of the tugs and launches is equipped with radio/telephone equipment for transmitting and receiving on Channels 16 and/or 13.

Radio/Telephone UHF (Private Frequency): Communication between the platform and the vessel and the Terminal before, during and after transfer of product will be via portable intrinsically safe, hand carried, radio/telephones supplied by the shore on a private UHF frequency.

Radio/Telephone VHF Resume Use Departing: When the vessel is ready to depart and the Berthing Master has boarded and resumes his function, VHF radio/telephone communication will again be established on International Maritime Channel 13 between the vessel's bridge, the 2 or 3 tugs, the mooring launches and the jetty, so that the casting off operation may be properly accomplished.

Radio Telephone – Guard Call Channel 16: After the Berthing Master disembarks and the tugs are dismissed, and the vessel has departed full away, it is expected the vessel will resume a guard watch on Channel 16. The terminal station may be called on Channel 16 and/or 13.

Radio Repairs: A Radio Holland Service Engineer available and can be arranged through the Agent.

TUGS: Tug assistance is compulsory. Mooring launches are available.

Normally 2 tugs are used for ships up to 75,000 g.r.t. Above 75,000 g.r.t. 3 tugs are used.

When 2 tugs are used, 1 each at the fore and aft ends of the main deck. The third tug is used on the port side bow until vessel is in front of the platform, then third tug moves to starboard side centre of the main deck. Each tug supplies 2 lines. When unberthing only 2 tugs are used to push and do not make fast.

CUSTOMS/IMMIGRATION: When the vessel is secure in the berth and the gangway is landed on deck, the Immigration Officer, the Customs Officer and the Agent will board to attend formal entry of the vessel. The Immigration Officer may act on behalf of the Quarantine Service.

Immigration: Two copies of the crew list are to be ready for presentation to the Immigration Officer. Crew List is to be delivered to the Terminal Gate for Security Control, therefore no Gate Passes are required.

Customs: The Customs Officer will require 1 Crew List, 1 Stores List, 1 List of Personal Effects for those crew men leaving the vessel at Bonaire and 1 List of all Medicines and Drugs. The Customs Officer with the assistance of the ship's Agent will prepare the Inward Clearance document. This document is to be signed by the Master. Upon completion of the above formalities, the vessel is declared free and shore leave may be granted.

BERTHING: Berth No. 1: Max. size vessels 500,000 d.w.t. on full draft and no restrictions for length and beam.

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphins Nos. BD2 and BD3.

Mooring Facilities: Berth No. 1 consists of an operating platform 132 ft. 10 in. (40.48 m.) long facing the sea and 94 ft. (28.65 m.) wide toward the shore with 2×24 in. and 16 in. swivel jointed steel loading arms for the transfer of petroleum products. Loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges. The 24 in. loading arms are constructed to fit on 16 in., 18 in. and 24 in. ship connections and the 16 in. loading arms are constructed to fit on 10 in., 12 in., 14 in. and 16 in. ship connections. The waterfront side of the platform is 22 ft. 3 in. (6.787 m.) inside and away from the ship's side.

Breasting Dolphins: There are 6 breasting dolphins, 4 of which are designed for the vessel to rest against and to which forward and back spring lines are to be secured to heavy quick-release mooring hooks. At each end of the system of breasting dolphins there is 1 landing dolphin offset to allow a vessel 5° off the parallel line to land against the berth system. These are noted "a" for the offset dolphin and the main dolphin is noted "b". The dolphins are numbered from No. BD1a and BD1b in the West and through BD2, BD3 and BD4 and BD4a to the East. The centre line of the berthing facility is 17 ft. 5 in. (5.3 m.) East of the centre line of the operating platform. This point is well marked on the seaward panel of the platform with a 4 in. wide white reflecting vertical stripe. BD2 and BD3 are each 135 ft. (41.148 m.) West and East of this white vertical stripe. BD1b is 80 ft. (24.4 m.) further West from BD2 and BD4 is 119 ft. (36.4 m.) further East from BD3.

Mooring Dolphins: Inshore 215 ft. (65.532 m.) perpendicular from the berthing line are 6 mooring dolphins. These dolphins are numbered from MD1 in the West to MD6 in the East, MD3 and MD4 are each 350 ft. (106.680 m.) West and East from the centre line of the mooring structure system noted by the white vertical stripe on the seaward face of the operating platform. MD2 and MD5 are each 250 ft. (76.200 m.) West and East respectively, from MD3 and MD4. MD1 and MD6 are each again 250 ft. (76.200 m.) West and East respectively, from MD2 and MD5.

Berth No. 2: Max. size vessels 150,000 d.w.t. with limited ballast or cargo quantity on board, down to 90,000 d.w.t. fully loaded. Max. depth of water on mooring line is 60 ft.

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphin Nos. BD2 and BD3.

Mooring Facilities: Berth No. 2 consists of a triangular platform 49 ft. (14.94 m.) long, facing the sea and 42 ft. 6 in. (12.95 m.) wide towards the shore with 3×12 in. swivel jointed steel loading arms for the transfer of petroleum products. The waterfront side is 11 ft. 6 in. inside and away from the ship's side. All loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges of 10 in., 12 in., 14 in. and 16 in. on ship's manifold.

Breasting Dolphins: There are 4 breasting dolphins for the vessel to rest against and to which forward and back springs are to be secured to heavy quick-release mooring hooks. The dolphins are numbered BD1 and BD2 on the West side of the platform and BD3 and BD4 on the East side. BD2 is located 139 ft. 4 in. (42.5 m.) West of the centre line of the platform and BD3 is located 123 ft. (37.5 m.) East of the centre line. BD1 and BD4 are each 5.7 m. further West and East respectively from BD2 and BD3.

Mooring Dolphins: Inshore, 164 ft. perpendicular from the berthing line are 3 mooring dolphins of which 2 are on the East side and 1 on the West side to handle respectively the head and sternlines. These dolphins are numbered MD1, MD2 and MD3 from West to East. MD1 is 328 ft. (100 m.) West of the centre line of the operating platform. MD2 is 328 ft. (100 m.) East of the centre line of the operating platform, MD3 is 262 ft. (80 m.) East of MD2.

General information applicable for both jetties:

Capstans: On each of the breasting and mooring dolphins there is a small capstan with sufficient power to heave up on to the deck of the dolphin a ship's mooring line for securing to the heavy quick-release hooks.

Mooring Lines: Prior to coming alongside, the vessel must have all mooring lines on station and available on that side which will be to the berth (normally port side to). Bearing in mind that the product transfer is via steel swivel loading arms, it is imperative that the forward and back spring lines be adequate to maintain a minimum fore and aft motion of the vessel to remain within the limitation of the envelope of loading arms.

Spring, Breasting, Head and Sternlines: The first lines lead out are headlines to the mooring dolphin, immediately followed by the forward and back springs to the breasting dolphins. Hereafter respectively the forward and after breasting lines are lead out to the appropriate mooring dolphins and finally the sternlines to the mooring dolphin. The procedure may be altered in accord with physical equipment on the ship, weather and sea conditions, along with other circumstances, all subject to the Berthing Master's requirements and combined approval of the Master and terminal management.

Mixed Mooring Lines Prohibited: Mixed moorings are prohibited, i.e. a wire and a fibre rope in parallel service is undesirable due to unequal elasticity. All mooring lines must be so arranged that loss of effect cannot occur when slacking off or heaving in one line, as required, due to the rise or lowering of the vessel during discharge or loading of cargo.

Mooring Machinery – Deck Winches: All deck machinery used for the heaving in and control of mooring lines must be operable. A vessel having deck machinery in poor state of maintenance to that point where mooring lines cannot be hove tight or brakes that tend to slip under tension will be sufficient reason to require consideration of terminal management to refuse connecting of the steel loading arms, or if same are already connected and the mooring lines become insecure, all transfer of product will be stopped and the steel loading arms disconnected pending correction of the mooring situation.

Surge-Tension Controls Prohibited: Wire mooring lines not on winch drums are not to be used for spring lines. Mooring wires secured on surge and tension controlled winches are prohibited. All mooring lines must be secured positively, i.e. on winch drums with the brake properly drawn tight or properly secured on bitts.

Power to Deck Machinery: At no time during the period the vessel is in berth is the power to operate deck machinery to be shut off.

Motion of Vessel in Berth: The vessel, while loading arms are connected, must not be permitted any motion alongside or away from its proper position in berth.

Surveillance of Mooring Lines: Mooring lines must remain under constant surveillance during unloading and loading operations. Failure to ease tension on mooring lines during unloading or failure to maintain proper tension on mooring lines while loading will be sufficient reason to stop transfer of product.

Fire Warp – Emergency Towing Wire: After the vessel is all fast fore and aft, an emergency wire of suitable quality and strength to tow the vessel should be positioned on the offshore bow and the after offshore quarter of the ship. This towing wire should be secured so that the eye may be readily picked up by a towing vessel. It is required that the length of the wire hawser should be not less than one-half again that of the highest freeboard of the vessel at the point of its location on the ship where the ship end is well fast on bitts.

EMERGENCY SIGNAL: In the event of any form of emergency such as fire, bursting of transfer piping, Operating Platform emergency signal will be an intermittent signal on the general alarm system for not less than 15 seconds. Since a shore radio is supplied to the vessel for proper communication, this radio must be used in the event of an emergency to inform the Loading Master. The vessel will use its own emergency signals in the event of any emergency on board.

To co-ordinate any emergency procedure, the personnel on the Operating Platform must be advised of the vessel's emergency signals.

In the event of any emergency either on board the vessel or the operating platform all oil transfer must be stopped and all oil transfer valves closed.

LOADING: *Electric Bond – Earthing:* Prior to manoeuvring the loading/unloading steel mechanical loading arms toward the vessel from the Operating Platform, the electric bond wire must be connected to a clean metal contact on the vessel in the area of the manifold.

The electric bond wire shall not be disconnected until the loading/unloading mechanical arms have been disconnected and manoeuvred well clear of the vessel.

The flame proof switch on the jetty will remain open until the electric bond wire has been connected to the ship. Prior to disconnecting the electric bond wire from the ship, the flame proof switch on the jetty will have been opened.

Connection to Oil Transfer Piping System: On both jetties there are steel pipe swivel jointed loading/unloading arms. (See also "Berthing").

This equipment is controlled either from the deck of the Operating Platform or from the ship's deck by using a remote control panel. Connections of the fittings requires clean flat faced flanges on the vessel's manifold, using a O-ring gasket, to ensure a secure tight connection.

Cargo and Ballast Transfer: Before transfer of cargo or ballast may be started, the Chief Officer and the Terminal Representative will ensure that all necessary controls and safety measures have been attended. A Declaration of Inspection is to be signed by a responsible Ship's Officer and the Terminal representative certifying that all precautionary measures have been taken, that all equipment used in the transfer operation is in proper order and that all concerned are in agreement on the proper procedure of the operation.

Discharge of Cargo: Upon advice from the Terminal Loading Master to the Ship's Officer in charge that oil transfer may be started, the Officer will arrange for the initial flow to be slow with sufficient pressure to permit inspection of all transfer piping and connections for any leakage. When the terminal personnel advise they are receiving product, the flow may be increased to the rate agreed upon.

Completion of Cargo Discharge: After all cargo tanks have been drained and the pumps have lost suction and the discharge of cargo has been declared finished, the flow of product will have stopped. With the agreement between the Ship's Officer and the Terminal Marine Supervisor, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipe-line system does not allow the complete draining of the unloading arm, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel!* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

Loading of Cargo: Upon advice from the Ship's Officer in charge that oil transfer may be started, the Terminal Loading Master will arrange for the initial flow of product into the vessel. When the Ship's Officer advises that he is satisfied that product is flowing in accord with the loading programme, he will advise the terminal personnel and the flow will be increased to the rate agreed upon.

Communication, Audible, Visual: Constant contact with the personnel on the Operating Platform during the topping off procedure is mandatory! The rate of flow of product is to be adjusted to that point where complete control is constant and that in the event of an emergency immediate shut down will not create any pressure surge on the shore transfer piping.

Topping Off of Cargo Tanks: Every precaution must be observed to avoid over-filling of any tank or causing any listing of the vessel. Observance of the trim by the stern shall be constant to avoid any undue strain upon the vessel's longitudinal structure. The cargo tanks and pipe-lines thereto on most tankers are segregated into groups. One tank in each group should be selected for the overflow relief tank by maintaining the level of liquid considerably lower than the other filling tanks to permit prompt relief of that tank reaching an overfilled level.

Completion of Loading: After all cargo has been loaded all product remaining in the loading arms will be drained into the vessel. If the vessel's pipe-line system does not permit complete draining of the loading arms, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel!* After the arms have been drained they may be disconnected and the ends blanked off to prevent any drippage of oil.

CRUDE OIL WASHING: Crude Oil Washing (C.O.W.) must be requested before arrival to obtain approval of the Terminal Manager.

It is the terminal's intention to allow vessels to C.O.W. at the terminal. However, the vessel must strictly adhere to the International Safety Guide for Oil Tankers and Terminals Guidelines pertaining to C.O.W. procedures and a terminal representative will check the procedure before and during the C.O.W.

BALLAST: *Ballast Loading:* Should the vessel have permanent ballast tanks with entirely separate pipe-lines and ballast transfer system sea water ballast may be loaded in accord with the Master's requirements.

Sea water ballast is not to be loaded into any cargo tanks or through any oil transfer system while there is any cargo on board the vessel. In the event of an emergency, special arrangements must be agreed upon with the terminal management for the loading of ballast into any cargo tanks before all of the cargo has been completely discharged.

The vessel's Senior Officer in charge will personally supervise the arrangement of the pumproom system for the ballasting operation. The Public Cargo Inspector will accompany the Officer into the pumproom to break the seals on the sea suction valves.

No sea suction valve may be opened until all down coming pipe-lines have been drained and are completely free of product and the down coming valve closed. In most instances the pumps should be operating just prior to opening the sea suction valve.

Ballast loading will be under the entire control of the ship's personnel and it is expected that all normal loading precautions will be observed.

Deballasting: En route to Bonaire the vessel should have thoroughly cleaned certain appropriate tanks for the containment of clean ballast for discharge overboard. Only dirty ballast (oil contaminated sea water) and tank cleaning slops are to be discharged into the terminal's ballast receiving system.

Ballast, Oily Water, Discharge: Under no circumstances will dirty ballast water be discharged overboard within a radius of 50 miles from any Netherlands Antilles Island.

Ballast Discharge to Shore: After the steel loading arm to be used has been connected to the ship's manifold, the discharge of ballast water will be accomplished in the same manner as the discharge of cargo.

Tank Bottoms and Slops: Upon completion of the deballasting operation, all of the vessel's tanks will be inspected and approved for the reception of cargo. The sea suction valves will then be sealed in the closed position by the public inspector or by a Bonaire Petroleum Corporation N.V. representative. Any bottoms and slops remaining must have the approval of terminal management prior to "loading on top".

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master for crew members requiring medical or dental attention.

In the case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign authorisation guaranteeing expense of attention rendered and repatriation.

FUEL: Bunkers for steam propelled tankers are available.

Bunker Transfer: During the period of time the vessel is in berth, the transfer of bunkers from one tank to another is prohibited. All bunkers to be consumed while in port must be available in that tank from which bunkers are normally consumed.

Fuel: Marine gasoil is available in small quantities from a shore storage tank. Limited Luboil available and supplied in drums. Water and fuel oil chemical treatment is available in drums by Drew-Chemical.

FRESH WATER: Fresh water on Bonaire is desalinised sea water and the supply is minimal, but available. 72 hours' notice is requested and maximum 100 tons can be supplied.

REPAIRS: There are no repair facilities on the Island of Bonaire. Upon sufficient advance notice, special service personnel and minor mechanical repair work may be arranged from Curacao. Transportation for such service personnel is via scheduled airline.

POLICE/AMBULANCE/FIRE: Tel. 8000 via Terminal's Control Room or Office.

CARGO INSPECTION: Along with the Government Boarding Officers the representative of the petroleum inspecting organization mutually engaged by the Shipper and Bonaire Petroleum Corporation N.V. will board the vessel for the purpose of gauging the cargo tanks, obtaining the temperature of the cargo and obtaining required samples. His function is to protect the interest of the vessel as well as the Shipper and the consignee. Every assistance is to be rendered to expedite his function on board the vessel. An Officer should accompany the Inspector while on board and should assist by making available all information requested such as cargo tank calibration tables, etc. Cargo transfer may not be commenced without the approval of the Inspector.

Completion of Discharge of Cargo – Inspection: Upon completion of discharge of the cargo, the Inspector will examine all of the cargo tanks and will sign the tank inspection certificate.

Loading Cargo, Inspection: In the case of a vessel arriving to load cargo, the Inspector will examine all of the cargo tanks to determine the condition of the cargo tanks for reception of the cargo. Upon completion of loading all of the cargo, the Inspector will gauge the cargo tanks, take temperatures and samples as required.

Incomplete or Part Cargo: In the event the vessel does not complete the discharge of cargo, or does not load a full cargo, the Inspector will board the vessel to gauge the cargo tanks to record the amount of cargo in the vessel after transfer operations have been completed.

Cargo Pumproom Sea Suctions: Prior to loading or unloading the Public Inspector will certify that the sea suction valves connected to the vessel's oil transfer system are closed, lashed and sealed. *Do not lock these valves under any circumstances.* These valves are to be sealed in the *Closed* position and sufficiently lashed so they may not open due to vibration or any other reason.

STORES/PROVISIONS/LAUNDRY: All stores and provisions are available. There are no deck and engine stores available. Upon sufficient advance notice, all items not available on Bonaire may be obtained from Curacao.

Laundry service may be arranged through the ship's Agent and available for unlimited quantities. Advance notice required.

DEVELOPMENTS: Clean product storage will be available from mid 1984.

A process-unit is under construction and is operational July 1984. This process unit is specially designed to upgrade off-spec. products and dewater product.

SHIPMASTER'S REPORT: 1977. *In his report the Master called the port – "Brasil".*

Documents:

5 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
1 Vaccination List.

Immigration Officer acts on behalf of Quarantine service. State of health on board to be given in 72 hour ETA message.

Services: Fresh water by truck from Kralendijk and very expensive. Very limited quantities of shipchandlery supplies. No deck or engine stores. Gas oil limited and by drums only. Bunker "C" only. Lube oil limited to some brands and limited supply by drums. Water and fuel oil chemical treatment available. Radio Holland Service Engineer available. Repair men can be flown in from Curacao. Very limited laundry service. If required at least 4 days' notice advisable. Tankers from Mediterranean, Africa and Gulf should give ETAs 10 and 5 days as well as 72/48/24 hours, any of which to give arrival draft F & A, number and diameter of connections, any condition affecting loading or discharging, ballast quantity, clean or otherwise and slops quantity, Pilot advised that 10 days longest, so far, that vessel waited off for berth. Have adequate fresh water on board for this contingency.

Berthing: No. 1 Jetty: Least depth alongside 110 ft. Loading/discharging Chiksans 2×24 in. and 2×12 in. Max. Size 500,000 d.w.t.

No. 2 Jetty: Least depth alongside 60 ft. Loading/Discharging Chiksans 3×12 in. Max. size 80,000 d.w.t. Product handled: Crude. Max. pressure; 125 p.s.i.

VHF contact with BOPEC on Channel 16 at 25 miles, then stand-by on Channel 13 for instructions. On berth VHF supplied to maintain shore contact with control who pass messages to Agent at Kralendijk.

Immobilising of engines or transfer of bunkers not permitted on berth. Port side alongside always.

SHIPMASTER'S REPORT: May, 1979.

Documents: Immigration require 2 crew lists on IMO forms. One additional crew list to be supplied to Agent and another to the security gate also required are 2 personal effects lists and 3 stores lists.

Pilotage: The Pilot requires a combination of accommodation ladder and pilot ladder. He will not use the pilot hoist.

Berthing: For vessels of about 140,000 d.w.t. 2 tugs are used, 1 each at the fore and aft ends of the main deck. Each tug supplies 2 lines.

When unberthing the tugs push and do not make fast.

Tankers of 250,000 d.w.t. use 3 tugs.

Moorings: 3 head lines are passed ashore first, followed by 2 breast lines and 2 forward springs. At the after end 2 spring lines are passed ashore first followed by 2 breast lines and finally 3 stern lines. Only one mooring boat is used and he passes forward shore lines ashore first.

SHIPMASTER'S REPORT: February, 1980.

Documents: 3 Crew lists for Agent and 2 for Immigration.

Pilotage: Pilot requires accommodation ladder (usually starboard side) when disembarking for VLCCs.

Tankers: Crude oil washing permitted only for tanks which will be used for ballast.

Shore Leave: Passes not required.

AUTHORITY: Bonaire Petroleum Corporation N.V., Bopec Building, P.O.Box 117, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8175, (Head Office), 8177 (Terminal). *Telex:* 1283 Bopec NA (Head Office), 1284 (Terminal). *Contact:* Dr. Th. G. M. Tijssen, Managing Director.

The Harbour Master of Bonaire.

BULLEN BAY, Curacao: 12.11 N. 69.01 W.

(See Plan Book)

LOCATION: Bullen Bay is an open bay on the South coast of Curacao, 8 miles N.W. of Willemstad.

DOCUMENTS: Documents and all General information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the Bay. Ships arriving are piloted by government Pilots supplied from Willemstad. Ships leaving are piloted by Pilots employed by the Curacao Oil Terminal.

Pilot Station: 1 mile S.W. of Cape St. Marie (that is the cape on the West side of Bullen Bay).

Communications: Ships destined for Bullen Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) and also Curacao Oil Terminal at Bullen Bay (VHF Channel 11) of their approach. The Pilots at Bullen Bay operate on VHF Channel 9.

ANCHORAGE: There is no anchorage in the bay. Ships that have to wait for berth are to remain in the vicinity within VHF radio range.

MAX. SIZE: 540,000 d.w.t. on full draft, LOA 1,350 ft.

TUGS: Compulsory. There are 2 tugs of 3,852 h.p. with 53 tons and 60 tons bollard pull and 1 tug of 2,500 h.p. with 35 tons bollard pull, stationed at Bullen Bay. 2 tugs will assist the tankers on their arrival and departure.

3 tugs will assist the VLCCs on their arrival and 2 tugs will assist on their departure.

BERTHING: *Curacao Oil Terminal:* Curacao Oil Terminal (COT) located at Bullen Bay facilitates economical trans-shipment of Eastern hemisphere crude arriving in very large crude carriers (VLCCs) for storage and on-carriage in smaller ships to draft restricted U.S. ports.

Jetties: Ships moor port side alongside.

Tanker jetties from East to West:

No. 1: 250,000 d.w.t. 4×12 in. connections, heading 196°
No. 2: 70,000 d.w.t. 4×12 in. connections, heading 177°
No. 3: 100,000 d.w.t. 4×12 in. connections, heading 146°
No. 4: 540,000 d.w.t. 4×16 in. connections, heading 129°
No. 5: 100,000 d.w.t. 4×12 in. connections, heading 127°
No. 6: 350,000 d.w.t. 4×16 in. connections, heading 124°

The tugboat jetty is located between Jetties No. 2 and 3.

Total tank capacity: 17,750,000 barrels.

1 – 1,000,000 barrels capacity – 1,000,000
16 – 750,000 barrels capacity – 12,000,000
6 – 375,000 barrels capacity – 2,250,000
38 – small tanks capacity – 2,500,000

Pipe-lines: Main track consists of 5 strings of 36 in. pipe. The jetties carry 2 strings of 36 in. pipe in a loop. The loading rate is up to 12,000 t.p.h. Tankers' discharge rate is up to 25,000 t.p.h.

Deballasting: Capacity 4,000 t.p.h. per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

Throughput:

Transhipment	1,200,000 barrels per day
Refinery import	250,000 barrels per day

Operators: Curacao Oil Terminal NV, P.O.Box 660, Willemstad, Curacao, Netherlands Antilles. Telex No. Curacao 1175.

FRESH WATER: Fresh water available at the piers.

FUEL: Bunker facilities for all grades are available at a rate of 3,800 bbls.p.h.

NAVIGATIONAL AIDS: There is a leading range of 043° True bearing on the West side of the bay for ships entering the bay, running 851 m. (approx. 4.5 cables) clear of the shore near Cape St. Marie, with red daymarks and a green and (yellowish) red light at night.

SHIPMASTER'S REPORT: February 1979.
Restrictions: Crude oil washing permitted subject to notice below. Tank wash piping must be tested before arrival and oxygen metres calibrated.
Health: As for U.S.A.
VHF: Channel 9 to give Notice of Readiness and for berthing with Pilot and tugs. Call Agent on Channel 25.
Berthing: Shore gangway at 2 largest berths.
Notice No. 1: Issued by Curacao Oil Terminal (C.O.T.)

Crude Oil Washing

Only tankers equipped with a well constructed inert gas installation and provided with fixed tank washing machines connected to the tank wash piping system by means of fixed steel piping may crude wash cargo tanks under the following conditions:

1. Oxygen content in cargo tank may not exceed 5% (*metres calibrated*).
2. Minimum inert gas pressure in cargo tank to be 250 mm. (10 in./water column) (0.025 hg/sq.cm. = −0.36 lb./sq.in).
3. Continuous supervision by a specifically appointed and experienced operator is mandatory.
4. The "in-line" O_2 analyser must be arranged to allow for calibration during inert gas operation.
5. The hydrants of the tankwash piping must be equipped with screwed-on heads.
6. Tankwash piping must be tested for tightness.
7. Exceed of discharge time will be for ship's account.

For each "crude washing" a request for cleaning must be submitted to the Head Operations of C.O.T.

Please sign for receipt: Curacao Oil Terminal N.V.
Signed..........................

Master
Operation Manager

Notice No. 2: Issued by N.V. Curacaosche Scheepvaart Maatschappij. Emmastad, Curacao, N.A.

CUSTOMS REGULATIONS
BONDED STORES

In connection with revised Customs Regulations for the ports of Curacao, we draw your attention to the following:

1. All stores on board of vessel on arrival, also personal effects, must be declared to Customs Officials when clearing in vessel.
2. While ship is in port, Customs Officials may seal bonded stores, e.g. beer, wine, spirits, cigarettes and tobacco.
   When sealing bonded stores, permission may be granted by the Customs Officials, to take out a certain amount of these stores, from the bonded store-room, before sealing the store-room.
3. Stores on board, which are *not* sealed by the Customs Officials, may be used on board vessels, but may not be taken ashore without permission of Customs.
4. All stores ordered in bond at the port of Curacao, MUST REMAIN UNBROACHED, until departure of vessel from Curacao, and it is more likely than not, that Customs Officials will board before departure for control. If bonded stores are found opened up, or missing, Customs will charge import duties, whilst the possibility exists that the ship may be fined for such breach of law.

SHIPMASTER'S REPORT: December, 1982.

Customs require one Narcotics List and will seal beer store if it contains more than 100 cases of beer.

If vessel requires to use shore crane for stores, etc., written permission must be obtained. This permission is supplied by Loading Master.

AUTHORITY: Harbour Master of Curacao.

CARACAS BAY, Curacao: 12.04 N. 68.52 W.

LOCATION: Caracas Bay is an open bay on the South coast of Curacao, 6 miles S.E. of Willemstad. This port, mainly used by tankers, bunker ships and large passenger liners, is specially fitted as an oil terminal.
DOCUMENTS: Documents and all general informations, refer to "Willemstad".
PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the bay. Ships at Caracas Bay are piloted by government Pilots supplied from Willemstad.

Pilot station: 1 mile SW of Lijhoek (that is the cape on the West side of Caracas Bay).
ANCHORAGE: There is no anchorage in the bay.
MAX. SIZE: Vessels with a max. overall length of 1,050 ft. and max. draft of 45 ft. can be accommodated. Max. depth 47 ft.
VHF: Ships destined for Caracas Bay are to inform traffic control at Willemstad (call "Fort Nassau" on VHF Channel 16) of their approach. There is no VHF radio station at Caracas Bay.
TUGS: Tugboats operate from Willemstad. Tug assistance only for ships arriving. Tugs are automatically provided:

1 tug for tankers up to 20,000 gross tons.
2 tugs for tankers above 20,000 gross tons.
1 tug for cargo and passenger ships exceeding 16,000 g.r.t. and 600 ft. length.
2 tugs for cargo and passenger ships exceeding 30,000 g.r.t.
Ships leave without tug assistance.

BERTHING: 2 piers owned by Shell Curacao Ltd. are at the East side of the bay, naturally protected from prevailing wind and sea, with depths up to 47 ft. alongside. Vessels dock directly with their port side along the piers. Pier No. 2, with a depth alongside of 47 ft., and pier No. 3, with a depth alongside of 47 ft., are newly built concrete piers/quays, modern and equipped for handling oil in bulk, with enough platform to serve also as passenger terminal. The largest cruise ships moor along these piers regularly.

The oil is transported through pipe-lines from the refinery at Emmastad to the storage tanks at Caracas Bay. 2 ships can bunker simultaneously. New electrically-driven centrifugal pumps, metering and blending equipment at the bay stand for efficiency to reduce bunkering time. Subject only to the capacity of ships receiving connections, loading rates up to 2,000 t.p.h. of bunker oil can readily be achieved.
FUEL: The piers are built as oil piers, modern and equipped to supply any kind of bunker or lubricating oil to any vessel.
FRESH WATER: Fresh water can be obtained via pipe-line on the wharves.
STEVEDORES: Lighters and longshoremen are supplied from Willemstad.
REPAIRS: Small repairs can be done at the bay through working barges alongside.
GENERAL: Clearance, port administration, port charges and regulations are the same as at Willemstad.
AUTHORITY: Curacao Port Authority, N.V., Werf de Wilde Z/N, Willemstad, Curacao, Netherlands Antilles. *Tel:* 611133, 611740. *Contact:* E. P. Sint Jago, Harbour Master.

FUIKBAY, Curacao: 12.03 N. 68.50 W.

LOCATION: Fuikbay, on the South coast of Curacao, 7 miles S.E. of Willemstad, is an inland bay with a 147 ft. wide navigable entrance. The depth of this harbour is 26 ft.
DOCUMENTS: Documents and general information, refer to "Willemstad".
PILOTAGE: Pilotage is compulsory.
ANCHORAGE: There is an anchorage area in the West side of the bay.
RESTRICTIONS: As a rule vessels only enter this port during daylight. Sailing can take place day and night.
MAX. SIZE: Vessels can enter and leave with a max. draft of 24 ft. and a max. length of 360 ft.
BERTHING: This bay is mainly used as a loading terminal of the "Mining Company Curacao" for export of phosphate rock mined out of the "Tafelberg". There is one berth under the conveyor which transports the phosphate rocks from shore into the holds of the vessel alongside. Depth alongside is 28 ft.

There is also a 84 ft. berth available for handling explosives or other cargo, usually named Westwerf. Only small vessels with a max. draft of 12 ft. can come alongside. Vessels with more draft can moor with the help of floats between ship and quay.

The piers are privately owned by "Mining Company Curacao" situated on private territory of this company.
FUEL: This port has no bunker facilities, so vessels bound for this port must take bunkers in Caracas Bay or Willemstad before or after calling at this port if bunkers are desired.
GENERAL: Other services such as tugboats, repairs, power, etc. are rendered from Willemstad. 5 ton mobile crane available.
AUTHORITY: Curacao Port Authority N.V., Werf de Wilde, Willemstad, Curacao, Netherlands Antilles. *Tel:* 611133, 611740. *Contact:* E. P. Sint Jago, Harbour Master.

KRALENDIJK, (including Salina) Bonaire: 12.09 N. 68.17 W. (See Plan Book)

PORT LIMITS: Within 3 miles of the Port.
DOCUMENTS:

	Customs	*Immigration*	*Agent*
Passenger list	1	2	2
Crew list	1	2	2
Personal effects list of crew	1		
Store list	1		
Curio list	1		

PILOTAGE: Pilot service is compulsory. Pilot meets vessels 0.75 miles S.W. of the berths. Pilot boat flies "H" flag by day and red over white light at night. The pilot boat is either a small tugboat or a fast speed GRP boat, orange hull, white superstructure with words "Pilot" on both sides.
ANCHORAGES: Unlimited. Depth 30 ft. and over.
RESTRICTIONS: Notify the Agent at least 24 hrs. in advance. No tide.
MAX. SIZE: Length 1,050 ft., also see "Berthing".
INWARD CLEARANCE: Inward clearance is effected on board immediately on docking. Immigration Officer arrives on board immediately after docking. Passengers disembarking at Bonaire must present themselves for documents check.

Customs Officer boards immediately after docking and together with a representative of the Agency's Shipping Department the inward clearance document of the vessel (in ballast or with cargo in transit, as the case may be) is prepared and signed. This document must be signed by the Master. Occasionally the Customs Officer may insist that the Master sign in his presence. Only upon completion of the above formalities, usually carried out in a very short time, is the vessel declared free and passengers and crew may go ashore. It is recommended that one of the public rooms be made available for the purpose of inward clearance in order to avoid congestion in the Purser's Office.

HEALTH: Free Pratique is granted by the Pilot.

RADIO: A Government Radio Station operates daily from 0700 to 2400 hrs. In case of emergency Bonaire Radio can be contacted by telephone. Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC). The Government Radio and Telephone Station maintains daily telephonic communication with Curacao, also with the United States, Europe, etc.

VHF: Call sign "Bonaire Pilots". Calling Channel 16, working Channel 11. Rescue operations Channel 6. Watchkeeping 0730 – 1200 hrs. and 1330 – 1700 hrs. except Saturdays, Sundays and holidays. Plans being made for 24-hour service.

RADAR: There is no Radar Port Control.

TUGS: Two 4,000 h.p. tugs are available. The Agent should be notified in advance if a tug is required, in order to make the necessary arrangements with the Petroleum Company.

BERTHING: *North Pier:*

Berthing space	225 ft.
Depth	30 ft. alongside at LW
Height	6 ft.

Max. permitted load factor on pier is 2,000 kilos per sq.m.

Vessels of max. 30,000 g.r.t. or a max. length of 738 ft. are allowed to berth alongside.

Southern Pier:

Length	394 ft.
Width	46 ft.
Depth	50 ft.alongside
Height	6 ft.
Length of connecting bridge from shore to pier	199 ft.
Width of connecting bridge from shore to pier	68 ft.
Max. LOA	1,050 ft.
